## TABLE OF CONTENTS

Letter From Conference Chair ........................................ iii
Letter From Program Chair ........................................... iv
Conference Organizing Committee .................................... v
Conference Referees .................................................. vi

### Volume I

#### Architecture

On Performance Evaluation of Fault Tolerant Multi-stage Interconnection Network .................................................. 1
  Youngsong Mun, Hee Yong Youn, University of Texas-Arlington
An Overview of RISC Architecture ........................................ 11
  Samuel O. Aletan, Louisiana Tech University
Persistent Structures to Store Motion and Moving Images ............ 21
  M. Zand, H. Farhat, H. Saiedian, University of Nebraska-Omaha
Improving Instruction Supply Efficiency in Superscalar Architectures Using Instruction Trace Buffers ............ 28
  Chih-Po Wen, University of California

#### Communications

An Interleaving Technique for Block Coding of Black and White Facsimile Data ........................................ 37
  D. Weifang Doong, Huizhu Lu, G.E. Hedrick, Oklahoma State University
Rapid Prototyping Tools for Telecommunications Applications .......... 46
  Scott Anderson, Dough Blewett, Meg Kilduff, AT&T Bell Laboratories
Object-Oriented Event Analysis for Telecommunications Services .......... 52
  Bernhard G. Humm, Michael Fazzolare, University of Wollongong
On a Trunk Group with a Finite Waiting Room ...................... 63
  C.S. Reece, University of Missouri-Kansas City
An Interface for Acquisition, Manipulation and Distribution of Mail and News Messages As Objects ............ 68
  Hossein Saiedian, J. Winslade, University of Nebraska-Omaha
A New Protocol Conformance Test Generation Method and Experimental Results ........................................ 75
  Xiaojun Shen, Guogang Li, University of Missouri-Kansas City
Analytic Performance Analysis of the DQDB Access Protocol ........... 85
  John Holliday, Jr., University of Missouri-Kansas City
Message Delay Analysis for CAN Based Networks .................... 89
  Zhengou Wang, Huizhu Lu, G.E. Hedrick, Marvin Stone, Oklahoma State University

#### Computational Linguistics

Dynamic Crossword Slot Table Implementation ................................ 95
  Geoff Harris, Griffith University
  D. Roach, H. Berghel, University of Arkansas
  P.D. Smith, California State University
A Proposed Benchmark for Testing Implementations of Crossword Puzzle Algorithms ........................................ 99
  Geoff Harris, J.J.H. Forster, L.J. Spring, Griffith University
  H. Berghel, University of Arkansas
Reversible Grammars and Natural Language Processing .............. 102
  Gordon Franck, University of Missouri-Columbia
The Crozzle—A Problem for Automation ................................ 110
  John Forster, G.H. Harris, Griffith University
  P.D. Smith, California State University
Transforming Expert System Output into Natural Language in a Process Control Environment .................... 116
  Paddy Matthews, Huk Mok, University College
Using Expectation to Enable Spoken Variable Initiative Dialog .......... 123
  Ronnie W. Smith, D. Richard Hipp, Duke University
'Tuning' an ASM Metric: A Case Study in Metric ASM Optimization ........ 131
  Hal Berghel, David Roach, University of Arkansas
  George Balogh, Carroll Hyatt, Axciom Corporation
Edit Distance of Run-Length Coded Strings ................................ 137
  Horst Bunke, University of Bern
  Janos Csirik, University of Szeged

#### Computer Assisted Instruction

Application of Simple Microcomputer Technology to Undergraduate Instruction In Geography .................... 144
  Stephen J. Stadler, Thomas A. Wikle, Oklahoma State University
An Intelligent Discovery Programming System ....................... 149
  Haider Ramadhan, University of Sussex
Data Structures

A Uniform Approach to the Stability and Performance Analysis of Concurrent Data Structure Maintenance Policies

