CONTENTS

OPENING LECTURES

1. Interpolative Reasoning as a Common Basis for Inference in Fuzzy Logic, Neural Network : Theory and the Calculus of Fuzzy If-Then Rules..........1
   Prof. Lotfi A. Zadeh
   University of California, Berkeley (U.S.A.)

2. The Physiology of Perception : Functional Architectures of Biological Sensorimotor control Systems........................................3
   Prof. Walter J, Freeman
   University of California, Berkeley (U.S.A.)

3. Towards Developing a Human-like Computer............................9
   Prof. Gen Matsumoto
   Electrotechnical Laboratory (Japan)

PLENARY LECTURES

1. Genetic Algorithms, Neural Networks and Fuzzy Logic Systems..........17
   Prof. Elie Sanchez
   Institut Méditerranéen de Technologie (France)

2. Chaos in Fuzzy Systems and Signals.....................................21
   Prof. Horia-Nicolai Teodorescu
   Polytechnic Institute of Iasi (Romania)

3. Chaos and Fuzzy Representations of Dynamical Systems................51
   Prof. Phil Diamond
   University of Queensland (Australia)

4. Adaptive Fuzzy Systems....................................................59
   Prof. Bart Kosko
   University of Southern California (U.S.A.)

5. Functional Chaotic Devices..................................................61
   Dr. Peter Davis
   ATR Optical and Radio Communications Research Laboratories (Japan)

   Prof. Ronald R. Yager
   Iona College (U.S.A.)

INVITED/ORDINARY SESSIONS

A-1 FUZZY NEURAL NETWORKS PART I (INVITED)

Organizer : James J. Buckley
            The University of Alabama, Birmingham (U.S.A.)

1. Direct Fuzzification of Neural Network and Fuzzified Delta Rule ..........73
   Yoichi Hayashi*, James J. Buckley** and Ernest Czogala***
   * Ibaraki University (Japan)
2. Two-Degree-of-Freedom Fuzzy Model using Associative Memories
Toru Yamaguchi, Kenji Goto and Tomohiro Takagi
Laboratory for International Fuzzy Engineering Research (Japan)

3. Learning in Fuzzy Neural Networks Utilizing Additive Hybrid Operators
James M. Keller and Zhihong Chen
University of Missouri-Columbia (U.S.A.)

4. Approximations Between Nets, Controllers, Expert Systems and Processes
James J. Buckley
The University of Alabama, Birmingham (U.S.A.)

A-2 FUZZY NEURAL NETWORKS PART II

1. Automatic Control of Sewerage Pumpstation by Using Fuzzy Controls and Neural Networks
Hong Chen, Masaharu Mizumoto and Yun-fei Ling
Osaka Electro-Communication University (Japan)

2. Learning of Expert's Knowledge by Neural Network and Deduction of Fuzzy Rules by Powell's Method
Hiroshi Isshiki and Hideichi Endo
Hitachi Zosen Corp. (Japan)

3. Knowledge Implementation Multilayer Neural Networks with Fuzzy Logic
* Fujitsu Laboratories Ltd. (Japan)
** The Nikko Research Center, Ltd.
*** The Nikko System Center, Ltd.

4. An Emotion Processing System Based on Fuzzy Inference and Its Subjective Observations
Torao Yanaru, Toyohiko Hirota and Naoki Kimura
Kyushu Institute of Technology (Japan)

A-3 FUZZY NEURAL NETWORKS PART III

1. Very Fuzzy Cognitive Maps
Julio Rives and Rafael Pereira
INISEL (Spain)

2. Construction Theory for a Subjective Observation Model Based on Affine Mapping and Its Application to Neural Networks
Torao Yanaru, Toyohiko Hirota and Masahiro Siraha
Kyushu Institute of Technology (Japan)

3. Fuzzy Simulation of a Chemical Reactor by an Artificial Neural Network
A. Bulsari and A. Krastawski
Lappeenranta University of Technology (Finland)

4. Fuzzy Logic and Neural Networks for Quantitative Chemical Analysis
A-4 FUZZY NEURAL NETWORKS PART IV

1. Learning Mechanism and an Application of FFS-Network Reasoning System........................................................................................................123
   M. Tokunaga, K. Kohno, Y. Hashizume, K. Hamatani, M. Watanabe,
   K. Nakamura and Y. Ageishi
   AdIn Research, Inc. (Japan)

2. Fuzzy Network Production System -Fuzzy Filtered Synapse Network and Intensive Learning by Accumulated Fuzzy Indication........127
   Ken Nakamura, Toshihide Fujimaki, Ryuji Horikawa and Youichi Ageishi
   AdIn Research, Inc. (Japan)

3. Architecture and Training of a Hybrid Neural-Fuzzy System.........131
   Lee A. Feldkamp, G. V. Puskorius, F. Yuan and L. I. Davis, Jr.
   Ford Motor Company (U.S.A.)

