TABLE OF CONTENTS

INAUGURAL SESSION

Welcome
H. Zwicker, Rector of the University of Stuttgart
R. Saal, Vice-President CAS, Region 8 of the IEEE, Technische Universität München
E. Lüder, Chairman of the ECCTD 83, Universität Stuttgart

Die Lösung des Vierfarbenproblems
The Solution of the Four Color Problem
W. Bader, Stuttgart, FRG

A General Sensitivity Theorem for Lossless Two-Ports and its Application to Active-RC, Switched Capacitor and Digital Filters
G.C. Temes, University of California, Los Angeles, Calif., USA

Impact of Circuit Theory and Technology on Communication Systems Design
C.F. Kurth, Bell Laboratories, North Andover, Mass., USA

Special Session S1: Signal Processors
Organizer and Chairman: A.Sawai, NEC, Kawasaki, Japan

A Fast Signal Processor without Multipliers
S. Steinlechner, E. Auer, E. Lüder, Universität Stuttgart, FRG

A General Purpose Digital Signal Processor
T. Ikezawa, H. Gambe, N. Kobayashi, S. Sumi, T. Tsuda, S. Fuji, Fujitsu Ltd., Kawasaki, Japan

Fast Monolithic Real-Time Signal Processor
E. Zaehringer, P. Anders, Intermetall, Freiburg, FRG

Architectural Tradeoffs in a Digital Signal Processing Microcomputer
S.S. Magar, Texas Instruments Incorporated, Houston, Texas, USA

Relp-Vocoding Using NEC 7720
P. Hedelin and L. Collberg, Chalmers Tech. University, Göteborg, Sweden

Regular Session R1: Design of SC-Filters I
Chairman: M. Hasler, Ecole Polytechnique Fédérale de Lausanne, Switzerland

Switched-Capacitor Filters Employing Voltage Inverter Switches- New Results
J. Pandel, Ruhr Universität Bochum, FRG

General-Purpose Design of First and Second Order Switched Capacitor Building Blocks
E. Hückem, G.S. Moschytz, ETH Zürich, Switzerland

Evaluation of Direct- and Image Frequency Response of Time Variant SC-Networks by Means of Equivalent Circuits
P. Lutz, TU Wien, Austria

On the Design of Switched-Capacitor Bandpass Filters, A Case Study
T. Fülöp, T. Pörnécz, TU Budapest, Hungary
Echo Cancellers for Telephone Systems - Application, Examples for VLSI-Technology
R. Wehrmann, Forschungsinstitute der Deutschen Bundespost beim FTZ, Berlin, FRG

The Impact of VLSI Evolution on Transmultiplexer Design
H. Göckler, ANT Nachrichtententechnik, Backnang, FRG

Special Session S3: Network Models for Biological Systems I
Organizer and Chairman: G.S. Moschytz, ETH, Zürich, Switzerland

The Electrical Network Space (ENS) for the Analysis and Modelling of Biological Systems
G.S. Moschytz, ETH Zürich, Switzerland

Modelling of the Spinal Motoneurone-Renshaw Cell Circuitry by a Network of Linear Filters at Different Operating Points
U. Windhorst, W. Koehler, Physiologisches Institut der Universität Göttingen, FRG

Spatial Filtering and Linearization in the Distributed Multi-Loop Neuromuscular Control System
G.F. Inbar, Technion - Israel Institute of Technology, Haifa, Israel

Model of the Human Ear
W. Entenmann, M. Gloger, W. Rupp, TU München, FRG

Regular Session R2: Network Theory I
Chairman: M.F. Fahmy, University of Assiut, Egypt

Unique Solvability of Linear Memoryless Networks - A Survey
A. Recski, Research Institute for Telecommunication, Budapest, Hungary

The Use of Multiterminal Subnetworks in the Modification of the Bus (Node) Impedance Matrix for Changes in the Network Containing Nonsymmetrical Couplings
A. Kaypmaz, Y. Tokad, Marmara Research Institute, Turkey

Resistive Multiport Network Synthesis Using Arbitrary Network Matrix Decomposition
J. Pospisil, Technical University of Brno, CSSR

Synthesis of Filters with Arbitrary Number of Infinity Attenuation Frequencies
R.A. Petkovic, B. M. Djurich, University of Nish, Yugoslavia

