AEROSOLS

Science, Industry, Health and Environment

VOLUME 1

PROCEEDINGS OF THE THIRD INTERNATIONAL AEROSOL CONFERENCE
SEPTEMBER 24–27, 1990
KYOTO INTERNATIONAL CONFERENCE HALL, KYOTO, JAPAN

Editors

SENICHI MASUDA
Fukui Institute of Technology, Fukui, Japan

KANJI TAKAHASHI
Institute of Atomic Energy, Kyoto University, Uji, Kyoto, Japan

Organized by

International Aerosol Research Assembly (IARA)
Japan Association of Aerosol Science and Technology (JAAST)

PERGAMON PRESS
A member of the Maxwell Macmillan Pergamon Publishing Corporation
OXFORD • NEW YORK • BEIJING • FRANKFURT
SÃO PAULO • SYDNEY • TOKYO • TORONTO
CONTENTS

Volume 1

Preface xxii

1. Plenary Lecture 1

Recent Advances in Aerosol Engineering
S. K. Friedlander 3

Aerosols and Microelectronics
B. Y. H. Liu 5

Aerosols and Climate
O. Preining 10

2. Session Lecture 19

Advances in Instrumentation for Microcontamination Measurement
D. Y. H. Pui 21

Precision Surface Cleaning; A Critical Step in Contamination Control
D. Ensor, R. P. Donovan and L. D. Michaels 26

Measurement of Back Ground Aerosols with Low Pressure Impactors in Europe
B. Georgi 28

Aerosol Filtration and Separation - Review, Presence and Future
R. Spuray 34

Performance Evaluation of Various Air Filters
H. Emi 39

Acid Deposition in Japan in Comparison with those in Europe and North America
T. Okita 44

Aerosol Processes for Material Synthesis
R. C. Flagan 50

Aerosol Dynamics
J. H. Seinfeld 55

Recent Advances in Shaped Beam Scattering Theory and Applications
G. Gouesbet 61
Aerosol Rate Processes Studied in Shock Tubes
   P. Roth

Contamination of Product Surfaces by Particles-Reduction and Control
   H. Fissan

The Degree of Mixing in Atmospheric Aerosols: An Overlooked Dimension
   J. Heintzenberg and D. S. Covert

Heterogeneous Nucleation and Growth of Ice Crystals on Aerosol Particles. Experiment, Nucleation Mechanism and Theory
   B. Gorbunov

Nuclear Aerosol Science and Aerosol Systems - An Overview
   W. O. Schikarski

Factors Relating Aerosol Exposure and Risk of Health Effects
   J. H. Vincent

Aerosol Deposition in the Human Respiratory Tract: Theory and Experiment
   W. Hofmann

Factors Governing Particle Deposition in Lung Airways
   M. Lippmann

Factors Important in the Deposition of Aerosolized Pentamidine
   G. C. Smaldone and G. M. Dickinson

3. Nucleation / Growth

Oscillatory Relaxation of Vapour Nucleation Rate
   M. P. Anisimov

Coagulation Formula for Nanometer-Range Particles with Finite Attractive Potentials
   A. S. Amadon and W. Marlow

Fluctuation-Coagulation Theory of Aerosol Evolution
   V. M. Merkulovich and A. S. Stepanov

An Algorithm of Independent Model for Calculating the Particle Size Distribution
   X. S. Cai and N. N. Wang

An Analytic Solution to Free Molecule Aerosol Coagulation
   K. W. Lee, L. A. Curtis and H. Chen

An Improved Technique for Analytically Evaluating Multimodal Coagulation Integrals of the Modal Dynamics Equation
   E. Whitby, U. Shankar and F. Binkowski

Numerical Solution of the Multicomponent Aerosol General Dynamic Equation
   Y. P. Kim and J. H. Seinfeld

Kinetics of Coagulation and Stochastic Processes of the Storage Theory
   V. V. Ryazanov
Review of Researches of Vapour Nucleation Rate in Laminar Flow  
M. P. Anisimov  

Determination of Composition of Critical Embryo in Case of Two-Channel Homogeneous Nucleation  
M. P. Anisimov and A. V. Taylakov  

The Quasi-Equilibrium Stage Nucleation Modeling by Complex Generation Functional  
V. V. Ryazanov  

Sticking Coefficients in Solid Aerosol Collisions  
R. B. Diemer, Jr.  

