DEVELOPMENTS IN FOOD ENGINEERING

Proceedings of the 6th International Congress on Engineering and Food

Edited by

Professor Toshimasa Yano (Professor Emeritus, University of Tokyo),
Department of Bioengineering, Faculty of Engineering,
Yokohama National University,
Tokiwadai, Hodogaya-ku, Yokohama 240, Japan

Professor Ryuichi Matsuno,
Department of Food Science and Technology,
Faculty of Agriculture, Kyoto University,
Sakyo-ku, Kyoto 606-01, Japan

and

Professor Kozo Nakamura
Department of Agricultural Chemistry,
Faculty of Agriculture, University of Tokyo,
Yayoi, Bunkyo-ku, Tokyo 113, Japan

BLACKIE ACADEMIC & PROFESSIONAL
An Imprint of Chapman & Hall
London • Glasgow • Weinheim • New York • Tokyo • Melbourne • Madras
## CONTENTS

### Keynote Lecture

Food Engineering – From arts to science/ T. Yano  

### Plenary Lectures

Mechanical emulsification/ H. Schubert, H. Karbstein  

Applications of NMR to food science and engineering/ P.S. Belton  

Progress in pasteurization and sterilization/ T. Ohlsson  

Fouling and cleaning: Mechanisms and models/ P.J. Fryer, M.T. Belmar-Beiny, P.J.R. Schreier  

Supercritical fluids: Fundamentals and applications/ P.G. Debenedetti  

Neural networks in bioprocess engineering/ Y.-H. Zhu, S. Linko, T. Eerikäinen, P. Linko  

Implementation of model based optimization of product quality parameters in dairy processes/ J. van der Linden  

Physiological functions of foods/ S. Arai  

### Physical and Physicochemical Properties of Food

Effect of moisture content on flow characteristics of SPI melt at an elevated temperature/ N. Hayashi, I. Hayakawa, Y. Fujio  

Novel approach to characterize the flow properties of fine dry food
powders/ H.O. Kono, Y. Itani

Viscosity measurements of fresh and heat stressed frying oil at high temperatures/ K.S. Miller, B.E. Farkas, R.P. Singh

Viscosity properties by amylograph of rice/ H. Kurasawa, I. Shoji

Physicochemical properties and hypolipidemic function of levan and its partial hydrolysate/ M. Takahashi, R. Takayama, K. Ishihara

Viscoelasticity of butter/ H. Hayashi

Viscoelastic characteristics of bread crumb and graphic analysis of compression creep curve/ Y. Wang, H. Morishima, Y. Seo, Y. Sagara, K. Imou

Viscoelastic behavior of parboiled rice/ S.M. Saif, D.A. Suter

Stress relaxation characteristics of alfalfa cubes/ R.T. Patil, S. Sokhansanj

Studies on rheological properties of foods/ Y. Masumoto, K. Kubota, Y. Hagura

Rheology of set type and stirred type yoghurt: build-up, break-down and recovery; the effects of pH, temperature and starter/ E. Rönnegard, J. Jiang, P. Dejmek

Monitoring of milk curd formation by means of physical properties/ H. Nakanuma, T. Doi, R. Watanabe

Reological analysis of jelly strength in heat induced gel like kamaboko/ H. Miki, J. Shindo, J. Nishimoto

Relationships of rheological and hydrodynamic properties of biopolymeric ingredients to the composite surimi gel texture/ C.M. Lee

Hypocaloric jams from grape juice/ E.C. Matias, I.M.N. Sousa, O. Laurcano

Mechanical properties of foods near the sol–gel transition point/ H. Kumagai, T. Inukai, T. Fujii, T. Yano

Effects of sugars on the gel–sol transition of agarose and κ-carrageenan/ K. Nishinari, T. Takaya, K. Kohyama, M. Watase

Critical behavior of agarose near the sol–gel transition point/ T. Fujii, H. Kumagai, T. Yano

Microstructure of hydrogel and its relationship with molecular–sieve characteristics in gel electrophoresis/ S. Miura, T. Fujii, H. Kumagai, T. Yano

Physicochemical studies on gelation of soybean 7S and 11S proteins by glucono-δ-lactone/ K. Kohyama, K. Nishinari

Rheological models for shelled maize en-masse/ L.O. Gumbe

Nondestructive texture measurement of apples/ S. Prussia, K. Morita, Y. Hung, C. Thai, W. Tollner

