Effect of saturation third harmonic on the performance of squirrel-cage induction machines
Yuefeng Liao, T.A. Lipo

Identification of parameters of asynchronous machines experimental methods and results
N. Khenfer, A. Rezzoug, E.J. Gudefin, F. Meibody-Tabar

Prediction of the performance characteristics of small induction motors from measurements without load machine
P. Ramminger, E. Andresen

Experimental investigation of shaft voltage induced in an inverter-fed cage induction motor
J.E. Roeber, J.F. Gieras

Further development of phantom loading in induction motors
S.L. Ho

Equivalent circuit determination of an AC-machine based on catalogue data and values of no-load current and stator resistance
L.M. Grzesiak, K. Reichert

Parameter identification of asynchronous motors with special attention to fast response measuring methods.
P.L. Timar, L. Bajza, E. Krisch, E. Solymoss

Study and evaluation of induction generator parameters for stability control in large interconnected power systems
L.M. Neto, C.H. Salerno, M.S. Miskulin

Estimation of losses in cage induction motors using finite element techniques
A. Arkkio, A. Niemenmaa

Influence of high order voltage harmonics on iron losses in an induction motor
Y. Mohamed-Ali, R. Glises, J.M. Kauffmann

Analysis of leakage flux distribution within the range of pole pitch of squirrel-cage induction motor
M. Dems, K. Komeza, S. Wiak

Non-simultaneous switch-on of a 3-phase induction machine
J. Bendl, L. Schreier

Thermomechanical stresses on the rotor bar during induction machines direct starting
P. Curiac, D. Popescu

Wound-rotor induction motors with partial non-inductive windings
Wang Xuefan, Xu Shizhang

High-speed induction dynamometers of the series GID
Z. Zak, R. Stana

Computer aided design of high speed induction motors
D. Taghezout, J. Dos Ghali, R. Wetter

A new design criteria for spindle induction motors controlled by field oriented technique
A. Boglietti, P. Ferraris, M. Lazzari, F. Profumo

Performance of induction motors with shaft-mounted torque discs
A.C. Smith, E.K.C. Chan, A.J. Curley

On the choice of the number of rotor slots for inverter-fed cage induction motors
A. Arkkio
Calculation of circulating current between parallel windings in induction motors with eccentric rotors, by the finite-element method
S.J. Salon, M DeBortoli, D. Burrow, C. Slavik 371

SPECIAL MACHINES and ACTUATORS II

Design of a hand-held motor using a rare-earth permanent magnet rotor and glassy-metal stator
V.S. Ramsden, W.M. Holliday, J.B. Dunlop 376

Recent developments in disk-drive spindle motors
K.J. Binns, M.A. Jabbar, T.S. Tan 381

On the choice of magnetic sheet for a split-phase single-phase motor line
F. Parasiliti, M. Villani 386

Time-stepping finite-element simulation of a ballistic solenoid
J.P. Sturgess 391

Acceleration-life testing of a linear pulse motor for total artificial heart
Masaki Yamaguchi, Katsuaki Kobayashi, Hajime Yamada, Mitsuji Karita, Yoshinori Mitamura, Kou Imachi 396

MODELLING, SIMULATION AND CAD I

Synchronous machine transient performance in finite element terms
D.C. Macdonald, J.P. Sturgess 401

Permanent magnet motor representation by energetic or finite element method
P. Brochet, J.P. Durcreux, A. Castelain 406

Analysis of brushless 2-pole single-phase synchronous generator without exciter by finite element method
S. Nonaka, K. Kesamaru 411

Extended linked magnetic and electric equivalent circuit models for electrical machines
L. Haydock 416

Transient currents of the double-star synchronous machine for a line to line short-circuit on one three phase winding
J.L. Kotny, D. Roger, F. Notelet 421

The modelling of the synchronous generator with additional potential winding connected to a transformer and half-controlled rectifier bridge
Jiao Shuli, Wang Xiangheng, K.L. Lo 426

Frequency converter-fed synchronous motors: interactive simulation system
A. Sapin, J.J. Simond, B. Kawkabani 431

Simulation and monitoring of induction motors with rotor asymmetry
P. Vas 435

Transmission-line modelling of induction motor drives
H. Selhi, C. Christopoulos, A.F. Howe, S.Y.R. Hui 440

Mathematical modelling of voltage source inverter/induction motor drive systems
S.M. Abdulrahman, J.G. Kettleborough, I.R. Smith, V.V. Vadher 445

