

RENEWABLE ENERGY TECHNOLOGY AND THE ENVIRONMENT

*Proceedings of the 2nd World Renewable Energy Congress
Reading, UK, 13-18 September 1992*

Edited by
A. A. M. SAYIGH
Department of Engineering, University of Reading, UK

Organized by
WORLD RENEWABLE ENERGY COMPANY LTD.

Volume 2

PERGAMON PRESS

OXFORD · NEW YORK · SEOUL · TOKYO

CONTENTS OF VOLUME 2

Solar Thermal

Solar Thermal Plants - LUZ Concept (Current Status of SEGS Plants) Dr. D.W. Kearney and H.W. Price, Kearney & Assoc., Del Mar, Cal. USA	582
The Use of Renewable Energy in the Production of Food Provision of Water in Developing Areas of the World Prof. T.A. Lawand and J. Ayoub, Brace Research Inst., Macdonald College, Quebec, Canada	589
The Photo-Thermal Industry F. Mahdjuri, Managing Director, Thermomax Ltd., Bangor, UK	597
Prediction of Solar Savings Fraction for Integral Passive Solar Water Heaters B. Norton, and A.C. Arthur, Department of Building, University of Ulster, Newtown Abbey, N. Ireland, UK	601
Exergy Considerations in Solar Collector Design S.O. Onyegebu and J. Morhenne, Ruhr-Universitat, Bochum 1, Germany	611
Transparent Honeycomb Insulated Solar Passive Hot Water Systems N.D. Kaushika, IIT, Delhi, Centre for Energy Studies, New Delhi, India	617
Effect of Trasparent Honeycomb Cover for Flate-Plate Solar Collector and System V. Nikiforov, Technion-Israel Institute of Technology, Civil Eng., Env. and Waters Res. Eng. Dept., Haifa, Israel	622
Solar Timber Drying - A Major Energy Saving in Developing Countries M.A. Sattar, Divisional Officer, Bangladesh Forest Research Inst., Chittagong, Bangladesh	627
Experimental Performance of an Indirect Type Solar Fruit and Vegetable Dryer V.K. Sharma, A. Colangelo and G. Spagna, Visiting Scientist, ENEA-C.R.E. Trisaia, Italy	635
Drying Characteristics of Some Food Materials in Greenhouse-Type Solar Dryer S. Demir, T. Cakaloz and S. Evcin, Ege University, Eng. Faculty, Food Eng. Department, Izmir, Turkey	642
Field Experimental Performance Evaluation of Free Convective Solar Crop Dryers in Nigeria E.A. Arinze, M.W. Bassey, J.O. Olukosi, B.A. Eke, and G.J.Schoenau, College of Eng., University of Saskatchewan, Saskatoon, Canada	647
Drying of Hay Packages with Solar Heated Air Y. N. Assalimy and A.K. El-Zaemey, Civil Engineering Dept., Sana'a University, Sana'a, Yemen	653