Description of bread textural deterioration by stress–strain curves, recoverable work, and thermal transitions/ P. Chinachoti

Fracture stress of frozen soybean curd/ H. Watanabe, C.Q. Tang, T. Mihori

The influence of moisture content on the failure mode of biscuits/ L. Piazza, R. Bringiotti, P. Masi

Changes of physical properties of drying materials/ P.P. Lewicki, D. Witrowa, W. Pomarańska–Lazuka

Effects of baking and storage conditions on mechanical properties of white bread/ Y. Wang, H. Morishima, Y. Seo, Y. Sagara, K. Imou

Impedance spectroscopic analysis in agricultural products/ K. Toyoda

Finite element analysis on the effective thermal conductivity of dispersed systems/ T. Sakiyama, T. Yano

Measurement of fraction of frozen water and thermal conductivity in frozen food materials/ R. Pongsawatmanit, O. Miyawaki

Thermophysical properties of raspberries and apples/ V. Bifani, D. Borcoski, P. Moyano, F. Osorio

A thermomechanical method for determining collapse temperatures of food powders/ V.T. Huang

Thermal studies of natural fruits/ M.M. Sá, A.M. Sereno

Thermal conversion of starch at low water activity/ K. Poutanen,
O. Myllymäki, K. Autio, P. Myllärinen, T. Suortti 161

Characterization of W/O/W emulsions with a view to possible food applications/ S. Matsumoto 164

Application of membrane emulsification method for preparing food emulsions and emulsion characteristics/ K. Suzuki, I. Shuto, Y. Hagura 167

Evaluation of model food emulsion stability by hygrometric measurements/ C.R. Lerici, C. Corradini, P. Pittia 170

Addition of soy lysophospholipids enhances emulsifying ability of food emulsifiers/ S. Fujita, A. Suzuki, H. Kawai 173

Water activity and water behavior of soy sauce, dehydrated soy sauce and the improvement on hygroscopicity of dehydrated soy sauce/ M. Hamano 179

Sorption isotherms and heats of sorption for fruit jams/ M.M. Sá, A.M. Sereno 182

Water sorption isotherms of food model mixtures/ P.P. Lewicki, W. Pomarańska–Lazuka 185

Glass transitions and physical state of dehydrated milk products/ Y. Roos, K. Jouppila 188

Stickiness and caking of infant formula food powders related to the glass transition phenomena/ L.E. Chuy, T.P. Labuza 191

Tentative of inducing fruit sugar crystallization during freezing to reduce the hygroscopicity of the corresponding freeze-dried powders/ S. De Melo, T. Giarola, J. Cal–Vidal 194

Diffusivity of water in flour/raisin mixtures/ A.E. Kostaropoulos, V.T. Karathanos, G.D. Saravacos 197

The use of digitized video images for monitoring color and color evolution of Jonagold apples during shelf life/ F. Vervaekte, E. Schrevens, J. Verreydt, K. Portier, J. De Baerdemaeker 200

Computerized image analysis of gas cell distribution in several foods/ S. Gohtani, N. Ariuchi, S. Kawasome, Y. Yamano 203

Functional properties of Lupinus luteus proteins/ I.M.N. Sousa,
Application of NMR to Food Engineering

Measurement of material properties in heterogeneous food systems by magnetic resonance imaging/ M.J. McCarthy, K.L. McCarthy, R.L. Powell, J.D. Seymour, T.-Q. Li 215

Analysis of the flow field in a single screw extruder using magnetic resonance imaging/ C.K. Agemura, R.J. Kauten, K.L. McCarthy 218

Determination and calculation of freezing equilibria in frozen foods/ M. Lotz, H. Weisser 221

The characteristics of the hydration water of protein in relation with the freezing and drying denaturation/ N. Hanafusa 224

NMR study of the dynamic behaviour of water in food systems: Guar galactomannan solutions and pectin gels/ E. Brosio, A. D'Ubaldo, B. Verzegnassi 227

NMR-measurements to study binding states and mobility of water in cellulose packaging materials/ F. Liebenspacher, H. Weisser 230

Heat capacity modeling of frozen food gels from NMR determination of water states/ P. Cornillon, J. Andrieu, J.C. Duplan, M. Laurent 233

