VOLUME 3 — RECOVERY PROCESSES

STEAM STIMULATION

FLOW REGIMES DURING CYCLIC STEAM STIMULATION
E. Vittoratos (Canada) ........................................................................................................... 3

INTERPRETING THE RESPONSE OF CYCLIC STEAM SIMULATION TO PROPPED FRACTURES IN CANADIAN OIL SANDS
M. Mohtadi (Germany) W.R. Freeborn (Canada) ................................................................. 11

ALTERNATIVES TO STEAM INJECTION IN MOLOACAN FIELD
S. Reyes G. and F. Rodriguez M. (Mexico) ........................................................................... 23

EFFECTIVENESS OF STEAM STIMULATION IN A HEAVY OIL RESERVOIR WITH BOTTOMWATER — A NUMERICAL SIMULATION STUDY
Zhengming Yang (China) ..................................................................................................... 41

DETERMINATION OF FRACTURE PARAMETERS DURING CYCLIC STEAMING IN COLD LAKE OIL SANDS
Mehmet Saltuklaroglu (Canada) ......................................................................................... 47

OPTIMUM CYCLIC STEAM INJECTION RATES FOR HEAVY OIL RESERVOIRS
Manolo Reina (Venezuela) .................................................................................................. 63

EXPERT SYSTEM FOR CYCLIC STEAM INJECTION
Manolo Reina and Lionel Rodriguez (Venezuela) ............................................................. 69

PARAMETRIC STUDY OF THE DESIGN FACTORS FOR CYCLIC STEAM INJECTION IN LAKE MARACAIBO OIL FIELDS
Ramiro Trebolle, Miriam de Paz and Douglas Martinez (Venezuela) .................................. 75

THERMAL SECONDARY RECOVERY IN COSTA BOLIVAR OIL FIELDS, STEAM GENERATION PLANTS, MARAVEN S.A.
José Manuel Morales and Rafael Unda (Venezuela) ......................................................... 89

OIL AND SUSPENDED SOLIDS REMOVAL FROM PRODUCED WATER USING ULTRAFILTRATION AND MICROFILTRATION
A. Zaidi, S. Kok, K. Simms and J. Schmidt (Canada) ......................................................... 97

NUMERICAL MODELLING OF THE CYCLIC STEAM STIMULATION PROCESS INCORPORATING TEMPERATURE, PRESSURE AND DYNAMIC FRACTURE PROPERTIES
M.Y-S. Chan, Toshiyuki Hirata and D.E. Towson (Canada) ............................................... 121
# Development Strategies for a Thick Multiple Layered Thick Heavy Oil Reservoir
Qi Jiang, Rui Zhang and Peigong Xie (P.R. China)

# Numerical Simulation of Steam Injection in a Heavy Oil Reservoir with Edgewater and Bottomwater
Jian Zhang and Renchu Liang (P.R. China)

# Relieving Plugs for the Heavy Crude Wells of Injecting Steam in the Water-Sensible Formation
Cheng Yixin, Wang Biao, Hu Zhimian and Jian Yinxue (P.R. China)

# An Analytical Composite Model for Cyclic Steam Stimulation in Elliptical Flow Geometry
John E. Arthur, Donald A. Best, Kamal N. Jha and Frank M. Mourits (Canada)

## Steam Flooding

**Steamflood Applications for Marginal Heavy Oil Reservoirs with Underlying Bottom Water**
Helen L. Chang, S.M. Farouq Ali and Albert E. George (Canada)

**Steam Generation Using High TDS Water Sources Field Pilot Test**
Fernando Camacho, Aaron Padrón and Johnny Morales (Venezuela)