Analysis of the Performance of a Solar Greenhouse Timber Dryer - Drying of Trinidadian Timber A. Tang Kai, I.A. McDoom and O. Headley, Dept. of Physics, University of The West Indies, St. Augustine, Trinidad and Tobago, The West Indies	662
Preliminary Results of a Force Convective Solar Dryer M.Y.H. Othman, K. Sopian, M.M. Salleh, and M.H. Ruslan, Dept. of Physics, Faculty of Physical and Applied Sciences, University Kebangsaan, UKM Bangi, Malaysia	667
The Technology of Heat Pumps and their Recent Development F.S. Bhinder, Acadeema Ltd. & Hatfield Polytechnic, Croxley Green, UK	672
Heat Pumps and Renewable Energies A.C. Gillet, Atelier D.S.C., Wavre, Belgium	680
Solar-Assisted Heat Pump and Energy Storage for Domestic Heating in Turkey T. Ayhan, K. Kaygusuz and O. Comakli, Karadeniz Technical Univ., Mechanical Eng. Dept., Trabzon, Turkey	687
Simulation of Solar-Powered Hybrid Ammonia-Water Heat Pump System for Cooling E.A. Arinze, G.J. Schoenau, S. Sokhansanj, S.S. Adefila, and S.N. Mumah, College of Eng., University of Saskatchewan, Saskatoon, Canada	692
Solar Cooling Activities in the Asian Institute of Technology R.H.B. Excell, Division of Energy Technology, Asian Institute of Technology, Bangkok, Thailand	700
A Rapid Cycling Ice Maker for Use in Developing Countries R.E. Critoph, Dept. of Eng., Univ. of Warwick, Coventry, UK	708
Solar Ponds for Large Scale Cooling Design P.T. Tsilingiris, Athens, Greece	714
Evaluation and Modeling of a Solar Air-Conditioning System Operating in Mexicali, Baja California, Mexico R. Best, M.A. Rivera, W. Rivera and B. Vazquez, Laboratorio de Energia Solar IIM-UNAM, Temixo, Morelos, Mexico	719
A Charcoal-Methanol Adsorption Refrigeration Powered by a Compound Parabolic Concentrating Solar Collector O.StC. Headley, A.F. Kothdiwala and I.A. McDoom, Dept. of Chemistry, The University of the West Indies, Cave Hill Campus, Bridgetown, Barbados, The West Indies	724
Fenestration Materials for Solar Thermal Radiation Control Prof. M.G. Hutchins, Solar Energy Mat. Res. Lab., School of Eng., Elect., Physics & Elect. Eng., Oxford Poly., Oxford, UK	729
EHD Enhanced Heat Transfer for Renewable Energy Applications P.H.G. Allen and T.G. Karayiannis, Thermofluids Engineering Research Centre, The City University, London, UK	738
Experimental Comparison Between a Conventional Forced Circulation System with Storage and One-Pass System	746

Without Storage, for a Daytime Constant Load Applications. M.J. Carvalho, M. Collares-Pereira, and F.M. Cunha, Dept. of Renewable Energies, LNETI, Lisboa Codex, Portugal	
Indoor Thermal Performance Tests of Honeycomb TIMS H.X. Yang, R.M. Marshall and B.J. Brinkworth, Solar Energy Unit, Sch. of Eng., Univ. of Wales College of Cardiff, Cardiff, UK	751
Solar Storage Stratification Analysis and Test Data Correlation. H. El-Agamawy, Arab Organization for Indust., Cairo, Egypt	756
Solar Still for West Bank and Gaza Strip Afif Hasan, Mech. Eng. Dept., Birzeit Univ., West Bank, Israel	763
On the Potential and Economic Feasibility of Solar Industrial Process-Heat Applications in Selected Turkish Industries S. Ozdogan and M. Arikol, Marmara University, Istanbul, Turkey	769
Provision of Drinking Water in Third World Villages Alternative Techniques Using Renewable Energy Sources K.S. Rabbani, Dept. of Physics, Faculty of Science, University of Dhaka, Dhaka, Bangladesh	774
Simulation and Performance of a MES Solar Distillation System. O.A. Hamed and J.A.S. Al-Jabri, Engineering Dept., UAE Univ. Al-Ain, United Arab Emirates	779
Performance Evaluation of a Solar Steam Generation System Installed in a Silk Weaving Factory A. Thomas, Instrumentation and Service Unit, Indian Institute of Science, Bangalore, India	792
Yearly Energy Changes of Solar Powered Flat Plate Engine A. Mihelic-Bogdanic, and Ivo Kolin, Dept. of Thermodynamics & Energetics, Faculty of Tech., Univ. of Zagreb, Zagreb, Croatia	797
Improvement of a Solar Water Heating System Through Changing of Collector and Hot Water Tank Configurations M.A. Mohamad, Nat. Res. Centre, Solar Energy Dept., Cairo, Egypt	802
Sun Auto-Tracker System for Solar Panels O.M.M. Eltom, M. Maamri, and A.A.M. Sayigh, Dept. of Engineering University of Reading, Reading, UK	807
Design, Development & Testing of Different Models of Solar Water Heater cum Solar Cookers N.M. Nahar, School of Eng., University of Wales, Cardiff, UK	814
Performance Analysis of Solar Ponds in Sinai E.H.T. El-Shirbeeney, F.A. Mohamed, Director, Mech.Electr. Research Institute, Shibeen-El-Kom, Egypt	820
Design and Simulation of Salt-Gradient Non-Convective Solar Pond at Nagpur D.K. Dixit, Dept. of Mech. Eng., College of Eng., Nagpur, India	825

