Volume 3

SESSION: 37
Information Management and System Integrity for Advanced Services
ORGANIZER and CHAIR: D. B. Waechter, Bell Communications Research, U.S.A.
SPONSORING COMMITTEE: Communications Switching

37.1 On the Modification of the Cell Streams Within an ATM Network
M. D’Ambrosio, CSELT, R. Melen, Politecnico di Milano, Italy .......................... 1

37.2 CCS#7 MTP Congestion and Overload Handling in Different STP Architectures
M. Bondonno, M. De Paola, L. Gabrielli, E. Paglieri, A. Pinnola - CSELT, Italy .......................... 1

37.3 Allocation of End-to-end Delay Objectives for Networks Supporting SMDS
F. Y. S. Lin, Bell Communications Research, U.S.A. ........................................... 1

37.4 Necessary OAM Modernization to Support AIN-based Services
D. S. E. Helmy, F. Cuervo, Bell-Northern Research, Doug Brown, Bell-Sygma Telecom Solution, Canada .......................... 1

37.5 General Purpose Simulation Tool for Analyzing Switching Systems
E. Valdimarsson, Washington University in St. Louis, U.S.A. .................................... 1

37.6 Autonomous System Control for a Distributed Switching Node
M. Tomura, H. Sunaga, N. Kurihara, NTT Communication Switching Laboratories, Japan ........................................... 1

37.7 FAUST: A Fault Tolerant Sparing Technique for ATM Switch Architectures
K. Padmanabhan, AT&T Bell Laboratories, U.S.A. ........................................... 1

SESSION: 38
Switch Architecture and Traffic Issues in BISDN/AM
ORGANIZER and CHAIR: G. Omidyar, Computer Science Corp., U.S.A.
SPONSORING COMMITTEE: Communication Systems Engineering

38.1 Space Priority Management in a Shared Memory ATM Switch
A. K. Choudhury, E. L. Hahne, AT&T Bell Laboratories, U.S.A. ........................................ 1

38.2 Performance of a Nonblocking Space-Division Packet Switch with Two Kinds of Correlated Input Calls
S. Shiokawa, I. Sasase, Keio University, Japan ........................................... 1

38.3 Simulation of a Simple Loss/Delay Priority Scheme for Shared Memory ATM Fabrics
E. J. Hernandez-Valencia, F. G. Bonomi, AT&T Bell Laboratories, U.S.A. ........................................ 1

38.4 Time-To-Delivery Queuing: A Multi-Purpose Resource Allocation and Congestion Control Technique
L. A. Neir, D. W. Petr, University of Kansas, U.S.A. ........................................... 1

38.5 A Multi-Queue Flexible Buffer Manager Architecture
R. Velamuri, C. A. Zukowski, Columbia University, U.S.A.; P. J. Landsberg, IBM T. J. Watson Res. Ctr. ........................................... 1

38.6 On High Speed Packet Switches with Windowed Input Buffers
G. Thomas, University of Southwestern Louisiana, U.S.A. ........................................ 1
SESSION: 39

Modulation and Coding

ORGANIZERS: E. Biglieri, Politecnico di Torino, Italy
D. Taylor, Univ. of Canterbury, New Zealand
CHAIR: D. Taylor, Univ. of Canterbury, New Zealand

SPONSORING COMMITTEE: Communication Theory

39.1 Comparison of Conventional and $\pi/4$-DQPSK in Rayleigh Fading and Gaussian Noise
C. S. Ng, T. T. Tjhung, K. M. Lye - National University of Singapore, Singapore, F. Adachi, NTT Mobile Communications Network, Inc., Japan ......................................................... 1,411

39.2 Nyquist Shaped QPSK in Cochannel Interference and Fading
N. C. Beaulieu, A. A. Abu-Dayya, Queen's University, Canada ......................................................... 1,419

39.3 A Performance Analysis of Trellis Coded Modulation Schemes in Non-Independent Rician Fading Channels
C. Tellambura, V. K. Bhargava, University of Victoria, Canada ......................................................... 1,424

39.4 A Quasi-Moment Approach for the Analysis of Noncoherent Communications Over Complex Non-Gaussian Fading Channels
K. H. Biyari, King Fahd University of Petroleum & Minerals, Saudi Arabia, W. C. Lindsey, University of Southern California, U.S.A ......................................................... 1,429

