TABLE OF CONTENTS

LUNCHEON SPEAKER

Incineration Research, Processes, and Hearings, or the Good, the Bad, and the Ugly .......................... 1
Jost O.L. Wendt, University of Arizona

COMMUNITY OUTREACH: COMMUNICATION--Chair: R. Kagel, Dow Chemical

Effective Risk Communication ............................................................... 7
Kathryn E. Kelly, Environmental Toxicology International, Inc.

Reaching Agreement Among Parties in Disputes Over Incineration .................................................. 15
Jennifer Nash, Massachusetts Institute of Technology

Hazardous Waste Incineration Managed By and For People ................................................................. 19
R.E. Bastian and G.D. Smith, Eastman Kodak Company

COMMUNITY OUTREACH: WHAT WORKS?--Chair: R. Kagel, Dow Chemical

Opposition to Incinerators in New Mexico: Impacts on Regulatory Policies ........................................ 25
Edith Pierpont, League of Women Voters of New Mexico

Public Consultation in the Siting of Hazardous Waste Management Facilities, A Case Study:
Ontario, Canada .................................................................................. 29
Brenda J. Sakauye, Ontario Waste Management Corporation

How Dow Has Obtained Community Support for a Second Incinerator: A Case Study ...................... 35
Jerry Ring, The Dow Chemical Company

MONITORING--Chair: N. Bergan, Sandia National Laboratory; CoChair: R.H. Chang, ITRI

Development of a High Temperature Gas Sampling Apparatus for the Qualification of the Flue Gases of a
Nuclear Waste Incinerator Plant ...................................................................... 39
Annie Trégouère, Patrick Burghoffer, and Jacques Vendel, IPSN/CEA

Comparison of Passive-Remote and Conventional Fourier Transform Infrared Systems for Continuously
Monitoring Incinerator Emissions ...................................................................... 43
Jack C. Demirgian and Cheryl L. Hammer, Argonne National Laboratory; Robert T. Kroutil, U.S. Army
Chemical Research, Development, and Engineering Center

Continuous Emissions Monitoring of Mixed Waste Incinerators ......................................................... 51
D.S. Moore, G.E. Bentley, M.J.S. Crain, H.A. Fry, D.J. Funk, P.H. Hemberger, R. Oldenborg, B.A. Palmer,
G.P. Quigley, and B.I. Swanson, Los Alamos National Laboratory

Emission Control of a Radioactive Waste Incineration Plant ............................................................... 55
R. Becker and G. Steinhaus, Kernforschungszentrum Karlsruhe GmbH

UTILIZATION/RECOVERY--Chair: M. E. Wacks, University of Arizona

Waste Utilization/Recovery by Preheating Ferrous Scrap ................................................................. 59
T.J. Schultz and J.K. Shah, Surface Combustion, Inc.
Poultry Litter as a Fuel in the UK - A Review ................................. 63
S.P. Dagnall, ETSU

Energy Recovery Boiler Technology in Hazardous Waste Incinerators .................................................. 71
S.G. DeCicco and I. Acharya, IT Technology

Utilization of Waste Ferrous Sulphate ........................................... 81
Marek Kotowski and Lucjan Pawlowski, Technical University of Lublin

AIR POLLUTION CONTROL A--Chair: J. Brady, Andersen 2000;
CoChair: L. Larrinaga, AWD

Operating Experience with the Ionizing Wet Scrubber on Hazwaste Incinerators ................................. 87
Stanton V. Sheppard, Ceilote/Air Pollution Control

The Application of GORE-TEX® Membrane Filter Bags at a Tire-to-Energy Facility ......................... 93

Trial Burns: A Case for On-Site Analytical Techniques .............................................................. 99
Sean O'Brien, Alliance Technologies

AIR POLLUTION CONTROL B--Chair: J. Brady, Andersen 2000;
CoChair: J.H. Kim, KAERI