A Generalized Approach to Linear Network Transformations and their Modelling
J. Brzobohaty, J. Pospisil, Technical University of Brno, CSSR

Regular Session R3: APPROXIMATION
Chairman: W. Entenmann, University of Munich, Munich, FRG

Amplitude versus Coefficient-Matching Optimization Techniques
R.E. Massara, A.R. Al-Najjar, University of Essex, Colchester, England

Interpolation with Multivariable Positive Real Functions
J. Gregor, Czech Technical University, Prague, Czechoslovakia

Low Order Windows Approximating Dolph-Chebyshev Window
H. Babic, Electrotechn. Faculty Zagreb, Yugoslavia
Special Session S5 : Testing Strategies for VLSI Circuits
Organizer and Chairman: J. Mucha, Universität Hannover, Hannover, FRG

Test Concepts for CMOS Gate Array Implementations
W. Görke, M. Merhöfer and W. Rosenstiel, Universität Karlsruhe, FRG

The History and Theory of Stuck at Fault
T.W. Williams, IBM Corporation, Boulder, Colorado, USA

E-Beam Testing Strategies for VLSI
B. Courtois, G. Berger-Sabbatel, IMAG, St. Martin d’Hères, France

Integrated Test System for Microelectronics
P. Das Gupta, M. Gerner, Siemens AG, München, FRG

Regular Session R4 : RC-ACTIVE FILTERS I
Chairman: M.S. Ghausi, Oakland University, Rochester, Mich., USA

Optimization and Properties of an Infinite - Q, RC-Active Cell Used in a Leapfrog Structure
J.C. Mouly, J. Neirynck, M. Hasler, Y. Zhang, Swiss Fed. Inst. of Techn., Lausanne, Switzerland

On the Design of High Frequency Active Filters
K. Mossberg, S. Signell, Royal Inst. of Techn., Stockholm, Sweden

Exact Design of SAB Filters with real Operational Amplifiers
B.D. Reljin, University of Belgrade, Yugoslavia

New General Biquadratic Active RC and Switched Capacitor Filters
P.V. Ananda Mohan, V. Ramachandran, M.N.S. Swamy, Concordia University, Montreal, Canada

Special Session S56 : INTEGRATED FILTERS
Organizer and Chairman: R. Schaumann, University of Minnesota, Minneapolis, Minnesota, USA

Experience with High - Frequency Gyrator Filters Including a New Video Delay-Line IC
K.W. Moulding and P.J. Rankin, Philips Research Lab, Surrey, England

Bipolar Integration of Analog Gyrator and Laguerre Type Filters (Transconductor-Capacitor Filters)
J.O. Voorman, W.H.A. Brüls and J.P. Barth, Philips Research Labs, Eindhoven, The Netherlands

Integrated Nonswitched Active RC Filters with Wide Dynamic Range
Y. Tsividis and M. Banu, Columbia University, New York, USA

Performance Characteristic of Switched Resistor Filters
R.L. Geiger and J. Bass, Texas A & M University, USA

Special Session S4 : Network Models for Biological Systems II
Organizer and Chairman: G. Moschytz, ETH, Zürich, Switzerland

A Network Model of the Middle Ear
A. Stirnemann, G.S. Moschytz, N.Dillier, ETH, Zürich, Switzerland

Electric Networks in the Simulation of Uptake, Distribution and Metabolism of Inhaled Vapors
J. Vlach, V. Fiserova-Bergerova, University of Waterloo, Canada/University of Miami, USA
Regular Session R 5 : LARGE NETWORK ANALYSIS
Organizer and Chairman: V. Zima, Czechoslovak Academy of Sciences, Prague

A Unified Decomposition Approach for Fault Location in Large Analog Circuits
J.A. Starzyk, A.E. Salama, J.W. Bandler, McMaster University, Hamilton, Canada

Special Techniques for Efficient Computer Aided Transient Analysis of Electrical Networks
A. Dabrowski, Technical University of Poznan, Poland

Qualitative Analysis of the Semi-State Model for Large Scale Systems
M.M. Milic, V.B. Bajic, University of Belgrade / Electronic Industry-FSU, Belgrade, Yugoslavia

