# Table of contents

Foreword \hfill IX
Preface \hfill XI

## 1 Mine management and economics

- Coal quality and inventory tracking system at the Lee Ranch Mine
  
  *B.D. Hansen*
  
  Page 3

- Quick-Calc, high technology and common sense for coal operations
  
  *Phil N. Bradbury*
  
  Page 11

- Development of a total maintenance system on a personal computer
  
  *J.W. Kupfner*
  
  Page 15

## 2 Surface mining I

- A micro-computer simulator for mountaintop removal mine planning and design
  
  *M.L. Smith, Z. Luo & E. Topuz*
  
  Page 23

- A review of on-board truck management systems
  
  *V. Srajer*
  
  Page 29

- Optimization of bucket wheel excavator and pit parameters in application to overburden stripping
  
  *Jan K. Wolski*
  
  Page 43

## 3 Geology and exploration

- West Virginia Geological and Economic Survey's Coal Sourcing Program: Helping consumers find 'The right coal'
  
  *Carl J. Smith, Gayle H. McColloch, Jr., Michael E. Hohn, Kenneth C. Ashton & Hobart M. King*
  
  Page 59

- Expert reasoning models applied to mine geologic data
  
  *Roger L. King*
  
  Page 65

## 4 Mine safety and ventilation

- ADA (Accident Data Analysis): A tool to improve mine safety
  
  *E.T. Bowers*
  
  Page 73
Ventilation teaching and research using a computerized scale model

J.C. Tien

The nodal method for calculating ventilation network

Lu Songtang

5 Information systems

Geographic information systems: A computer technology for the coal industry

C.G. Treworgy & M.H. Bargh

Cooperative research in the development of a safety information system

Dave Kessler, Mark Scott, William J. Wiehagen & John Grasso

6 Surface mining II

Optimization of loading and hauling operations in surface mining

Raj K. Singhal & Kostas Fytas

Computerized sizing of mobile bulk handlers

G.T. Lineberry & J.L. Gallimore

7 Blasting

The use of computer blast simulations to evaluate the effect of angled holes in cast blasting

R.F. Favreau & David Lilly

Explosive casting blast round design

R.R. Rollins & R.W. Givens

8 Coal preparation

COALPROM – A coal preparation plant simulation

Eugene C. Hise & Vanston R. Brantley

Optimization of coal or mineral circuits

A.I.A. Salama & M.W. Mikhail

9 Ground control and rock mechanics

Computerized evaluation of the impact of ground control and economics on the extraction of coal mine pillars

A. Kumar, C. Haycocks & A. Unal

Development and performance of a microcomputer-based digital data acquisition system for use in a rock mechanics laboratory

Marek Mrugala, Robert M. Belesky, H. Reginald Hardy, Jr. & Paul L. Marcuzzo, Jr.

Practical application of MULSIM/BM for improved mine design

Les A. Beckett & Rudy S. Madrid