4. Approximation between Fuzzy Expert Systems and Neural Networks.....135
   Yoichi Hayashi*, James J. Buckley**and Ernest Czogala***
   * Ibaraki University (Japan)
   ** The University of Alabama, Birmingham (U.S.A.)
   *** Technical University of Silesia (U.S.A.)

A-5 CHAOTIC FUZZY SYSTEMS

1. Hierarchical and Recurrent Networks of Fuzzy Models..................141
   Hidetomo Ichihashi
   University of Osaka Prefecture (Japan)

2. Transitions of Fuzzy Number through Nonlinear Dynamical Systems
   (Invited)........................................................................................................145
   Takeshi Yamakawa, Eiji Uchino, Tsutomu Miki and Tomokazu Nakamura
   Kyushu Institute of Technology (Japan)

3. New Mechanism to Transfer Schemata Caused by Transfer Crises........149
   Kazuo Sakai*, Tsuyoshi Katayama**, Kotaro Oiwa*** and Satoshi Wada*
   * Meiji University (Japan)
   ** Japan Automobile Research Institute, Inc. (Japan)
   ***Oita University (Japan)

4. Chaotic Fuzzy Models in Economy.............................................................153
   J. Gil Aluja*, Horia-Nicolai Teodorescu**, A. M. Gil Lafuente*
   and Al. P. Tacu***
   * University of Barcelona (Spain)
   ** Polytechnic Institute of Iasi (Romania)
   ***Center for Economic Studies (Romania)

A-6 FUZZY NEURAL COMPUTING SYSTEMS PART I (INVITED)

Organizer: Madan M. Gupta
University of Saskatchewan (Canada)

1. Fuzzy Logic and Neural Networks ............................................................157
   Madan M. Gupta
2. Computation and Learning Paradigms for Biologically Inspired Intelligent Computing
   Panos A. Ligomenides
   University of Maryland (U.S.A.)

3. Chaotic Neural Networks and Their Possible Application to Biological System Modeling
   M. Bodruzzaman and Mohan J. Malkani
   Tennessee State University (U.S.A.)

4. On Fuzzy Structures : Sets, Relations and Graphs
   Kiran R. Bhutani
   The Catholic University of America (U.S.A.)

A-7 FUZZY NEURAL COMPUTING SYSTEMS PART II (INVITED)
Organizer : Madan M. Gupta
University of Saskatchewan (Canada)

1. Synaptic and Somatic Adaptations in Dynamic Neural Networks
   Madan M. Gupta and D. H. Rao
   University of Saskatchewan (Canada)

2. Neurocomputing and Infinite-valued Logic
   Djuro Koruga and Stuart Hameroff
   University of Arizona (U.S.A.)

3. Neural Network Learning by Tolerance Optimization
   Václav Sebesta and Mirko Novák
   Institute of Computer and Information Science (U.S.A.)

4. A Learning Method of Fuzzy Inference Rules with Neural Networks and its Application
   Masao Mukaidono and Masato Yamaoka
   Meiji University (Japan)

A-8 NEURAL NETWORKS AND FUZZY DYNAMICS (INVITED)
Organizer : Yee Leung
The Chinese University of Hong Kong (Hong Kong)

1. Inference Network for Optimization Applications
   K. P. Lam* and C. J. Su**
   * The Chinese University of Hong Kong (Hong Kong)
   **The University of British Columbia (Canada)

2. Logical Processing with Perceptrons
   Yee Leung* and Zhiqiao Wu**
   * The Chinese University of Hong Kong (Hong Kong)
   **Shenzhen University (China)

   C. P. Kwong
   The Chinese University of Hong Kong (Hong Kong)

4. Rule Learning in Expert Systems using Genetic Algorithm :
   1. Concepts
2. Empirical Studies..................................................................................................................205
Kwong Sak Leung*, Yee Leung*, Leo So** and Kin Fai Yam*
The Chinese University of Hong Kong (Hong Kong)
University of Arizona (U.S.A.)