Prefiltration of Incineration Gaseous Wastes by Granular Bed Filter .............................................. 103
J. Vendel and A. Briand, IPSN/CEA; M. Girod, CEASACLAY

How Can Incineration Processes Meet the Stringent European Requirements for NOx Emissions? ........ 109
K.J. Whiting, T-Thermal (Europe) Ltd.; J.M. Pardell, TRI-MER Corporation

Some Characteristics of SiC Filter Media for the Filtration of Hot Off-Gas ........................................ 115
Joon-Hyung Kim, Sung Paal Yim, Yong-Chil Seo, Byung-Gil Ahn, and Hun-Hiwee Park, Korea Atomic
Energy Research Institute

Fluidized Bed Incineration of Hazardous Chemicals and Waste Solids with Simultaneous Control
of Air Pollutants .................................................................................... 121
Pasupati (Pas) Sadhukhan and Mike Bradford, Jacobs Engineering Group Inc.

An Innovative System for the Emission Control of Heavy Metals and Dioxin .................................. 129
Peter Schöner, Von Roll GmbH

Use of High-Surface-Area-Hydrate-Additive in a Two Stage Process .............................................. 133
Bernd Morun, Rheinische Kalksteinwerke GmbH; Florian Schwarzkopf, Consultant

Case Study in Achieving a Particulate Emission Level of 0.08 Gr/Dscf @ 7% O2 ............................. 141
Albert J. Lalik, Burroughs Wellcome Co.

INNOVATIVE TECHNOLOGIES--Chair: W. McCulla, LANL;
CoChair: R. Rutberg, Chem-Security

Vitrification of Asbestos with a Process Using a Plasma Torch .......................................................... 147
Jean Guenard, Electricite de France
Molten Salt Oxidation as an Alternative to Incineration .................................................. 151
Leonard W. Gray, Martyn G. Adamson, John F. Cooper, Joseph C. Farmer, and Ravindra S. Upadhye,
Lawrence Livermore National Laboratory

Aqueous Phase Oxidation Techniques as an Alternative to Incineration .................................. 157
Leonard W. Gray, Martyn G. Adamson, Robert G. Hickman, Joseph C. Farmer, Zoher Chiba,
David W. Gregg, and Francis T. Wang, Lawrence Livermore Laboratory

The Electrochemical Destruction of Waste Reprocessing Solvent and Ion Exchange Resins ............. 167
D.F. Steele, J.P. Wilks, and W. Batey, AEA Technology Dounreay

Decomposition of Organic Compounds in a Silent Discharge Plasma ........................................ 175

Nonthermal Plasma Alternative to the Incineration of Hazardous Organic Wastes ..................... 179
University of California

C. Ed Ball and David Randall, Midwest Research Institute; George Huffman and C.C. Lee, U.S. Environmental Protection Agency

DESIGN & START-UP--Chair: D. Dalton, SAIC; CoChair: H. Ramm, HIM

Inincerator Emergency Safety Vents ....................................................................................... 191
ASME Research Committee

A Novel Method of Reducing Transient Emissions from Rotary Kiln Incinerators Through Modified Waste Packaging ........................................................................................................ 195
Paul M. Lemieux and William P. Linak, U.S. Environmental Protection Agency; Jost O.L. Wendt,
University of Arizona

Design and Construction of a Radwaste Incineration Facility: A French-Spanish Technical Cooperation Project ....................................................................................................................... 199
Serge Carpentier, SGN; Pablo Zuloaga, ENRESA

Warning! Siting a Hazardous Waste Incinerator in New Jersey May Be More Than You Think It Is .... 205
Jay Bizarro, ISP Environmental Services Inc.

Incineration of Dioxin Contaminated Wastes: Design and Start-Up of a Transportable Incinerator ................................................................. 211
Robert P. Apa, Morrison Knudsen Corporation

Solid Waste Incineration: Problems Ahead, Proceed with Caution (One Year's Experience from a Pharmaceutical Manufacturing Company) ........................................................................ 217
Sarah R. Alston, Burroughs Wellcome Co.