Measurement of moisture diffusion in soybean seed by pulsed-field-gradient NMR method/ H. Watanabe, M. Fukuoka, S. Shimada 236

Moisture diffusion in fresh and dehydrated fish flesh measured by PFG-NMR/ M. Fukuoka, W. Wen, T. Mihori, H. Watanabe 239

$^1$H–NMR images and localized spectra of foods/ N. Ishida, H. Kano, H. Ogawa 241

Mechanical Processing of Food

Investigation of jet agglomeration processes/ H. Schuchmann, H. Schubert 244

The effect of interparticle forces on the separation of fine powders from
Thermal and Mass Transfer Operations of Food

Thermal property measurements of fried foods using differential scanning calorimeter/ A.B. Buhri, R.P. Singh

Colorimetric measurements of meat products cooked using different systems/ P. Pittia, M. Anese, C. Orlando, A. Sensidoni

Interactions between maillard reaction products and lipid oxidation during the roasting process and storage of hazel–nuts (Corylus avellana)/ C. Severini, P. Pittia, M.C. Nicoli, G.G. Pinnavaia

A new method of monitoring particle motion and temperature in a
liquid/particle system/ H. Sawada, R.L. Merson  

Co–rotating disc scraped–surface heat exchanger for food processing/ A. Friis, J. Adler–Nissen, O. Hassager  

Heat transfer in bakery ovens/ R.E. Altomare  

Modelling and simulation of food frying processes/ G.S. Mittal, P. Ateba  

Modelling pasta cooking processes/ L. Piazza, M. Riva, P. Masi  

Ohmic thawing of shrimp blocks/ M.O. Balaban, T. Henderson, A. Teixeira, W.S. Otwell  

Heat transfer analysis in food heated by far–infrared radiation/ N. Sakai, T. Hanzawa  

Optical characteristics of vegetables in far–infrared irradiation heating/ M. Shimizu, A. Hashimoto, S. Oshita  

Temperature distribution in microwave oven heating – The influence of different cavity modes/ T. Ohlsson, P.O. Risman  

In–flow microwave heating of pumpable foods/ T. Ohlsson  

Mathematical modeling of batch heating of liquids in a microwave cavity/ A.K. Datta, H.M. Prosetya, W. Hu  

Measurement of evaporation coefficient of water during vacuum cooling of lettuce/ A.H. Tambunan, Y. Seo, Y. Sagara, H. Morishima, Y. Kawagoe  

Heat and mass transfer modelling during beef carcass chilling for quality control/ G.S. Mittal, P. Mallikarjunan  

Corn drying: Modelling the quality degradation/ F. Courtois, A. Lebert, J.C. Lasseran, J.J. Bimbenet  

Puff drying of foods in a fluidised bed/ N.C. Shilton, K. Niranjan  

Estimation of the effective moisture diffusivity from drying data. Application to some vegetables/ C.T. Kiranoudis, Z.B. Maroulis, D. Marinos–Kouris, G.D. Saravacos  

Effect of freezing conditions on vapor permeability of freeze-dried foods/ K. Nakamura, K. Matagi, T. Odawara, T. Hoshino
Moisture content distribution and moisture diffusion in foods during heating/ C. Skjöldebrand, K. Thorvaldsson 346

Mass transfer in osmotic processes/ Z. Yao, M. Le Maguer 349

The sorption of water in the agricultural materials/ T. Kamcoka, K. Horibe 352

The diffusion of seasoning substances in various slurries – Application of nondestructive measurement using ultrasonic technique-/ T. Torii, S. Odake 355

Diffusion of salt in dry–salted feta cheese/ S. Yanniotis, J. Zarpoutis, E. Anifantakis 358

Extraction rate for soluble solids during coffee brewing/ S. Oshita, A. Hashimoto, T. Miyata, T. Okado 361

The measurement of the losses of soluble solids in legume seeds (Lablat purpureos) during the process of soaking at different temperatures and in the process of cooking/ A. Jadan, M. Silva, M. Moscoso 364

Evaluation of steam distillation of roasted coffee for quality improvement of soluble coffee/ N. Imura, O. Matsuda 367

Phase Change Operation

Studies on the recrystallization of ice in frozen food systems/ S.G. Min, W.E.L. Spieß 370

