TABLE OF CONTENTS

TECHNICAL SESSION 1
Identifying Boards, Components and Packages for Production, Quality and Inventory Control
Chairman: Benjamin Nelson, Industrial Market Relations, Markem Corporation

"Quality or Else" ......................................................... 3
Benjamin Nelson, Industrial Market Relations, Markem Corporation

"Bar Code Labels for Boards and Packages" ...................................... 6
Jud Miner, Vice President Sales, Datapage Technologies

"Print Quality Labels in House" ........................................... 22
Sprague Ackley, Scientist, Intermec

TECHNICAL SESSION 2
Manufacturing Engineering - Integrating Design & Production
Chairman: Mervyn Thomas, Chief Applications Specialist, Racal Redac Systems Ltd.

"Improving Assembly Throughput with Discrete Optimization" .................................................. 35
Carlsen Svanhohn, Technical Director, CAM Software Resources

"Automating Program Generation for Assembly Equipment" .................................................. 42
Charles Ziegler, Project Engineer, Delta Information Systems, Inc.

"Setup Optimization Strategies and Tools" ........................................ 50
Janet Pearce and Robert Toole, Software Eng., Mitron

TECHNICAL SESSION 3
PCB Educational Forum--Part I
Chairman: Bernard Kessler, Consultant, Bernard Kessler & Associates

Harvey Miller, Kirk-Miller Associates

"Glass Fabrics Production - An Overview*" ................................... 69
Mike Bryant, Burlington Glass Fabrics Industries

"Copper Foil Manufacturing" ............................................ 71
Rolland Savage, Technical Service Manager, Gould Inc.

"Prepeg and Laminate Manufacturing" ....................................... 80
Mike Radcliffe and William Glover, Nelco Industries

"Design Systems" ......................................................... 82
Jim Hixson, Automata Design, Inc.
TECHNICAL SESSION 4
Incentives for Manufacturing Multi-Chip Module Laminates
Chairman: Don Swanson, Editorial Director, Electronic Packaging & Production Magazine

"Multi-Chip Modules and their Impact on the Printed Circuit Industry" ........................................... 1827
Charles Lassen, Managing Director, U.S. Operations, BPA (Management & Technology) Inc.

"Trends in Design & Layout for Multi-Chip Module Laminates" ................................................... 91
Tony Mazzullo, Harris EDA

"Performance Analysis of Laminate-Based Multichip Modules" ..................................................... 96
William Blood, Manager ASIC/MCM System Engineering, Motorola, Inc.

"Laminates for Multi-Chip Modules" ................................................................................................. 105
Michael Freda, Acsist Associates Inc.

"ASIC MCML™ Series Manufacturing Process" .............................................................................. 114
James Trent and Daniel Thompson, Motorola, Inc.

TECHNICAL SESSION 5
Inert Gas Soldering
Chairman: Donald Burr, Principal Automation Engineer, Unisys Corporation

"Membrane Air Separation Systems for On-Site Nitrogen Supply" .................................................. 127
Louis Romano, National Marketing Manager, Praxair Inc., Linde Division

"Reductions in Inert Gas Usage and No-Clean Processes in Recirculating Forced Convection SMT Reflow Systems" .................................................................................................................. 137
Dieter Brammer, Vice President, Development, ABW Systems Corp.

"No-Clean Reflow Machines Come of Age" ...................................................................................... 143
Sabi Avramescu, R & D Manager, Electrovert Ltd.

"Optimizing Nitrogen Purity and Flow in a Convection Reflow Oven" ............................................ 149
Norm Cox, Engineering Manager, Research Inc.

"Low-Bridging Soldering Process Using Nitrogen" ......................................................................... 1833
Marty McDonald, Praxair Inc., Linde Division

"Retrofitting Infrared Reflow Furnaces" ......................................................................................... 158
Stephen Jacobs, Development Engineer, Air Products and Chemicals
TECHNICAL SESSION 6
Boundary Scan
Chairman: Jon Turino, Logical Solutions Technology Inc.

"Testing High-Performance PC Modules Using Boundary Scan" .................. 173
Harry Jin and Bruce Peterson, AST Research, Teradyne Corp.

"IEEE P1149.5 Standard Module Test and Maintenance Bus" .................... 1837
Pat McHugh, U.S. Army Labcom

"IEEE Std.-1149.1–An Introduction" ............................................. 179
Jim Whetsel, Senior Member of Technical Staff, Texas Instruments

"Low-Cost Boundary-Scan Test Interfaces" ......................................... 196
Julian Marshall, President, Alpine Image Systems

"Boundary Scan–A Paradigm Shift for Test Engineers" ......................... 203
Stig Oresjo, Applications Engineer, Hewlett-Packard

TECHNICAL SESSION 7
Test Interconnect Options
Chairman: Ken Johnson, Testech, Ltd.

