CONTENTS

ATOMISTIC THEORY

Theoretical Studies of Helium in Metals
J. B. Adams, W. G. Wolfer, S. M. Foiles, C. M. Rohlfing
and C. D. Van Siclen

Molecular Dynamics Simulations of Rare Gases in Metals:
Interactions
R. M. Nieminen

Theoretical Description of the Growth and Stability
of Helium Platelets in Nickel
M. D’Olieslaeger, G. Knuyt, L. De Schepper and L. M. Stals

HELIUM DEFECT INTERACTIONS AND DIFFUSION

Helium Defect Interactions in Metals and Silicon
A. van Veen

Diffusion and Clustering of Helium in Noble Metals
P. Jung

Mobility of Helium and Nitrogen Implanted at High Fluences
into Solids, as Derived from their Concentration Profiles
D. Fink, L. Wang and J. Martan

HELIUM IN METAL TRITIDES

$^3$He Effects in Tritides
T. Schober and H. Trinkaus

Fundamental Properties of Helium in Metal Tritides
G. J. Thomas

Elucidation of Fundamental Properties of Helium in Metals
by Nuclear Magnetic Resonance Techniques
G. C. Abell
Inert Gas Bubbles in Metals: A Review
C. Templier

Formation and Annealing of Kr Precipitates in Ni Thin Films
R. C. Birtcher

Cross Section Transmission Electron Microscopy (XTEM)
on Inert Gas Implanted Metals
E. Gerritsen and J.Th.M. De Hosson

Fundamental and Applied Aspects of Noble Gas Bubbles in Steel
J. Noordhuis and J.Th.M. De Hosson

Gas Bubble Lattices in Metals
P.B. Johnson

Macroscopic Phenomena Induced by High Dose MeV Energy
Implantation of Helium, Neon and Argon Ions
F. Pászti

83Kr Mössbauer Spectroscopy and Inert Gas Inclusions
in Aluminium and Silicon
and A. van Veen

133Xe Mössbauer Study of Neon Inclusions in Molybdenum
H. Pattyn, P. Hendrickx and S. Bukshpan

Overpressurized Inert Gas Clusters in Aluminium and Silicon
Observed by EXAFS Spectroscopy
G. Faraci
Behaviour of Krypton Atoms Implanted into Aluminium as Investigated by a Channelling Method
E. Yagi

X-Ray Diffraction Studies of Krypton and Lead Inclusions in Aluminium

Gas Densities in Helium Bubbles Determined by Small Angle Neutron Scattering
H. Ullmaier

INERT GAS BUBBLES IN METALS: HIGH-TEMPERATURE BUBBLE EVOLUTION

Inert Gas Bubble Coarsening Mechanisms
H. Schroeder, P.F.P. Fichtner and H. Trinkaus

Influence of Real Gas Behaviour on the Ostwald Ripening of Inert Gas Bubbles in Bulk Materials
P.F.P. Fichtner, H. Schroeder and H. Trinkaus

Recent Experimental Studies on Thermal and Irradiation-Induced Resolution of Gas Atoms from Bubbles in Solids
J.H. Evans

Helium Bubble Nucleation in Aluminium Irradiated with 600 MeV Protons
F. Paschoud, M. Victoria and R.Gotthardt

New Aspects of Gas-Induced Swelling in Helium-Implanted Nickel During Annealing
V.N. Chernikov, P.R. Kazansky, H. Trinkaus, P. Jung and H. Ullmaier

Phase Transformations of Argon in Bubbles Formed in Nickel During Low and High Energy Argon Ion Bombardment
D.B. Kuzminov and V.N. Chernikov

BUBBLE GROWTH MECHANISMS

Inert Gas Bubble Growth Mechanism Maps for Metals
P. J. Goodhew

Loop-Punching as a Mechanism for Inert Gas Bubble Growth in Ion-Implanted Metals
S.E. Donnelly, D.R.G. Mitchell and A. van Veen
Possible Mechanisms Limiting the Pressure in Inert Gas Bubbles in Metals  
H. Trinkaus  

Parameters and Processes Controlling Helium Bubble Formation in Metals at Elevated Temperatures  
B.N. Singh and H. Trinkaus  

INERT GASES IN NUCLEAR FUELS  

Fundamental Aspects of Inert Gas Behaviour in Nuclear Fuels: Oxides, Carbides and Nitrides  
Hj. Matzke  

Simulating the Behaviour of Inert Gases in UO$_2$  
R.W. Grimes  

Condensed-Phase Xenon and Krypton in UO$_2$ Spent Fuel  
L.E. Thomas  

Kinetics of Recrystallization and Fission-Gas Induced Swelling in High Burn Up UO$_2$ and U$_3$Si$_2$ Nuclear Fuels  
J. Rest and G.L. Hofman  

Fission Gas Behaviour During Power Transients in High Burn-Up LWR Nuclear Fuels Studied by Electron Microscopy  
I.L.F. Ray, H. Thiele and Hj. Matzke
