CONTENTS

Contributors ix
Preface xiii

1. Wnt Ligands as a Part of the Stem Cell Niche in the Intestine and the Liver 1
Bahar Degirmenci, George Hausmann, Tomas Valenta, Konrad Basler
1. Introduction 2
2. An Overview of Wnt Signaling 2
3. The Intestine 4
4. The Liver 10
5. Concluding Remarks 13
References 14

2. Wnt Signaling in Adult Epithelial Stem Cells and Cancer 21
Si Hui Tan, Nick Barker
1. Introduction 22
2. Gastrointestinal Stem Cells and Cancer 27
3. Skin Stem Cells and Cancer 48
4. Liver Stem Cells and Cancer 57
5. Concluding Remarks 62
References 64

3. Wnt Signaling in the Central Nervous System: New Insights in Health and Disease 81
Carolina A. Oliva, Carla Montecinos-Oliva, Nibaldo C. Inestrosa
1. Introduction 82
2. Wnt Expression in the Postnatal and Adult CNS 89
3. Wnt Function in the Developing and Mature CNS 92
4. Wnt Effect in Neuronal Processing 100
5. Wnt Signaling Dysfunction in Neurodegeneration and Mental Disorders 104
6. Concluding Remarks 118
References 118
### 4. Of Wnts and Ribosomes

_Astrid S. Pfister, Michael Kühl_

1. Introduction 132
2. Target Genes of Wnt Signaling Involved in Ribosome Biogenesis 139
3. Regulators of Ribosome Biogenesis and Nucleolar Factors as Modifiers of Wnt Signaling 144
4. Noncanonical Wnt Signaling Regulates Nucleolar Size 146
5. Wnt Regulates Ribosome Composition 146
6. Closing Remarks 147
References 148

### 5. Wnt Signaling in Skeletal Muscle Development and Regeneration

_Francesco Girardi, Fabien Le Grand_

1. Wnt Signaling Pathways 158
2. Skeletal Muscle Development 159
3. Wnt Signaling in Skeletal Muscle Development 161
4. Skeletal Muscle Regeneration 164
5. Wnt Signaling in Skeletal Muscle Regeneration 165
6. Control of Myofiber Typing by Wnt Signaling 169
7. The Crosstalk Between Wnt and TGFβ Signaling in Skeletal Muscle 170
8. Wnt Signaling Implications in Muscular Disease and Treatment 172
9. Concluding Remarks and Outstanding Questions 173
Acknowledgments 175
References 175

### 6. Wnt Signaling in Kidney Development and Disease

_Yongping Wang, Chengji J. Zhou, Youhua Liu_

1. Introduction 182
2. Wnt Signaling: Components and Routes 183
3. Wnt Signaling and Kidney Development 185
4. Wnt Signaling and Kidney Diseases 194
5. Conclusions 200
Acknowledgments 200
References 201

### 7. Wnt Signaling in Stem Cells and Cancer Stem Cells: A Tale of Two Coactivators

_Michael Kahn_

1. Introduction 210
2. Wnt Signaling Pathways in Stem Cell Biology 210
10. **The Central Role of Wnt Signaling and Organoid Technology in Personalizing Anticancer Therapy** 299
   Elizabeth Vincan, Renate H.M. Schwab, Dustin J. Flanagan, Jean M. Moselen, Bang M. Tran, Nick Barker, Toby J. Phesse

   1. Introduction 300
   2. Wnt Signaling Pathway 301
   3. Organoids Derived from Adult Epithelium 303
   4. Organoids Derived from Patient Tumors 306
   5. Modeling Dormant Tumor Cells: The Next Frontier for Tumor Organoids 309
   6. Conclusions 313
   Acknowledgments 314
   References 314

11. **Wnt Signaling in Hematological Malignancies** 321
   Stephanie Grainger, David Traver, Karl Willert

   1. Hematopoietic Stem Cell (HSC) Development 322
   2. HSC Homeostasis 323
   3. Wnt Signaling 323
   4. Wnt in HSC Development and Homeostasis 326
   5. Wnt Signaling in Leukemia 328
   6. Wnt Signaling in Lymphoma 331
   7. Wnt Signaling in Myeloma 332
   8. Conclusions and Perspectives 333
   References 334