39.5 Influence of Nonlinear HPA on Trellis-Coded OFDM for Terrestrial Broadcasting of Digital HDTV
E. Bogenfeld, R. Valentin, K. Metzger, Telekom, Research & Technology Centre, W. Sauer-Greff, University of Kaiserslautern, Germany ......................................................... 1,433

39.6 Bandwidth and Power Efficient Pragmatic Codes
F. Hemmati, COMSAT Laboratories, U.S.A ......................................................... 1,439

39.7 Geometrically Uniform Trellis Codes based on Multidimensional Unbalanced QPSK
S. Benedetto, R. Garello, M. Mondin, Politecnico di Torino, Italy ......................................................... 1,444

SESSION: 40

ATM Transport System Experiments and Trials

ORGANIZER: I. Tokizawa, NTT Transmission Sys., Japan
CHAIR: K. Y. Eng, AT&T Bell Labs., U.S.A.

SPONSORING COMMITTEES: Computer Communication/Communication Switching Transmission Systems

40.1 ATM Transport System Architecture and Field Trial
I. Tokizawa, H. Ueda, K. Kikuchi, NTT Transmission Systems Laboratories, Japan ......................................................... 1,449

40.2 An ATM Cross-Connect System for Broadband Trials and Applications
K. Y. Eng, M. A. Pashan, G. D. Martin, C. R. Crue, AT&T Bell Laboratories, U.S.A ......................................................... 1,454

40.3 Giga-Bit ATM Cross-Connect System with STM-ATM Conversion Function
T. Kurano, Y. Shirozu, K. Murakami, M. Yamaguchi, F. Akashi - NEC Corporation, Japan ......................................................... 1,461

40.4 ATM Transport Systems Based on Flexible, Non-stop Architecture

40.5 An ATM System and Network Architecture in Field Trial
W. Fischer, R. Stiefel, T. Worster, Siemens AG, Germany ......................................................... 1,476

40.6 ATM Transport Node for Flexible and Robust Access Networks
A. Takase, Y. Nakano, Y. Ashii, M. Takano, Hitachi, Ltd., Japan ......................................................... 1,481

40.7 622 Mb/s 8 x 8 Shared Multibuffer ATM Switch with Hierarchical Queueing and Multicast Functions
SESSION: 41A

Synchronization and Jitter

ORGANIZER: R. Simila, US WEST, U.S.A.
CHAIR: H. Colas, Jr., US WEST, U.S.A.
SPONSORING COMMITTEE: Transmission Systems

41A.1 Analysis of Burstiness and Jitter in Multimedia Communications
Z. Wang, J. Crowcroft, University College London, United Kingdom ........................................ 1,496

41A.2 SONET Requirements for Jitter Interworking with Existing Networks
R. O. Nunn, AT&T Bell Laboratories, U.S.A. ................................................................. 1,501

41A.3 A Practical Estimate Methodology for MRTIE and Related Issues
S. Bregni, L. Valtriani, Sirti S.p.A., Manzalini, CSELT, Italy ............................................. 1,506

SESSION: 41B

Communication Intelligence & Functionality - In the Network or in the Periphery?

ORGANIZER: E. J. Addeo, Bell Communications Research, U.S.A.
CHAIR: A. D. Gelman, Bell Communications Research, U.S.A.
SPONSORING COMMITTEE: Multi Media Services and Terminals

41B.1 A Framework for B-ISDN CPE and Signalling
F. Hartanto, H. R. Sirisena, University of Canterbury, New Zealand ......................................... 1,511

41B.2 Knowledge Representation for Adaptive Overload Packets Control in Multimedia Networks
E. Rashid, H. Kobayashi, T. Nakamura - Tohoku University, Japan ....................................... 1,516

41B.3 An End-to-End Connection Management Protocol for Multimedia Multipoint Communications
S. Park, Y. Choi, Seoul National University, Korea .............................................................. 1,521

41B.4 A Connection Manager for Flexible Specification and Transparent Location of Special Resources
S. L. Moyer, D. S. Rouse, Bell Communications Research, U.S.A. .......................................... 1,526

41B.5 Upgrading Strategies for B-ISDN Architectures and Services
Y. Takasaki, Hitachi Central Research Laboratory, Japan ..................................................... 1,531

SESSION: 42

Integrated Network Management

ORGANIZER and CHAIR: D. N. Zuckerman, AT&T Bell Labs., U.S.A.
SPONSORING COMMITTEE: Network Operations and Management

