WATERPOWER '91

Proceedings of the International Conference on Hydropower

Denver, Colorado
July 24-26, 1991

Edited by David D. Darling

Published by the American Society of Civil Engineers
345 East 47th Street
New York, New York 10017-2398

A New View of Hydro Resources
TABLE OF CONTENTS

PREFACE ................................................................. iii
ACKNOWLEDGEMENTS ................................................... v
INTRODUCTION ........................................................... vii
TECHNICAL PROGRAM SESSION SCHEDULE ......................... viii

VOLUME I

Economics & Finance .................................................. 1
Environmental .......................................................... 76
Licensing/Legal ......................................................... 376
Planning ................................................................. 519
Project Case Studies .................................................. 593
Technology Transfer .................................................. 665

Economics & Finance-1—Models
Chairman: John L. McMahan, Public Utility District #2, Grant County, WA
Session 4

Hydropower Risk Analysis
Robert U. Murdock and John S. Gulliver ....................................... 1
Monte Carlo Simulation Techniques for Predicting Annual Power
Production
John P. Cross and Peter J. Bulandr ........................................... 11
Probabilistic Analysis of Modernization Options
Walter O. Wunderlich and James E. Giles .................................. 19
The Impact of Drought on Hydropower Generation - Case Study of
Bureau of Reclamation Hydropower Plant
Robert Walker and Larry Schluntz ........................................... 29

Economics & Finance-2—General
Chairman: Jim Clune, RPPC-Bonneville Power Administration
Session 57

Economic Evaluation of Minimum Flow at Rockton
Steve Bohlman, Ellen Faulkner, Dennis Geary and Linda Hinseth .......... 38
Renovation and Uprating of Seven Hydropower Plants in Java
Walter Nuessli ............................................................. 48
A Case for Modernizing the Funding and Repayment of Regional Water/Power Projects
Peter G. Ungerman ........................................... 58
Evaluating the Dynamic Operating Benefits of Hydro Power Plants
Jennie S. Rice, Salim J. Jabbour and William M. Wells ............... 68

Environmental—EPRI-1
Chairman: Charles W. Sullivan, Electric Power Research Institute
Session 2

Improving the Assessment of Instream Flow Needs for Fish Populations
Michael J. Sale and Robert G. Otto .................................. 76
Evaluating Hydro Relicensing Alternatives - Impacts on Power and Non-Power Values
Jennie S. Rice, Jim Birk and Charles W. Sullivan ....................... 85
Evaluation of an Eicher Fish Diversion Screen at Elwha Dam
Fred C. Winchell and Charles W. Sullivan .................................. 93
A Demonstration of Strobe Lights to Repel Fish
Paul Martin, John Downing, Ned Taft and Charles W. Sullivan .......... 103

Environmental-1—Instream Flow-1
Chairman: James F. LaBounty, U.S. Bureau of Reclamation
Session 9

Techniques for Balancing Instream Flow Needs With Project Operation
John R. Bizer .......................................................... 113
The Use of IFIM for Evaluating Effects of a Flow Alternative on Fish Habitat in a River System With Competing Water Demands
William J. Miller, James W. Chadwick, Steven P. Canton, Don J. Conklin, Jr. and Edward Y. Chrisp .................. 122
Altering Federal CVP Power Operations to Accommodate Fisheries' Survival on the Sacramento River
Joseph Ungvari, Glen Youman and David Coleman ....................... 132

Environmental-2—Instream Flow-2
Chairman: Gary W. Frey, Western Area Power Administration
Session 16

Evaluation of Alternatives for Providing Minimum Flows Below TVA's South Holston Dam
J. Stephens Adams .................................................. 142
Twin Falls Mitigation Plan: Long Term Monitoring of Fish Populations
Allan C. Solonsky and Phillip J. Hilgert .................................. 152
A Water Budget Approach to Instream Flow Maintenance
Terry Waddle ......................................................... 155
Instream Flow Needs Below Peaking Hydroelectric Projects
Robert T. Milhous .................................................... 163
Environmental-3—Impact Mitigation  
Chairman: Joe S. Field, Stone & Webster Engineering Corp.  
Session 23

Pumped Storage, the Environment and Mitigation  
Peter L. Strauss ........................................... 173

Harvest Facility Protects and Improves Fishery  
Terry Hampton and Wayne Daley .......................... 183

Case Study: Central Oregon Siphon Power Project Mitigating Local Concerns  
Gregory Reichert and Ron Nelson .......................... 189

