Proceedings of

THE 12th SYMPOSIUM ON
ULTRASONIC ELECTRONICS

Tokyo, December 2–4, 1991

Sponsored by
The Japan Society of Applied Physics
CONTENTS

Invited Papers

Tunneling Acoustic Microscopy .............................. Keiji TAKATA 3
Antipolarity Domains Formed by Heat Treatment of Ferroelectric Crystals and Their Applications ........................ Kiyoshi NAKAMURA 9

Physical Acoustics

Elastic Constants of a Cubic Crystal Grown in a High-Pressure Diamond Anvil Cell ................................. Shigeo SASAKI, Satoru KATOH and Hiroyasu SHIMIZU 17
Effect of Ultrasonic Vibrations on the Growth of InxGa1-xSb Mixed Crystals (III) ................................. Takuya TSURUTA, Keiichi YAMASHITA, Satoshi ADACHI, Yasuhiro HAYAKAWA and Masashi KUMAGAWA 23
Ultrasonic Study of Sub β Relaxation in Epoxides Cured with Aliphatic Diamines ................................. Yoshihiko KANEMITSU, Hiroyuki NABETA, Hitoshi MATSUÉ, Aishi YAMAMOTO, Yoshihiko NAGATA, Kazushi YAMANAKA, Toshiro KODA and Yasuaki MASUMOTO 29
Photoacoustic Characterization of Semiconductors Heterostructures ................................. Yoshihiko KANEMITSU, Hiroyuki NABETA, Hitoshi MATSUÉ, Aishi YAMAMOTO, Yoshihiko NAGATA, Kazushi YAMANAKA, Toshiro KODA and Yasuaki MASUMOTO 29
X-Ray Photoacoustic Spectroscopy of CuCl, CuBr, and CuI ................................. Taro TOYODA, Tsutomu MASUJIMA, Hideaki SHIWAKU and Masami ANDO 32
Simulated Heat Conduction in Toda Lattices with Inhomogeneous Mass Distribution ................................. Norihiko NISHIGUCHI, Naoki TAKAHASHI and Tetsuro SAKUMA 35
Thermal Diffusivity of Semiconductors Evaluated by Differential PPE Method ................................. Jun MORIMOTO, Yoichi OKAMOTO and Toru MIYAKAWA 38
Measurement of Elastic Moduli by Rectangular Parallelepipeds Resonance Method ................................. Masahiro INOHARA, Masamoto TANAKA, Misao HASHIMOTO and Tetsuro SUZUKI 41
Velocity of Sound in and Elastic Properties of Rb2O·B2O3 Glasses ................................. Masao KODAMA 44
Behavior of Dislocation Core in AgCl Single Crystals ................................. Hiroto TATENO, Koushi KAWAGOE, Akira FUKAI and Youichiro IWASHITA 47
Study on Orientational Motion of Liquid Crystals by Acoustically Induced Birefringence ................................. Shinobu KODA, Takahiro KOYAMA, Yuji ENOMOTO and Hiroyasu NOMURA 51
Measurements of Gel Rigidity Using Surface Waves ................................. Pak-Kon CHOI 54
Mechanical Properties of Chemical Gel In a Low Frequency Range ................................. Toshiaki MIURA and Hajime TANAKA 57
Study of Ultrasonic Behavior of Salol near Melting Point Using Interior Transducer-Type Cell ................................. Hiroaki KAMIOKA 60
Computer Simulation of Phonon Conduction in Langmuir-Blodgett Films ................................. Satoru OZAWA and Yosio HIKI 63
Critical Acoustic Anomaly of a Binary Mixture of Nitroethane and Cyclohexane with Acetone Impurity in the Frequency Range of 0.3–3 MHz ................................. Naoki INOUE, Yuichiro MURAKAMI, Masahiko KATO, Takahi HASEGAWA and Kiichiro MATSUZAWA 66
Optical Beating Brillouin Spectroscopy ................................. Tatsuro MATSUOKA, Keiji SAKAI and Kenshiro TAKAGI 69