42.1 Multi-Layer Operations Functional Analysis for Broadband ATM Networks and Services
G. Wrigley, M. Izzo, S. Farkouh, Bell Communications Research, U.S.A. ................................. 1,536

42.2 Intelligent Network Management System of PSTN Under Future’s B-ISDN Environment
L. Wang, J. Zhou, F. Sha, University of Posts and Telecommunications, X. Zhao, Beijing Design Institute of the MPT of China, China ......................................................... 1,543

42.3 A Protocol Architecture for Integrated Management of Local and Large Networks
M. Colin, B. Sales, Brussels University, Belgium ............................................................... 1,548

42.4 Network Management Information for System Control
B. J. Leon, R. Narayanan, University of Southwestern Louisiana, U.S.A. ................................. 1,553

42.5 Dynamic Bandwidth Allocation in Integrated Communication Networks
N. Xiao, F. Wu, S. M. Lun, University of California at Berkeley, U.S.A. .................................. 1,558

42.6 Design and Implementation of a Configuration Management System
K. H. Lee, ChangWon National University, South Korea ..................................................... 1,563
SESSION: 43

Survivable Optical Networks

ORGANIZERS: Y. Y. Ching, Bell Communications Research, U.S.A.
T. H. Wu, Bell Communications Research, U.S. A.
CHAIR: T. H. Wu, Bell Communications Research, U.S. A.

SPONSORING COMMITTEE: Optical Communications

43.1 An Algorithm for Survivable Network Design Employing Multiple Self-healing Rings
J. B. Slevinsky, W. D. Grover, M. H. MacGregor, TR Labs, Canada .............................................. 1,568

43.2 A Capacity Comparison for SONET Self-Healing Ring Networks
C. C. Shyur, Y. M. Wu, C. H. Chen, Telecommunication Labs, DGT, Taiwan .................................. 1,574

43.3 Dimensioning of Self-Healing Rings and Their Interconnections
J. Shi, J. P. Fonseka, University of Texas at Dallas, U.S.A ........................................................... 1,579

43.4 Distributed Control Algorithms for Dynamic Restoration in DCS Mesh Networks: Performance Evaluation
H. Kobrinski, M. Azuma, Bell Communications Research, U.S.A .................................................... 1,584

43.5 Message Control Channel Protocol and Performance Analysis for Distributed ATM Virtual Path Self-Healing Network
N. Yoshikai, NTT, Japan, T. H. Wu, Bell Communications Research, U.S.A .................................. 1,589

43.6 Performance Analysis of Fast Distributed Network Restoration Algorithms
J. Bicknell, C. E. Chow, University of Colorado at Colorado Springs, Syed, MCI Telecommunications, U.S.A .... 1,596

43.7 A Decomposition Approach to Assign Spare Channels in Self-Healing Networks
M. Herzberg, Telecom Australia Research Laboratories, Australia .................................................. 1,601

SESSION: 44

Digital Satellite Transmission Technology

ORGANIZERS and CHAIRS: C. E. Mahle, Comsat Lab., U.S.A.
M. Bousquet, ENSAE (SUP’AERO), France

SPONSORING COMMITTEE: Satellite and Space Communication

44.1 Improving Frame Synchronization When Using Convolutional Codes
P. Robertson, German Aerospace Research Establishment (DLR), Germany ........................................ 1,606

44.2 Burst Mode Interference Cancellation for Superposed Transmission of SSMA-QPSK Signals
and TDMA-QPSK Signals in Nonlinear Channels
T. Sugiyama, H. Kazama, M. Morikura, S. Kubota, S. Kato, NTT Radio Communication Systems Labs, Japan .... 1,612

44.3 Error Protection for Satellite Broadcast of HDTV and Conventional TV
F. F. Tzeng, COMSAT Laboratories, U.S.A ................................................................. 1,617

44.4 Flash-TV: A Flexible Bit-Rate Transmission System for Digital HDTV Outside Broadcasting by Satellite
A. Morello, RAI, Centro Ricerche, Italy ................................................................. 1,622

44.5 Analysis of Transmission Schemes for Satellite Digital Audio Broadcasting
C. Eitia, R. De Gaudenzi, R. Viola, ESTEC, E. Colzi, Universita degli Studi di Firenze,
F. Giannetti, Universita degli Studi di Pisa, A. Azzarelli, Politecnico di Torino, Italy ......................... 1,628