Ing-Ray Chen, University of Mississippi
Sayed A. Banawan, University of Houston

Multiple Representation of Abstract Data Types and Reuse of Realizations

A Pragmatic Set Operation and Its Implementation in C

Tom Bennet, University of Missouri

Database

Towards a Standard for SQL-Based Spatial Query Language

Paolino Di Felice, Eliseo Clementini, Universita dell' Aquila

Extending N-grid Group Authorization Using Compact Encoding

Wen-gong Shieh, Bob P. Weems, Krishna M. Kavi, University of Texas-Arlington

Performance of Join on an N-Dimensional Mesh

Hyoun I-Jhang, University of Kansas

Design of a Temporal Database for Phlebitis

Connie Delaney, Padmini Srinivasan, University of Iowa
D.V. Rama, Bentley College

Dynamic Addition and Removal of Attributes in BANG Files

Nalini Hosur, Oklahoma Department of Vocational and Technical Education
Huizhu Lu, G.E. Hedrick, Oklahoma State University

Searching Spatial Objects with Index by Dimensional Projections

Xiaoming Cheng, Huizhu Lu, G.E. Hedrick, Oklahoma State University

Selection of Search Terms Based on User Profile

Sanjiv K. Bhatia, University of Missouri-St. Louis

A Model of Integrity for Object-Oriented Database Systems

James M. Slack, Elizabeth A. Unger, Kansas State University

On The Use of Distributed Joins for Processing Interlibrary Loans

J. Michael Bennett, Paul Neo, University of Western Ontario

Supporting General Queries in an Object Management System

Xuequn Wu, Software Technology

Storage and Access of Temporal Information for the Management of Complex Systems

Y.C. Shim, C.V. Ramamoorthy, University of California-Berkeley

Parallel Main Memory Database System

Soon M. Chung, Wright State University

Processing Multi-Join Query in Parallel Systems

Kian-Lee Tan, Hongjun Lu, National University of Singapore

The Distributed Object Environment: Support for a Distributed Object-Based System

Steven Glicker, Gail Whitehead, Eric Evans, University of Texas-Austin

Using an Object-Relationship Model for Rapid Prototyping

Bogdan D. Czejdo, Ralph P. Tucci, Loyola University

Design and Functions of DUO: The First Italian Academic OPAC

Maristella Agosti, Maurizio Masotti, University of Padova

A Deductive Database Audit Trail

David L. Sallach, SBC/OC Services

Expert Systems

PETINA-Tour Generation Using the ElipSys Inference System

Panagiotis Stamatopoulos, Isambo Kavali, Constantin Halatsis, University of Athens

An Alternative to Constraint Logic Programming for Managing Domain Arithmetics In PROLOG

David Roach, Hal Berghel, University of Arkansas

A Graph-Aided Inference Browser for Developing Knowledge-Based Systems

Suk I. Yoo, Chang H. Park, Seoul National University

Supporting Knowledge Acquisition by End Users: Tools and Representations

Andreas Girgensohn, Frank Shipman, University of Colorado

Implementation of an Automated E.M.S. Optimization Program using an Embedded Expert System

R.R. Goforth, S. Parker, A. Balagamwala, University of Arkansas

On the Construction of Efficient Match Networks

Jack S.E. Tan, University of Houston
J. Srivastava, S. Shekhar, University of Minnesota

On the Conversion of Rule Bases Into Belief Networks

Shijie Wang, Marco Valtorta, University of South Carolina

Permanent Object Storage and Collections for Object-Oriented Systems With Rules

Bogdan D. Czejdo, Loyola University
Christoph Elick, M. Taylor, University of Houston
Fuzzy Systems

Parallel Pattern Recognition Using Fuzzy Cooperative Expert Systems
Mordechay Schneider, Eliahu Shnaider, Florida Institute of Technology
A. Kandel, University of South Florida