**Maraven Experience on Steam Drive**
F. Portillo and L. Bracho (Venezuela)

**Analytical Steamflood Model for Heavy Oil Reservoirs**
H.S. Chhina, J.E. Arthur and F.N. Pebbani (Canada)

**Continuous Measurement of Steam Quality Using a Radioactive Sensor**
Peter Reinders and Andres Tremante (Venezuela)

**Computer Simulation of Laboratory Cells Used in Thermal Recovery Experiments**
B.F. Birdwell and W.C. Richardson (USA)

**SWIPS Process Evaluated for Application to a California Heavy Oil Sand**
J.H. Duerksen (USA)

**Use of Surface Displacements to Monitor EOR Projects**
Roman A. Bilak, Leo Rothenburg and Maurice B. Dusseault (Canada)

## In Situ Combustion

**The Development of In Situ Combustion Projects: Techno-Commercial Aspects and Strategy**
M. Greaves and G.M.S. Ibrahim (UK)

**Experimental Studies of Crude Oil Pyrolysis, Fuel Formation and Combustion in Relation to In-Situ Combustion**
M. Ranjbar and G. Pusch (Germany)

**The Effects of Geomechanical Behaviour on In-Situ Recovery Processes in Oil Sands Reservoirs**
K.M. Kosar and K. Been (Canada)
TABLE OF CONTENTS

USE OF HIGH PRESSURE DIFFERENTIAL SCANNING CALORIMETRY TO EVALUATE OIL SANDS FOR IN-SITU COMBUSTION  
S. Indrijarso, R. Hughes and D. Price (UK) .............................................................. 313

EFFECT OF PRESSURE AND CLAY CONTENT ON COMBUSTION KINETICS OF HEAVY OIL IN LIMESTONE MEDIUM  
Fariborz Rashidi and Suat Başçı (Turkey) ............................................................... 323

NUMERICAL SIMULATION OF TWO-DIMENSIONAL COMPOSITIONAL CHANGES DURING IN SITU COMBUSTION  
M. Greaves, M.N. Derahan and A.S. Bagci (UK) ...................................................... 329

IN SITU COMBUSTION — THE ESSENTIAL REACTION KINETICS  
M.R. Islam, A. Verma and S.M. Farouq Ali (Canada) ............................................ 343

INFLUENCE OF CO₂ ON THE RECOVERY OF HEAVY OILS FROM IN-SITU COMBUSTION PRESSURE CYCLES  
G.J.J. Williams, C.J.J. Black, A.D. Hessell and R.J. Hallam (UK) ......................... 355

THERMAL ALTERATIONS OF RESERVOIR SANDS IN IN SITU COMBUSTION PROCESSES  
Marlene Villaiba and Elena Escobar (Venezuela) .................................................. 363

GLOBAL IN SITU COMBUSTION PROCESS: A NEW TECHNOLOGY PROPOSED TO ENHANCE THE HEAVY AND VISCIOUS OIL RECOVERY BY THERMAL METHODS  
Vasile Comsa (Romania) ............................................................................................ 375

PLANNING A COMMERCIAL SCALE HEAVY OIL PROJECT  
P.W. Elder and R.G. Holcek (Canada) ...................................................................... 381

ADDITIVES

PRODUCTION PERFORMANCE OF AN IMMISCIBLE CO₂ APPLICATION IN A HEAVY OIL FIELD; BATI RAMAN, TURKEY  
Kayhan İsever, Ahmet Köse and Yüksel Kurt (Turkey) ............................................ 389

MOBILITY CONTROL FOR STEAM FLOODING WITH HIGH TEMPERATURE RESISTANT ADDITIVES  
F. Schwarzkopp, R.D. Stoll, H.W. Gudenu and D. Barnewold (Germany) .............. 399

CHARACTERISTICS OF STEAM-FOAM DRIVE PROCESS IN MASSIVE MULTI-ZONE AND THIN SINGLE-ZONE RESERVOIRS  
Shane S. Mohammadi (USA) Dennis A. Coombe (Canada) .................................... 407

STUDY OF ENHANCED HEAVY OIL RECOVERY BY HOT CAUSTIC FLOODING  
Jianshe Wang, Yueqiu Li, Jingrong Zhang and Shi Tiande (P.R. China) ................. 419

