Preface vii

Duro R. Kurepa ix

Opening remark

J. Edmund Gibbs, Radomir S. Stanković xi

Why IWGD-89?

Franz Pichler

Some historical remarks on the theory of Walsh functions
and their applications in information engineering xxv

Part One: Continuous Gibbs Derivatives

J. Edmund Gibbs

Local and global views of differentiation 1

Paul L. Butzer, W. Engels

Background to an extension of Gibbs differentiation in Walsh analysis 19

William R. Wade

The Gibbs derivative and term by term differentiation of Walsh series 59

Ferenc Schipp

Multiple Walsh analysis 73

Jenö Pál

Walsh-Fourier transform and dyadic derivative 91

Jenö Pál, Ferenc Schipp

On the a.e. dyadic differentiability of dyadic integral on \( R^+ \) 103
Toshiyuki Kitada, C.W. Onneweer  
_Hörmander-type multiplier theorems on locally compact Vilenkin groups_ 115

Yasushi Endow  
_Dyadic differentiability conditions for dyadic stationary processes_ 127

Mohammad Maqusi  
_Applications of the Gibbs derivatives in the computations of statistical moments_ 137

He Zelin, David Mustard  
_Convergence properties of a class of Walsh-Fourier integral operators_ 145

**Part Two : Discrete Gibbs derivatives**

Radomir S. Stanković  
_Some remarks on Gibbs derivatives on finite dyadic groups_ 159

Franz Pichler  
_Experiments with 1-D and 2-D signals using Gibbs derivatives_ 181

Zhang Gongli, Claudio Moraga  
_Variations on the Gibbs' derivatives_ 197

Milena Stanković  
_Program for evaluation Gibbs derivatives on finite Abelian groups_ 209

Radomir S. Stanković, Claudio Moraga  
_Real Gibbs derivatives on finite Abelian groups_ 225

Miomir S. Stanković, Naum N. Aizenberg  
_Generalized discrete Gibbs derivatives and related linear equations_ 249

Radomir S. Stanković  
_Gibbs derivatives on finite non-Abelian groups_ 269

Claudio Moraga, Ed.  
_Trends and open questions_ 299