44.6 Bandwidth-and Power Efficiencies of Trellis Coded Modulation Schemes
S. Ramseier, Ascom Tech Ltd., Switzerland; Christian Schlegel, Univ. of South Australia, Australia ............ 1,634

44.7 Nonlinear Channel Equalization in Digital Satellite Systems
C. H. Tseng, E. J. Powers, The University of Texas at Austin, U.S.A .............................................. 1,639

44.8 A Wideband Communications Satellite for the National Research and Education Network
M. Keaton, R. M. Beuhrer, S. C. Kwatra, J. Kim, The University of Toledo, U.S.A .................................. 1,644
SESSION: 45
Signal Processing for Personal Communications
ORGANIZER and CHAIR: Z. Kostic, AT&T Bell Labs., U.S.A.
SPONSORING COMMITTEE: Signal Processing and Communication Electronics

45.1 Low Delay, High Quality Wireless Digital Speech Communications by Shared Time Division Duplexing
W. C. Wong, National University of Singapore, Singapore, C-E. W. Sundberg,
N. Seshadri, AT&T Bell Laboratories, U.S.A. .......... 1,649

45.2 Performance of Unequalized Frequency-Hopped TDMA on Dispersive Fading Channels
S. Ariyavisitakul, L. F. Chang, Bell Communications Research, U.S.A. .......... 1,654

45.3 Effects of Multipath and Antenna Diversity on the Uplink Capacity of a CDMA Wireless System
A. Jalali, P. Mermelstein, Bell Northern Research and INRS-Telecommunication, Canada .......... 1,660

45.4 Periodic PN Sequence Delay Estimation Using Phase Spectrum Data
K. L. Kosbar, J. J. Zaninovich, University of Missouri-Rolla, U.S.A. .......... 1,665

45.5 Performance Analysis of an All Digital BPSK Demodulator
J. Gevargiz, Jet Propulsion Laboratory, U.S.A. .......... 1,670

45.6 Decision Feedback Multiuser Receivers for Asynchronous CDMA Systems
T. R. Giallorenzi, S. G. Wilson, University of Virginia, U.S.A. .......... 1,677

45.7 Rapid Converging Adaptive Interference Suppression for Direct-Sequence Code-Division Multiple-Access Systems
E. K. B. Lee, Motorola, Inc., U.S.A. .......... 1,683

SESSION: 46
System Engineering Aspects of Personal Communications
ORGANIZER: H. P. Corrales, AT&T Bell Labs., U.S.A.
CHAIR: P. Balaban, AT&T Bell Labs., U.S.A.
SPONSORING COMMITTEE: Communication Systems Engineering

46.1 Understanding Personal Mobility and Terminal Mobility in PCS
C. Bedingfield, BellSouth Telecommunications, U.S.A. .......... 1,688

46.2 PCS Network Data Model
P. A. Riley, J. M. Sauer, AT&T Bell Laboratories, U.S.A. .......... 1,693

46.3 Performance Analysis of a Dynamic Channel Allocation Technique for Terrestrial and Satellite Mobile Cellular Networks
E. Del Re, R. Fantacci, G. Giambene, Universita di Firenze, Italy .......... 1,698

46.4 Comparison of ARQ Protocols for Asynchronous Data Transmission over Rayleigh Fading Channels
V. Iyengar, A. Jalali, P. Mermelstein, J. Michaelides, Bell-Northern Research, Canada .......... 1,703

46.5 Payphone Service for Third Generation Mobile Systems
R. Nevoux, G. Mazziotto, P. Hiolle, France Telecom, France .......... 1,708

46.6 RAP - A Novel Medium Access Control Protocol for Wireless Data Networks
K. C. Chen, C. H. Lee, National Tsing Hua University, Taiwan .......... 1,713

46.7 Simulation of Digital Communication Systems Using a Stochastically Optimized Importance Sampling Technique
W. A. Al-Qaq, M. Devetsikiotis, J. K. Townsend, North Carolina State University, U.S.A. .......... 1,718

SESSION: 47
Code-Division Multiple Access
ORGANIZER and CHAIR: E. Sousa, University of Toronto, Canada
SPONSORING COMMITTEE: Communication Theory

47.1 Orthogonal Multicarrier Techniques Applied to Direct Sequence Spread Spectrum CDMA Systems
A. Chouly, A. Brajal, S. Jourdan, Laboratoires d'Electronique Philips, France .......... 1,723