Engineering Improvements on the ThermalKEM South Carolina Hazardous Waste Incineration Facility: A Case History ................................................................. 223
Rich Madden, ThermalKEM; John Balchan, ENSR Consulting & Engineering
The Texas Kiln Success Story: Four Decades of Experience ........................................... 227
David A. Van Wyk, Sr. and Bobby Weaver, AWD Technologies, Inc.; Jeff Stultz, Dow Chemical Company; Jim Newell and Ken Otto, Dow Engineering Company

RISK--Chair: R. Wegeng, Battelle PNL

Levelized Cost-Risk Reduction Prioritization of Waste Disposal Options ................................. 231
Vance K. Wilkinson and Joan M. Young, Oak Ridge National Laboratory

Hazardous Waste Incinerator Stack Emission Risks--An Engineer’s Perspective ....................... 237
J. Michael Osborne, 3M; Steve Schliesser, MRI

Communicating Risk to the Public: It’s More Than ‘All Talk’ ............................................. 245
Joyce Feldman, Foster Wheeler Enviresponse, Inc.

The Increasing Importance of Risk in Environmental Decision-Making .................................. 249
John A. Jaksch and Charlette A. Geffen, Pacific Northwest Laboratory

Risk Assessment, Metals Emissions and the Clean Air Act Amendments of 1990 ....................... 255
Morris Trichon and Robert Chang, Research-Cottrell Environmental Services & Technologies

BEHAVIOR OF ORGANICS & NON-METALLIC INORGANICS IN THERMAL TREATMENT SYSTEMS--Chair: K. Bruce, Acurex; CoChair: K. Whiting, T-Thermal

Development of a Laboratory Method for Estimation of Hydrogen Chloride Emission Potential of Incinerator Feed Materials ................................................................. 261

Elisabeth Poncelet, French Environment and Energy Control Agency

Evaluation of POHCs for Chemical Demilitarization ............................................................. 273
P. Gilford, G. Hinshaw, G. Jungclaus, and M. Whitacre, Midwest Research Institute; C. Massimino, and Y.J. Kim, Environmental Protection Agency

Further Development of the KfK System for Radioactive Waste Incineration ........................... 281
F. Dirks, W. Hempelmann, and W. Pfeifer, Kernforschungszentrum Karlsruhe

Catalytic Destruction of Chlorinated Organics Including PCDD’s/PCDF’s in Flue Gas From Waste Incinerators ........................................................................................................ 287
I.M. Freidel, Allied-Signal Industrial Catalysts

Vapor Extraction and Catalytic Oxidation of Chlorinated VOCs ................................................ 291
F.A.M. Buck, King, Buck & Associates Inc.; C.W. Hauck, Hauck Technical

Zhuoxiong Mao, Michael J. McIntosh, and Jack C. Demirgian, Argonne National Laboratory
RADIOACTIVE WASTE INCINERATION--Chair: R. Koenig, Merlin; CoChair: W. Hempelmann, KFK Karlsruhe

Incineration Process for Plutonium-Contaminated Waste .......................................................... 303
*J.J. Vincent, T. Longuet, R. Cartier, and L. Chaudon, CEA*

The Incinerator Project of the Valduc Nuclear Research Center ............................................. 307
*J.P. Durec, Ussi; J. Lannaud, CEA*

Incineration of Spent Ion Exchange Resins in Combination with Fluidized Bed and Catalyst ........ 311
*Taneaki Yahata, Shinji Kihara, Masaru Hirata, and Masayoshi Abe, Oarai Research Establishment*

Operation Experience with the Swiss Incineration Plant for Low Level Radioactive Waste .......... 317
*Peter Leister, Colenco Power Consulting Ltd.; Wolfgang Zehnder, Paul Scherrer Institute; Hartmut Ramm, Hess Industrial Waste Management Ltd.*