Two-dimensional finite-element modelling of eddy current problems - the effect of circuit connection
J.P. Sturgess 450
The integration of the finite element method into design procedures for analysing electrical machine performance
T.W. Preston

An expert system for the integrated design and test result Odiagnosis of industrial DC motors
G. Cross, J.J. Blakley, F. Shui

RELCUTANCE MACHINES

Measurement of magnetic characteristics of switched reluctance motors
H.C. Lovatt, J.M. Stephenson

Electromagnetic testing of switched reluctance motors
C. Cossar, T.J.E. Miller

Control strategy to minimise torque ripples of switched reluctance motors
Quan Jiang, Ju Ye, E. Zhou

Prediction and measurement of torque ripple in SR motors
J. Corda, S. Masic, J.M. Stephenson

Optimum commutation - current profile on torque linearization of switched reluctance motors
D.S. Schramm, B.W. Williams, T.C. Green

Three dimensional effects in λ/i diagrams for switched reluctance motors
S. Williamson, A.A. Shaikh

An improved disc-geometry switched reluctance motor
M.A. El-Khazendar

Quadratic hybrid boundary integral equation-finite element method applied to magnetic analysis of a switched reluctance motor
A. Omekanda, C. Broche, R. Balland

Use of energetic methods for the optimised design of hybrid stepping motors
A. di Gerlando, G. Colombo

Single-step dynamic torque characteristics of a variable-reluctance stepping motor
A.P. Russell, I.E.D. Pickup

A three-phase claw-pole stepping motor with sensorless self-synchronisation
E. Kokornaczyk

Starting performance of smooth stator solid rotor reluctance machines using a boundary integral method
M.E. Zaim, R. Saou, B. Laporte

Mathematical model and dynamic analysis on SRD used new main circuit of one switch element each phase
Cai Wei, Li Jun, Yuan Jing-an, Shi Nai

Development of sub-KW single-phase switched-reluctance motor drives
S. Chan, H.R. Bolton

A low-voltage switched reluctance motor with experimentally optimised control
M. Steibler, Jie Ge

Conveyor drives using switched reluctance motors
N.N. Fulton, P. Greenhough

Distributed anisotropy rotor synchronous (DARSYN) drives - motor identification and performance
I. Boldea, N. Muntean, S. Deaconu, S.A. Nasar, Z. Fu

Vector control and performance of a reluctance synchronous machine with a flux barrier rotor
M.J. Kamper, R.A. Trubenbach
INDUCTION MACHINES II

Numerical fitting method for obtaining induction motor characteristics from manufacturer data sheets
C. Goldemberg, O.S. Lobosco, 552

Effects of slot closure and magnetic saturation on induction machine behavior: A study using finite element analysis
S.J. Salon, M.J. DeBortoli, D. Burow, C. Slavik 557

Axial magnetic forces on induction machine rotors
K. Lenasi, M. Berlec 562

Stability of the induction motor: A further look at equivalent-circuit approaches
M.R. Harris, N.N. Barsoum 567

An 8097 based high performance soft-starter for induction motors
W.L. Soong, T.J.E. Miller, S.E. Wood 572

CONTROL I

Speed estimation with digital position sensor
B.J. Brunsbach, G. Henneberger, Th. Klepsch 577

State and parameter observers in the induction motor control systems.
T. Orłowska-Kowalska 582

Rotor time constant online-identification of induction cage motors for transputer controlled servodrives
D. Naunin, S. Beierke 587

Modelling and non-linear identification of static parameters of a double cage induction machine
P. Lagonotte, H. Al Miah, J.C. Trigeassou 592

Parameter estimation of field-oriented controlled induction motor fed by CR-PWM via EKF using stator reference currents
G. Bal, D.M. Grant 597

A comparative analysis of stochastic and deterministic techniques applied to an induction motor drive
X. Roboam, B. de Fornel, J.M. Semenzato 602

A study of large-capacity pulse motor drive system using PWM current source inverter
K. Shinohara, Y. Minari 607

Current estimation in brushless dc drives using a motor observer
C.D. French, P.P. Acarnley, A.G. Jack 612

State-observer based indirect current detection for PM synchronous servo drives
J.F. Moynihan, S. Bolognani, R.C. Kavanagh, M.G. Egan, J.M.D. Murphy 617

Rotor position estimation in PM motors
P.P. Acarnley, N. Ertugrul 622

Torque transient capabilities of vector controlled ac motors with identical stators
S.A. Nasar, I. Boldea, Z.X. Fu 627

Numerical considerations in field oriented control of asynchronous drives
K. Jelassi, B. de Fornel, M. Pietrzak-David 632
MODELLING SIMULATION and CAD II