Irradiation of Aromatic Hydrocarbons in Air by Accelerated Electrons  
H.-R. Paul and H. Matzing  

Aerosol Formation from α- and β-Pinene  
K. Izumi, S. Hatakeyama and T. Fukuyama  

Atmospheric Sulfate Formation: A Study of Catalytic Effects of Metal Species on the Oxidation of S(IV) in Aqueous Solutions  
I. Grgic, V. Hudnik, M. Bizjak and J. Levec  

Binary Condensation and Evaporation in the Continuum Regime.  
T. Vesala, M. Kulmala, A. Majerowicz and P. E. Wagner  

Vapor Pressures and Surface Free Energies of C_{14} to C_{18} Monocarboxylic Acids and C_{5} and C_{6} Dicarboxylic Acids  
Y. Tao and P. H. McMurry  

Binary Nucleation in the MSA-H_{2}O and H_{2}SO_{4}-H_{2}O Systems  
B. Wyslouzil, J. H. Seinfeld, R. Flagan and K. Okuyama  

Formation of Stratospheric H_{2}SO_{4} - Aerosols by Binary Homogeneous Nucleation: A Re-Examination  
A. Laaksonen and M. Kulmala  

Simulating the Formation of Acid Aerosols: Significance of Binary Nucleation  
M. Kulmala, K. Hämeri and J. Mäkelä  

The Dynamics of Sub-Micron H_{2}O-H_{2}SO_{4} Aerosols: A Smog Chamber Study  
R. V. Dingenen and F. Raes  

Theoretical Prediction of Sticking Probability of H_{2}O and H_{2}SO_{4} Systems by Free Angle Ratio  
M. Itoh  

Observation of Steady-State Aerosol Formation by Nucleation in Vapor Mixtures during Adjustable Expansion Pulses  
F. E. Wagner and R. Strey  

Glycerol Vapour Nucleation Rate in Helium, Argon and Nitrogen Atmosphere  
M. P. Anisimov and S. N. Vershinin  

Homogeneous Nucleation of Silicon in an Aerosol Reactor Using Laser-Heating  
F. E. Kruis, B. Scarlett, R. A. Bauer and J. Schoonman  

vii
Aerosol Formation by Rapid Nucleation in CVD Thin Film Preparation
  K. Okuyama, Y. Kousaka, D. D. Huang and J. H. Seinfeld  

Formation and Growth of Aerosol Particles in Laminar Flow
  N. Aya  

The Physics of Aerosol Nucleation and Growth in Turbulent Boundary Layers
  C. F. Clement and I. J. Ford  

4. Generation  

Some Consequences of Instability of Aqueous Aerosols Produced by Jet and Ultrasonic Nebulizers
  I. Gonda and P. R. Phipps  

Aerosol Generation from Particle Suspensions by Ultrasonic Nebulizer
  K. Homma, F. Serita and M. Takaya  

Measurement and Control of Medical Aerosols Generated by the Ultrasonic Atomizer with Function of Self-Suction
  I. Shimizu, M. Sato and H. Hirayama  

Optimum Design of a Nebulizer for Standard Aerosol Particle Generation
  N. Tajima, N. Fukushima and Y. Sato  

A New Aspect of Ultrasonic Aerosol Generator to E. N. T. Diseases
  N. Hyo, Y. Hyo, K. Wakuda, H. Yamamoto and H. Takano  

Generation and Application of Uniform Aerosol of Polystyrene Particle
  S. Yamamoto, S. Aotani, N. Fukusima and Y. Kousaka  

Role of Liquid Properties on Droplet Formation by Bursting Bubbles
  W. Hinds and T. L. Kuo  

Processing of Ultrafine Particles by Laser Ablation
  D. T. Shaw, T. Haugan, G. Xie and S. Patel  

Production of Uniformly Sized Droplets in a Strong Electric Field, from the Taylor-Cone
  G. M. H. Meesters, A. M. E. Reedijk, A. P. C. Krekel and B. Scarlett  

An Ultrafine DOS Monodisperse Aerosol Particle Generator for Large-Scale Filter Testing
  B. Y. H. Liu and B. Y. Lin  

