PROCEEDINGS
SPIE—The International Society for Optical Engineering

Soviet–Chinese Joint Seminar on

Holography and Optical Information Processing

Andrei L. Mikaelian
Cochair/Editor

21–26 September 1991
Bishkek, Kirghizstan

Sponsored by
Russian Academy of Sciences
Chinese Optical Society
SPIE/Russia—The International Society for Optical Engineering, Russian Chapter
Scientific Council for Optical Memory Problems of the Academy of Sciences
Scientific Council for Problems of Holography of the Academy of Sciences
Physics Institute of the Kirghizstan Academy of Sciences

Published by
SPIE—The International Society for Optical Engineering

Volume 1731

SPIE (The Society of Photo-Optical Instrumentation Engineers) is a nonprofit society dedicated to the advancement of optical and optoelectronic applied science and technology.

Contents

vii *Organizing Committee*
ix *Introduction*

SESSION 1 OPTICAL MEMORY AND NEURAL NETWORKS: DATA STORAGE AND DEVICES

2 **Optical immersion as a new way to increase information recording density** [1731-01]
V. V. Petrov, S. M. Shanoylo, A. A. Krjuchin, V. I. Kozheshcurt, A. A. Tokar, V. I. Zymenko, Institute of Information Recording Problems (Ukraine).

13 **Development of the library in form of holography** [1731-02]
W. Yuan, Tianjin Microform Technique Corp. (China).

18 **Noncoherent double phase-conjugate mirror using $Bi_{12}TiO_{20}$** [1731-03]
M. P. Petrov, A.F. Ioffe Physical-Technical Institute (Russia); J. D. Caulfield, Univ. of Alabama in Huntsville (USA); E. V. Mokrushina, A.F. Ioffe Physical-Technical Institute (Russia).

30 **Studying the performance of crystal materials for real-time holographic recording and display** [1731-04]
Y. Li, M. Zhao, Y. Qin, Xian Institute of Optics and Precision Mechanics (China).

36 **Integrated-optical head on lithium niobate** [1731-05]
A. L. Belostotsky, A. S. Leonov, D. V. Petrov, Institute of Semiconductor Physics (Russia).

48 **Systems for data reading from optical disks on the basis of diffractive lenses** [1731-06]
G. I. Greisukh, S. A. Stepanov, Civil Engineering Institute (Russia).

SESSION 2 OPTICAL MEMORY AND NEURAL NETWORKS: ARCHITECTURES AND IMPLEMENTATIONS

60 **Two modified models of neural network** [1731-07]
W. Zhu, Central Institute of Nationalities (China); Y. Chen, Institute of Physics (China).

65 **New real-time optical associative memory system** [1731-08]
Y. Zhang, W. Fan, Tianjin Univ. (China).

74 **Recent advances in holographic data storage in SBN** [1731-09]
L. B. Hesselink, J. P. Wilde, Stanford Univ. (USA).

80 **Departing from Bragg's law of SBN crystal volume grating** [1731-10]
J. Cao, X. Shen, X. Lu, Shanghai Institute of Mechanical Engineering (China); L. Xu, Shanghai Institute of Silicate (China).

85 **Making multifacet holographic arrays and optical implementation of associative memory** [1731-11]
Y. Yan, Z. Wen, M. Wu, G. Jin, Tsinghua Univ. (China).

89 **Optical pattern recognition system based on WTA model of neural networks** [1731-12]
J. Shen, Y. Zhang, Nankai Univ. (China).

(continued)

SESSION 3 HOLOGRAPHIC OPTICAL ELEMENTS AND COMPUTER-GENERATED HOLOGRAMS

96 **Dichromated-gelatin holographic optical elements** [1731-13]
Y. Jiang, L. Chen, J. Wu, Z. Hu, Y. Hu, Suzhou Univ. (China).

99 **Fabrication of holographic optical elements for the near-infrared based on polymer materials** [1731-14]
R. A. Lessard, N. Cappolla, R. Changkakoti, G. Manivannan, Univ. Laval (Canada).

112 **Optimal design of a holographic field lens for the infrared** [1731-15]
L. Chen, J. Wu, Y. Jiang, Suzhou Univ. (China).

119 **Experimental studies of wide-angle eye holographic recording** [1731-16]
S. Xu, Z. Luo, Z. Xie, W. Li, P. Ma, Beijing Institute of Radiation Medicine (China).

124 **Several considerations of computer-generated hologram for optical interconnection of VLSI** [1731-17]
P. Long, H. Zhang, D. Hsu, Beijing Institute of Posts and Telecommunications (China).

128 **Phase diffraction grating for the integral transforms of coherent light fields** [1731-18]
E. Balashova, M. Neofitnyi, V. Svich, Kharkov State Univ. (Ukraine).

SESSION 4 HOLOGRAPHIC DISPLAY AND MATERIALS

140 **Recent developments on holography applications in China** [1731-19]
G. Mu, K. Chin, Y. Zhang, D. Hsu, Beijing Institute of Posts and Telecommunications (China).

144 **Study of holographic optical pixel** [1731-20]
B. Wang, S. Shen, M. Chang, J. Zhu, D. Hsu, Beijing Institute of Posts and Telecommunications (China).

148 **Methods and uses of polarization holography** [1731-21]
Sh. D. Kakichashvili, Institute of Cybernetics (Georgia).