Rules for P-Marking of Thermal Solar Collectors H. Wennerholm, Swedish National Testing & Research Institute, Energ Technology, Boras, Sweden	830
A Solar Hybrid System for Residential-Cum-Water Heating Application C. Choudhury and H.P. Garg, Head, Centre of Energy Studies, Indian Institute of Technology, New Delhi, India	835
Performance Study of a Flate-Plate Solar Collector Installed in Riyadh, Saudi Arabia Y. Gh. Al-Saedi, King Abdulaziz City for Science and Technology, Riyadh, Saudi Arabia	840
Solar Ponds in Cogeneration Systems Giorgio A. Bemporad, ISMES Spa, Viale G. Cesare 29, Bergamo, Italy	848
The Optimal Interval of Branch Pipes in the Solar Flat Plate Collector Li Baojun, and Zhang Xinfan, Dept. of Mech. Eng., Shenyang Architectural Engineering College, Shenyang, P.R. China	853
Performance Evaluation Study of a Linear Solar Concentrator with Reverse Flat-Plate Absorber K.A. Khan and A. J. Khan, Renewable Energy Research Centre, Faculty of Science, University of Dhaka, Dhaka, Bangladesh	858
Thermal and Numerical Analysis of a Heat Pipe Solar Collector Kamal A.R. Ismail, and M.M. Abogderah, Faculdade de Engenharia Termica E de Fluidos, Universidade Estadual de Campinas, Campinas SP, Brazil	862
Experimental Measurements of Solar Collector Water Heater in Climatic Conditions of Poland M.A. Sayeghand, Danielewicz, Katedra A Klimatyzacji I Ciepłownictwa, Politechniki Wrocławskiej, Warsaw, Poland	867
The Thermal Performance of Mass Production Solar Collector E. Azad and A. Hadji Saghati, Iran University of Science & Technology, Narmak, Tehran, Iran	870
Performance Evaluation Study of a Linear Solar Concentrator with Reverse Flat-plate Absorber A.J. Khan & K.A. Khan, Renewable Energy Research Centre, Dept. of Physics, University of Dhaka, Dhaka, Bangladesh	875
Effects on Performance of a TSAEH Exerted by The System's LHWCT Lin Wenxian and Lu Enrong, Solar Energy Research Dept., Yunnan Teachers University, Kunming, Yunnan, P.R. China	880
Review of Models for Deep-Bed Crop Drying D. Nuh, R.M. Marshall and B.J. Brinkworth, Solar Energy Unit, Sch. of Eng., Univ. of Wales College of Cardiff, Cardiff, UK	885
Simulation of Solar Grain Drying Using the Algorithmic Model Yousef N. Assalimy & Ibrahim S. Moghram, Electrical Eng. Dept., Faculty of Engineering, Sana'a University, Sana'a, Yemen Republic	891