On Application of Stochastic Control of Execution of Very Complex Deterministic Algorithms for
VLSI Design and Optimization Problems
D. Ilic, Ilic Computers Corporation, Rancho St. Fe, Calif., USA

Regular Session R 6 : MATHEMATICAL METHODS IN NETWORK THEORY
Chairman: J.W. Bandler, McMaster University, Hamilton, Ontario Canada

Algebra of Linear Reciprocal Four-Port
V. Zima, M. Vlcek, Czechoslovak Academy of Sciences / Technical University, Prague, CSSR

Truncation Errors in Certain Synthesis Methods Based on Mathematical Programming
A. Handkiewicz, Technical University of Poznan, Poland

Markov Parameter Characterization of the Strict Positive Problem
N. Hamada and B.D.O. Anderson, Keio University, Yokohama, Japan / Australian National University, Canberra, Australia

Centering Using the Modified Simplex Method
P. Pavlik, Tesla Electronics Research Institute, Prague, CSSR

Regular Session R 7 : ROUNGING NOISE AND LIMIT CYCLES IN DIGITAL FILTERS
Chairman: R. Vich, Czechoslovak Academy of Sciences, Prague, CSSR

Digital Filter Design with Low Roundoff Noise
J. Beiler, University of Stuttgart, FRG

On the Realization of Minimum Sensitivity and Minimum Roundoff Noise State-Space Discrete Systems
L. Thiele, TU Munich, FRG

A Method for the Determination of all Limit Cycles
E. Auer, University of Stuttgart, FRG

A New Coefficient Quantization Scheme to Suppress Limit Cycles in State-Variable Digital Filters
E.O. De Luca and G.O. Martens, University of Manitoba, Canada
Simple Evaluation and Optimization of Gain-Sensitivity Products in a Class of Active-RC Circuits:
A State-Space Approach
V. Tavsanoglu, c/o Prof. Saal, TU München, FRG

A New Multiparameter Sensitivity Measure and the Sensitivity Performance of Active Filters Derived from Passive Ladder Prototypes
M.S. Piedade and M.M. Silva, Centro Electronica Aplicada Lisboa, Portugal

Sensitivity Comparison of RC-Active Leapfrog and Multiple-Pole Cascade Filters
M. Biey, M. Hasler and J.C. Mouly, Politecnico di Torino, Italy/Ecole Polytechnique Federale de Lausanne, Switzerland/Instituto Electrotecnico Nazionale "Galileo Ferraris", Torino, Italy

Second Order Active R Filters with Zero Pole Q Sensitivities Due to Gain-Bandwidth Products
C. Acar and M.A. Tan, Technical University of Istanbul, Turkey

Radio-FM-IF-Filter Realized with RC-Lines in Thin-Film Technology
F. Zapf, Universität Stuttgart, FRG

Generating of Bandlimited FSK Signals by Quadrature Modulation
E. Klier, TESLA Strasnice, Prague, CSSR

Analysis and Design of a Totally Self-Checking Checker for a Linear Delta Modulation System
N. Kanopoulus and V. Makios, Research Triangle Institute, N.C./University of Patras, Greece

Numerical Demodulation of an FM Signal
T. Bilek, Czech Technical University, Prague, CSSR

Generalized Mean Filters: A New Class of Nonlinear Filters for Image Processing
A. Kundu, P.P. Vaidyanathan and S.K. Mitra, University of California, Santa Barbara, Calif., USA

Speech-Encoding by Voiceband-Inversion Using Switched-Capacitor Techniques
J.A. Nossek and H. Betzl, Siemens AG, München, FRG
Regular Session R 11: LAYOUT ALGORITHMS I
Chairman: I. Shirakawa, Osaka University, Suita, Osaka, Japan

On the Computational Complexity of an external Pin Assignment Problem
I. Shirakawa, S. Tsukiyama, T. Kimoto, Osaka University, Japan ........................................ 195

Hierarchical Wiring of Gate-Array VLSI Chip
M. Bursteln, R. Pelavin, IBM Yorktown Heights/University of Rochester, USA ......................... 198

On the Force Placement of Logic Arrays
K.J. Antreich, F.M. Johannes, K.M. Just, TU München, FRG ........................................... 203

Artwork Description for VLSI Layout Analysis and Design
W. Maly, Techn. University of Warsaw, Poland .................................................................