Demonstration Plant and Test of an Incinerating Melter System for Radioactive Wastes .............. 323
*H. Miyao, K. Tanimoto, and M. Miyazaki, Power Reactor and Nuclear Fuel Development Corporation; H. Wakui, K. Oasada, and F. Ishikawa, CHIYODA Corporation*

Incineration of Mixtures of Dry Active Wastes Containing More than 2 wt% Chlorine .................. 327
*G. Sandrelli and G. Agrati, ENEL/DSR; S. Terrani, Polytechnic of Milano; M. Pandolfi, SINCOS Ltd.*

A Commercial Use of a Simplified Combustible Radioactive Waste Incineration System ............. 333

SITE REMEDIATION/TRANSPORTABLE INCINERATORS--
Chair: C. Massimino, U.S. EPA/REGION 10; CoChair: K. Smith, IT

Site Remediation Soils Handling, Incineration and Site Closeout Challenges and Solutions ........ 339
*Derrell T. Young and Jeffrey C. Dasch, Ogden Waste Treatment Services, Inc.; James A. Ives, ARCO Alaska, Inc.*

Pilot-Scale Incineration of PCB-Contaminated Sediments from the Hot Spot of the New Bedford Harbor Superfund Site .......................................................... 345
*L.R. Waterland and W.E. Whitworth, Acurex Environmental Corporation; M.K. Richards, U.S. Environmental Protection Agency*

Case Study in Transportable Incineration Technology Applied to Chemical Warfare Agents ........ 353

Site Test Results with the PCF-6 ........................................ 357
*Rob Haun and Richard Eschenbach, Retech, Inc.; Dan Battleson and Corry Alsberg, MSE, Inc.; Trevor Jackson, SAIC*

Design and Operating Features of the Ecotechniek Thermal Treatment System .......................... 365
*Robert D. D'Olier and Alan P. Gradet, HALLIBURTON NUS; E.H. DeBoer, Ecotechniek*
Vapor Phase Thermal Oxidation for Site Remediation ............................................. 371

Co-Firing Coal and Former Manufactured Gas Plant Waste-Contaminated Soil .... 375

Trial Burn Requirements for Hazardous Waste Incineration Projects .................. 379
John Gilbert, United States Environmental Protection Agency; Paul Meeter, Roy F. Weston, Inc.; Daniel Crouse, Response Engineering and Analytical Contract

Fate of Tritium, Carbon\(^{14}\), and Iodine\(^{131}\) in Wet Scrubber Air Pollution Control Systems on Chemical and Medical Waste Incinerators ........................... 395
Jack D. Brady, Andersen 2000 Inc.

Biomedical Waste Treatment in the Federal Republic of Germany ....................... 405
G. Steinhaus, Kernforschungszentrum Karlsruhe GmbH

Investigation into the Discrepancy Between MWI and MWC CDD/CDF Emissions .......... 409
W.S. Lanier and T.R. von Allen, Energy and Environmental Research Corporation

Controlling Emissions from Medical Waste Incinerators .................................. 419
Michael G. Dennis and Arlene R. Borowsky, ENSR

Design, Installation and Start-Up of a Rotary Kiln Hospital Waste Incineration System with Heat Recovery and SDA/FF APC System ................................. 425
Gordon F. Blizard, Jr. and Robert J. Tidona, ThermAll, Inc.

 Destruction of Medical Waste Using Plasma Energy ...................................... 431
Marlin D. Springer and William C. Burns, Mason & Hanger National, Inc.