Ultrasonic Measurement

Measurement of Sound Velocity in Liquid Using Frequency Sweeping-Interdigital Transducer ................................. Akihiro SAWAGUCHI and Kohji TODA 75
Liquid Sensor Using Two-Port Surface Acoustic Wave Resonator
Tooru Nomura, Tsutomu Yasuda and Shoji Furukawa 78

Measurements of Conductivity and pH of Liquid Using Surface Acoustic Wave Devices
Jun Kondo and Showko Shiokawa 82

Laser Picosecond Acoustics in Various Types of Thin Film
Oliver B. Wright, Takao Hyoguchi and Katsuhiro Kawashima 85

Excitation of Hypersonic Waves at Metal/Liquid Interfaces Using Transient Reflecting Gratings
Akira Harata and Tsuguo Sawada 88

Application of Laser-Induced GHz Surface Acoustic Waves to Evaluate Ion-Implanted Semiconductors
Hiroyuki Nishimura, Akira Harata and Tsuguo Sawada 91

Studies on Material Evaluation of Metals by Ultrasonic Spectrum Method
Katsuhiko Honjo, Jun-ichi Masuda and Yoshikazu Sudo 94

Application of Scanning Single-Pulse Ultrasonic Spectroscopy to Structural Evaluation of CFRP
Hirotaka Okabe, Selji Taki and Kazumi Matsushige 96

Effective Range of Observable Depth by Electron-Acoustic Microscopy Using Two-Phase Electron Acoustic Signals
Hirosi Takenoshita and Masahiro Managaki 99

Reconstruction of Acoustic Impedance Distribution of Functionally Gradient Materials by Using Reflection Impulse Response
Osamu Kuwahara, Ning Wang and Sadayuki Ueha 102

Measurement of Piezoelectric Vibration Using Optical Fiber
Michio Ohki, Naomi Shima and Tadashi Shiosaki 105

Measurement Method for Acoustic Nonlinearity Parameter of Small Volume Samples Using a Focused Gaussian Beam
Shigemi Saito 108

Acoustic Characteristics of Marine Sediment Model with Partial Gas Saturation
Masao Kimura 111

Experimental Studies on Ultrasonic Measurements of Scattering Media by Using Wavelet Transform
Tsuneo Ikuchi and Sojun Sato 115

Ultrasonic Measurement of Cylindrical Objects Making Use of Ray Tracing
Keinosuke Nagai and Fumio Aoki 118

Detection of Compressed Pulse Signals by Processing Energy Distribution Ratio
Genta Shinohara and Toyoki Sasakura 121

Extenive Doppler Method for Single Component Doppler Signal
Naohiko Tanaka, Shigeo Ohtsuki and Motonao Tanaka 125

Sound Propagation on a Concave Cylindrical Impedance Boundary
Toyohiko Ishihara and Ryogo Tatsumi 128

Multiple Scattering and Acoustic Shielding Effect of Parallel Pipes in Water
Kazuhiro Ohashi, Toshiaki Ikuchi, Akio Hasegawa and Toshiyuki Nakanishi 131

Sound Scattering of Plane Wave by a Transverse Isotropic Cylinder
Ning Wang and Sadayuki Ueha 134

Influence of Acoustical Ray and Diffracted Ray on Sound Field in an Underwater Bilinear Surface Duct
Kouji Ohshima and Toyohiko Ishihara 137

Photoacoustic Spectroscopy and Ultrasonic Imaging
Examination of the Fidelity of Acoustic Phase Conjugate Waves Using Schlieren Visualization Technique
Masahiro Ohno 143

Detection and Imaging of Subsurface Microcracks in Silicon Wafers Using Photoacoustic Microscope
Toshihiko Nakata, Yukio Kembo, Takehiko Kitamori and Tsuguo Sawada 146

Development of Scanning Photoacoustic Microscope
Yoshiaki Tokunaga and Akiyuki Minamide 149

Influence of Piezoelectric and Pyroelectric Effects on Signal of PAS Using a Transparent Transducer
Susumu Horita, Takeshi Saikawa and Tomonobu Hata 152