INJECTION OF HOT FLUIDS, GAS AND FOAMING AGENT IN THE DEMJÉN-WEST FIELD  
Maria Toth (Hungary) Claude Gadelle (France) Dmitriy Georgievich Antoniady (USSR) 441

A THREE-DIMENSIONAL FOAM DRIVE EXPERIMENT WITH STEAM-SURFACTANT-NITROGEN CO-INJECTION  
Rod Ridley, Tad Sudol and Gurdeep Purewal (Canada) ......................................... 449

A THEORETICAL ANALYSIS OF THE MECHANISMS ASSOCIATED TO STEAM WITH SOLVENT INJECTION PROCESSES  
Orlando R. Rivas (Venezuela) ............................................................................... 455
HEAVY CRUDE AND TAR SANDS – HYDROCARBONS FOR THE 21ST CENTURY

EXPERIMENTAL EVALUATION OF THE EFFICIENCY OF FOAMING AGENTS IN STEAMFLOOD PROCESSES
Zuleyka Méndez and Enrique Campos (Venezuela) .......................................................... 463

FIELD EXPERIENCE WITH THE ADDITION OF SURFACANTS, DILUENTS, AND NATURAL GAS IN CYCLIC STEAM INJECTION
James McGee, Jose Yibirin and Freddy Socorro (Venezuela) ........................................ 471

STEAM SOAK WITH ADDITIVES, THE MARAVEN EXPERIENCE
L. Bracho and F. Portillo (Venezuela) ................................................................. 485

ELECTRIC AND ELECTROMAGNETIC HEATING

RESEARCH INTO AND DEVELOPMENT OF ELECTROMAGNETIC TECHNOLOGY TO EXTRACT BITUMINOUS OIL: BASIC PHYSICS, MATHEMATICAL MODELS, HARDWARE AND PROCEDURE
Fanil L. Sayakhov and Minnekhan A. Fatykhov (USSR) .................................................. 501

INTERACTION OF HIGHLY STABLE WATER-OIL EMULSION WITH RADIO FREQUENCY ELECTROMAGNETIC FIELD
Fanil L., Sayakhov, Nail Sh. Imashev and Minnekhan A. Fatykhov (USSR) ....................... 507

MICROWAVE HEATING OF HEAVY OIL RESERVOIRS AS A VIABLE METHOD OF EOR
S.S. Marsden (USA) ........................................................................................................... 515

FACTORS AFFECTING THE EFFICIENCY OF ELECTRICAL RESISTANCE HEATING PATTERNS
J.B. Maggard and R.A. Wattenbarger (USA) .................................................................. 519

SIMPLIFIED HEAVY-OIL BOTTOMHOLE-HEATING PRODUCTION PREDICTIONS
R.E. Laine, J.M. Rajtar, J.N. Ring and R.A. Wattenbarger (USA) ...................................... 531

IMPROVED CALCULATION OF OIL RATES WITH ELECTRICAL RESISTANCE HEATING (ERH)
B.A. Baylor, J.B. Maggard and R.A. Wattenbarger (USA) ................................................ 539

CIRCUIT MODELING FOR THE NUMERICAL CALCULATION OF RF HEATING OF CRUDE OIL IN PIPES AND RESERVOIRS
Roberto C. Callarotti (Venezuela) ..................................................................................... 547

NUMERICAL SIMULATION OF A NEW RECOVERY TECHNIQUE FOR HEAVY OIL RESERVOIRS WITH BOTTOM WATER
M.R. Islam (Canada) M. Mbride (USA) A. Chakma (Canada) ............................................. 561

BIOTECHNOLOGY FOR CONFORMANCE CONTROL OF A WATERFLOOD
T.J. Cyr, J.W. Costerton, S.A. Binkensop and F.M. Cusack (Canada) ............................... 569

AUTHOR INDEX .................................................................................................................. 573