Regular Session R 13: NETWORK DECOMPOSITION
Chairman: A. Csurgay, Hungarian Academy of Science, Budapest, Hungary

A Decomposition Technique for Multiprocessing Solution of Load Flow Problems
R. Mota-Palomino, V.H. Quintana, University of Waterloo, Canada .................................... 207

Realization of N-Port Networks by Using Singular Value Decomposition
S. Osowski, Technical University of Warsaw, Poland ......................................................... 210

A Heuristic Algorithm for Tearing Large-Scale Networks
J. Rutkowski, Silesian Technical University, Gliwice, Poland ........................................... 213

Regular Session R 14: DIGITAL FILTERS I
Chairman: R. Boite, Faculte Polytechnique de Mons, Mons, Belgium

Antimetric Wave Digital Filters Derived from Complex Reference Circuits
K. Meerkötter, Ruhr-Universität Bochum, FRG ................................................................. 217

DTMF Band Split Filters Realized by Wave Digital Filters
L. Gazsi, H. Dawei, Ruhr-Universität Bochum, FRG .......................................................... 221

On the Implementation of Narrowband Wave Digital Filters
H. Eyssele, H. Göckler, ANT Nachrichtentechnik GmbH, Backnang, FRG ......................... 224

A Topological Formular for the Evaluation of the Transfer Function of Digital Filters
N. Fliege, TU Hamburg-Harburg, FRG ..............................................................

Special Session S 7: SC-FILTERS
Organizer and Chairman: G.C. Temes, University of California
Los Angeles, Calif., USA

A Precision Technique for Measuring Capacitor Array Ratio Errors
J.L. McCreary, Intel Corporation, Santa Clara, California, USA ........................................ 230

Properties and Analysis of Switched Capacitor Networks
Y. Tsididis and S.C. Fang, Columbia University, New York, USA ..................................... 233

Analysis of Nonideal SC-Filters with two Phases
G. Spahlinger, Universität Stuttgart, FRG ................................................................. 236
Regular Session R15: SPECIAL PURPOSE ANALOGUE CIRCUITS
Chairman: K. Mossberg, Royal Institute of Technology, Stockholm, Sweden

Effects of the Architecture on Noise Performance of CMOS Operational Amplifiers
B.J. Hosticka, W. Brockherde and M. Wrede, Universität Dortmund, FRG

New Families of RC-Oszillators
I. Haritantis, University of Patras, Greece

Sampling Multiplier in M.O.S. Technology
J.L. Huertas and A. Rodríguez-Vasquez, Universidad de Sevilla, Spain

Regular Session R16: NONLINEAR NETWORKS I
Chairman: L.O. Chua, c/o Technische Universität München, München, FRG

New Conditions for the Existence of the Normal Form for Nonlinear Circuits of Great Complexity
A. Ioanovici, The Weizmann Institute of Science, Rehovot, Israel

Analysis of Piecewise-Linear Resistive Networks Using Gauss-Seidel Method
M. Tadeusiewicz, Technical University of Lodz, Poland

On the Stability of Nonlinear Two-Port Amplifiers
A. Baranyi, J. Ladvansky, Research Institute for Telecommunication, Budapest, Hungary

Regular Session R12: LAYOUT ALGORITHMS II
Chairman: S. Tsukiyama, Osaka University, Suita, Osaka, Japan

Computational Geometry Approach to Wire Routing Design
T. Ohtsuki, Waseda University, Tokyo, Japan

A Rerouting Scheme for Single-Layer Printed Wiring Boards
I. Shirakawa and S. Futagami, Osaka University, Japan

On a Longest Path Algorithm and its Complexity if applied to the Layout Compaction Problem
W. Schiele, TU München, FRG

Regular Session R17: SYSTEM THEORY
Chairman: F. Reza, Concordia University, Montreal, Canada

Cepstral Analysis by Factorization of the Signal Z-Transform
R. Vich, Czechoslovak Academy of Science, Praha, Czechoslovakia

Spectral Approximation of a Continuous-Time Outer System
I. Widya, TNO-Groundwatersurvey, Delft, The Netherlands

