Chapter 4
GALVANNEALING: PROCESS CONTROL AND ALLOYING REACTIONS

Development of On-Line Measuring Technique and Equipment of Alloying Degree for Galvannealed Steel Sheet Production

Saito, M., Hosomi, K., Kittaka, T., Hirose, Y.

On-Line Measurement of Zinc Alloy Coating - Iron Content in Galvannealed Coating

Stadlbauer, A., Zeman, K., Krämer, W.

Control of the Galvannealing Process

Wilms, S., Fischbach, J.P., Hardy, Y., Beguin, M.

Galvanized and Galvannealed IF-Steel of Hoogovens for the Automotive Industry

Influence of Steel Grade and Surface Topography on the Galvannealing Reaction

Faderl, J., Pimminger, M., Schönberger, L.
Kinetics of Fe-Zn Reactions During Galvannealing ................................................. 199
Lamberigts, M., Leroy, V., Beguin, M., Dubois, M., van der Heiden, A., Verhoeven, G.

Factors which Affect the Alloy Growth Rate in Galvannealed Coatings ..................... 204
Mercer, P.D.

Investigation of Zinc/Iron Alloying in Various Commercial Galvanised Steels during Experimental Galvannealing by Radiation and Induction Heating ........................................... 209
Jenkins, G.A., Burrows, L.J.

Mathematical Model to Predict Phase Structure and Iron Content of HDGA Coating .......... 215
Zhang, L., Bensinger, T.R., Franke-Polz, E.M., Strayer, M.D.

Fe-Zn Alloying Reactions in CGL Process .................................................................. 220
Inagaki, J., Sakurai, M., Sagiyama, M.

Chapter 5
SURFACE TREATMENT AND PAINT ADHESION COATINGS ....................................... 225

Cooperation Between Supplier and Customer in Developing New Pretreatment Processes with Higher Environmental Compatibility .............................................. 227
Gehmecker, H., Kurzmann, P.

A New Acid-Type Surface Conditioning Treatment for Paint of Zn-4%Al-0.1%Mg Alloy Coated Steel Sheets ............................................................... 231
Fukumoto, H., Mizuki, H., Yoshino, M., Yokoyama, M.

Prephosphating of Hot-Dip Galvanized Steel Sheet ..................................................... 236
Riesop, J., Roland, W.A., Pimminger, M., Kollnberger, S.

Industrial Reliability of Paint Adherence on Skin Hot Dip Galvanized Steel: High Nickel Phosphatization Treatment ................................................................. 241
Droniou, P., Filussi, P.

Relations Between Coating Failures and Compositions of Cathodic Electrocoat Primer .... 245
Katayama, T., Kume, M.

Self-Healing Observed for an Artificial Defect in Dry-in-Place Chromate Coating .......... 250
Suda, A., Shinohara, T., Tsujikawa, S., Ogino, T., Tanaka, S.

Aging Mechanism of Paint Adhesion of Electrodeposited Chromate Films ................. 255
Okumura, K., Tanigawa, M., Furuya, T.

Paint Adhesion of Zinc Coated Steel Sheet ................................................................. 260
Verhoeven, G., Vanthournout, M., De Cooman, B.C.

Properties of Zn-Ni-Cr Coated Steel Sheets ............................................................... 265
Mabuchi, M., Mochizuki, K., Kato, C., Morito, N.

Chapter 6
COATED STEEL SHEETS IN THE AUTOMOTIVE INDUSTRY .................................. 271

Zn- and Zn-Alloy Coated Steel - What's the Best Coating for Automotive Application? .... 273
Espenhahn, M., Dèchène, W., Bode, R., Warnecke, W.

Hot Dip or Electrodeposited Coatings for Automotive Application: A Comparison of Their Technology ................................................................. 278
Nagel Soepenberg, E.

A Car Makers Experience with Precoated Steel ......................................................... 286
Heath, N.E.
The Development of Hot-Dip Galvanneal for Automotive Application ........................................... 291

Butler, J.F., D'Amico, M.A., Doctor, G.W.

Corrosion Resistance and Paintability of 2-Layer Galvannealed Steel for Automotive Use ............... 296

Fukada, A., Konda, S., Bessho, T.