AUTOKNAQ-Automatic Knowledge Acquisition for Fault Isolation Expert Systems
Mordechay Schneider, Florida Institute of Technology
Mark W. Wheeler, Harris Government Communications Systems Division

Comparison of Fuzzy Implication Operators by means of Weighing Strategy in Resolution Based Automated Reasoning
Yong-Gi Kim, Ladislav J. Kohout, Florida State University

Image Contrast Enhancement Using Fuzzy Set Theory
Faisel Saeed, K.M. George, Huizhu Lu, Oklahoma State University

On the Issue of Neighborhood in Self-Organizing Maps
Marimuthu Palaniswami, University of Melbourne
Hua Yang, La Trobe University

Graphics, GUI, and Image Processing

Inference of A 3-D Object From A Random Partial 2-D Projection
Pamela Hsu, Evangelos Triantaphyllou, Kansas State University

New Mathematical Morphology Operators and Their Applications
G. Meghabghab, Valdosta State College
A. Kandel, University of South Florida

Estimating Testability and Coverage Distributions of a VLSI Circuit From a Mixture of Discrete and Continuous Functions
H. Farhat, Mansour K. Zand, Hosseim Saiedian, University of Nebraska

Study of a Generic Graphics Package for the Development of Various User Interfaces
Amir Khwaja, Raghu Mannam, Joseph Urban, Arizona State University

Learning Tool for Signed English Using Graphical Hand Automation
Eun-Jung Holde, Geoffrey G. Roy, University of Western Australia

Reconstructing Surfaces From Sparse Depth Information
Jesse S. Jin, Brian G. Cox, Wai K. Yeap, University of Otago

Improving Edge Detection by an Objective Edge Evaluation
Quanming Zhu, University of Nebraska-Omaha

Adaptive Estimation of Optical Flow From General Object Motion
Zhaoxin Pan, Joseph J. Pfeiffer, Jr., New Mexico State University

A Graph Browser for Large Directed Graphs
Yves Mathys, Motorola, Inc.

Information Theory

Entropy and Information Measures in Combinatorial Optimization
Owen J. Murphy, California State University
Aby Tehranipour, Eastern Michigan University

A Hierarchical Single-Key-Lock Access Control Using the Chinese Remainder Theorem
Kim S. Lee, Huizhu Lu, Don D. Fisher, Oklahoma State University

Intelligent Systems

An Adversarial Plan Recognition System for Multi-Agent Airborne Threats
Richard D. Amori, East Stroudsburg University

A Cost Effective Question Asking Strategy
Evangelos Triantaphyllou, Kansas State University
Jinchang Wang, Missouri Western State College

Diagnosis of Complex Industrial Devices
Bechir el Ayeb, Universite de Sherbrooke

An Object-Oriented Model for Intelligent Networks
Qingzhong Cai, University of Texas-Arlington

Logic Programming

Proving Functionally Difficult Problems through Model Generation
Richard Rankin, Ralph Wilkerson, University of Missouri-Rolla

Experimentation with Proof Methods for non-Horn Sets
Chris Merz, Ralph Wilkerson, University of Missouri-Rolla

Channel Routing by Constraint Logic
Nicholas C. Phillips, Southern Illinois University

Computation at Infinity: A Nonstandard Approach
Klaus Kaiser, University of Houston

Unification for Completely Commutative Theories
Daniel Murphy, University of Missouri-Rolla
Operating Systems

A Heuristic Multiprocessor Scheduling Algorithm for Creating Near-Optimal Schedules Using Task Systems Graphs .................................................................................................................. 711
Farideh Samadzadeh, G.E. Hedrick, Oklahoma State University

The Effect of Power-Tail Distributions on Response Times in Time-Sharing Computer Systems 719
Lester Lipsky, Sharad Garg, Maryann Robbert, University of Connecticut

Parallel and Distributed Computing

A Comparison of Performance of Algorithms for Polar Decomposition on a Multivector Processor .................................................................................................................. 724
S. Lakshmivarahan, Sudarshan K. Dhall, Gwan-Ming Thio, Kulathur S. Rajaseethupathy
University of Oklahoma