The Solarized Combined Drying Process R. Budin, A. Mihelic-Bogdanic, Veliko Filipan and Z. Kupresak, Dept. of Thermodynamics & Energetics, Faculty of Technology, University of Zagreb, Zagreb, Savska 16, Croatia	898
Performance Studies of Solar Kilm for Timber Drying H.P. Garg, J. Prakash and D.S. Hrishikesan, Centre of Energy Studies, Indian Inst. of Technology, New Delhi, India	903
Development of a Solar Fruit Dryer for Tropical Areas. S. Janjai and P. Praditwong, Faculty of Science, Silpakorn University, Makorn Pathom, Thailand	908
Experimental Study and Simulation of Drying of Orange Peels E. Belahmidi, A. Belghit and A. Mir, Laboratoire de Mecanique des Fluides et d'Energetique, Dept. de Physique, Faculte des Sciences I, Marrakech, Morocco	913
Experimental and Computer Simulation of Solar-Heated and Natural Air Hay Drying Systems S. Sokhansanj, E.A. Arinze, G.J. Schoenau, and R.T. Patil, College of Eng., University of Saskatchewan, Saskatoon, Canada	918
Energy Conservation in Egyptian Glass Industry Using Solar Kilns for Sand Drying M.A. Mohamad, and S.M. Khalil, National Research Centre, Solar Energy Dept., Dokki, Cairo, Egypt	925
A New Drying Technique Based on the Solar Radiation Concentration Effect D.C. Badea, Dept. of New Proceed. and Tech., Inst. of Food Chemistry, Bucharest, Romania	930
Renewable Energy Powered Stirling Engines a Viable Energy Alternative D.K. Dixit, and Sudhir V. Ghodke, Dept. of Mech. Engineering, College of Engineering, Nagpur, India	934
New Fluids for Compression Heat Pumps A. Azzaoui, and A. Bernatchou, Solar Energy Lab., Faculte des Sciences, Rabat, Morocco	939
Analysis of a Steam Generating System, Using Linear Solar Concentrator, for Generation of Electrical Power N.K. Mandal and S.N. Sharan, Engineering Technology, Birla Institute of Technology and Science, Bajasthan, India	944
Design and Test of a Solar Adsorption Ice Maker Huang Zhi-Cheng and Li Zhong-fu, Guangzhou Institute of Energy Conversion, Chinese Academy of Sc., Guangzhou, P.R. China	949
Simulation of a Solar Refrigerator Based on Chemical Reaction Using a CPC Collector R. Elayachi, A. Bendou and H. Hamdi, Laboratoire de Mecanique des Fluides et d'Energetique, Dept. de Physique, Faculte des Sciences I, Marrakech, Morocco	954

A Computerized Method for Calculating the Dimensions of an Aqua-Ammonia Absorption Refrigerating System Components R. Naciri, M. Boudida, M. Charia, Lab. d'Energie Solaire, Faculte des Sciences, Rabat, Morocco	959
Computer Modelling and Simulation of a Solar-Augmented Vapour Absorption Refrigeration System D.K. Dixit, U.N. Gaitonde and G.K. Sharma, Dept. of Mech. Engineering, College of Engineering, Nagpur, India	964
Simulation of an Adsorptive Solar Refrigerator in Two Different Moroccan Climates F. Bentayeb, F. Lemmini and J.J. Guillemainot, Laboratoire d'Energie Solaire, Faculte des Sciences, Rabat, Morocco	969
Simulation of an Autonomous Solar Absorption-Diffusion Refrigerator T. Mediouni, and M.N. Kaddioui, Laboratoire de Mecanique des Fluides et d'Energetique, Dept. de Physique, Faculte des Sciences I, Marrakech, Morocco	974
Improvement of Performance of Solar Absorption Refrigeration Machine $\text{NH}_3/\text{H}_2\text{O}$, with a Bubbling M. Ahachad and M. Charia, Laboratoire d'Energie Solaire, Faculte des Sciences, Rabat, Morocco	979
Performance Study of the Packed Bed Dehumidifier Using Lithium Chloride W.J. Yan and Y.H. Huang, Energy and Research Lab., Industrial Technology Inst., Hsinchu, Taiwan	984
Thermal Design Studies on an Open Cycle Vapour-Absorption and Liquid Desiccant Hybrid Solar Cooling System Y.K. Yadav, S.C. Kaushik, Dept. of Agricultural Eng., Haryana Agricultural University, Hisar-125 004, India	989
Simulation with Mapping Relation Method and Discussion of Control Characteristics of Solar Air Conditioning System H.S. Ward, Fu Hui Li, and Huang Zhi Cheng, Technical College Planning Team, Wanchai, Hong Kong	994
A Model for Solar LiBr Absorption Cooling System. M.A. Farwati, Mech. Engineering Dept., Faculty of Eng., Benghazi, Libya	999
Performance of A Solar-Powered Air-Conditioning Plant K.C. Ng, C. Yap, T.Y. Bong and H.L. Bao, Dept. of Mech. Eng., National University of Singapore, Singapore	1005
Efficiency Increasing Methods for A Solar Driven Vapor Ejection Type Refrigerator V.A. Petrenko, Inst. of Low-Temperature Technics and Energetics, Odessa, Ukraine	1018
A Solar Vapour Ejection Refrigerator Testing in Air Conditioning Regime V.A. Petrenko, and N.A. Stchetinnina, Inst. of Low-Temp. Technics and Energetics, Odessa, Ukraine	1023