47.2 Direct Sequence CDMA Employing Combined Modulation Schemes
J. Wang, A. Yongacoglu, University of Ottawa, Canada .......... 1,729
47.3 A Reduced Complexity Adaptive Near-Far Resistant Receiver for DS-CDMA
E. G. Strom, S. L. Miller, University of Florida, U.S.A. .......................................................... 1,734
47.4 Multiple-Capture Performance of a Common Code DS/SSMA Packet Radio System
D. I. Kim, Seoul City University, Korea ..................................................................................... 1,739
47.5 Throughput Analysis of Slotted Asynchronous DS/CDMA System
C. Trabelsi, A. Yongacoglu, University of Ottawa, Canada ................................................... 1,744
47.6 A Comparison of Diversity Schemes for a Mixed Mode Slow Frequency Hopped Cellular System
S. Chennakeshu, A. Hassan, GE Corporate R&D, J. Anderson, ECSE Dept. RPI, U.S.A. ............ 1,749
47.7 Analysis of Frequency-Hopped Packet Radio Networks with Several Symbols per Dwell Interval
K. A. Mohamed, L. Pap, Technical University of Budapest, Hungary ........................................ 1,754

SESSION: 48A

Traffic Control and Management in High Speed Networks
ORGANIZER and CHAIR: I. Habib, City College of New York, U.S.A.
SPONSORING COMMITTEE: Computer Communication

48A.1 Deterministic Rule Based Traffic Descriptors for Broadband ISDN: Worst Case Behavior and Connection Acceptance Control
B. T. Doshi, AT&T Bell Laboratories, U.S.A. .............................................................................. 1,759
48A.2 Input Selective Cell Tagging and Discarding with MMPP Traffic Model for BISDN/ATM Congestion Control
K. Sohraby, AT&T Bell Laboratories, U.S.A. .............................................................................. 1,765
48A.3 Graceful Adaptation of Guaranteed Performance Service Connections
C. J. Parris, G. Ventre, H. Zhang, University of California, Berkeley, U.S.A. ......................... 1,770
48A.4 Performance Trending for Management of High-Speed Packet-Switched Networks
R. Sankar, University of South Florida, R. Singh, NYNEX, U.S.A. .......................................... 1,777

SESSION: 48B

Modulation and Coding for Mobile Satellite Communications
ORGANIZERS and CHAIRS: A. Yongacoglu, University of Ottawa, Canada
T. Mathiopoulos, Univ. of British Columbia, Canada
SPONSORING COMMITTEE: Satellite and Space Communication; Personal Communication

48B.1 Analysis of Coherent and Differential Detection for Trellis-Coded 8-PSK over Satellite Flat Rician Fading Channels
R. De Gaudenzi, European Space Research and Technology, The Netherlands,
V. Vanghi, George Washington University, U.S.A. ................................................................ 1,782
48B.2 Performance of 16-QPOM Signals on a Fading Mobile Satellite Channel
S. B. Slimane, T. Le-Ngoc, Concordia University, Canada ..................................................... 1,787
48B.3 Sequence Estimation Scheme for Narrowband Digital FM Signals with Limiter-Discriminator Detection under Fading Environment
Y. Iwanami, Nagoya Institute of Technology, Japan ................................................................ 1,792
48B.4 RAKE Receiver Structures for Differential and Pilot Symbol-Assisted Detection of DS-CDMA Signals in Frequency-Selective Rayleigh Fading Channels
C. D'Amours, A. Yongacoglu, J. Wang, University of Ottawa, M. Moher, Communications Research Centre, Canada ................................................................. 1,798

SESSION: 49

Selected Hot Topics in Digital Communications Systems
ORGANIZER and CHAIR: E. J. Addeo, Bell Communications Research, U.S.A.
SPONSORING COMMITTEES: Data Communications Systems; Multi Media Services and Terminals

49.1 Topological Design of Multihop Lightwave Networks
C. Ersoy, Bogazici University, Turkey, S. S. Panwar, Polytechnic University, U.S.A. ............... 1,803
49.2 On Handoffs in Packetized Wireless Systems  
Z. Haas, C.-L. I, AT&T Bell Laboratories, U.S.A.  
1,808