TCO-Firing of Coal and Hospital Waste Proof-of-Concept Demonstration ............... 435
E. James Coulthard and Jacob Korenberg, DONLEE Technologies Inc.; Gary A. Nelkin, United States Department of Energy

Certification of Medical Waste Incinerator Operators and Operator Supervisors .......... 443
Kenneth R. Durkee and Jeffrey A. Telander, U.S. Environmental Protection Agency

Status of EPA Regulatory Development Program for Medical Waste Incinerators--Results of Emission Test Program ......................................................... 447
Kenneth R. Durkee and James A. Eddinger, U.S. Environmental Protection Agency

Assessment of the Effects of Incinerator Operating Parameters on Emissions from MWI's ........ 457
Dennis D. Wallace, Midwest Research Institute
Medical Center Incineration: A Case History ................................................................. 467
George D. Martin and David W. Tyler, University of Michigan Hospitals

Hospital Waste Incinerator Operations: Challenges and Opportunities ....................... 473
Eric J. Buzzell, Borgess Medical Center

Comparison of Costs for Alternatives to Onsite Incineration of Medical Waste ............... 477
Suzanne D. Shoraka, Midwest Research Institute; Kenneth R. Durkee and James A. Eddinger,
U.S. Environmental Protection Agency

Emissions Assessments from Incineration of Large Volume Parenteral Plastic Containers .... 483
G.R. Hassel, R.G. Rizeq, and T.P. McGrath, Energy and Environmental Research Corporation

PHYSIOCHEMICAL NATURE OF INCINERATOR RESIDUES & DISPOSAL
OPTIONS--Chair: B. Diel, Chemical Waste Management;
CoChair: P. Kalb, Brookhaven National Laboratory

Washington State's Experience in Regulation Development, Adoption, and Implementation of the
Special Incinerator Ash Regulation, Chapter 173-306 WAC ........................................ 489
Ali M. Raad and James C. Knudson, Department of Ecology

The Nature of Elements in Incineration Residues and Their Stabilized Products ............... 495
T. Taylor Eighmy, David Domingo, Dominique Stämpfli, and James R. Krzanowski, University of New
Hampshire; Dykstra Eusden, Bates College

Modeling the Leaching of Metals from Hazardous Waste Incineration Ash .................... 501
D. Dzombak, Carnegie Mellon University; F. Morel, Massachusetts Institute of Technology; J. Mundt,
E. Hirschberg, and G. Huff, Amoco Oil Company

Immobilization of Ash by Microwave Heating ............................................................ 507
Kazuki Morita, Vinh Q. Nguyen, Ron Nakaoka, and John D. Mackenzie, University of California Los Angeles

An Optimized Disposal and Reuse Characterization for Thermal Waste Treatment Residues .... 513
Wolfgang Baum, William F. Sutton, and Thomas E. Weyand, Pittsburgh Mineral & Environmental
Technology, Inc.

Optimization of Stabilization System Design ............................................................. 519
Barry N. Beck and Michael L. Duke, DRE Technologies, Inc.

CoChair: J. McFee, IT Corporation

Potential Need for Modification of TRU Waste Destined for Disposal at the WIPP .......... 527
Matthew Silva, New Mexico Environmental Evaluation Group

Radioactive Mixed Waste Incineration at the U.S. Department of Energy ....................... 531
Pete Siebach and Bryan Westich, U.S. Department of Energy; Alex Murray, Science Applications
International Corporation
DOE Mixed Wastes: What Are They and Where Can Thermal Technologies be Applied? ................. 541
Wayne A. Ross, Pacific Northwest Laboratory; Leon C. Borduin, Los Alamos National Laboratory;
Burdon C. Musgrave, Lawrence Livermore National Laboratory

Mixed Waste Incineration at the Rocky Flats Plant ............................................. 551
Reginald W. Tyler, U.S. DOE; David C. Moody, Los Alamos Technology Office at Rocky Flats;
Paul M. Williams, EG&G, Rocky Flats

Hanford's RMW Thermal Treatment Initiative ....................................................... 555
B.G. Place and J.G. Riddelle, Westinghouse Hanford Company

Recent Advances in In Situ Vitrification ............................................................. 559
William F. Bonner and Ja-Kael Luey, Pacific Northwest Laboratory

THERMAL DESORPTION OF PETROLEUM CONTAMINATED SOILS &
SLUDGES--Chair: J. Cudahy, Focus Environmental; CoChair: H. Molleron, Clean Earth