Design and Fabrication of a Portable Solar Barbecue S. Manzoor, S.A. Shahid, H. Sadiq, S. Zafar, S. Qadeer, and M. Ayyub, Peoples Colony, (Beaconhouse Public School), Faisalabad, Pakistan	1030
Textured Black Copper Solar Selective Absorber Coatings P. Richharia, C/O Dr. A. Sharma, New Delhi, India	1035
Analysis of Axially Finned Phase Changing Material PCM Storage Unit Kamal A.R. Ismail, and Monica M. Goncalves, Faculdade de Engenharia Termica E de Fluidos, Universidade Estadual de Campinas, Campinas SP, Brazil	1041
Rationalization of Design and Application of the Parabolic Dish Solar Furnace W. Tyfour and M.A. Alhusein, Faculty of Engineering, Mutah University, Mutah - Karak, Jordan	1046
Optimization of Collector Tilts Using F-Chart Method G. Datta, L. Broman and H.P. Garg, Vasant Kunji, New Delhi, India	1051
The Dynamics of Free Convection in a Solar Pond A. Joyce, M.C. Giestas, and H. Pina, Department of Renewable Energies, LNETI, Lisboa Codex, Portugal	1056
Numerical Study of Mixed Convection in Two Contiguous Semi-Open Cavities A. Amahmid, A. Mir and M.N. Kaddioui, Laboratoire de Mecanique des Fluides et d'Energetique, Dept. de Physique, Faculte des Sciences I, Marrakech, Morocco	1061
Submodels for the Numerical Simulation of Solar Water Storage Tanks F. Parrini, S. Vitale and L. Castellano, ENEL/CRTN, Milan, Italy	1066
Trade-Offs Between Efficiency and Pressure Drop in Simple Duct Solar Air Heaters C. Choudhury and H.P. Garg, Centre of Energy Studies, Indian Institute of Technology, New Delhi, India	1071
Solar Collector Parameter Estimation from Daily System Tests K.Y. Foong, N.E. Wijesundera and M.N.A. Hawlader, National Univ. of Singapore, Mech. and Production Eng. Dept., Singapore	1076
Development of Solar Concentrators at the University of Agriculture, Faisalabad, Pakistan S. F. Haider, S.A. Shahid, M. Ayyub, H. Sadiq, and A.H. Jilani, Dept. of Agri. Meteorology, Univ. of Agr., Faisalabad, Pakistan	1081
A Tracking Mechanism for Medium and High Concentration Ratio Parabolic Trough Solar Collectors S.A. Kalogirou, S. Lloyd and J. Ward, High Tech. Inst., Nicosia Cyprus	1086
Performance Measurements of a Concentrated Sun Tracking Collector Built at Hacettepe University Demir Inan, Hacettepe Univ., Dept. of Physics, Ankara, Turkey	1092
Experimental Study of Temperature Dependent Heat Transfer During Melting and Solidification Processes S.S. Al-Jandal, Dept. of Eng., Univ. of Reading, Reading, UK	1097