On the Theory of AR-Spectral Approximation for Processes Containing Deterministic Signals
C.V.K. Prabhakara Rao and J. Helmond, Delft University of Technology, The Netherlands

Nonlinear Levinson Prediction Filter for Higher-Order Random Sequences
J. Zarzycki, Wrocław Technical University, Poland
Regular Session R 18 : IMPLEMENTATION OF DIGITAL SIGNAL PROCESSING
Chairman: J.O. Scanlan, University College, Dublin, Ireland

Digital Filter Structures with Parallel Arithmetic for Custom Designs
T. Noll and W. Ulbrich, Siemens AG, MUnchen, FRG

Development and Validation of Parallel Implementation of Algorithms
K. Kronlof, Helsinki University of Technology, Finland

Signal Processor Implementation of Modem Filters
T. Saramäki, Y. Neuvo, Tampere University of Technology, Finland and
H. Skogsrud, Norwegian Telecommunication Administration Research Establishment, Kjeller, Norway

Experimental Signal Processing and Development System
J. Skyttä, O. Hyvärinen, H. Hartimo and O. Simula, Helsinki University of Technology, Finland

Regular Session R19 : NOISE; SENSITIVITY AND PARASITICS IN SC-FILTERS
Chairman : H. Weinrichter, Technische Universität Wien, Austria

A Contribution to Noise Analysis of SC-Networks
G. Müller, ANT Nachrichtentechnik, Backnang, FRG

Noise Figures of Switched-Capacitor N-Path Filters
J.A. Nossek and H.Weinrichter, Technische Universität Wien, Austria

Frequency Limitations of SC Networks
G. Fischer, G.S. Moschytz, Eidgenössische Technische Hochschule ZUrich, Switzerland

Poles, Zeros and their Sensitivities in Switched-Capacitor Networks
R. Flodeck, J. Vlach and G.S. Moschytz, Eidgenössische Technische Hochschule ZUrich, Switzerland

Special Session S8 : FILTERS FOR OPTICAL COMMUNICATIONS I
Organizer and Chairman: G. Winzer, Siemens AG, MUnchen, FRG

Wavelength Division Multiplexing Systems - Present and Future
J. Minowa, Nippon Telegraph and Telephone Publ. Corp., Take, Japan

Losses and Crosstalk of WDM Components and Systems
A.M. Hill, British Telecom Research Labs, Ipswich, Suffolk, England

WDM Devices with Interference Filters
H.F. Mahlein, Siemens AG, MUnchen, FRG

Special Session S 10 : ANALYSIS AND SYNTHESES OF SPEECH I
Organizer and Chairman : P. Dewilde, Technische Hogeschool Delft, Delft, The Netherlands

New Directions in Speech Coding at Low Bit Rates
B.S. Atal, Bell Laboratories, Murray Hill, New Jersey, USA

On the Generalized Schur Positivity Test and Levinson Recursion
P. Delsarte, Y. Genin, Y. Kamp, Philips Research Laboratory, Brussels, Belgium

From the Algorithm to the Chip : A Case Study of a Speech Recognition Word Detector
P. Frison and P. Quinton, IRISA, c/o Prof. Benveniste, Univ. de Beaulieu, Rennes, France
Special Session S 12 : LAYOUT FOR GATE ARRAYS
Organizer and Chairman: D.A. Mlynski, Universität Karlsruhe, FRG

Automatic Routing of Gate arrays
M. Wiesel, Bell Laboratories, Murray Hill, USA ........................................ 328

Aulis-Automatic Placement and Routing of Gate Arrays
A. Völker, F. Opitz, Siemens AG, München, FRG ........................................ 331

Computer Aided Layout for Single Layer Gate Arrays
M. Moullion, Mikron, Eching bei München, FRG ........................................ 338

Regular Session R 20 : TIME VARYING NETWORKS
Chairman : R.D. Horvath, University of Belgrade, Yugoslavia

A Study of Transient Processes and Parametric Resonance in the Circuits with Varying Parameters
P.M. Kolesnikov, BSSR Academy of Sciences, Minsk, USSR ........................................ 343

Sparse Matrix Frequency Analysis of the Linear Time-Varying Networks
Z.S. Musialowski, Technical University of Wrocław, Poland ........................................ 346