NC Algorithms for Dominations in Permutation Graphs .................................................................................................................. 734
Y. Liang, Indiana Purdue University
C. Rhee, Eastern Kentucky University
S.K. Dhall, S. Lakshmivarahan, University of Oklahoma

Parallel Quicksort in Hypercubes Multicomputers .................................................................................................................. 740
Youran Lan, Magdi Mohamed, University of Missouri-Columbia

Scheduling Algorithms for Precedence Graphs .................................................................................................................. 747
Mansur Samadzadeh, Sridhar Mandyam, Oklahoma State University

Performance Modeling of a Partitionable Circular Bus Network for Distributed Systems .................................................................................................................. 758
Tai-Kuo Woo, University of Florida

Using The Linda Distribution Paradigm to Address a Variety of Computational Balancing Concerns .................................................................................................................. 767
Jack Cummings, Ray Ford, University of Montana

Parallel Solution of Hough Transform and Convolution Problems a Novel Multimodal Approach .................................................................................................................. 775
Lan Jin, California State University-Fresno
Lan Yang, California State Polytechnic University

SUVS: A Distributed Real-Time System Testbed for Fault-Tolerant Computing .................................................................................................................. 782
S.M. Yang, K.M. Kavi, A. Agarwalla, M. Reddy, S. Anam, University of Texas-Arlington

Scheduling Interval Ordered Tasks on Multiprocessor Architecture .................................................................................................................. 792
Hesham H. Ali, Hesham El-Rewini, University of Nebraska-Omaha

On The Evolution of Complex Genomes: Adaptive Graph Computations With A CM-2 Connection Machine .................................................................................................................. 798
A. Aggarwal, Sahota Sarkar, Boston University

Distributed Algorithms for Locating Centers and Medians in Communication Networks .................................................................................................................. 808
Mohan Sharma, IBM

Jianhua Chen, Sitharama Iyengar, Louisiana State University

A Model for Job Scheduling in a Distributed Computer Network .................................................................................................................. 818
Jiang B. Liu, Bradley University

Autotasking on the Cray Y-MP: A Performance Evaluation on Seismic Codes .................................................................................................................. 825
Ernst L. Leiss, L.T. Shih, University of Houston

A New Fault Tolerant Distributed Mutual Exclusion Algorithm .................................................................................................................. 831
Rachamallu L.N. Reddy, Bidyut Gupta, Southern Illinois University
Pradip K. Srimani, Colorado State University

A Dynamic Task Scheduling Method for Multiprocessor Systems .................................................................................................................. 840
Ming-fang Wang, University of Central Arkansas

Ada/TL Specification and Verification of a Distributed Computation .................................................................................................................. 846
W. Hankley, P. Tsai, Kansas State University

Performance Evaluation and Modeling

Performance of the Short-Time Fourier Transform and Wavelet Transform to Phonocardiogram Signal Analysis .................................................................................................................. 856
M.S. Obaidat, M.M. Matalgah, University of Missouri-Columbia

Performance of the Perception Algorithm for the Classification of Computer Users .................................................................................................................. 863
S.A. Bicha, M.S. Obaidat, University of Missouri-Columbia

Operational Performance Metrics in a Distributed System: Part I-Strategy .................................................................................................................. 867
Bert N. Corwin, Booz-Allen & Hamilton Inc
Robert L. Braddock, Loral Space Information Systems

Operational Performance Metrics in a Distributed System: Part II - Metrics and Interpretation .................................................................................................................. 873
Robert L. Braddock, Michael R. Claunch, J. Walter Rainbolt
Loral Space Information Systems
Bert N. Corwin, Booz-Allen & Hamilton Inc