A-9 NEURAL NETS AND FUZZY SYSTEMS PART I (INVITED)
Organizer : Armando F. Rocha
Universidade Estadual de Campinas (Brazil)

1. A Neuro-Fuzzy Inference System Designed for Implementation on a Neural Chip........209
   P. Y. Glorennec
   Institute National des Sciences Appliquées (France)

2. Neurofuzzy Controllers.................................................................................................213
   Fernando Gomide and Armando F. Rocha
   Universidade Estadual de Campinas (Brazil)

3. Distributed Modelling...................................................................................................217
   W. Pedrycz* and Armando F. Rocha**
   * University of Manitoba (Canada)
   **State University of Campinas (Brazil)

4. A Proposal for Approximate Case-based Reasoning on Neural Networks...221
   Zuliang Shen, Ho Chung Lui and Liya Ding
   National University of Singapore (Singapore)

A-10 NEURAL NETS AND FUZZY SYSTEMS PART II (INVITED)
Organizer : Armando F. Rocha
Universidade Estadual de Campinas (Brazil)

1. A Connectionist Architecture for Production Rules with Variables...........225
   Katsuaki Sanou, Steve G. Romaniuk and Lawrence O. Hall
   University of South Florida (U.S.A.)

2. Neurofuzzy Interpolation : I. The Theoretical Background.................229
   F. J. V. Zuben*, M. Regattieri* and Armando F. Rocha**
   * Universidade Estadual de Campinas (Brazil)
   **Research on Natural and Artificial Intelligence (Brazil)

3. Using Boundary Shape Data for Efficient Adaptive Rule Modifications 233
   Hideyuki Takagi
   University of California, Berkeley (U.S.A.)

4. A Proposal of Parallel Resolution Inference on Neural Logic Network......237
   Liya Ding
   National University of Singapore (Singapore)

B-1 LEARNING ALGORITHM FOR FUZZY SYSTEMS (INVITED)
Organizer : Miguel Delgado and Antonio González
Universidad de Granada (Spain)

1. The Frequency on Fuzzy Domains and its Application to the System Identification 241
   Miguel Delgado and Antonio González
   Universidad de Granada (Spain)
2. Empirical Learning for Fuzzy Knowledge Acquisition ..........................245
   Elisabetta Binaghi
   I F C T R -C.N.R. (Italy)

3. Learning Rules for A Fuzzy Inference Model.................................253
   Luis M. de Campos and Serafin Moral
   Universidad de Granada (Spain)

4. A Knowledge Base Structure for Fuzzy Controllers..........................257
   Ricardo García Rosa, Mª Teresa de Pedro and Marco Tulio de Andrade
   Instituto de Automática Industrial, CSIC (Spain)

B-2 KNOWLEDGE ACQUISITION AND TOOLS FOR EXPERT SYSTEMS
TECHNOLOGY (INVITED)
Organizer: H.-J. Zimmermann
RWTH Aachen (Germany)

1. Fuzzy Similar Informations in Fuzzy Information Techniques............261
   Hubert Frank
   University of Dortmund (Germany)

2. Fuzzy-ID3: A Class of Methods for Automatic Knowledge Acquisition.....265
   Richard Weber
   Elite-European Laboratory for Intelligent Techniques Engineering (Germany)

3. Online Development Tools for Fuzzy Knowledge-Based Systems of Higher
   Order.....................................................................................269
   C. von. Altrock and B. Krause
   INFORM Software Corp., Aachen (Germany)

4. Reasoning with Uncertainty in the Knowledge Engineering Environment
   K E E © ..................................................................................273
   Rudolf Felix**, Claudio Moraga* and Bernd Reusch*
   * University of Dortmund (Germany)
   **Fuzzy Demonstration Centre Dortmund (Germany)

B-3 APPROXIMATE REASONING PART I (INVITED)
Organizer: I. B. Turksen
Tokyo Institute of Technology (Japan)

1. Classification and Representation of Ambiguity in Language Usage........277
   Toshihiko Yokogawa
   Laboratory for International Fuzzy Engineering Research (Japan)

2. Search Strategies using Fuzzy Sets.............................................281
   Makishi Nakayama* and Anca Ralescu**
   * Kobe Steel Ltd (Japan)
   **LIFE (Japan)

3. Sensitivity Analysis in Fuzzy Systems..........................................287
   I. B. Turksen* and Q. Wang**
   * Tokyo Institute of Technology (Japan)
   **University of Toronto (Canada)