Optical and Thermal Evaluation of Semiconductor by Differential Photothermal Deflection Spectroscopy
Tomonobu Hata, Masahiko Ishimaru and Susumu Horita 155

Photoacoustic Flowcell Using Acoustic Resonance
Yukito Tabuchi and Toshiyuki Matsunaga 158

Determination of Sound Velocities by High Frequency Complex V(z) Measurement in Acoustic Microscopy
Tomio Endo, Yasuo Sasaki, Takeshi Yamagishi and Mitsugu Sakai 160

Acoustic Properties of Plastics for Applications to Probes of an Ultrasonic Diagnostic Instrument
Toshio Kondo, Shinji Kishimoto and Yutaka Sato 163
Tissue Hardness Measurement Using Ultrasonic Radiation Force—Theoretical Derivation of Tissue Hardness from the Relaxation Curve—

Tsuneyoshi Sugimoto, Sadayuki Ueha and Kouichi Itoh 166

A Simulation Model for B-Mode Imaging

Masahiko Hashimoto, Shin-ichiro Ueno, Tsutomu Yano, Jun-ichi Satoh and Masami Kawabuchi 169

A Dual Frequency Ultrasonic Probe

Shiho Saitoh and Mamoru Izumi 172

Diffraction Tomography from Data Collected with Transducer and Receiver Scanned Simultaneously

Keinosuke Nagai, Tomoki Yokoyama and Wein CaU 175

SAW and Communication Device

Load Resistance Characteristics of LiNbO3 Piezoelectric Transformers

Masaji Sato, Masanori Ueda, Hiroshi Hasegawa and Noboru WakeSuki 181

A Design Method for Micro-Mechanical Filters with Quarter Wavelength Elements

Hiroaki Satoh 184

Optimum Electrode Design for Effective Excitation of the Edge Mode by Taking Account of Its Electric Potential Distribution

Hiroshi Watanabe, Hironobu Saito and Hiroshi Shimizu 187

A Miniaturized Face Shear Mode Quartz Crystal Resonator

Hirofumi Kawashima and Masaru Matsuyama 190

Fundamental Equations of Electro-Acoustic Conversion for an Interdigital Surface-Acoustic-Wave Transducer by Using Force Factors

Toshihiro Kojima and Tatsuo Suzuki 194

Control of Second Order Temperature Coefficient of SAW Propagating in Thin Film Layers

Yasuhiro Nakagawa, Toshimaro Yoneda, Kazuhiro Hasegawa and Keiko Hosaka 198

An Ultrasonic Method of Constructing a Differential Phase Shift Keying System

Toshio Ikeda, Tadaaki Uchida and Kohji Toda 201

Development of Diagnosis System for SAW Devices Based upon Spectrogramme Analysis

Masakazu Koike, Jun-ichi Shikawa, Ken-ya Hashimoto and Masatsune Yamaguchi 204

Theoretical Evaluation of SAW Velocity Measured by Divergent-Beam Ultrasound Transducers

Ken Yamada, Masaru Sasaki and Kiyoshi Nakamura 207

Characteristics of Leaky Surface Waves Propagating on LiTaO3 Substrate

Kouichi Yamamoto, Masao Murota and Yasutaka Shimizu 210

An Analysis of Surface-Acoustic-Wave Devices on Layered Substrates

Masanori Koshina and Kazuhiro Ohbuchi 213

Lamb Wave Devices Employing ZnO-Film/Al-Foil Composite Structure

Velayutham Rajendran, Masakazu Koike, Ken-ya Hashimoto and Masatsune Yamaguchi 216

Ceramic Resonators Using BGS Waves

Michio Kadota, Kazuhiko Morozumi, Toshiaki Ikeda and Toru KASANAMI 219

IIDT Type Low-Loss SAW Filters Using Withdrawal-Weighted Transducers

Hiromi Yatsuda, Yoshihiko Takeuchi, Taira Horishima and Kazuo Yamashita 222

Ion Polishing of ZnO Films by an ECR System

Michio Kadota, Makoto Minakata and Toru KASANAMI 224

WDM Optical Switching Characteristics in Collinear Acousto-Optic Module for Photonic Switching System