North Fork Feather River Erosion Control Program  
Larry L. Harrison ........................................... 199

Environmental-4—Water Quality-1  
Chairman: Gary Grinnell, HDR Engineering, Inc.  
Session 30

Review of Mitigation Methods for Fish Passage, Instream Flows, and Water Quality  
Steven F. Railsback, Glenn F. Cada, Lisa H. Chang and Michael J. Sale ........................................... 209

Hydrogen Sulfide in Hydropower Reservoirs  
Joseph T. Johnson, Richard J. Ruane and Lyman H. Howe II ...................... 219

Factors Affecting Dissolved Oxygen in Hydropower Reservoirs  
Richard J. Ruane and Gary E. Hauser .......................... 226

Side Effect of the Cross-Flow Turbine: Improved Water Quality  
Helmut Erdmannsdoerfer and Alfred F. A. Patzig .......................... 236

Environmental-5—Water Quality-2  
Chairman: Charles E. Bohac, Tennessee Valley Authority  
Session 37

The Gloryhole Approach to Increasing Dissolved Oxygen Content  
Kenneth R. Broome ........................................... 244

Distribution and Grain Sizes of Deposited Reservoir Sediments, Seventy Years After Dam Construction  
A. M. Melone and K. Vanderwal Dubé .......................... 252

Mercury in Fish and Water in New Impoundments - A Review of the Literature  
David B. Pott ........................................... 260

Environmental-6—Resolution of Conflict  
Chairman: Ray Porter, Dames & Moore  
Session 44

Glen Canyon Hydropower vs. The Grand Canyon (The Conflict of Basic Values)  
Rick L. Gold ........................................... 269
Cooperation and the Endangered Species Act
S. Clayton Palmer .................................................. 279
Balancing Power Production With Natural Resource Benefits: Can You Trade Apples for Oranges?
James Thrall and Bruno Trouille .................................. 289
The Impact of “No Net Loss” of Wetlands on Water Power Development Alternatives
Susan Tomasky and Noreen Tama Bellegarde ...................... 298

Environmental-7—Fish Protection-1
Chairman: William D. Stelgers, Stone & Webster Engineering Corp.
Session 51

Relative Survival of Juvenile Chinook Salmon Through Bonneville Dam on the Columbia River
John Ferguson ...................................................... 308
Effects of Hydroelectric Turbine Passage on Fish Early Life Stages
Glenn F. Cada ....................................................... 318
Fish Entrapment and Mortality at the French Landing Hydroelectric Powerhouse
Joseph R. Bohr and Mark J. Sundquist .......................... 327
Fish Entrapment and Relicensing: Truths and Consequences
John Pizzimenti, John Meldrim and Kevin Malone ............ 335

Environmental-8—Fish Protection-2
Chairman: Robert O. Pearce, National Marine Fisheries Service
Session 58

Design of Extended Length Submerged Traveling Screen and Submerged Bar Screen Fish Guidance Equipment
David Bardy, Mark Lindstrom and Don Fechner .................. 345
Fish Protection at Water Intakes Using a New Signal Development Process and Sound System
P. H. Loeffelman, D. A. Klinect and J. H. Van Hassel ........... 355
Net and Hydroacoustic Monitoring of Fish Passage
John Downing, Paul Martin, Ned Taft and Charles W. Sullivan .... 693
Atlantic Salmon Smolt Movement and Behavior at Vernon Hydroelectric Station
Douglas D. Royer, Brian N. Hanson and Milton R. Anderson .... 366

Licensing/Legal-1—Environment
Chairman: Dean L. Shumway, Federal Energy Regulatory Commission
Session 22

Where’s the Competition?: The Real Threats to Project Relicensing
Gary D. Bachman and Mary Jane Graham ......................... 376
One Hydro Project -- Many Regulatory Masters
Donald H. Clarke .................................................. 386
Legal Strategy in Dealing with Fish and Wildlife Resource Agencies
John R. Molm ................................................................. 396

Harrisburg Hydroelectric Project - Water Quality Issues
Daniel R. Lispi, David Burgoigne and Rex A. Tolman ....................... 405

Licensing/Legal-2—Relicensing
Chairman: Thomas N. Russo, Federal Energy Regulatory Commission
Session 29

Fair Market Value vs. Net Investment
George K. Lagassa .......................................................... 415

Fair Value, Net Investment and Relicensing
John W. Gulliver ............................................................. 424