Optimum CAD-CAE design of axial flux permanent magnets motors
F. Caricchi, F. Crescimbini, A. Di Napoli, E. Santini 637

The latest study on CAD of stepper motors
Yao Hong, Wang Xiangheng, I.R. Smith 642

A synchronous machine model in the harmonic domain
A Medina, J. Arrillaga, J.F. Eggleston 647

Measurement and modelling of low-frequency disturbances in induction machine
T. Thiringer 652

Computer simulation for the dynamic behaviour of variable speed solid rotor induction machines
G. Onbilgin, I. Senlik 657

Effects of saturation in double-cage induction machines
P. Vas, J. Li 662

A model for predicting the level of airgap eccentricity in operating three-phase induction motors:
The case of sinusoidally distributed windings
A.J. Marques Cardoso, E.S. Saraiva 667

Mathematical modelling of the squirrel-cage induction motors including space harmonics effects.
J. Luiz do Nascimento, R. Carlson, S.R. Arruda 672

Modelling and digital simulation of the field oriented control of a reluctance machine supplied by a PWM-VSI
A Tounzi, F. Meibody-Tabar, A. Rabih, F.M. Sargos 677

Simulation of the synchronous motor’s starting fed via a voltage inverter
G. Adamidis, A. Safacas 682

An object oriented model for induction motor drives
D.T.W. Liang, M.J.N. Cumbi, J.M. Hernandez Cid 687

Mathematical modelling and simulation of self-commutated PM - hybrid stepping motor
V. Tilia, A. Forrai, Cs. Szasz 692

Sawyer type linear motor dynamic modelling
I.A. Viorel, Z. Kovacs, L. Szabo 697

A comparison of finite element and analytic solutions for rotor surface losses in turbine generators
S. Salon, M.R. Shah 702

LINEAR MACHINES

Modelling and testing a new linear reluctance motor
N. Locci, I. Marongiu 706

Induction motor with helical winding and liquid metal secondary
Y. Agafonov 711

Design of a linear induction motor for the control of conductive fluid flow
H. Ohsaki, E. Masada, G. Henneberger 716

Performance characteristics of a transfer machine using permanent magnet type linear synchronous motor
T. Mizuno, H. Yamada 721

Propulsion control of controlled-PM LSM maglev carrier
K. Yoshida, Y. Tsubone, T. Yamashita 726
PERMANENT MAGNET MACHINES

An assessment of the power available from a permanent magnet synchronous motor which rotates at 5000,000 rpm
E. Consterdine, D.E. Hesmondhalgh, A.B.J. Reece, D. Tipping

Design and initial test results from a permanent magnet synchronous motor for a vehicle drive
A.G. Jack, B.C. Mecrow, A.J. Mitcham

Performance evaluation of an axial-flux PM generator
F. Caricchi, F. Crescimbini, O. Honorati, E. Santini

Results of test on a prototype for large converter-fed permanent magnet motors
C. Goldemberg, O.S. Lobosco

High speed synchronous machine with rare earth-cobalt magnets
M. Hippner, R.G. Harley

Development of a composite-rotor permanent magnet synchronous motor
E.S. Hamdi, A.N. Mubarak

Design of permanent magnet machine rotors
J. Hylander

Analytical solution of the system equations of the axial field permanent magnet synchronous motor drive
N. Ertugrul, P.P. Acarnley

Pull-in criterion for permanent-magnet synchronous motors
Cheng Ming, Zhou E

Starting and operation of permanent-magnet commutatorless motor without a shaft position sensor
Yi-Kang He, Yao-Ming Wang, Yuan Ruan

Numerical calculation of transient field of REPM synchronous motor during starting
Yao Shouyou, Yang Hong, Cao Zitong

Measurement on parameters of permanent magnet synchronous machine including the cross-saturation effect.
Ma Lei, Yao ShouYou, Cao ZhiTong, Zhang JingHua

A rare earth permanent magnet generator of novel design
Ö. Göl, B. Sobhi-Najafabadi, A.M. Parker

The prediction of iron losses in brushless permanent magnet dc motors
K. Atallah, Z.Q. Zhu, D. Howe

Unbalanced magnetic pull in permanent magnet motors
B. Ackermann

Torque ripple analysis in brushless permanent magnet motor drives
D. Hanselman, J.Y. Hung, M. Keshura
Speed control of a constant torque brushless motor
E. Favre, L. Cardoletti, E. von Siebenthal, M. Jufer
