# ***Nonlinear Image Processing III***

**Edward R. Dougherty**  
**Jaakko Astola**  
**Charles G. Boncelet, Jr.**  
*Chairs/Editors*

**12–13 February 1992**  
**San Jose, California**

*Sponsored by*  
SPE—The International Society for Optical Engineering  
IS&T—The Society for Imaging Science and Technology

*Published by*  
SPE—The International Society for Optical Engineering

**Volume 1658**

# Contents

- vii *Conference Committee*
- ix *Introduction*

## SESSION 1 FILTERING I

---

- 2 **Adaptive generalized stack filtering under the mean-absolute-error criterion [1658-01]**  
L. Yin, J. Astola, Y. A. Neuvo, Tampere Univ. of Technology (Finland).
- 13 **Morphological filter mean-absolute-error theorem [1658-02]**  
R. P. Loce, Xerox Corp.; E. R. Dougherty, Rochester Institute of Technology.
- 25 **Statistical properties of soft morphological filters [1658-03]**  
L. Koskinen, J. Astola, Tampere Univ. (Finland).
- 37 **Fixed points of some ordering-based filters [1658-04]**  
H. G. Longbotham, D. H. Eberly, Univ. of Texas/San Antonio.
- 46 **Multilevel stack filtering for image processing applications [1658-06]**  
T. Sun, Tampere Univ. of Technology (Finland); B. Zeng, Univ. of Toronto (Canada); Y. A. Neuvo, Tampere Univ. of Technology (Finland).
- 56 **Application of nonlinear filters to edge detection [1658-07]**  
C. G. Boncelet, Jr., R. C. Hardie, Univ. of Delaware.
- 63 **Three-dimensional morphology based on  $\Xi$ -filters [1658-32]**  
K. Preston, Jr., Kensal Consulting and Carnegie Mellon Univ.

## SESSION 2 IMAGE ANALYSIS

---

- 76 **Morphological algorithm development case study: detection of shapes in low-contrast gray-scale images with replacement and clutter noise [1658-09]**  
L. R. Rystrom, P. L. Katz, R. M. Haralick, C. J. Eggen, Univ. of Washington.
- 94 **Statistics of the morphological pattern-spectrum mean and variance for a normal-sized convex-base random Boolean image [1658-10]**  
F. M. Sand, Fairleigh Dickinson Univ.; E. R. Dougherty, Rochester Institute of Technology.
- 106 **Invariant characterizations and pseudocharacterizations of finite multidimensional sets based on mathematical morphology [1658-11]**  
D. Sinha, CUNY/College of Staten Island; H. Lee, Daewoo Telecom Co., Ltd. (South Korea).
- 118 **Morphological operations applied on polygon representation of binary images [1658-12]**  
O. P. Yli-Harja, A. M. Vepsäläinen, Technical Research Ctr. of Finland (Finland).
- 127 **Dimensional measurements and operators in mathematical morphology [1658-14]**  
P. Soille, J. C. Serra, J. Rivest, Ecole des Mines de Paris (France)

(continued)

- 139 **Morphological gradients [1658-15]**  
J. Rivest, P. Soille, S. Beucher, Ecole des Mines de Paris (France).
- 151 **Application of morphology to feature extraction for face recognition [1658-33]**  
G. G. Gordon, Harvard Univ. and TASC; L. M. Vincent, Harvard Univ. and Xerox Imaging Systems.

---

**SESSION 3      FILTERING II**

---

- 166 **Multichannel edge-enhancing technique [1658-16]**  
K. Tang, Y. A. Neuvo, Tampere Univ. of Technology (Finland).
- 177 **Continuous-time analysis of the response of the pseudomedian and related filters to periodic signals [1658-17]**  
M. A. Schulze, J. A. Pearce, Univ. of Texas/Austin.
- 189 **Robust time-domain frequency analysis [1658-18]**  
D. Shelton, H. G. Longbotham, Univ. of Texas/San Antonio.
- 199 **DPCM with median predictors [1658-19]**  
Y. H. Lee, D. H. Kang, J. H. Choi, K. D. Lee, Korea Advanced Institute of Science and Technology (South Korea).
- 210 **Nonlinear filtering structure for smoothing discontinuous signals corrupted with Gaussian noise [1658-20]**  
R. L. Stevenson, Univ. of Notre Dame.
- 222 **Local histogram filtering utilizing feature-selective templates [1658-21]**  
T. McMurray, J. A. Pearce, Univ. of Texas/Austin.
- 234 **Logical context of nonlinear filtering [1658-22]**  
E. R. Dougherty, Rochester Institute of Technology; R. M. Haralick, Univ. of Washington.
- 245 **Morphological residue approach to shape representation [1658-23]**  
S. Loncaric, A. P. Dhawan, Univ. of Cincinnati.

---

**SESSION 4      NEURAL NETWORKS**

---

- 258 **Neural network approach to adaptive image enhancement [1658-24]**  
L. Guan, Array Systems Computing Inc. (Canada).
- 267 **Training of object classes using mathematical morphology [1658-26]**  
S. S. Wilson, Applied Intelligent Systems, Inc.
- 276 **Efficient neural network implementation of morphological operations [1658-27]**  
A. W. Morales, The Pennsylvania State Univ.; S. Ko, Univ. of Michigan/Dearborn.
- 287 **Optical implementation of gray-scale morphology [1658-28]**  
R. H. Schaefer, D. P. Casasent, Carnegie Mellon Univ.

- 297 **Bohr's indeterminacy principle in quantum holography, adaptive neural networks, cortical self-organization, molecular computers, magnetic resonance imaging, and solitonic nanotechnology [1658-29]**  
W. Schempp, Univ. of Siegen (FRG).
- 344 **Simulated annealing applied to acoustic signal tracking [1658-30]**  
C. Lee, Naval Postgraduate School.
- 356 **Wilson-Cowan neural network in image analysis [1658-31]**  
K. Mantere, J. P. Parkkinen, Univ. of Kuopio (Finland); T. Jaaskelainen, Univ. of Joensuu (Finland); M. M. Gupta, Univ. of Saskatchewan (Canada).
- 364 *Addendum*  
365 *Author Index*