Probabilities of Qualitative Behaviors for Dependability Analysis of a Fault Tolerance Model .................................................................................................................. 883
Daniel Berleant, Kristian Bognaes, Li Sheng, Joyce Ch'ng, Chiou-guey Liaw
University of Arkansas
Arun Chandra, University of Texas-Austin

Programming Languages and Functional Programming

Parallel Implementation of an Extended Functional Programming Language on a Cellular Tree and Data Flow Architectures .................................................................................................................. 890
Reza Sanati-Mehrizy, Krishna K. Aggarwal, Afsaneh Minzie, Louisiana State University
The Use of a Software Specification Metalanguage
Karl B. Zerangue, Joseph E. Urban, Arizona State University

A System for Program Component Specification and Code Generation
Robert P. Brazile, University of North Texas

ECOS Graphs: A Dataflow Programming Language
J. C. Huang, Naval Underwater Systems Center
Jose Munoz, Hal Watt, George Zvara, University of Houston

Scientific and Engineering Computing

An Efficient Algorithm for Sparse Matrix Computations
S.C. Park, J.P. Draayer, Si-Qing Zheng, Louisiana State University

Transfer of Computing Techniques to the Chemical and Petrochemical Industries from NASA-JSC
Sharon Westerman, SHARWEST Inc.
Hing Pang, Brown & Root Braun

A Systolic Array Architecture for Multiplying Toeplitz Matrices
S. Sureshchandran, University of Delaware

A Note on Checking Matrix Products
B. Ravikumar, University of Rhode Island

Automating Road Surface Analysis
L. Donnell Payne, Texas Christian University

A CLP(R) System for Solving Partial Differential Equations
David S. Homiak, SBCIOC Services

A Distribution-Free Random Number Generator Via a Matrix-Exponential Representation
Edward F. Brown, University of Missouri-Kansas City

The Design of a Human Interface for a Thunderstorm Warming System
William T. Neumann, Arizona State University

Hyper9002: An Online Operating Manual for a Chemical Manufacturer Using Hypertext Integrated with an Object Oriented Database
Gael Paquet, Object Databases

Qualitative Representation of a Continuous Process with Reference to Apple Fruit Abscission
M.K. Rogoyski, Rogers Mesa Research Center
T.L. Mourey, Mesa State College
A.R. Renquist, Orchard Mesa Research Center

Spatial Decomposition of a Tumor Into a Minimum Number of Spherical Components
Jay Mookherje, Nagarajan Prabhakaran, Florida International University

Approximate Submatrix Matching Problems
Xiaojun Shen, Qing Hu, University of Missouri-Kansas City

Simulated Annealing and Genetic Algorithms

Near Optimal Triangulation of a Point Set by Simulated Annealing
Subhajit Sen, Si-Qing Zheng, Louisiana State University

Global Optimization by Center-Concentrated Sampling
Aoru Kambayashi, Toshiba Research and Development Center

Implementation of Massively Parallel Genetic Algorithms on the MasPar MP-1
Antonette M. Logar, Edward M. Corwin, Thomas M. English, Texas Tech University

A Genetic Algorithm for Packing in Three Dimensions
Arthur L. Corcoran III, Roger L. Wainwright, University of Tulsa

Solving Combinatorial Optimization Problems Using Parallel Simulated Annealing and Parallel Genetic Algorithms
Pooja P. Mutalik, Leslie R. Knight, Joe L. Blanton, Roger L. Wainwright, University of Tulsa

Solving The N-Queens Problem Using Genetic Algorithms
Kelly D. Crawford, University of Tulsa

Software Engineering

Design and Implementation of a Requirements Clustering Analyzer for Software System Decomposition
Alan T. Yaung, IBM

A Formal Structured Method for Requirement Specification Construction
Shaoying Liu, University of York

A Structured Approach to the Evaluation and Selection of CASE Tools
Louis A. Le Blanc, University of Arkansas-Little Rock
Willard M. Korn, University of Wisconsin