Nobuo Goto and Yasumitsu Miyazaki 227

Magneto-Optic Devices using Interaction between Magnetostatic Surface Wave and Optical Guided Wave

Kazuo Hasegawa and Yasumitsu Miyazaki 230

Note on Shimizu-Saito’s Tracking Methods

Shigeo Hayashi and Yukihiko SASAKI 234

Ultrasonic Motor, Actuator and Transducer

An Encoder-Less Ultrasonic Stepping Motor Using Open-Loop Control System

Chiharu Kusakabe, Yoshiro Tomikawa, Takehiro Takano and Kenetsu Narita 239

Resonant Frequency Deviation of Ultrasonic Flat Motor Caused by Rotor Pressure

Tamotu IIJIMA, Kazuhide Sano, Isao Shibata, Yasuhiro Nakagawa and Hiroshi Ito 242

Ultrasonic Rotary Motor Using a Longitudinal-Torsional Vibration Converter

Jiromaru Tsujino and Masanobu Takeuchi 245

Revolution Speed Characteristics of an Ultrasonic Motor Estimated from the Pressure Distribution of the Rotor

Hiroshi Hirata and Sadayuki Ueha 248
Inspection of Rotor and Stator Vibration of the Ultrasonic Motor Using Longitudinal and Torsional Vibrations .......................... Manabu Aoyagi and Yoshiro Tomikawa 251
Development of Fast and Fine Position Control System of an Ultrasonic Motor .......................................................... Seiji Aoyagi, Takahiro Oda, Yoshitsugu Kamiya and Sakiichi Okabe 254
Excitation of an Asymmetric Displacement without Residual Vibration and its Application to Construct a Piezoelectric Actuator ................. Yoshiro Tomikawa, Chiharu Kusakabe, Manabu Aoyagi and Takehiro Takano 257
Piezoelectric Actuator and Step-Up Voltage Circuit for an Optical Switch .......................................................... Masanori Ueda, Hisashi Sawada, Hiroshi Hasegawa and Noboru Wakatsuki 260
Development of Powerful Airborne Ultrasonic Transmitter for Robot Metrology .......................................................... Seiji Aoyagi, Yoshitsugu Kamiya and Sakiichi Okabe 263
Frequency Response of a Piezoelectric Polymer Film Hydrophone and an Elastic Wave Induced on the Backing Surface .................................. Yasuhiro Nakamura and Takahiko Otani 266
Improvement of the Sensitivity of a Polarimetric Heterodyne Fiber-Optic Underwater Acoustic Sensor .................. Osamu Sugiyama, Sumio Takahashi, Toshiki Kikuchi, Koichi Hirama and Masahiro Seya 269
A Miniature Hydrophone for High Acoustic Pressures ........................................ Naoto Inose and Masao Ide 272
Effect of Radiation Impedance of Arrayed Transducers in Water on Radiated Sound Field .................................. Satoshi Yoshii, Akio Hasegawa and Tosiaki Kikuchi 274
Wide Band Receiving Characteristics of Piezo-Rubber Hydrophone .................................................. Kohji Ogura, Masahiro Nishiki and Hisao Banno 278
Transmitting and Receiving Voltage Sensitivity for Piezoelectric Rubber Transducers on a Plate .................. Hiroshi Uchida, Toshiaki Kikuchi, Akio Hasegawa and Sumio Takahashi 281
Analysis of MSW Transducer Electrode Design by Use of Weighting Functions .................................. Takuro Koike and Masashi Miyahara 284
Ultrasonic Welding of Thin Metal Plates Using a Complex Vibration Welding Tip .................................. Jiromaru Tsujino, Tetsugi Ueoka, Hiroyuki Konda and Yusuke Kimura 287
Ultrasonic Vibration Press of Powder Using 20 kHz Upper and Lower Vibration Punches and a Vacuum Compacting Die .................................. Jiromaru Tsujino and Haruo Suzuki 290