4. A Syllogistic Reasoning as a Multi-Objective Default Expectation Process

xxvi
B-4 APPROXIMATE REASONING  PART II

1. Analytical Inference Results for Triangular Fuzzy Data (Invited)...........295
   B. De Baets and E. E. Kerre
   University of Gent (Belgium)

2. An Attempt to Methods for Approximate Reasoning based on Fuzzy
   Entropy's Theory (Invited).......................................................301
   Akio Shimizu
   Ube Industries, Ltd. (Japan)

3. Revision Principle for Approximate Reasoning : Based on Linear Revising
   Method.....................................................................................305
   Liya Ding*, Zulilang Shen* and Masao Mukaidono**
   * Institute of Systems Science, National University of Singapore (Singapore)
   **Meiji University Japan)

4. A Method of Approximate Reasoning with Certainty Factor.................309
   Yutaka Hata, Kiyotaka Miyai, Fujio Miyawaki and Kazuharu Yamato
   Himeji Institute of Technology (Japan)

B-5 APPROXIMATE REASONING  PART III

1. Fuzzy Matching and Fuzzy Comparison in Fuzzy Expert System............313
   Keon-Myung Lee, Kyoung-A Seong and Hyung Lee-Kwang
   Korea Advanced Institute of Science and Technology (Korea)

2. Fuzzy Logic Controllers with Flexible Structure.............................317
   Ronald R. Yager and Dimitar P. Filev
   Machine Intelligence Inst., Iona College (U.S.A)

3. Pruning Fuzzy Decision Trees.....................................................321
   Joseph M. Barone
   Loki Software, Inc. (U.S.A)

4. Decision Making under Fuzziness with Multiple Objectives and Its
   Application to Design Problem Solving........................................325
   Masaaki Iida, Osamu Katai, Tetsuo Sawaragi and Sosuke Iwai
   Kyoto University (Japan)

B-6 APPROXIMATE REASONING  PART IV

1. Analogical Fuzzy Reasoning and Gradual Inference Rules....................329
   László T. Kóczy* and Kaoru Hirota**
   * Technical University of Budapest (Hungary)
   **Hosei University (Japan)

2. Neural Network-based Fuzzy Production Rule Generation and its
   Application to an Approximate Reasoning Approach........................333
   Hyun-Jung Yi and Kyung-Whan Oh
   SoGang University (Korea)
3. Interpolation of Fuzzy If-Then Rules by Neural Networks

Hisao Ishibuchi, Hidehiko Okada and Hideo Tanaka
University of Osaka Prefecture (Japan)

4. Interpolation of Noisy Signal Data by using Fuzzy Inference (Invited)

Eiji Uchino, Takeshi Yamakawa, Tsutomu Miki and Shin Nakamura
Kyushu Institute of Technology (Japan)

B-7 FUZZY MODELING

1. Auto-Tuning Method of Fuzzy Membership Functions Using Neural Network Learning Algorithm: Application to Water Flow Forecasting for Reservoir

Ryoichi Ichikawa*, Kazuo Nishimura*, Masahiko Kunugi*, Kazue Shimada*, Yasuharu Shimakura**, Yohei Fujisawa** and Yasuhiro Matsunoki**
*TOSHIBA Corporation (Japan)
**HOKURIKU ELECTRIC POWER Co., INC (Japan)

2. Fuzzy Logic Based Modeling and Optimization

Yu Qian, Patrick Tessier and Guy A. Dumont
The University of British Columbia (Canada)

3. A Study on the Fuzzy Selective Relational Algebra (FSRA)

Doheon Lee, Hyung Lee-Kwang and Myoung Ho Kim
Korea Advanced Institute of Science and Technology (Korea)

4. A Self Generating and Tuning Method for Fuzzy Modeling using Interior Penalty Method

Ryu Katayama, Yuji Kajitani and Yukiteru Nishida
Sanyo Electric Co., Ltd.
(Japan)

B-8 FUZZY ENGINEERING APPLICATIONS (INVITED)

Organizer: I. B. Turksen
University of Toronto (Canada)

1. Architecture of A Fuzzy-Inference-System Shell

I. B. Turksen, Lizhu Guo and K. C. Smith
University of Toronto (Canada)

2. Incremental Learning of Complex Concepts

Marcellina M. T. Mileti* and Anca Ralescu**
*University of Cincinnati (U.S.A.)
**Laboratory for International Fuzzy Engineering Research (Japan)

