INDEX Volume 1

PLENARY LECTURE

Continuous casting: status and prospects
P. Nilles, A. Etienne ................................................................. 1.1

CASTING CONSUMABLE MATERIALS

Developments of linings for tundish
A. Ratto, V. Pezzotti ................................................................. 1.17

Boron nitride enrichment of the submerged entry nozzles: a solution to avoid clogging
E. Luehrsen, A. Ott, W. Parbel, J. Piret, R. Ruddleston, B. Short .................. 1.37

An overview of ECSC-funded research on casting powders
K.C. Mills .................................................................................... 1.59

Use of instrumentation to evaluate mold powders and practices at the Burns Harbor no. 2 slab caster
M.R. Ozgu, D.N. Rego, B. Kocatulum, K.J. Simms, T.W. Fenicle, K.R. Burcaw, W.T. Bentley, D.J. Idstein ........................................ 1.73

MAINTENANCE AND REVAMPING

Slab production in electric steel making plant: operating and quality results on the revamped continuous casting machine
F. De Nola, F. Milani, M. Malandra, A. Carboni ....................................... 1.83

Supervising and diagnosis system at the continuous casting plants of the Hoesch Stahl AG in Dortmund - Experience and outlook
H. Bachmajer, F.W. Schaefer .................................................................. 1.93

Maintenance and revamping
M. Hosny Abdel Rahman .................................................................. 1.103

The evaluation of schemes for upgrading continuous slab casting facilities
B. Patrick, B. Barber, D.J. Scoones, J.L. Heslop, P. Watson ....................... 1.111

Modifications and results of the revamping of the no. 2 slab CCM at ILVA-Terni works
F. Sarlo, G. Brascugli, F. Rossini, G. Costanzi, A. Contaretti .................. 1.121

An engineering “fingerprint” of British Steel’s, Llanwern works slabcaster
D.J. Bowen, A.J. Spear ......................................................................... 1.131

OPERATION RESULTS

High speed continuous casting for blooms and billets
A. Depierreux, F. Knaff, R. Henrion, N. Martinussen, P. Naveau, S. Wilmotte .................................................. 1.297

Influence of the modification of the secondary cooling conditions on the productivity of Vallourec Saint Saulve rotative continuous caster
P. Boussard, R. Szezesny, C. Dworatzek, J. Selaries, N. Niederlaender ...... 1.313

Production of quality steels using the six-strand billet caster at Tata Steel
R.N. Chattopadhyay, B. Lobo, S.N. Jha, A. Chatterjee, ................................................................. 1.323

The continuous casting of billets and blooms in stainless steels
M. Gnadenberger, H.P. Jung, K.J. Kremer .................................................. 1.335

Advances in continuous casting technology made by Kyoei Steel Ltd

Construction and operational results of continuous forging process at no. 3 bloom caster at Mizushima works

Investigation of temperature control at the continuous casting machine of Combined Steelworks of DIMAG Corp.
J. Szegedi, J. Bollobas, Zs. Varga, J. Nagy .................................................. 1.365

Four years continuous operating experience with the Rocon rotary tundish valve on the eight strand bloom caster at British Steel, Teesside Works
J. Purdie, M.J. Hague .................................................. 1.373

CC oxy-cutting and deburring maintenance: low cost and high production systems
G. Oehmen, H.K. Lotz .................................................. 1.389

An investigation into the causes of sticker breakouts
A.S. Normanton, V. Ludlow, D. Stewart, K.C. Mills .................................................. 1.401

Improvement for high productivity and high quality of slabs at Kure no. 2 CC
K. Noguchi, T. Tsuboi, M. Takeoka, K. Kurihara .................................................. 1.413

Results of CC improvements on Chertal's caster
V. Furlan, A. Palmaers, B. Parisse .................................................. 1.423
QUALITY IN THE CONTINUOUSLY CAST PRODUCTS
AND THEORETICAL INVESTIGATIONS

The quantification of macro-segregation in continuous cast slabs
and its relationship to product performance
I.D. Simpson, L.G. Moore, C.L. Carey .................................................. 1.435

Improvement of semi-macro segregation in continuously cast slabs
with roll alignment taper and EMS
C.H. Yim, I.R. Lee, Y.K. Shin, S.K. Kim, K.S. Oh,
D.S. Jang, S.M. Yang ........................................................................... 1.445

Regression analysis and improvement application of slab central segregation
S.J. Chen, T.M. Chen ............................................................................ 1.455

Process and metallurgical improvements in the continuous casting
of high-oriented electrical steel slabs at ILVA-Terni steel works
B. Andreoli, G. Costanzi, F. Sarlo, T. Shimokasa, A. Spaccarotella,
G. Provantini ..................................................................................... 1.469

Progress with the computer aided quality control in the modernized LD III
steel plant in Linz
T. Fastner, P. Narzt, H. Preissl ............................................................. 1.479

Influence of the steelmaking conditions on nonmetallic inclusions
and product defects
K. Tanizawa, F. Yamaguchi, K. Inaoka, K. Tanaka ................................. 1.491

Castability assurance of Al-killed Si-free steel by calcium cored
wire treatment
B. Bergmann, N. Bannenberg, R. Piepenbrock ...................................... 1.501

Influence of shell solidification on generation of slab defects.
Use of hydraulic mold oscillation at Sollac Florange
M. Nadif, A. Solimine, P. Ominetti, P. Velluet, M. Blandel,
M. Roscini ......................................................................................... 1.509

Quality improvement of continuously cast stainless steel slabs at Pohang works

Application of mould thermal monitoring in the study of slab surface quality
for heavy plate grades at Scunthorpe Works, British Steel
D.E. Humphreys, J.D. Madill, V. Ludlow, D. Stewart, S.G. Thornton,
A.S. Normanton .................................................................................. 1.529

The influence of mould design and oscillation-mark formation, heat transfer
and quality in the continuous casting of steel slabs
R.B. Mahapatra, J.K. Brimacombe, I.V. Samarasekera ............................ 1.541

The influence of electromagnetic stirring on the solidification structure of steels
P. Toboc, V. Fireteanu, I. Vircolaeu, V. Mirea, M. Nicolae,
M. Mihaiiescu, V. Giurgea .................................................................... 1.557
Reduction of centre porosity and centre segregation by strand and final EMS in stainless and carbon steel blooms
L. Holmstroem, B. Rogberg .......................................................... 1.567

Effect of the secondary cooling on the internal structure of blooms and billets
A. Etienne .............................................................................. 1.577

Direct billet casting at Stocksbridge Engineering Steels:
meeting the markets quality expectations
M. Worral, K. Thomas .......................................................... 1.589

Analysis of the cause and prevention of longitudinal midface cracks and depressions on continuously cast free-machining steel blooms
R. Bommaraju, R. Glennon, M. Frazee ...................................... 1.599

Implementation of an Al-based bloom caster quality prediction system
K.C. Teh, H.M. Lie, J. Herbertson, D. Trotter ................................. 1.611

The E.L.V. solidification model in continuous casting billet moulds using casting powder
E. Lainez, J.C. Busturia ............................................................. 1.621

Plasma arc remelting of surface layer of continuously cast billets of high-alloyed steels and alloys
Yu.V. Latash, G.F. Torkhov .................................................... 1.633