Petroleum Contaminated Soils and Sludges--Markets, Permitting and Thermal Desorption Technologies .... 563
Environmental Protection Agency; Seymour I. Rosenthal, Foster Wheeler Enviresponse

Comparing Thermal Counter Flow and Parallel Flow Soil Remediation Processes ..................... 571
Everett Harwood, Thermotech Systems Corporation

Trends and History of the Ex-Situ/Low Temperature Hydrocarbon Contaminated Soils Treatment
Industry ................................................................................................................... 577
Scott Briel and George L. Chedsey, Soil Remediation Company

Emissions Testing of Systems for the Treatment of Petroleum Contaminated Soils and Sludges ........ 581
Meryl R. Jackson and Charles A. Petrishe, The Almega Corporation

RE*SOIL--A Fixed Thermal Treatment Unit for Petroleum Contaminated Soils ...................... 587
John B. Anthony and Stephen A. Warren, Clean Berkshires, Inc.

Thermal Desorption Utilizing Hollow-Screw Technology ........................................... 589
William J. Sheehan, Separation and Recovery Systems, Inc.

BEHAVIOR OF METALS IN THERMAL TREATMENT SYSTEMS--
Chair: W.R. Seeker, EERC; CoChair: W. Clark, EERC

Fate of Metallic Constituents During Incineration ................................................. 595
Pratim Biswas, Wen Yinn Lin, and Chang Yu Wu, University of Cincinnati

Analysis of Chromium Volatility in the DWTF Incinerator and in the Molten Salt Processor ....... 599
Bartley B. Ebbinghaus, University of California

Laboratory Measurements of Metal Adsorption from Simulated Incinerator Flue Gases: Sorbent
Selection for Cesium Capture ................................................................................. 605
S.M. Crosley and R.J. Kedi, Oak Ridge National Laboratory
Metals Emissions from Hazardous Waste Incinerators ................................................. 611
Joseph J. Santoleri, Four Nines, Inc.

Verification of Continuous Monitoring of Metal Emissions ........................................ 619
J. Michael Osborne, 3M; Steve Schliesser, MRI

Analysis of Toxic Metals Emissions from Waste Combustion Devices .......................... 625
R. George Rizeq, Wyman Clark, and W. Randall Seeker, Energy and Environmental Research Corporation

MATERIALS--Chair: M. Trichon, Research Cottrell

A Study of the Effects of Alkali Attack on Refractories Used in Incineration .................. 631
Kelvin McAlister and Edward Wolfe, Harbison-Walker Refractories

Recent Alloy Additions Improve the High Temperature Properties of Austenitic Stainless Steels .......... 639
James J. Skarda and James E. Hamer, Rolled Alloys

Corrosion Studies and Recommendation of Alloys for an Incinerator of Glove-Boxes Wastes ........ 645
F. Devisme and M.H. Garnier, CEA

Sayan Chakraborti and Mark Abashian, IT Corporation; J. Carlos Lopez, Westinghouse Electric Corporation-WID; Ravi Batra, U.S. Department of Energy-WPSO

Alloy Selection for Waste Incineration Facilities ......................................................... 663
G. Sorell, G. Sorell Consulting Services

MIXED WASTES INCINERATION--Chair: R. Gillins, SAIC;
CoChair: C. von Koch, Siemens

TSCA Incinerator Testing and Operational Experience .................................................. 673
T.O. Rogers, R. Heller, and D. Blind, IT Corporation

Dynamic Simulation Study of the CIF Incinerator ...................................................... 679
T. Hang, Westinghouse Savannah River Company

Waste Treatment Evaluation for Aqueous Mixed Waste from Incineration ....................... 683
H. Holmes Burns, Westinghouse Savannah River Company

Tri-Cities Environmental Analysis and Treatment (Treat) Complex ................................ 689
Bill Root, Federal Environmental Services, Inc.