Comparative Performance Studies of Woods in Improved Wood-Burning Stoves B. Garba and A.S. Sambo, Usmanu Danfodiyo University, Sokoto Energy Research Centre, Skoto, Nigeria	1106
Design, Construction and Performance Tests of Two Parabolic Concentrator Cookers U. Musa and A.S. Sambo, Usmanu Danfodiyo University, Sokoto Energy Research Centre, Skoto, Nigeria	1111
Role of Agricultural Wastes in Solar Hot Water Storage Systems P.B.L. Chaurasia, Solar Energy Division, Central Arid Zone Research Inst., Jodhpur-(Rajasthan), India	1118
Solar Thermal Treatment of Natural Phosphate: Fritting Phenomenon E.M. Banane, M. Boumahaza, and L. Belkbir, Faculte des Sciences, Rabat, Morocco	1123
Energy Conservation Possibilities in a Typical Indian Dairy A. Thomas, V.G. Tungal, and D.G. Haryadi, Instrumentation and Service Unit, Indian Institute of Science, Bangalore, India	1128
Solar Greenhouse with Concentrating Roof Vaclav Bauer, Vladimir Kuceravy, Bonumill Nabelek, Vladimir Jirka, Miroslav Maly, Stanislav Pribil, Czechoslovak Academy of Sciences, Institute of Botany, Section of Plant Ecology, Trebon, Czechoslovakia	1133
A Combined Multiple Effect and Basin Stills for Salin Water Solar Desalination N.S. Bishena, University of 7th April, Faculty of Science, Department of Physics, Zawwia, Libya	1138
Development of a Low Cost Charcoal Stove Operated Absorption Refrigerator for Vaccine Storage in Papua New Guinea. A.H. Uppal and K.K. Komuna, Dept. of Mech. Eng., Univ. of Technology, Lae, Papua New Guinea	1143
Report on the Development of Solar Gadgets at University of Agriculture, Faisalabad,(Pakistan) S.A. Shahid, S. Qadeer, S. Zafar, H. Sadiq, S. Manzoor, and N. Tariq, Department of Physics, University of Agriculture, Faisalabad, Pakistan	1149
Effect of Pre-Heating on the Performance of Insulated Solar Still A.S. Sambo and M. Aliyu, Usmanu Danfodiyo University, Sokoto Energy Research Centre, Skoto, Nigeria	1154
Performance of a Dialytic Battery with Ion-Exchange Membranes Coupled with a Solar Still (Solar Membrane Cell) Fujio Suda, Department of Resources and Environment Sciences, Sch. of Hummanities and Culture, Tokai Univ., Hiratsuka, Japan	1162
Environmentally Controlled Novel Greenhouse Using Passive Solar Energy S.M. El-Haggar, The American University in Cairo, Cairo, Egypt	1167

An Autonomous Combined Solar System for Heating, Cooling and Water Supply	1175
V.A. Petrenko, and V.A. Goubanov, Inst. of Low-Temperature Technics and Energetics, Odessa, Ukraine	
An Experimental Model of an Autonomous Energetic Complex on a Base of Renewable Energy Sources	1180
V.A. Petrenko, V.A. Goubanov, and D.I. Bouiaji, Inst. of Low-Temperature Technics and Energetics, Odessa, Ukraine	
Thermal Radiation Performance Analysis on Solar Steel Pipe Concrete Collecting Wall	1185
Li Baojun; Yang Shilong, Dept. of Physics, Shenyang Arch. Engineering College, Shenyang, China