Ice structure and its control in frozen food gels/ O. Miyawaki, S.K. Bae 373

A comparative study of freezing time prediction for food products/ F. Kluza, W.E.L. Spieß 376

Variation of correction factors in an approximate equation for freezing and thawing time prediction/ A. Rubiolo de Reinick 379

Progressive freeze–concentration and its relationship with the ice structure at freezing front/ S.K. Bae, O. Miyawaki 382

Concentration and Dehydration Processes

Freeze concentration of some heat sensitive solutions/ O. Flesland, X. Song, I. Strømmen 385

Studies on the freeze concentration of foods. – Determination of eutectic temperatures of amino acids in aqueous ethanol solution –/

Ice crystals agglomerated in freeze concentration/ Y. Shirai, K. Nakanishi, R. Matsuno 391

Thermodynamic modeling of the osmotic concentration process/ R.N. Biswal, M. Le Maguer 394

Recent advances in dewatering and impregnation soaking processes/ A.L. Raoul-Wack, R. Saurel, G.M. Rios, S. Guilbert 397

Dewatering through immersion in sugar/salt concentrated solutions ("Osmotic dehydration"). An interesting alternative for seafood stabilisation/ A.L. Raoul-Wack, A. Collignan 400

Osmotic dehydration of peas and its effect on drying/ F. Kaymak, T. Cakaloz 403

Studies on the sorption characteristics of bulk wheat and canola/ W. Lang, S. Sokhansanj 406

Diffusivity of water and solubles during rehydration of osmo-convection dried plant tissue/ A. Lenart, B. Iwaniuk 409

Study of rehydration before eating on dehydrated vegetables/ M. Zhang, C. Wang, X. Ma, C. Li 412

Effect of drying conditions on effective moisture diffusivity in "chufa" tubers (Cyperus esculentus L.)/ A. Altarriba, A. Núñez-Lemos, D. Vidal 415

Simultaneous heat and moisture transfer with hygrostrain-stress formation in food undergoing drying/ K. Hayakawa, T. Tsukada, T. Furuta, N. Sakai 418

Dynamic modelling of fruit dehydration/ F. Giroux, S. Guilbert, G. Trystram 421

Determination of structural parameters for the dried layer of coffee solution undergoing sublimation dehydration/ J. Ichiba, Y. Sagara, Y. Kawagoe, Y. Seo 424

Quality aspects in drying of food granular materials/ K. Kramer, I. Strømmen, X. Song 427

Considerations on the diffusivities of moisture and aroma components/ W.J. Coumans, A.A.J. Ketelaars, P.J.A.M. Kerkhof 430

Flavour retention in different methods of spray drying/ A. Senoussi, B. Bhandari, E. Dumoulin, Z. Berk 433
Improvement of l-menthol retention by cyclodextrin during drying/ T. Furuta, H. Yoshii, A. Yasunishi

Spray drying leaflash technique: An investigation on pulverization and flow profiles/ L. Clement, E. Dumoulin, S. Lagarde, C. Bourlier

Research of far-infrared drying on white mushroom/ M. Zhang, N. Xu

Convective drying of Lactobacillus plantarum/ L.J.M. Linders, G. Meerdink, K. van't Riet

Convective drying of lactic acid starter cultures with high survival rates/ U. Kessler, W. Bauer

Drying of enzymes: Relationships between thermal stability of enzymes and water concentration/ S. Yamamoto, Y. Kasuga, Y. Sano

**Reaction Kinetics in Food Processing**

Prediction of kinetic parameters for food quality changes using equivalent time at standard temperature/ H.-Y. Cho, Y.-R. Pyun

Prediction of quality change during food storage/ D.R. Heldman, R.R. Chao

Correlations between physicochemical properties and kinetic parameters of different cultivars of rice/ Y.-H. Chang

Development and validation of prediction models for texture change under varying temperature conditions/ B.E. Verlinden, J. De Baerdemaeker

The effect of cook-chill processing on the texture development of different types of vegetables and fruits/ B.E. Verlinden, X.K. Vandewalle, J. De Baerdemaeker

The effect of water activity and temperature on the retrogradation rate of gelatinized wheat flour/ C. Rhee, S.W. Lee

Diffusion and reaction in wheat grains/ A.G.F. Stapley, M.P. Hollewand, L.F. Gladden, P.J. Fryer