3. Fuzzy Logic Expert System Scheduler

I. B. Turksen and T. Yurtsever
University of Toronto (Canada)

4. Inductive Learning of Conceptual Fuzzy Sets

Tomohiro Takagi, Atsushi Imura, Hirohide Ushida and Toru Yamaguchi
LIFE (Japan)

B-9 DIAGNOSTIC SYSTEMS BY FUZZY LOGIC

1. Supporting Method for Optimum Maintenance Policy Selection by the
Fuzzy Logic.................................................................................................................. 381
Toshio Toyota and Peng Chen
Kyushu Institute of Technology (Japan)

2. Fault Diagnosis Method by Using Fuzzy Rule Based Models......................... 385
Gancho Vachkov* and Hisayoshi Matsuyama**
* Sofia Technological University (Bulgaria)
** Kyushu University (Japan)

3. Detection of Earthquake Precursors by Fuzzy Theoretical Methods.............. 389
Hidemi M. Ito and Akihiko Wakayama
Meteorological Research Institute (Japan)

4. Reliability Prediction of Electronic Equipment with Fuzzy Inference.............. 393
Tadashi Murata
Ryukyu University (Japan)

B-10 SAFETY RELIABILITY AND NOISE IMMUNITY OF FUZZY / NEURAL SYSTEMS

1. Fuzzy Risk Index-Theory and Application......................................................... 397
C. Preyssl* and Y. Nishiwaki**
* European Space Agency (The Netherlands)
** University Vienna (Austria)

2. Fuzzy Fault Tree Analysis : A Case Study......................................................... 401
A.W. Deshpande*, U. A. Deshpande** and P. Khanna*
* National Environmental Engineering Research Institute (India)
** Indian Institute of Technology (India)

3. On Subjectivity of Fuzzy Sets Operations in Fuzzy Reliability Analysis.......... 405
Takehisa Onisawa
University of Tsukuba (Japan)

4. Design and Robustness of Winner-Take-All Cellular Neural Networks........... 409
Gerhard Seiler and Josef A. Nossek
Technische Universität München (Germany)

C-1 FUZZY LOGIC CONTROL PART I

1. Uncertainty as Objective Function in Fuzzy Control (Invited)......................... 413
Arthur Ramer
University of New South Wales (Australia)

2. On Fuzzy Inference Based on Intuitionistic Logic (Invited)......................... 417
Toyoihiko Hirota and Torao Yanaru
Kyushu Institute of Technology (Japan)

3. Comparison of Several Fuzzy Reasoning Methods on Driving Control of a ...Model Car (Invited)................................................................. 421
K. Nishimori, H. Tokutaka, S. Hirakawa, S. Kishida and N. Ishihara
Tottori University (Japan)

4. Fuzzy Control Rules and Stability Conditions................................................. 425
S. Takahara*, K. Ikeda** and S. Miyamoto**
* Kagawa Prefectural Industrial Technology Center (Japan)
** University of Tokushima (Japan)

xxix
C - 2 FUZZY LOGIC CONTROL PART II

1. Fuzzy Optimal Control Revisited: Toward a New Generation of Fuzzy Control? (Invited) .......................................................... 429
   Janusz Kacprzyk
   Polish Academy of Sciences, (Poland)

2. Application of Fuzzy Control to a Batch Culture (Invited) .................. 433
   Tsunenobu Fukuda
   Kaneka Corporation (Japan)

3. Forecast Learning Fuzzy Control of an Autonomous Mobile Robot ....... 437
   Mikio Maeda, Manabu Shimakawa and Shuta Murakami
   Kyushu Institute of Technology (Japan)

4. Minimization of Rule-Chips in Fuzzy Control and Fuzzy Inference Systems ................................................................. 441
   H.N.Teodorescu
   Polytechnic Institute of Iasi (Romania)

C - 3 FUZZY LOGIC CONTROL PART III

1. A Movement Control Method and a Learning Method for Multi-Coupled Car-like Robots ...................................................... 445
   Kazuhiro Yasui and Hidenori Itoh
   Nagoya Institute of Technology (Japan)

2. An Adaptive Fuzzy Current Controller with Neural Network for Field-Oriented Controlled Induction Machine .......................... 449
   Kyu-Chan Lee, Seong-Sik Min, Jhong-Whan Song and Kyu-Bock Cho
   Hyosung Industries Co., Ltd (Korea)