49.3 A New Selective Retransmitted ARQ System  
L. Wei, D. Shu-guang, Shenzhen Starsoft Computer, Inc., China  
1,815

49.4 A Flow Control Strategy for ATM Networks Based on a Unified Performance Parameter  
D. R. Vaman, S. Kumar, X. Qian, T. M. Oser, X. Gu, Stevens Institute of Technology, U.S.A.  
1,822

49.5 An Algebraic Model for Computing the Maximum Throughput of Pipelined Protocol Processors  
M. Cardona, S. Tsujii, Tokyo Institute of Technology, T. Satake, Matsushita Electric Works, Ltd., Japan  
1,827

49.6 Performance Limits of Multiaccess Tree Protocols with Shared Multi-User Coding  
G. Thomas, University of Western Louisiana, U.S.A.  
1,834

SESSION: 50

Service Interworking: an Enabler for Future B-ISDN Services
ORGANIZER: D. Ko, Northern Telecom, Inc., U.S.A.
CHAIR: M. Wernik, Bell Northern Research, Canada
SPONSORING COMMITTEE: Communication Switching

50.1 An ATM System Architecture for Seamless Network Evolution  
N. Endo, A. Takase, S. Gouhara, S. Takahashi, J. Yanagi, Hitachi, Ltd., Japan  
1,839

50.2 A Hardware Platform for B-ISDN Services Multiplexing: Design and Performance of AAL and ATM Layers  
G. Marino, E. Merli, M. Pavesi, G. Rigolio, P Vaccari, F. Zizza, ITALTEL, Italy  
1,844

50.3 Using ATM Interworking Broadband Networks and Services  
P. Brackett, R. Damodaram, N. Ransom, D. Spears, BellSouth Telecommunications, U.S.A.  
1,849

50.4 Frame Relay Interworking With Asynchronous Transfer Mode  
R. Pretty, M. Morin, Bell-Northern Research, Canada  
1,854

50.5 Effect of Multiplexed Sub-ATM Rate Inter-LAN Traffic on Input Queueing ATM Switches  
H. S. Kim, B. R. Collier, Carnegie Mellon University, U.S.A.  
1,861

50.6 Public Data Multi-Service Interface Interworking using ATM (Balancing Connectivity, Efficiency and Performance)  
D. E. McDysan, MCI Telecommunications, U.S.A.  
1,867

50.7 The SCAI Standard  
R. D. Ryan, Bell Northern Research, U.S.A.  
1,872

SESSION: 51

Optical Communication Network Systems
ORGANIZER: R. R. Prucnal, Princeton University, U.S.A.
CHAIR: W. Kwong, Hofstra University, U.S.A.
SPONSORING COMMITTEE: Optical Communications

51.1 A Comparison of Three Analog Optical Links for High Dynamic Range Applications  
J. C. Fan, R. F. Kalman, L. G. Kazovsky, Stanford University, U.S.A.  
1,877

51.2 System Applications of Dispersion-Compensation Techniques in Upgrading Interoffice 1310 nm-Optimized Fiber Networks  
H. Izadpanah, C. Lin, Bell Communications Research, U.S.A.  
1,882

51.3 Coherent Analog Optical Links: Design, Performance and Potential Applications  
T. K. Fong, D. J. M. Sabidoix, L. G. Kazovsky, Stanford University, U.S.A., M. Tabara, Furukawa Electric, Co., Ltd., Japan  
1,886

51.4 Comparison of Coded and Uncoded QPSK Intradyne and Heterodyne Receivers  
C.-P.Li, M. Bouklihacene, L. Kurz, Polytechnic University, U.S.A.  
1,891

51.5 Error Probabilities of Optical Heterodyne OOK and FSK Communications Systems  
K. C. M. Varnum, Naval Air Warfare Center; R. Robertson, U.S. Naval Postgraduate School, U.S.A.  
1,896

51.6 Performance Analysis of Optical CDMA Communication Systems with PPM Signaling  
H. M. H. Shalaby, University of Alexandria, Egypt  
1,901
51.7 Optical Fibre n-ary PPM: Natural Acquisition Sequences and Frame Phase Extraction
J. M. H. Elmirghani, The University of Huddersfield, R. A. Cryan, The Manchester Metropolitan University, F. M. Clayton, GEC Hirst Research Centre, United Kingdom

SESSION: 52

Intelligent Network Software Platforms—Network & Management
ORGANIZER: R. Sundararaman, AT&T Bell Labs, U.S.A.
CHAIR: W. McSorley, Systems Integration Lab., U.S.A.
SPONSORING COMMITTEE: Communications Software/Network Operations and Management
Communications Switching

52.1 The Design and Implementation of a Service Logic Execution Environment Platform
C. L. Yang, C. F. Yu, GTE Laboratories Incorporated, U.S.A.