Particle Production in Reactive Turbulent Flows
  S. E. Pratsinis and Y. Xiong  

5. Optical Properties  

Scattering of a Laser Beam by One Particle: Behaviour of Gouesbet's Coefficients
  G. Gréhan and G. Gouesbet  

Optically Determined Properties of the Aerosol during Fog Formation and Dissipation
  H. Horvath and C. Dellago

</table>
Comparison of Sampling Artifacts in Different Designs of Diffusion Denuders
C. S. Lu, P. J. Smith, P. Biswas and S. E. Pratsinis 343

The Study of the Aerosol Flow around Commercial Samplers by Means of LDA-Technique
G. N. Lipatov, V. I. Yakimchuk, S. A. Grinshpun and T. I. Semenyuk 347

Evaluation Model for Anisokinetic Sampling on Particle Concentration Measurement and a Hypothesis on Specific Flow around Nozzle
M. Samata 351

Overall Efficiency of Tubular Inlet Sampling at 0 to 90 Degrees from Aerosol Flows
K. Willeke and S. Hangal 355

Leading Edge Effects in the Gravitational Deposition of Aerosol Particles
K. Okazaki, Y. Endo and K. Ishimaru 359

Peculiarities of Aerosol Particle Motion in Sink Fields
S. A. Grinshpun, G. N. Lipatov and T. I. Semenyuk 363

Aerosol Deposition and Re-Entrainment in Tube Bends
K. Koistinen, S. Rautio and T. Raunemaa 370

Particle Velocity Distribution in Turbulent Air Flow
S. Yuu and T. Okamura 375

Deposition of Nonspherical Aerosol Particles in Turbulent Air Flows
M. Goldenberg, I. Gallily and M. Shapiro 379

Theory of Charged Aerosol Particle Thermal Deposition on an Electrically Enhanced Cylindrical Wire
J. S. Chang and T. G. Beuthe 383

Deposition of Aerosol Particles on a Surface Composed of Different Kinds of Materials
H. Yoshida, T. Ninomiya and H. Masuda 387

Thermophoretic Force on a Spherical Particle in a Semi-Infinite Expanse of Gas over a Plate
T. Kanki, T. Miyazaki and H. Ueda 391

Experimental Study of Thermophoretic Deposition of Particles in Laminar Tube Flow
N. Montassier, D. Boulaud and A. Renoux 395

Thermophoresis in Gases at Small Knudsen Numbers: Theory and Experiment
S. P. Bakanov 399

Photophoresis of Spherical Particles: Theory and Experiment
S. A. Beresnev, A. I. Bogolepov, G. P. Bystray, V. G. Chernyak and G. A. Fomjagin 403

Spatial Self-Organization of Aerosol Particles in External Force
H. Takano, K. Sato, H. Kagawa, Y. Isu and S. Okuda 407

Behavior of Aggregate Aerosols in the Aerodynamic Particle Sizer
Y. S. Cheng, B. T. Chen and H. C. Yeh 411

On the Aerodynamically Induced Disintegration of Agglomerates
A. Rajathurai and P. Roth 415
Aerodynamic and Electrical Properties of Multiple Particle Agglomerates or Aggregates
T. G. Cleary, G. Mulholland, R.-J. Han, J-R Pao and J. W. Gentry 419

Fractal Analysis of Fluid Drag Acting on a Fiber with Dust Load
C. Kanaoka, S. Hiragi and W. Tanthapanichakoon 423

Application of Simulated Fractals in the Characterization of Irregularly-Shaped Particles and Aggregates
J-R Pao, Y-C. Chang and J. W. Gentry 427

Generation and Morphological Analysis of Agglomerated Aerosol Particles
S. Tohno and K. Takahashi 431

Experimental Measurement of the Diffusion Charging of Spherical and Non-spherical Particles

High Efficiency Unipolar Charger Using α-ray Radioactive Source

Aerosol Charge Neutralization by a Corona Ionizer

Electrostatic Classification for Ultrafine Particles below 0.02 μm
Y. Yamada, A. Koizumi, Y.S. Cheng and H.C. Yeh 446

The Effect of Brownian Diffusion on Gravitational Coagulation of Aerosol Particles at Large Peclet Number
C. S. Wen and L. Zhang 450