Renault-Sollac Partnership to Develop Pure Zinc Galvanized Sheet for Vehicle Body Panels ............. 301

Charbonnier, G., Grégoire, P., Quantin, D., Buscarlet, E.

Experience with Prepainted Steel Sheets for Car Bodies with Deep Drawing Properties .................. 308

Colaiacovo, F., Serra, M.G., Bertorelli, P.

Application of Both Sides Organic Composite Coated Steel Sheet to Automobile Outer Panel .......... 313

Kikuta, Y., Muku, R., Ohgishi, H., Morito, N., Ichida, T.

The Development of Pre-Painted Steel Sheet for Automotive Applications ...................................... 318

Pietersen, C.A., Rijkhoff, M.J.

Development of Fe-Mn/Zn-Fe Double Layer Plated Steel Sheet for Auto-Bodies ............................. 323

Ahn, D.-S., Shin, J.-C., Chae, H.-M., Cho, S.-J., Han, K.-H.

Chapter 7
CORROSION BEHAVIOUR .................................................................................................................. 329

Corrosion Resistance of Zn-Cr Alloy Electrocoated Steel Sheets ....................................................... 331

Kanamaru, T., Suzuki, S., Arai, K.

Corrosion Behaviour of Galvannealed Steel Sheet Flash-Coated with Al-Mn Alloy Layer Electroplated from Molten Salt ................................................................. 336

Shibuya, A., Seto, H., Uchida, J., Tsuda, T., Yamamoto, Y., Fukui, K.

Corrosion Resistance of Zinc and Zinc Alloy Coated Steel Sheets with Al Vapor Deposition in the Upper Layers ......................................................................................... 341

Shin, J.C., Lee, Y.P., Choi, K.D., Jun, J.H.

Corrosion Resistance and Coloring of Galvanized Steel Sheets by Vacuum Deposition of Silicon Top Layers ........................................................................................................... 346

Anomalous Corrosion on Fluoro-Resin Top Coated Galvanized Steel Sheet in Regions with Heavy Snow ....................................................................................................................... 351

Fujisawa, H., Ban, T., Irie, T., Shiragami, K., Kimura, H.

Mechanisms for Atmospheric Corrosion of Prepainted Steel Sheets Used in the Building Industry ... 356

Barreau, C., Thierry, D., Massinon, D.

Influence of Substrate-Coating Interactions on the Microstructure and Properties of Galfan Products 363

Lamberigts, M., Leroy, V.

The Properties of Paint Adhesion and Corrosion Resistance after Painting of Steel Sheet Covered with a Zinc-Polymer Composite Coating ......................................................... 368

Hisamoto, J., Ikeda, K., Ta-ke-e, N., Satoh, H.

The Corrosion Resistance of Organic Composite-Coated Steel Sheets ........................................... 372

Shiota, T., Noumi, R., Suzuki, N., Suzukawa, Y., Nakatsukasa, M., Osako, S.

Corrosion Resistance Mechanism of a Newly Developed Organic Composite Coated Sheet Steel for Automotive Use .......................................................................................... 377

Odashima, H., Shibata, K., Kikuchi, I.
Chapter 8
NEW PROCESSES, NEW PRODUCTS .......................................................... 383

The New Organic Coating Line of Sollac-Florange:
Description of the Process and Characteristics of the Products .......... 385
Lerouge, A., Keller, J., Perrin, R.

The Introduction of Durasteel Technology at Voest-Alpine Stahl Linz GmbH 391
Androsch, F.M., Kösters, K., Wall, E.

New Methods of Coating Steel Strip ..................................................... 396
Goldschmied, G., Karner, W., Jäsch, G.

Performance of Organic Composite Coated Steel Sheet for Home Electric Appliances 402
Kawanishi, Y., Ikeda, S., Suzuki, N.

Development of New Black Organic Composite Coated Steel Sheet with Weldability 407
Yoshimi, N., Yamashita, M., Watanabe, T.

Aluzinc Plus: A New Continuous Hot-Dip 55 % Al-Zn Protective Coating 412
Lamberigts, M., Leroy, V., Kuhn, M., Renard, L.