52.2 Hierarchically Structured Switching Software
K. Koyanagi, T. Shimizu, S. Tomita, NTT Communication Switching Laboratories, Japan

52.3 Experiences in Prototyping the Intelligent Network

52.4 A Prototype of a Service Management System for the Intelligent Network
R. Chipalkatti, L. Koyfman, C. Jack, Y. Lim, GTE Laboratories Inc., U.S.A.

52.5 Advanced Intelligent Network Directions
V. C. Majeti, R. A. Prasad, AT&T Bell Laboratories, U.S.A.

52.6 Inter-Network Roaming Based on Personal Digital Cellular Standards
H. Sawada, S. Hirata, A. Nakajima, NTT Mobile Communication Network, Inc., Japan

SESSION: 53

Signal Processing and Coding for Storage
ORGANIZER and CHAIR: A. Armstrong, Cirrus Logic Inc., U.S.A.
SPONSORING COMMITTEE: Signal Processing for Magnetic Recording

53.1 Partial Response Class I Signaling Applied to High Density Magnetic Recording
J. Fitzpatrick, J. K. Wolf, University of California-San Diego, U.S.A.

53.2 A Reduced-Complexity Sequence Detector with Soft Outputs for Partial-Response Channels
M. Nasiri-Kenari, C. K. Rushforth, University of Utah, A. D. Abbaszadeh, Paramax Systems, U.S.A.

53.3 A Concatenated Decoding Scheme for (1-D) Partial Response with Matched Spectral-Null Coding
K. J. Knudson, J. K. Wolf, L. B. Milstein, University of California - San Diego, U.S.A.

53.4 Optimal Filter Design for Fixed Delay Tree Search with Decision Feedback
J. Moon, S. She, University of Minnesota, U.S.A.

53.5 Equalized Maximum Likelihood Receiver in a Magnetic Recording Channel
I. Lee, C. Modlin, J. M. Cioffi, Stanford University, U.S.A.

53.6 Codebook Optimization by Cauchy Annealing
Z. Wang, J. V. Hanson, University of Waterloo, Canada

53.7 Optimal Mapping for 2-Bit High Speed Huffman Compression
M. A. Bassiouni, A. Mukherjee, University of Central Florida, U.S.A.

SESSION: 54

Modulation/Equalization in Data Transmission
ORGANIZERS: N. Zervos, AT&T Bell Labs., U.S.A.; S. V. Kartalopoulos, AT&T Bell Labs., U.S.A.
CHAIR: N. Zervos, AT&T Bell Labs., U.S.A.
SPONSORING COMMITTEES: Signal Processing and Communication Electronics; Communications Theory

54.1 A New Architecture for Orthogonally Multiplexed QAM Systems
54.2 Analysis of Channel Noise in Orthogonally Multiplexed QAM Systems
N. Benvenuto, G. Cariolaro, G. Michieletto, L. Vangelista, Universita di Padova, Italy ................. 1,990

54.3 Two Frequency Estimation Schemes Operating Independently of Timing Information
F. Classen, H. Meyr, Aachen University of Technology, Germany ........................................ 1,996

54.4 On Blind Identifiability of Multipath Channels Using Fractional Sampling and Second-Order Cyclostationary Statistics
J. K. Tugnait, Auburn University, U.S.A. ................................................................. 2,001

54.5 An Efficient Algorithm for Computing Bounds on the Average Transmitted Power in Generalized Partial Response
G. M. Pitstick, J. R. Cruz, University of Oklahoma, U.S.A. ........................................... 2,006

54.6 Blind Identification of Terrestrial Microwave Radio Channels
E. Biglieri, G. Caire, Politecnico di Torino, G. D'Aria, CSELT, Italy ................................. 2,011

54.7 Joint Channel Estimation and Data Detection Using a Blind Bayesian Decision Feedback Equaliser
S. Chen, S. McLaughlin, P. M. Grant, B. Mulgrew, University of Edinburgh, United Kingdom ........ 2,017

Author Index ................................................................................................................. Follows page 2021