Regular Session R 21 : DIGITAL FILTERS II
Chairman : J.Gensel, Leipzig, GDR

On the Quantization of Low-level Signals : The Fixed Point Case
R. Boite, Faculté Polytechnique de Mons, Belgium ........................................ 349

Design of Recursive Digital Filters Through the Use of Discrete Exponentials
A.I. Saleh and M.F. Fahmy, University of Assiut, Egypt ........................................ 352

1-D and 2-D Stable Digital Filters with Zero Magnitude Sensitivity in Attenuation Zeros
M. Domanski, Technical University of Poznan and M. Piekarski, University of Wrocław, Poland ........................................ 355

All Digital N-Path Filter
S.K. Mitra, University of California, St. Barbara, USA and K.Hirano, Kobe University, Japan ........................................ 358

Regular Session R 22 : DESIGN OF SC-FILTERS II
Chairman : G. Müller, ANT Nachrichtentechnik GmbH, Backnang, FRG

Design of Switched-Capacitor Bandpass, Lowpass and Highpass Filters Derived from LC-Ladder Filters
K. Haug, ANT Nachrichtentechnik GmbH, Backnang, FRG ........................................ 362

A Family of Switched-Capacitor Phase-Locked Loops
J.J. Mulawka, A. Pakulak, Technical University of Warsaw, Poland ........................................ 366

Time-Shared Differential Switched-Capacitor Amplifying Stage
F. Montecchi, Università di Pavia, Italy ........................................ 369

Time-Domain Equivalent Circuits for Switched-Capacitor Circuits
A.E. Sen, Technical University of Istanbul, Turkey ........................................ 372

Scymbal 2 : A Portable Computer Program for Efficient All-Symbolic Hierarchical Analysis of Large Multiphase Switched-Capacitor Networks
A. Konczykowska and M. Bon, Centre National de Télécommunication, Bagneux, France ........................................ 375
Special Session S 9 : FILTERS FOR OPTICAL COMMUNICATIONS II
Organizer and Chairman: G. Winzer, Siemens AG, München, FRG

Wavelength Division Multiplexer with Diffraction Grating
J.-P. Laude, JOBIN-IVON, Longjumeau, France ........................................ 379

Selective Multiwavelength Sources and Detectors
S. Sakai, Nagoya Institute of Technology, Nagoya, Japan ............................ 384

Planar and Integrated Multi- and Demultiplexers
H.-G. Unger, Technische Universität Braunschweig, FRG ............................... 387

Special Session S 11 : ANALYSIS AND SYNTHESIS OF SPEECH II
Organizer and Chairman: P. Dewilde, Technische Hogeschool Delft,
Delft, The Netherlands

On the Design of LPC Vocoders with Multi-Pulse Excitation
P. Kroon and E.F. Deprettere, Technische Hogeschool Delft, Delft, The Netherlands ........ 390

Quotient-Difference Relations in Connection with AR Filtering
A. Bultheel, Katholieke Univ. Leuven, Heverlee, Belgium ............................ 395

Orthogonal Filters: Pipelining and VLSI Implementation
P. Dewilde, Technische Hogeschool Delft, Delft, The Netherlands ..................... 400

Special Session S 13 : STATISTICAL OPTIMIZATION
Organizer and Chairman: R. Spence, Imperial College of Science and Technology, London, England

Optimization by Simulated Annealing
S. Kirkpatrick, IBM Thomas J. Watson Research Center, Yorktown Heights, N.Y., USA........

A New Convergent Cut Algorithm for Convex and Nonconvex Design Centering Problems with Fixed Parameter Tolerances
E. Wehrhahn, TE KA DE Fernmeldeanlagen, Nürnberg, FRG ........................... 405

A General Approach to Statistical Circuit Design
K.J. Antreich, J. Armaos, Technische Universität München, FRG ........................ 409

Regular Session R 23 : ANALOG ACTIVE FILTERS
Chairman: R. Saal, Technische Universität München, FRG

Analog Active Filters - Past, Present and Future
M.S. Ghausi, Oakland University, Rochester, Mich., USA.................................