3. Cooperative Mobile Robots using Fuzzy Algorithm .......................... 453
   Hyuntae Kim, Heungsik Noh, Seungwoo Kim and Mignon Park
   Yonsei University (Korea)

4. Fuzzy PI/On-based Active Vibration Modes Compensation ................ 457
   H.N.Teodorescu*, I.Bogdan* and F.Grigoras**
   * Center for Fuzzy Systems & AI (Romania)
   ** Institute for Information Science (Romania)

C - 4 FUZZY LOGIC CONTROL PART IV

1. Stability Analysis of a Fuzzy Control System of a Superconducting Actuator ................................................................. 461
   Tadashi Kitamura and Mochimitsu Komori
   Kyushu Institute of Technology (Japan)

2. An Automatic Start-up and Shut-down Control of a Drum-type Boiler using Fuzzy Logic ..................................................... 465
   Zeungnam Bien*, Dong-Hwan Hwang*, Jae Hyuk Lee*,
   Hyung-Keun Ryu**, Hanoh Lee***, Sung-Kwang Hur**** and
   Ik-Soo Park*****
   * Korea Advanced Institute of Science and Technology (Korea)
   ** Korea Telecom (Korea)
   *** Korea National Institute of Standards and Technology (Korea)
   **** Korea Institute of Machinery & Materials (Korea)
   ***** Korea Research Institute of Chemical Technology (Korea)
3. **A Fuzzy Automatic-combustion-control-system of Refuse Incineration Plant**
   Makoto Fujiyoshi and Toshiyuki Shiraki
   Hitachi Zosen Corp. (Japan)
   .................................................................469

4. **A Fuzzy Dynamic Learning Controller for Chemical Process Control**
   Jeong Jun Song and Sunwon Park
   Korea Advanced Institute of Science and Technology (Korea)
   .................................................................473

**C-5 SYSTEM IDENTIFICATIONS BY NEURAL NETWORKS**
Organizer: Takeshi Yamakawa
Kyushu Institute of Technology (Japan)

1. **A Neo Fuzzy Neuron and Its Applications to System Identification and Prediction of the System Behavior**
   Takeshi Yamakawa, Eiji Uchino, Tsutomu Miki and Hiroaki Kusanagi
   Kyushu Institute of Technology (Japan)
   .................................................................477

2. **Neuro-Fuzzy Identification Model of Nonlinear Dynamic Systems**
   Minho Lee, Soo-Young Lee and Cheol Hoon Park
   Korea Advanced Institute of Science and Technology (Korea)
   .................................................................485

3. **Space-Time Structure Dynamics of Neural Networks**
   Licheng Jiao and Zheng Bao
   Xidian University (P.R.China)
   .................................................................489

4. **On the Dynamics and Potentialities of a Discrete-time Binary Neural Network with Time Delay**
   Simone Gardella, Toru Kumagai, Ryoichi Hashimoto and Mitsuo Wada
   Industrial Products Research Institute, MITI (Japan)
   .................................................................493

**C-6 NEURAL CHIPS**

1. **Custom Analog VLSI Neural Chips with On-chip Digital Learning for Pattern/Character Recognition (Invited)**
   Yiwen Wang* and Fathi M. A. Salam**
   * University of Minnesota (U.S.A.)
   **Michigan State University (U.S.A.)
   .................................................................501

2. **A Simple Nonlinear Synapse Circuit for Artificial Neural Networks (Invited)**
   Myung-Ryul Choi
   Korea Electronics Technology Institute (Korea)
   .................................................................505

3. **MOS Charge-mode Circuits for Analog VLSI Neural Systems**
   Okihiko Ishizuka, Zheng Tang, Jing Liang and Hiroki Matsumoto
   Miyazaki University (Japan)
   .................................................................509

4. **An Input Driven Multi-layer Perceptron Neural Network and CMOS VLSI Implementation**
   Ho Sun Chung, Kyung Hoon Lee, Soo Yong Lee and Kwon Il Bae
   Kyungpook Nation University, Taegu (Korea)
   .................................................................513
1. Modular Analog Hardware Neural Networks with On Chip Hebbian Learning and Analog Weight Storage (Invited)........................................517
   B. Linares-Barranco*, E. Sánchez-Sinencio**, A. Rodríguez-Vázquez* and
   J. L. Huertas*,
   * Centro Nacional de Microelecctóulica(Spain)
   **Texas A&M university (U.S.A.)