Closure of Building 624 Incinerator .............................................................................. 691
M.N. Ridley, M.L. Hallisey, S. Terusaki, and M. Steverson, Lawrence Livermore National Laboratory
Safety Considerations in Engineering and Design of Radioactive Waste Incineration Plants

Alfred Chrubasik, NUKEM GmbH

Hazardous Waste Incineration Wastewater Treatment

Roy De Gesero, AWD Technologies, Inc.; John Teringo, Dow Chemical USA; Bill McIlhenny, Consultant

Stabilization of Incinerator Air Pollution Control Residues

Paul R. Lear and Jesse R. Conner, Chemical Waste Management

A Survey of Slag and Slag Avoidance Techniques with Emphasis on Methods to Control Melt Temperatures

W.R. (Bill) Schofield, John Lutzmann, and Gene Patterson, Schofield Environmental Associates

Radiation Cooling in Hazardous Waste Incinerators

Donald L. Corwin and George Lipinski, Four Nines, Inc.

Optimization Software for Hazardous Waste Incineration

R.R. Mitchell, E.K. McKinley, and L.J. Koos, Westinghouse Science and Technology Center; F. Murray, Aptus Environmental Services

Regulation of Incinerators in the UK and Europe

J.P. Wilks, Winfrith Technology Centre

New Clean Air Act: Technical Implications for Hazardous Waste Incineration Facilities

Azita Yazdani, Pollution Prevention International

The Impact of Rotary Kiln Atmosphere on the Performance of Hazardous Waste Incinerator--Oxidative vs. Starved-Oxygen

Min-Da Ho, Union Carbide Industrial Gases, Inc.

Incinerator for Fluorinated Hydrocarbons

I. Mielke, Hoechst AG

High VOC Destruction with Low NOx in Adiabatic Radiant Combustors

David F. Bartz and Frederick E. Moreno, Alzeta Corporation; S.P. Barone, Gas Research Institute

A New French Plant to Meet the EEC Emission Objectives

Gerard Millot, EMC Services

Firing of Non-Condensible Waste Gas Streams in Stand Alone Modular Incineration Systems

Roberto E. Santos and Jonathan C. Backlund, Coen Company
MIXED WASTE TECHNOLOGY DEVELOPMENT--Chair: C.S. Jackson, LLNL; CoChair: D.A. Kenny, BNFL

Current DOE Initiatives in Plasma Arc Technology Development .............................................. 765
Ray Geimer, Science Applications International Corporation

Ausmelt Top Submerged Lancing Technology for Smelting and Detoxification of Hazardous and Radioactive Waste ................................................................. 771
B.W. Lightfoot, K.R. Robilliard, and R.W. Matusewicz, Ausmelt Pty Ltd.

Patrick M. Dhooge, Delphi Research, Inc.

Advanced Powerful CO\(_2\) Laser-Controlled Incineration of Waste Graphite Blocks (II) ................................................................. 783
Jean R. Costes and Nicolas Barbannaud, CEA; Philippe Caminat, Institut Méditerranéen de Technologie

State of the Art Review of Air Pollution Control Technologies for Mixed Waste Incinerators ............................................. 787
M. Boddy, W. Clark, W.R. Seeker, and B. Springsteen, Energy and Environmental Research Corporation

Treatment of Mixed Wastes by the Molten Salt Oxidation Process ......................................................... 795

METALS ROUNDTABLE--Moderator: C. Dempsey, U.S. EPA/RREL; Session Organizer: J. Feldman, Foster Wheeler Enviresponse

Metals Roundtable: Panelist Discussion Points ......................................................... 801
Gary D. Hinshaw, Midwest Research Institute

Partitioning of Metals in Incinerators and Control of Subsequent Emissions: Key Issues for Research .............................................. 803
Morris Trichon, Research-Cottrell Environmental Services & Technologies

Metals Emissions from Incinerators: Current Issues ......................................................... 805
Larry R. Waterland, Acurex Environmental Corporation

AUTHOR INDEX ................................................................. 807

ATTENDEE LIST ................................................................. 811