How the Office of Hydropower Licensing Resolved Seven Recent
Relicensing Disputes
Lee Emery ................................................................. 434

Using Project Management Techniques in Hydro-Relicensing
David Dominie and Jon Richard ........................................... 446

Licensing/Legal-3—Compliance
Chairman: Joseph D. Morgan, Federal Energy Regulatory Commission
Session 36

When FERC Investigates Your Unlicensed Project: A Five-Point
Protection Plan
Michael A. Swiger .......................................................... 455

Extensive Civil Penalties Apply!!! Lessons Learned Since WaterPower '89
Michael J. Kurman and Noreen M. Lavan .................................. 464

Document Image Systems for Hydro License Compliance
David K. Iverson ............................................................. 474

Licensing/Legal-4—General
Chairman: Fred E. Springer, Federal Energy Regulatory Commission
Session 43

Development of Small Hydro in Ontario
Guirish S. Sardesai .......................................................... 482

Changing Legal Issues Regarding Transfer of a Plant up for Relicensing
Douglas E. Keats and M. Curtis Whittaker .................................. 492

The Effects of Recent Legislation on Conventional, Non-Federal
Hydropower
Richard Hunt and Judith Mohsberg ........................................ 503

Streamlining Hydropower Regulation: Proposals for a New Licensing
Process
Gail A. Greely and Sabrina S. Simpson .................................... 509
Hydropower: Making Its Mark in North America
Marla Barnes, Leslie Eden and Carl Vansant ............................. 519
Reviewing the Role of Hydropower in TVA Reservoir Operations
Douglas H. Walters and Christopher D. Ungate .......................... 529
Low Flow Impact on Power in the Great Lakes Basin
K. N. Irvine, B. Price and R. J. Guido ................................. 539
Dealing with the Difficult Utility
Douglas E. Keats, Mark J. Sundquist and John P. Cross ................ 549

Planning-2—Pumped Storage
Chairman: Antonio Ferreira, Northeast Utilities Service Co.
Session 11
EPRI's Pumped Storage Planning and Evaluation Guide
Henry H. Chen and Charles W. Sullivan ............................... 556
The Mt. Hope Waterpower Project
Frank Fisher and Robert Balletti ........................................ 563
Small and Low Head Pumped Storage Projects
A. Hassan Makarechian ..................................................... 573
Benefits and Applications of Modular Hydroelectric Pumped Storage
Rick S. Koebbe ................................................................. 583

Project Case Studies-1—Including Hydraulic Models
Chairman: Brian W. Clowes, U.S. Army Corps of Engineers NPDPE-WM
Session 25
Feasibility of Adding Small Hydro to Federal Hydraulic Structures in the
Upper Ohio River Basin
Robert W. Schmitt ............................................................. 593
Hydraulic Model Studies for Non-Federal Projects at Federal Dams - A
Case Study
Barend Meiling ................................................................. 600
Yough Hydro Case History - Development 12 MW Facility
Daniel J. Barton, Paul C. Rizzo and John M. Musacchio .............. 608
Overcoming the Obstacles - Hydroelectric Development on the Kankakee
River
Bennett D. Reischauer, Richard G. Simms and Russell Johnson .... 617

Project Case Studies-2—Additions to Existing Structures
Chairman: David F. Guyot, Black & Veatch
Session 32
More Power to the Allegheny - Design of the Allegheny 8 & 9
Hydroelectric Stations
Ed O'Connor ................................................................. 627
The PEC Headworks Project - A Cooperative Hydropower Development
  Stanley J. Hayes, David M. Clemen and Raymond O. Ellis ............... 637
Lake Siskiyou Power Project
  S. T. Su, D. A. Gravenkamp and Roger Cummins ........................... 647
In-Mine Hydroelectric Power Generating Station
  Richard A. Volkin ........................................................................ 656

Technology Transfer—General
  Chairman: Ronald R. Loose, U.S. Department of Energy
  Session 6

Undeveloped Hydropower Resource Potential
  Garold L. Sommers and Bennie N. Rinehart ................................. 665
Technology Transfer in the Bureau of Reclamation
  Danny L. King and Darrell W. Webber .................................. 672
Private Hydropower Projects: Exporting the American Experience
  Wayne L. Rogers and Jean-Pierre Bourgeacq ............................ 678
Technology Transfer for Small Hydro
  Marino Estrada ........................................................................ 687

Subject Index .............................................................................. 697
Author Index ................................................................................ 703