An Analysis of the Brownian Motion of a Particle in Low Pressure Gas Flows
K. Tsuzuki and T. Iino 454

Modal Aerosol Dynamics Modeling
E. Whitby, P. McMurry and F. Stratmann 458

Transformation of Aerosols in Thin Channels
A. A. Lushnikov and V. A. Zagaynov 462

Resuspension by Particle Collisions
W. John, D. N. Fritter and W. Winklmayr 466

Dynamical and Optical Properties of Polystyrene Doublets
Y. Ozaki, M. Mizuochi, M. Utiyama, T. Fukuyama, F. Kosaka and D. Ito 470

7. Measurement 475

Asbestos and Mineral Fibers in Subway System in Beijing

Design and Performance of a Portable Fibre Monitor
A. P. Rood and E. J. Walker 481
Automatic Counting of Asbestos Fibers  
A. Kaga, Y. Inoue, N. Maehata and A. Yoshikawa

Measurement of Asbestos Concentrations in the Atmosphere by a Fibrous Aerosol Monitor  
H. Koyama, Y. Konishi and T. Takata

Aerodynamic and Electrical Measurements with Ultrafine Asbestos Fibers  
J. W. Gentry, K. Spurny, D. Hochrainer and J. Schoermann

In-Line Holographic Sizing of Fibrous Aerosols with Submicron Diameters  
D. T. Shaw, G. Xie, L. Hua and S. N. Patel

Performance an Ultrafine Condensation Particle Counter  
R. Caldow, P. Keady, A. Wiedensohler and H. C. Hansson

A 30 Å Particle Detector for Ultraclean Gas Systems  
W. McDermott, A. Schwarz, R. C. Ockovic and M. R. Stolzenburg

Construction and Performance of a CNC Array for Filter Testing  
W. Holländer, W. Dunkhorst and H. Lödding

Comparative CCN Concentration Measurements between Two Sites in the Meuse Valley and Occurrence of Localized Dense Fogs in Relation with Industrial Activities  
J. J. Boreux and R. Serpolay

Carbon and Sulfur Distribution on Size-Density Separated Coal Fly Ash  
K. Furuya, T. Kikuchi and N. Fukushima

Characterization of Particles in Combustion Exhaust  
H. Burtscher, A. Leonardi, S. Diserens, D. Steiner and H. C. Siegmann

On-Line Measurements of Soot in the Exhaust of Diesel Engines by β-Absorption  
B. Georgi, A. Krasenbrink, H. Dreiheller, D. Rensing and K. Stauber

Size Distribution of Charged Soot from Low Pressure Flames  
A. Hospital and P. Roth

Comparison of the Standard Combustion Observation Cell with Ionization Chamber and Optical Smoke Measurement Standards  
R. A. Roos, M. Goldman and D. Dutertre-Ladureen

Determination of Particle Size Distribution by Means of Parametric Particle Charging  
N. G. Beranau, H. O. Luck and R. M. Vanck

In-situ and Real Time Measurements of the Atomization Characterization of Commercial Atomizers  
N. N. Wang, X. H. Yu and W. J. Lu

Experimental Studies on Submicron Aerosol Size Distribution Measurement Methods  
E. I. Kauppinen, J. J. Eskelinen, D. A. Lundgren and R. W. Vanderpool

On-line Aerosol Analysis Combining Size Determination, Laser-Induced Fragmentation and Time-of-Flight Mass Spectroscopy  
J. Marijnissen, O. Kievit, H. Mori, B. Scarlett, P. Verheijen, P. Kistemaker, R. Steenvoorden and T. Weeding
Phoretic Spectroscopy of Aerosols
W. Holländer and H. Windt

Fiber Optical Measurement of Time Resolved Fluorescence Spectra for Detection of PAHs on Particles
A. Krupp, W. Robers and R. Niessner

Aerosol X-Ray Absorption Spectroscopy (AXAS)
A. Schmidt-Ott, U. Müller, H. C. Siegmann, S. Krummacher and W. Niemann

Photoelectron Emission as Broadband Sensor Principle
R. Niessner, P. Wilbring, B. Hemmerich and U. Panne

Laser-Induced Aerosol Heating in a Quadrupole Cell and Dynamic Stability of the Particle
T. Iwamoto, M. Itoh and K. Takahashi