Studies on interaction between non enzymatic browning reaction and lipid oxidation in food processing/ M. Dalla Rosa, D. Barbanti, S. Pizzirani, F. Bressa

Oxidation rate of polyunsaturated fatty acid and antioxidation effect of gel layer/ K. Nakamura, K. Nagai, T. Inoue, M. Hakoda
Simulation of oxidation processes of liquid lipids/ S. Adachi, J. Imagi, T. Ishiguro, R. Matsuno

Isomerization reaction kinetics of catechins in packaged tea drinks during processing/ Y. Komatsu, S. Suematsu, Y. Hisanobu, H. Saigo, R. Matsuda, K. Hara

Citrus fruits combination improving taste and flavor of marmalade/ T. Morishita, K. Nishio

Kinetics of aspartame degradation in liquid dairy beverages/ L.N. Bell, D. Shoeman, M. Tsoubeli, T.P. Labuza

Esterification in micro aqueous organic phase/ M. Inoue, M. Imai, M. Shimizu

Thermal inactivation of pectinesterase in papaya pulp (pH 3.8)/ P.R. Massaguer, M.A. Magalhães, R.M. Tosello

Heat gelation and reaction kinetics of whey protein concentrates/ S.M. Taylor, L.F. Gladden, P.J. Fryer

Effect of microwave heating on non–enzymatic browning in banana products/ M.P. Cano, V. Lizarraga

Effect of microwave heating rate on maltose production in sweetpotato/ T. Nakai, J. Sawai, A. Hashimoto, T. Honda, M. Shimizu

Studies on the cooking–rate equations of foods/ K. Kubota, Y. Masumoto, G. Zhang, Y. Hagura

Kinetic modelling of chicken muscle thermal conductivity during deep-fat frying/ M.O. Ngadi, L.R. Correia

Cold extrusion – Tribochemistry/ S.S. Wang, X. Zheng, C.T. Ho, D. Qu

Fermentation Processes

Chemical and physical changes of tofuyo (fermented tofu) during fermentation/ M. Yasuda, N. Kobamoto

Statistical characterization of tempeh starter from the aroma components of soybean tempeh/ Suprinyanto, Y. Fujio, I. Hayakawa

Manufacturing of solid culture media in film bags for shiitake cultivation/ K. Ohsaki, S. Yamada, O. Fuse, T. Motegi, G. Kawai,
Y. Fukushima

Sorghum brewing with facultative anaerobic *Rhizopus* in practical operations/ H.-H. Wang, J.-C. Tsao

Production of enzymes for food processing by solid state fermentation/ M. Taniguchi, K. Ooshima, M. Fujii

Cell growth and α-amylase production characteristics of *Bacillus subtilis* ATCC 601/ T.J.G. Salva, I.O. Moraes

Fermentation processes for the production of natural colour compounds for the food industry/ A.M. Martin

Effect of castor oil hydrolysate on the production of γ-decalactone and cis-6-dodecen-4-olide by *Sporobolomyces odorus* / S.-L. Lee, C.-C. Chou

Modelling of transport phenomena during the cultivation of *Bacillus thuringiensis* for the production of bioinsecticides/ A. Pérez-Galindo, C.G. Velázquez, H. Medrano-Roldán, C.M. Robles, C. Rodríguez-Padilla, R. Tamez-Guerra, J.L. Galán-Wong

Measurement of the main industrial fermentation parameters governing the production of bioinsecticides by *Bacillus thuringiensis* var. *kumamotoensis* / H. Medrano-Roldán, C.G. Velázquez, C.M. Robles, A. Pérez-Galindo, C.P. Correa, C. Rodríguez-Padilla, R. Tamez-Guerra, J.L. Galán-Wong

Fermentative production of L-lactate from xylose/ T. Ueda, K. Tanaka, A. Ishizaki

Optimization studies of a lactic acid fermented beverage process/ T. Moe, J. Adler-Nissen

General method for lactic acid batch fermentation processes monitoring/ E. Latrille, D. Picque, G. Corrieu

Anaerobic continuous ethanol fermentation using a computer coupled medium feeding system which has DDC control pH of the culture broth/ S. Tripetchkul, M. Tonakawa, A. Ishizaki, Z. Shi, K. Shimizu

Method for on-line prediction of the alcoholic fermentation rate in wine-making/ B. Perret, G. Corrieu

Measurement of cell density in the broth of aggregative organism...