Integrating Software Tool Communication Within an Environment
Peraphon Sophatsathit, Joseph Urban, Arizona State University

Software Reusability

A Reusable Software Catalog Interface
J.E. Swanson, United States Army
M.H. Samadzadeh, Oklahoma State University
Reusable Distributed "Data Environments" .......................... 1083
M. Ancona, P. Cagetti, P. Catagna, L. Gruosso, Universita di Genova

A Generic Object-Oriented Concurrency Mechanism for Extensibility and Reuse of Synchronization Components ........................................ 1091
Laurent Thomas, Centre de Recherche en Informatique de Nancy

Special Topics

Classification of Non-Linear-Separable Real-World-Problems Using A-Rule, Perceptions and Topologically Distributed Encoding ........................................ 1098
Martin Eldracher, Technische Universitat Munchen

A Methodology for Fast PC Hard Disk State Restoration ......................... 1105
David Langan, University of South Alabama
Thomas J. Scott, Western Illinois University

Dynamic Change in Office Automation: Modeling and Analysis .................. 1111
Shih-Gong Li, IBM
Clarence Ellis, University of Colorado-Boulder
Kar Yan Tam, Hong Kong University of Science and Technology

Management Guidelines for PC Security ........................................... 1118
Troy E. Anderson, Kansas State University

Simulation of Communications Architecture Specifications Using Prolog ........ 1123
Wayne Citrin, University of Colorado

Media Transports and Distributed Multimedia Flows ................................ 1132
Mark Baugher, IBM

On a Single Server Queue with Non-Renewal Input ................................ 1144
Appie van de Liefvoort, University of Missouri-Kansas City
Aby Tehranipour, Eastern Michigan University

Conversational Statistical Computing for Routing Algorithms .................. 1150
Kendall E. Nygard, Rhonda Magel, Cheng-Hong Yang, North Dakota State University

Theory (General)

Iterative Tree Automata, Alternating Turing Machines, and Uniform Boolean Circuits:
Relationships and Characterizations .............................................. 1159
Abdellaziz Fellah, Kent State University
Sheng Yu, University of Western Ontario

An Application of the Method of Buckets to the Selection Problem ............... 1167
Gary A. Hyslop, Edmund A. Lamagna, University of Rhode Island

Analysis and Experience with an Information System Development Methodology ................................................. 1173
Mannahesh Kantipudi, Joseph E. Urban, Arizona State University

Vertex-Transitivity and Routing for Cayley Graphs in GCR Representations ........ 1180
K. Wendy Tang, SUNY at Stony Brook
Bruce W. Arden, University of Rochester

Visualization

SCIL-VP: A Multi-Purpose Visual Programming Environment .................... 1188
Dennis Koelma, Richard van Balen, Arnold Smeulders, University of Amsterdam

Using Agentsheets to Create a Voice Dialog Design Environment ................ 1199
Alex Repenning, Tamara Summer, University of Colorado

Palette: An Extensible Visual Editor ............................................. 1208
Eric Golin, Steven Danz, Susan Larison, Diana Miller-Karlow
University of Illinois at Urbana-Champaign

Visual Support for Version Management ......................................... 1217
Marceli Wein, W. Morven Gentleman, National Research Council of Canada

Models and Techniques for the Visualization of Labeled Discrete Objects ........ 1224
Dinseh P. Mehta, University of Minnesota
Sartaj Sahni, University of Florida

Performance Comparison of Neural Networks and Pattern Recognition Techniques for Classifying Ultrasonic Transducers ........................................ 1234
M.S. Obaidat, D.S. Abu-Saymeh, University of Missouri-Columbia

Using Pictorial and Object-Oriented Programming for Computer Algebra ........ 1243
Trevor J. Smedley, Technical University of Nova Scotia

Stereoscopic Projections and 3D Scene Reconstruction .......................... 1248
Chaman L. Sabharwal, University of Missouri-Rolla