In Situ Supermicronic Aerosol Measurements
G. Grehan, J. N. Le Toulouzan and G. Gouesbet

Feasibility and Accuracy of Photon Correlation Spectroscopy for Particle Sizing of Aerosols
M. Itoh and K. Takahashi

Optimal Design of Photon Correlation Spectroscopy for Aerosol Measurements: Design and Performance of 50 ns Real Time Digital Full Correlator
M. Itoh and K. Takahashi

Particle Size Determination by Correlation Spectroscopy: Effect of Low Particle Concentration
G. Schweiger, R. Rambau, W. Krabn and K. Lucas

Dynamic Laser Light Scattering to Determine Size Distribution of Aerosols
B. P. Singh and S. Chopra

Inversion Algorithms to Retrieve Aerosol Size Distribution from Ground Measurements
U. Amato, M. F. Carfora, V. Cuomo and C. Serio

Determination of Aerosol Size Distributions through Constrained Linear Inversion of Spectral Optical Depths
J. M. Livingston, R. Pueschel and H. Horvath

Aerosol Size and Concentration Measurement from Scattered Light Signals
H. T. Sommer and C. Harrison

Advanced Inversion Technique of the Fredholm Integral Equation for the Determination of Particle Size Distribution
R. M. Vanck, H. O. Luck and N. G. Bernigau

360° Scattered Light Measurements of Airborne Particles
G. Metzig

A Criterion of the Applicability of Fraunhofer Diffraction for Diffraction Based Particle Sizer (II)
H. J. Zhang and N. N. Wang
Study of Optical Behaviour of Particulate Systems with Variations in Refractive Index, Size and Polydispersity Using Multichannel Technique  
H. S. Shah, D. B. Vaidya and J. N. Desai  
616

Comparison of Experimental and Theoretical Study of Diffuse Reflectance of Highly Scattering Particulate Systems  
H. S. Shah, D. G. Adroja and D. B. Vaidya  
621

The Coarse Dust Recorder  
E. Vrins  
626

Optical Particle Counter Performance Requirements for the 1990s  
A. Lieberman  
630

Velocity and Flux Density Distributions of Particles in Sensing Volume of an Optical Particle Counters  
K. Ehara, Y. Kimoto, T. Matsuda and H. Yano  
635

Calibration of Particle Counters in the Field of Ultra-Low Concentrations  
J. Daval, F. Torrecillas, H. Loyer and M. Pourprix  
639

Laboratory Intercomparison of Polytec Optical Aerosol Analysers  
643

Calibration of Integrating Plate Photometers - the Removal of Scattering Loss  
R. Hitzenberger  
647

A New Personal Sampling System  
M. Kunugi, Y. Matsumoto, J. Shindo, H. Koyama and T. Tani  
648

Testing Equipment and the Technique for Determination of Aspiration Efficiency of Aerosol Measurement Devices under Calm Air Conditions  
G. N. Lipatov, S. A. Grinshpun, T. I. Semenyuk and V. I. Yakimchuk  
652

On-Line Measurement of Average Particle Diameter with MESA  
W. Schöck  
655

Development of Mist Size Analyzer Using Nichrome Thin Plate  
H. Yoshiyama, I. Tamori and H. Ueda  
659

Measurement of Droplet Size Distribution by a Hot-Film Anemometer  
Y. Ozaki, M. Utiyama, T. Fukuyama, M. Nakajima, Y. Hayakawa and K. Ojima  
663

Measurements Cloud Interstitial Aerosol with In-Line Holography  
S. Borrmann and R. Jaenicke  
667

Microvideo-Graphic Probe for Particle Sizing in Industrial Areas  
A. Kleitz  
671

Enhancement of Water Droplets Detection by MgO Layer Undercoated with Dyestuffs  
K. Fujibayashi, N. Murasaki and M. Matsui  
672

Application of Remote Laser Detection Systems  
S. Fujii, G. Xie and K. Y. Kim  
676

xiv
Direct Observation of Particle Reentrainment in a Turbulent Channel Flow

H. C. Wang, T. Niida, R. Udischas and H. Y. Wen

Use of Granular Beds in the Inertial Regime for Aerosol Size Distribution Measurement (Feasibility Study)

D. Boulaud