Regular Session R 24 : NONLINEAR NETWORKS II
Chairman: R. Saal, Technische Universität München, FRG

New Breakthroughs in Nonlinear Circuits
L.O. Chua, Technische Universität München, FRG......................................... 413
Regular Session R 25 : SPECIAL DIGITAL FILTERS
Chairman : A.N. Venetsanopoulos, University of Toronto, Canada

Discrete Coefficient Optimization for the CAD of Arbitrary Integrated Digital Filters
R. Jain, J. Vandewalle, H. de Man, Katholieke Universiteit Leuven, Heverlee, Belgium...

Minimization of the Number of Additions in Digital Filters without Multipliers
K. Hifer, Universität Stuttgart, FRG ....................................................

Efficient Microprocessor-Based Linear-Phase FIR Filters for ECG-Signal Processing
K.-P. Estola, T. Saranahki, J. Malmivuo, Tampere University of Technology, Finland......

Z-Domain Matrix Analysis of Nonuniformly Sampled Data Processing by Digital Filters
A. Wojtkiewicz and M. Tuszynski, Technical University of Warsaw, Poland ............

Special Session S 14 : SIMULATION AND ANALYSIS TECHNIQUES FOR VLSI-CIRCUITS
Organizer and Chairmen: A. Ruehli, IBM Thomas J. Watson Research Center,
Yorktown Heights, N.Y., USA and C.-H. Carlin,
Ecole Polytechnique Federale de Lausanne, Switzerland

A New Multilevel Simulation Program for Large Systems Based on Piecewise-Linear Modelling
J.T.J. vanEindhoven and J.A.G. Jess, Technische Hogeschool Eindhoven, The Netherlands...
J.A.M. Brooijmans, H.O. Koopmans, A. Martin

Guided Mixed-Mode Circuit-Timing simulation Based on Dynamical Decomposition
H. de Man, Ph. Reynaert, I. Bolsens, Katholieke Universiteit Leuven, Heverlee

Analysis Programs for Analog Circuits and Systems
E. Lindberg, Technical University of Denmark, Lyngby, Denmark........................

The Waveform Relaxation Method for Large Scale Circuits Analysis
A. Ruehli, F. Odeh, IBM T.J. Watson Research Center, Yorktown Heights, N.Y., USA and
C.-H. Carlin, Swiss Federal Institute of Technology, Lausanne, Switzerland ............

Regular Session R 26 : MULTIDIMENSIONAL DIGITAL FILTERS
Chairman : S.K. Mitra, University of California, St. Barbara, USA

Necessary and Sufficient Conditions for 2-D Discrete Scattering Hurwitz Polynomials
S. Basu, Stevens Institute of Technology, Hoboken, N.Y., USA and
A. Fettweis, Ruhr-Universität Bochum, FRG ........................................

General Decomposition of Two-Dimensional Filter
A.N. Venetsanopoulos and B.G. Mertzios, University of Toronto, USA..................

Memory-Oriented Realization of 2-D Digital Filters
G.L. Sicuranza, Università degli Studi di Trieste, Italy...........................

On the Construction of Two-Dimensional Digital Filters by Fast Hademard-Haar Hybrid Transforms
A. Drygajlo, J. Ihnatowicz, Silezian Technical University Gliwice, Poland.............
Special Session S15: MODELING OF SYSTEMS
Organizer and Chairman: A. Csurgay, Hungarian Academy of Science, Budapest, Hungary

Fundamental Limits in Large-Scale Circuit Modelling
A. Csurgay, Hungarian Academy of Science, Budapest, Hungary

Complexity of Digital Simulators Used for the Analysis of Large-Scale Circuit Dynamics
T. Roska, Hungarian Academy of Science, Budapest, Hungary

Special Session S16: APPROXIMATION I
Organizer and Chairman: R. Unbehauen, Universität Erlangen-Nürnberg, Erlangen, FRG

Approximation Problems in Circuit-Design - a Survey
W. Hohneker, H. Kicherer, R. Unbehauen, A. Wüpper, Universität Erlangen-Nürnberg, Erlangen, FRG

Survey of CAD Optimization Software for Solving Circuit Design Problems in the Minimax Sense
J.W. Bandler, McMaster University, Hamilton, Ontario, Canada
W. Kellermann, W.M. Zuberek