Hot-Dip Galvanized Steel Sheet with ZnAl- and Al/Zn-Alloy Coating for Building- and Appliance-Industry .................. 417
Schwarz, W., Schuhmacher, B., Wolfhard, D.

Characteristics of the One Coat/One Bake Type Anti-Finger Printed Electrogalvanized Sheet 422
Kim, H.-J.

Chapter 9
SURFACE AND STRUCTURAL ANALYSIS OF COATINGS ....................... 427

Atomic Structures of Interfaces in Annealed Electrogalvanized Steel Sheets .......................................................... 429
Lin, Y., Chiu, W.-A., Meshii, M.

XPS as a Tool for the Surface Characterization of Continuously Produced Hot Dip Galvanized Steel .......................... 436
Lammers, K.R., den Harder, A., van der Meer, W.J.

Analytical Transmission Electron Microscopy of Galvanneal Coatings .............................................................................. 442
L'Espérance, G., L'Ecuyer, J.D., Simard, A., Barreto, M.P., Botton, G.

Zinc Rich Corner of the Fe-Zn-Al Revised Phase Diagram .................. 449
Dauzat, M., Stouvenot, F., Moreau, T.

Electrochemical Stripping of Galvannealed Steel .................................. 455
Baudin, H., Beysseras, A., Dalard, F., Rameau, J.J.

The Characterization of Intermediate Phases of Electrogalvanized
- Iron Couples by Cross-Section Transmission Electron Microscopy - A Brief Overview .............................................. 461
Giannuzzi, L.A., Howell, P.R., Pickering, H.W., Bitter, W.R.

Microstructure and Mechanical Behaviour of Zinc Coating .................... 468
Chapter 10
ELECTROGALVANIZING PROCESS AND PRODUCT ........................................ 475

Improved Current Transfer and Productivity on the U.S. Steel Carousel Process through the Use of Hold Down Rolls ................................................................. 477

The Effect of Preplating Processes on the Performance of Electrodeposited Coatings on Steel ........ 484
Payer, J.H., Michel, G.M.

Reactor Design in Continuous Steel Strip Electroplating Cells ..................................... 491
van Haastrecht, G.C., Paramanathan, B.K.

Effect of Chromate Coating Structure on Surface Characteristics of Electrogalvanized Steel Sheet ... 501
Tajiri, Y., Yamaji, T., Kondo, T.

The Development of Electrolytic Composite Zn-Fe$_2$O$_3$ Coatings: Process and Coating Characteristics ............................................................... 506
Cels, J.P., Roos, J.R., Buelens, C., Fransaer, J., Vanthournout, M., Schrijnemackers, J., Renard, L.

Chapter 11
FIELD AND ACCELERATED CORROSION TEST METHODS .................................. 519

Mechanism of Underfilm Corrosion Propagation in Painted Automotive Galvanized Steels During Exposure in the New Volvo High-Performance Chamber ................. 521
Ström, M., Ström, G., van Ooij, W.J., Sabata, A., Knueppel, B.A., Ramamurthy, A.C.

Corrosion Protection Functions of Zinc Coating on Steel Sheet, as Revealed by the Investigation of Field Cars and Laboratory Test ..................................................... 528
Miyoshi, Y., Ito, Y., Soreide, L.E., Davidson, D.D.

Corrosion Behavior of Precoated Steel Sheets in Volvo Tests at Three North American Locations Using Perforation Coupon Assemblies .................................................. 535
Davidson, D., Soreide, L., Miyoshi, Y., Ito, Y.

Ten Years of Working and Testing Results on Corrosion Proving Ground ......................... 541
Cherault, M., Charbonnier, G.

Characterization of Organic Coating Breakdown on Galvanized Steel during Atmospheric Exposure by Electrochemical Impedance Spectroscopy ........................................ 549
Amirudin, A., Barreau, C., Massinon, D., Thierry, D.

Traditional Testing Methods for Painted Metal Substrates Supported by Electrochemical Impedance Measurements ............................................................... 556
Wrubl, C., Litigio, A., Mollica, A.
