SECOND INTERNATIONAL CONFERENCE ON OFFSHORE WELDED STRUCTURES

London — 16-18 November 1982

Conference Technical Director

H.C. COTTON

Chairmen

SESSION I  J.N. Mansfield
II  F.M. Burdekin
III  J. de Back
Special  B. Tomkins
IV  R.E. Dolby
V  T. Boniszewski
VI  H.C. Cotton
VII  H.C. Cotton

THE WELDING INSTITUTE

Abington Hall  Abington  Cambridge CB1 6AL

CONTENTS

Papers

SESSION I  Design and validation

1  J.M.THOMAS
Quantitative risk analysis of offshore welded structures

9  W.K.WONG and J.H.ROGERSON
A probabilistic estimate of the relative value of factors which control the failure by fracture of offshore structures

13  J.LEREIM
Elastic-plastic fracture analysis of heavy walled structural elements

21  I.J.SMITH, H.G.PISARSKI, N.ELLIS, and N.J.PRESCOTT
A defect assessment method, using finite elements and the CTOD design curve, for use in the design of offshore welded structures

41  I.E.TEBBETT
Welded tubular joints — new formulae for the ultimate limit state

43  R.W.NICHOLSON and B.A.SZABO
Some considerations concerning the use of finite elements in fatigue life computations

47  R.H.BOND, N.R.CAMERON, R.E.TAYLOR, J.D.HARRISON, M.S.KAMATH, P.H.M.HART, and C.A.BAINBRIDGE
The Buchan Alpha platform: a comprehensive postconstruction fitness review

58  M.H.OGLE, N.D.P.BARLTROP, and J.EVANS
Fatigue of large stiffened plate structures

52  P.GANTKE and M.HANEKE
Design philosophy, rules, and procedures for cast steel nodes

SESSION II  Achievement of mechanical properties in welded joints

2  G.W.DAWSON and P.JUDSON
Procedural guidelines for the achievement of tough welded joints in structural steels for offshore applications

3  P.JUDSON and D.McKEOWN
Advances in the control of weld metal toughness

12  R.FRASER, A.McLEAN, D.J.WEBSTER, and D.S.TAYLOR
High deposition rate submerged-arc welding for critical applications

20  H.HARASAWA, M.HANO, and W.E.BREMNER
The development and selection of welding procedures for optimum mechanical properties

30  J.WĘGRZYŃ and J.DZIUBIŃSKI
The mechanical properties of welds with soft interlayers

38  V.G.MARSHALL
The procedural requirements for welded joints in offshore structures: a question of validity

40  P.C.R.CUNHA, A.M.POPE, and A.F.NÓBREGA
Fracture toughness of weld metals for Brazilian offshore platforms

SESSION III  Fatigue performance of welded joints

4  M.B.GHANEM and R.FENN
The effect of welding on the fatigue behaviour of a 0.5 carbon equivalent steel
D.K. MATLOCK, G.R. EDWARDS, D.L. OLSON, and S. IBARRA
An evaluation of the fatigue behaviour in surface, habitat, and underwater wet welds

S.S. GOWDA, D.V. REDDY, M. AROCKIASAMY, and D.B. MUGGERIDGE
Fatigue strength of offshore welded monopod tubular joints

P.J. HAAGENSEN
Improving the fatigue performance of welded joints

T. IWASAKI and J.G. WYLDE
Recent research on the fatigue performance of welded tubular joints

SPECIAL SESSION Development and use of revised Fatigue Guidance Notes for Offshore Structures

N.M. IRVINE
The concept and definition of hot spot stress as used in the revised Guidance for fatigue assessment of welded tubular joints

T.R. GURNEY
The basis of the revised fatigue design rules in the Department of Energy Offshore Guidance Notes

D.J. LOADER, P.A. SHORROCK, and V.A. STATON
Implications of the New Fatigue Design Guidance Notes for the designer and platform operator

SESSION IV Developments in materials and material selection

K. BESSYO, H. OZAWA, N. NAKANO, and M. NAKANISHI
The development of high heat input steels for offshore welded structures by the SHT process

M. SUZUKI, K. TSUKADA, and I. WATANABE
Newly developed Arctic grade high Al/low N/micro Ti type offshore structural steel

H.G. PISARSKI and J.D. HARRISON
Background to the material selection procedures for steels and weldments contained in the proposed revisions to the Department of Energy Guidance Notes

H. BAUMGARDT, H. de BOER, and B. MÜSGEN
Special features in the development of high strength steels for offshore technology

M. HANEKE and F. GANTKE
Research into material for cast steel nodes

R.R. BARR and P.S. MITCHELL
Plate steel development for offshore platforms and drilling rigs

SESSION V Developments in consumables

D.S. TAYLOR and G.M. EVANS
The systematic development of a new range of MMA electrodes for critical areas of offshore fabrication

H. MENTINK, N.G.J. NÜHN, S.J. VERBURG, and F.F. WESTENDORP
The development of consumables for offshore constructions

G. ALMQVIST, S. BUDGIFVARS, L. LINDSTRÖM, B. MAGNUSSON, and L. WITTUNG
Some principles for low moisture absorption properties of basic MMA electrodes
SESSION VI  Quality control for offshore fabrication

5  R.R.STROUD and R.FENN
The measurement and control of penetration during submerged-arc welding

35  J.E.M.JUBB
Ongoing inspection strategy for offshore structures

39  T.BOKALRUD and A.KARLESEN
Reliability analysis of fatigue damage in offshore welded structures

14  J.G.HICKS and K.P.BENTLEY
Surveillance of quality assurance activities in steel fabrication

SESSION VII  Underwater welding and repair

17  H.HOFFMEISTER, K.KÜSTER, and H-G.SCHAFSTALL
Weld joint properties of medium strength steels after underwater wet MIG-welding by the water curtain process

18  W.ANDREAE, H.G.BRANDT, H.HOFFMEISTER, and H-G.SCHAFSTALL
The development and sea testing of an underwater mechanised wet welding system

60  XU QINAN
The structure and fabrication of a deep sea simulator

42  I.E.TEBBETT
Cement-grouted strengthening and repair systems

51  D.van der TORRE and M.P.SIPKES
Remote-controlled underwater welding in the dry

53  G.W.BOLTJE
Underwater stud welding