2. Fuzzy Processors using Neural Phenomena in CMOS Digital LSI (Invited)....521
   Katsufusa Shono, Cong-Kha Pham and Shinichi Ooki
   Sophia University (Japan)

3. On Realization of Large Neural Networks........................................527
   Wieslaw Sienko and Andrzej Luksza
   Maritime Merchant Academy (Poland)

4. Analog Integrated Cochlear Model for Speech Analysis (Invited)...........531
   Weimin Liu and Moische H.Goldstein, Jr. and Andreas G.Andreou
   The Johns Hopkins University(U.S.A)

C - 8 FUZZY HARDWARES AND FUZZY LOGIC COMPUTERS

1. Serial Architecture for Fuzzy Controllers: Hardware Implementation using
   Analog/Digital VLSI Techniques..................................................535
   Jose L.Huertas Diaz, Santiago Sanchez-Solano, Angel Barriga-Barros and
   Iluminada Baturose Castillo
   Centro Nacional de Microelectronica (Spain)

2. Digital Fuzzy Processor FP-5000..............................................539
   Kazuhsa Shimizu, Masaharu Osumi and Fumikazu Imae
   OMRON Corporation (Japan)

3. WARP: Weight Associative Rule Processor An Innovative Fuzzy Logic
   Controller..................................................................................543
   Andrea Pagni, Rinaldo Poluzzi and Gianguido Rizzotto
   SGS-Thomson Microelectronics (Italy)

4. Architectures for Rule-Chips Number Minimizing in Fuzzy Inference
   Systems......................................................................................547
   H.N.Teodorescu* and T.Yamakawa**
   * Polytechnic Institute of Iasi (Romania)
   **Kyushu Institute of Technology (Japan)

C - 9 NOVEL DEVICES FOR NEURAL & CHAOTIC SYSTEMS

1. Implementation of Neural Network Adder (Invited)............................551
   Mititada Morisue, Kenichiro Sakai and Hideki Fujinaga
   Saitama University (Japan)

2. Generation of Chaotic Signals using Current Mode Techniques...............555
   A. Rodríguez-Vázquez, M. Delgado-Restituto, S. Espejo and J. L. Huertas
   Centro Nacional de Microelecctóulica (Spain)

   Takeshi Yamakawa, Tsutomu Miki and Eiji Uchino
   Kyushu Institute of Technology (Japan)

D-1 FUZZY LOGIC

1. Basic Tools for Fuzzy Control: Triangular Norms and Conorms (Invited) ....567
   Erich Peter Klement and Peter Bauer
   Johannes Kepler Universität (Austria)

2. Mathematical Foundations of Fuzzy Logic (Invited) ..................................571
   Esko Turunen
   Lappeenranta University of Technology (Finland)

3. Linguistically Oriented Fuzzy Logic Controller (Invited) ..........................575
   Vilém Novák
   Czechoslovak Academy of Sciences (Czechoslovakia)

4. Complements, t-norms, and s-norms in Toul Sets ..................................579
   Sadaaki Miyamoto
   University of Tokushima (Japan)

D-2 FUZZIFICATION AND UNCERTAINTY MEASURE

1. Average Total Uncertainty: A New Measure and Its Properties (Invited) ....583
   Nikhil R. Pal, James C. Bezdek and Rohan Hemasinha
   University of West Florida (U.S.A.)

2. Information Based Reasoning in Fuzzy and Dempster-Shafer Theories (Invited) .................................................................587
   Arthur Ramer
   University of New South Wales (Australia)

3. Multi-Valued Logic of Uncertainty Derived from Epistemic Modality ..........593
   Tetsuya Mural*, Masaki Miyakoshi** and Masaru Shimbo**
   * Sapporo Medical College (Japan)
   **Hokkaido University (Japan)

4. Fuzzifications of Complete Lattices and Applications ..........................597
   Arturo A. L. Sangalli
   Champlain Regional College (Canada)

D-3 FUZZY MEASURES AND APPLICATIONS (INVITED)

Organizer: Michel Grabisch
Thomson-Sintra ASM (France)

1. Application of Fuzzy Measure, Fuzzy Integral and Neural Network to the System Which Estimate Taste by Using Industrial Analysis ......................601
   Masanori Matsuda* and Takaharu Kameoka**
   * SATAKE Corporation (Japan)
   **Mie University (Japan)
