Cognitive Paradigms
in
Knowledge Organisation

Second International ISKO Conference
Madras 26-28 August 1992

Organised by
Madras Library Association
Sarada Ranganathan Endowment for Library Science
University of Madras

Sarada Ranganathan Endowment for Library Science
CONTENTS

Preface v

Introduction xiii

Session I

Knowledge and Knowledge Organisation: the Needs and the Modes

The Impact of Computer Technology on Knowledge Representations 1
Elaine Svenonius

Eduard Sukiasyan

Cognitive Skills of Conceptualisation Process and Types of Concepts 23
M. Sekhar & E.R. Ekbote

Cognitive Paradigms and User Needs 35
Bernd Frohmann

Session II

Knowledge Seeking in Libraries

Not Even the Voice of a Ghost: Epistemology as a Bridge from Our Bibliographical Past to a New Paradigm 51
J.M. Perreault

Displays of Bibliographic Records in Call Number Order: Functions of the Displays and Data Elements Needed 65
Dorothy McGarry
Session III

Knowledge Seeking in Information Retrieval

Knowledge Organisation for Information Retrieval

Padmini Srinivasan

Contextual Information Needs: Retrieval Techniques and the Research Process

S. Amba & Hemalata Iyer

Citation Analysis: An Important Tool for Knowledge Organization

R.G. Dharmapurikar

Factors Affecting the Analysis of Requests and the Formulation of Query Statements

Mirja Iivonen

Multiple Subject Representations and Cognitive Searches

K.S. Raghavan & P. Sankaralingam

Session IV

Knowledge Seeking in Problem Solving, Decision-Making, and Learning Situations

Cognitive Modelling of Technology Information

J. Hölzl

The Use of Conceptual Models in Design and Implementation of Decision Support Systems

Jasminka Novak

Modeling and Simulation in the Development of Decision Support System for Library Resource Sharing Networks

Yogendra P. Dubey

A ‘Path-Model’ in Social and Behavioural Research

Pratibha Upadhyay
Knowledge Representation in Human-Computer Interaction: A Terminological Representation

Daniela D’Aloisi

Session V

Taxonomic Approach to Knowledge Representation

A Universal System Without Ordering Codes

Ejnar Wahlin

Knowledge Classification – A Permanent Structure for Dynamic Knowledge

Asha Umarani

The System Concept as a Tool for Knowledge Representation: Understanding the Human Body

Jayashree Ramadas & Usha Nair

Organisation of Knowledge in Neurological Sciences – A Comparative Study of Secondary Sources

K. Sivareddy & R.S.R. Varalakshmi

Propaedia of Encyclopaedia Britannica: A Conceptual Model of Knowledge Organisation

M. Parameswaran

Session VI

Analytico – Synthetic Approaches to Knowledge Organisation

Ranganathan’s Generalised Model of Subject Structure and Modes of Formation of Subjects

A. Neelameghan

Cognitive Approach in Information Consolidation

S. Seetharama

Systematization of Science and Technology Research

Giliola Negrini
A Compositional Approach to Acquire and Represent Knowledge from Medical Coding Systems  
_{Aldo Gangemi, Mario Glanti, Elena Galeassi, Angelo Rossi Mori_}

The Network of Knowledge Fields: Conceptual Systematization in Action  
_{Ingetraut Dahlberg_}

**Session VII**

**Cognitive Paradigms and their Application to Knowledge Organisation**

Representing Knowledge Through Legal Concepts  
_{Suneeti Rao_}

Conceptual Representations Based on Natural Language Phrases  
_{Gerhard Rahmstorf_}

Use of Paradigm in Classification of Melodic-Scales  
_{C.S. Krishnamoorthy_}

Learning Teaching Cognitive Paradigms in Knowledge Organisation  
_{Mamota Das_}

Use of a Relational Database System to Model the Variability of Historical Source Information  
_{Joseph A. Busch_}

Creativity and Knowledge Organisation: A Cognitive Interaction  
_{M.A. Gopinath_}

**Session VIII**

**Cognitive Paradigms in Knowledge Base**

The Variation in Informativity of Research Papers with Time and Field  
_{Moshe Yitzhaki_}
