Introduction

1. Fundamentals and rock data

Rock stress and rock stress measurements – A review
O.Stephansson & E.T.Brown

New problems in rock mechanics
E.I.Shemyakin

Modelling of longwall roof rock behaviour – A rock mass classification approach
A.K.Ghose

Pre- and post-failure behaviour of rock samples
D.Krzysztoń

On an applicability of a new linear strength criterion for sandstones
M.Kwaśniewski

Geophysical and geomechanical controls of rock structures in underground excavations
E.Armando, O.Del Greco, L.Sambuelli & L.Stragiotti

Search for quantitative relation between mine-induced stress and seismic activity
B.Drzęła, A.Garus & J.Białek

Stresses in an underground metal mine
P.Ramírez Oyanguren, J.A.Ojeda Ruiz & R.Lain Huerta

Influence of post-failure properties of coal on the stress state in the seam
Z.Klecze & A.Zorychta

Stress control in coal seams employing powered support
W.Sikora & M.Major

The influence of the temperature gradient on the stress-strain state of the frozen soil in underground openings
J.Hatala
## 2. Modelling methods

The development and use of modelling techniques for underground mine design  
*B.K. Hebblewhite*  

Anwendungsbeispiele numerischer Modelle und neuer Verfahren zur Beherrschung von Strecken  
*G. Everling*  

Application of scale models of equivalent materials for the solution of problems related to rockbursts  
*A. Roček, P. Janas & M. Machálek*  

Prediction of stressed states in a structurally heterogeneous tectonically disturbed rock massif  
*N. A. Filatov & V. M. Barkovsky*  

Geomechanical modelling for optimisation of slope design parameters in opencast mines in Jharia coalfield, India  
*K. K. Gupta, D. P. Singh, V. K. Singh & T. N. Singh*  

Rock mass elastic model and its application in mechanics of underground structures  
*N. S. Bulychev, I. V. Goncharov & I. I. Savin*  

Application of Biot modified model in gas coal mechanics  
*J. Bauer, S. Gaczyński & Z. Gergowicz*  

## 3. Applications in mine design

The design of pillars of potash underground mines in Brazil  
*S. A. B. de Fontoura & E. C. Teixeira*  

Rock mechanics investigations at Mochia Mine  
*Y. V. A. Rao, B. K. P. Sinha & H. V. Paliwal*  

Shafts lining design erected with the application of fissured rocks preliminary plugging up  
*N. N. Fotieva & N. I. Savin*  

Basic research on the theory and method of control designing in coal face  
*S. Zhenqi & Jiang Yujing*