158 **Molecular photo-CT complexes based on dynamic holographic media** [1731-22]
Yu. A. Cherkasov, E. L. Alexandrova, S.I. Vavilov State Optical Institute (Russia).

166 **Antihumidity dichromated gelatin and its sensitized characteristics** [1731-23]
L. Guo, C. M. Dai, T. Q. Chai, Sichuan Univ. (China).

169 **Red-sensitive photopolymer for holography** [1731-24]
G. Zhang, H. Zhang, Y. Ren, Beijing Teachers College (China).

173 **Holographic recording with operated sensitivity and stability in chalcogenide glass layers** [1731-25]
A. Kikineshi, A. Mishak, A. Sterr, Uzhgorod State Univ. (Ukraine).

SESSION 5 OPTICAL INFORMATION PROCESSING: SYSTEMS AND PATTERN RECOGNITION

182 **Progress in quantum optical computing** [1731-26]
H. J. Caulfield, Univ. of Alabama in Huntsville (USA).

188 **Implementation of optical logic gates using programmable LCTV** [1731-27]
T. Wang, S. Yang, Y. Li, S. Fan, S. Zhang, H. Wen, W. Yu, Guangzhou Institute of Electronic Technology (China).

196 **Compact optical logic processor and its applications** [1731-28]
D. Feng, H. Zhao, S. Xia, Fudan Univ. (China).

201 **Associative memory of new generation supercomputers based on optical information processing principles** [1731-29]
V. S. Burtsev, V. B. Fyodorov, Scientific Computer Ctr. (Russia).

217 **New design of the correlation filter for distortion-invariant optical pattern recognition** [1731-30]
A. Li, C. Tao, S. Bian, J. Wang, S. Nie, East China Institute of Technology (China).

222 **Hybrid optical system for computing invariant moments of images** [1731-31]
Y. Chen, S. Zheng, D. Li, Institute of Physics (China).

226 **Dactyloscopy with the optical-digital hybrid system** [1731-32]
W. Huang, J. Zhou, L. Zhou, J. Guo, Shanghai Jiao Tong Univ. (China).

234 **Spatial light modulators and their application for optical correlation** [1731-33]
Y. Li, M. Zhao, Y. Qin, Z. Wang, Y. Kong, Xian Institute of Optics and Precision Mechanics (China).

SESSION 6 OPTICAL INFORMATION PROCESSING: INTERFEROMETRY AND APPLICATIONS

240 **Optical fiber holographic interferometry** [1731-34]
D. Yu, J. Du, Y. Sun, Y. Zhang, Tianjin Univ. (China).

245 **Effects of coherence degrees on measurement accuracy in optical information processing** [1731-35]
F. Zhang, D. Yu, T. Liu, Tianjin Univ. (China).

251 **Real-time image processing of F-P interference fringe pattern** [1731-36]
B. Li, Tsinghua Univ. (China); J. Chen, Nanjing Normal Univ. (China); Z. Li, Huazhong Univ. of Science and Technology (China).

255 **Investigation on holographic correlation and its applications** [1731-37]
F. Zhang, D. Yu, Tianjin Univ. (China).

259 **Electro-optical information processing for optical heterodyne interferometry profilometer** [1731-38]
T. Chen, Z. Li, Huazhong Univ. of Science and Technology (China); J. Chen, Nanjing Normal Univ. (China).

263 **Image information modulation and processing for fringe scanning optical profiler** [1731-39]
J. Chen, Nanjing Normal Univ. (China); Z. Zhang, Z. Li, Huazhong Univ. of Science and Technology (China).

(continued)

SESSION 7 SPECIAL MEASUREMENTS AND DEVICES

268 **Optical fiber holographic endoscope and its applications** [1731-40]
Y. Zhang, J. Du, Y. Sun, Z. He, X. Liu, Tianjin Univ. (China).

273 **Grating strain method for measuring strain field in the vicinity of a crack tip** [1731-41]
X. Wu, Huazhong Univ. of Science and Technology (China); J. Chen, Nanjing Normal Univ. (China).

278 **Detecting laser illumination using holographic lens and position-sensitive device** [1731-42]
H. Zhang, B. Wang, C. Yu, M. Chang, D. Hsu, Beijing Institute of Posts and Telecommunications (China).

282 **Three-dimensional information acquiring and processing system using phase-shifting technique** [1731-43]
T. Chen, K. Xu, Fudan Univ. (China).

287 **Forward-scattering particle image velocimetry for measuring flow-field velocity at low particle density** [1731-44]
G. Zhou, Y. Zhang, Tianjin Univ. (China).

293 **Image transmission through random media in single pass via optical phase conjugation** [1731-45]
J. Zhang, Q. Wang, Y. Zhao, D. Lin, Beijing Normal Univ. (China).

297 **Acousto-optical devices using paratellurite for optical information processing systems** [1731-46]
V. B. Voloshinov, D. D. Mishin, A. N. Uskov, Moscow State Univ. (Russia).

303 **Bistable acousto-optic devices for optical information processing systems** [1731-47]
V. I. Balakshy, A. V. Kazaryan, V. Ya. Molchanov, Moscow State Univ. (Russia); M. Hai, Hefei Univ. of Science and Technology (China).