On the Method of Partial Approximation for High Q Stages
I. Filanovsky, K.A. Stromsmoe, The University of Alberta, Edmonton, Canada

Minimum Phase Lowpass Transfer Functions with Flat Group Delay and Equiripple Amplitude
S.C. Dutta Roy, P. Varanasi, Indian Institute of Technology, New Delhi, India

Regular Session R27: DEVICE MODELS
Chairman: H. de Man, Katholieke Universiteit Leuven, Heverlee, Belgium

Delay Management Algorithms for Digital Filter Implementations
L. Claesen, H. de Man, J. Vandewalle, Katholieke Universiteit Leuven, Heverlee, Belgium

Accurate CMOS Models for Event Driven Logic Simulator
R. Sundblad and C. Svensson, Linköping Institute of Technology, Sweden

A Determination of the SPICE-BJ1-Parameters for Small and Medium Bias Currents
F. Sischka, Universität Stuttgart, FRG

An Operational Amplifier Macromodeling with Application to NAP2
A. Napieralski, Technical University of Lodz, Poland

A Model for Resistors with Distributed Capacitance in High Speed Integrated Circuits
A.Z. Incecik, P. Sehrig, Siemens AG, München, FRG

Regular Session R28: RC-ACTIVE FILTERS II
Chairman: J. Oslowski, Politechnika Warszawska, Poland

Realization of Second Order Voltage Transfer Functions by DVCCS-Operational Amplifier - RC Circuit with Low Gain-Sensitivity Products
V. Tavsanoglu, c/o Prof. Saal, Technische Universität München, FRG

A Method for RC Active 2-Port Synthesis of an Arbitrary Transfer Function
J.A. Deboz, Poznań Technical University, Poland
A New Class of High-Q Active Filters with Three Operational Amplifiers
M.V. Popovich and V.B. Misic, University of Belgrade, Yugoslavia .................. 532

A Comparison of Four Active Network Realizations of a 12th-Order Bandpass Filter Function
S. Fotopoulos, T. Deliyannis, A. Drossopoulos, University of Patras, Greece .......... 504

Special Session S18: Frequency Stability in Communication Systems
Organizer and Chairman: V.F. Kroupa, Institute of Radio Engineering and Electronics, Praha, Czechoslovakia

Frequency Stability Required by Modern Communication Systems
V.F. Kroupa, L. Sojdr, Institute of Radio Engineering and Electronics/Tesla - Research Institute of Radiocommunication, Praha, Czechoslovakia .......... 507

Cavity Stabilization Techniques for Diode and FET Oscillators
A. Jacob, K. Schünemann, Technische Universität Braunschweig, Braunschweig, FRG ........ 510

Methods for Measurement of Frequency Stability: State of the Art and Recent Progress
J. Gros/Lambert, Laboratoire de Physique et Métrologie des Oscillateurs, Besancon, France...
D. Fest, M. Olivier, J. Herdin

Calculation and Measurement of Phase Noise in Synthesizers for Communications and Radar Applications
M. Lewis, Microwave Associates, Dunstable, England .......................... 531

Signal Processing for the Digital Audio Console
P.S. Lidbetter, Neve Electronic Laboratories, Royston, Herts., England .............. 535

Principles, Applications and Implementation of Digital Sampling Frequency Converters
R. Lagadec, Willi Studer, Regensdorf, Switzerland .................................. 540

Design and Measurement of a to d and d to a Conversion Systems for Digital Audio
R. Lagadec, D. Pelloni and M. Schneider, Willi Studer, Regensdorf, Switzerland .... 543

Wordfit: A Digital Signal Processing System for Automatically Synchronizing Two Similar Speech Signals

Special Session S17: APPROXIMATION II
Organizer and Chairman: R. Unbehauen, Universität Erlangen-Nürnberg, Erlangen, FRG

A Double Approximation Approach to Minimum Phase Transversal Filters and its Application to a New Structure of Recursive Filter Realization
G. Simon, Technical University of Budapest, Hungary .......................... 549

On the Generation and Approximation of Positive Operators
F. Reza, Concordia University, Montreal, Quebec, Canada .......................... 552

A Unified Approach for IIR Digital Filter Design
Y. Neuvo, T. Saramäki, Tampere University of Technology, Finland .................. 557