"Electro-Static Discharge and Vacuum Fixtures: A Case Study" ................... 215
Michael Sullivan, Stephen A. Cohen and Kathy Shottes Regan, Teradyne, Inc.

"Fixture Technology Update - Hitting Small Test Targets" ....................... 220
Gary St. Onge, Director of Fixture Operations, Everett Charles Technologies

"VXI Interface Connector Assemblies" .............................................. 227
Norman Wood, Jeff Stowders and Robert Rowley, Virginia Panel Corporation

TECHNICAL SESSION 8
Completing the Cycle–Connecting it All Together
Chairman: Lynette O'Brien, President, IICIT, Orange County Chapter

"MIL-SPEC Solderability - Putting it all Together" ............................... 235
Cristi Cristich, Cristek Interconnects

"Flex-Circuit Interconnection Development" ....................................... 242
Douglas Parker, G & H Technology

"Surface Treatments for Electronic Components Solutions for Adhesive Bonding Problems" .......................... 250
Scott Sabreen, The Sabreen Group

"Microwave Modules: Attaining and Retaining Hermeticity" ..................... 260
Bill Ables, Texas Instruments Inc.
TECHNICAL SESSION 9
Accelerating the Successful Change to CFC Alternatives
Chairman: William Kenyon, Du Pont Electronics

"Managing the Transition on a Global Scale--Change in the Cleaning Agent Means Changes to Equipment, Processes, Process Control, Specifications & Standards" .................................................. 271
William Kenyon, Du Pont Electronics

"Production Experience Using a Closed-Loop Membrane System for a Semi-Aqueous In-line for Cleaning Avionics Electronics" .................................................. 279
Peggy Strickland and Suzanne Nachbor, Honeywell Inc.

"A Comparison of Optimized Process Options for Low, Moderate and High-Volume Semi-Aqueous Cleaning" .................................................. 281
Erin Yaeger, J. M. Ney Co. and T. R. Fields, DuPont Electronics

"Qualification and Implementation of Low-Residue Solder Pastes in a Six-Sigma Environment" ................. 293
Richard Brooks, Motorola

TECHNICAL SESSION 10
Building Long-Term Supplier Relationships
Chairman: William Riordan, Manager, Operations, General Dynamics

"Teaming with Equipment Suppliers to Develop-Zero Defect Processes" .................................................. 305
James Coslow, Member of Technical Staff, Automotive System Laboratory (ASL), Inc.

"Supplier SPC Program for Aerospace and DoD Operations" .................................................. 314
Dr. Ronald Anjard, Sr., A. Kenniston, George Rigney, Terry Gregory, Jeff Robles, and Sara Britt, GDE Systems Inc. (formerly General Dynamics Electronics)

TECHNICAL SESSION 11
PCB Educational Forum--Part II
Chairman: Bernard Kessler, Consultant, Bernard Kessler & Associates

"Design Inputs" .................................................. 335
Jim Hixson, Automata Design, Inc.

"Printed Circuit Board Fabrication Flowchart" .................................................. 345
Howard Jones, Quality Engineering Specialist, Hewlett-Packard Company
TECHNICAL SESSION 12
Z-Directional Conductive Polymer and Chip on Board
Chairman: Neng-hsing Lu, Senior Research Scientist, ITRI-Materials Research Laboratories

"Epoxy for Chip on Board" ................................................................. 353
W. Chin and T.Y. Lee, National Tsing Hua University, Department of Chemical Engineering

"Monte Carlo Study of Percolation in Conductor-Filled Polymers" ............................................. 361
Paul Ho, Professor and T. W. Poon, Research Associate, University of Texas at Austin, Center for Materials Science and Engineering

"Innovative Electronic Packaging for All Types of Components" ..................................................... 364
Joe Alvite and Linda Hendrickson, Robodyne Corporation

"Chip-on-Board Technology" ............................................................... 372
Neng-hsing Lu, Senior Research Scientist, ITRI-Materials Research Laboratories

TECHNICAL SESSION 13
High-Density Interconnection Using Conductive Metal Polymer Composites
Chairman: Joseph Fulton, Member of Technical Staff, AT&T Bell Laboratories

"Solderless Flip Chip Technology" .......................................................... 1853
Richard Estes and Frank W. Kulesza, Epoxy Technologies Inc.

"Reliability and Versatility of PTF Fine Pitch Technology" ......................................................... 385
Roger Iannetta, Poly-Flex Circuits

"Interconnecting Liquid-Crystal Driver LSI's by TAB-on-Glass and Board-to-Glass Using Heat Seal Connectors and Anisotropic Electrically Conductive Film" ........................................... 393
Roger Reinke, President, Elfom, Inc.
TECHNICAL SESSION 14  
Copper Solderability Preservative Coatings
Chairman: Iris Artaki, Distinguished Member of the Technical Staff, AT&T Bell Laboratories

"Switching from Tin/Lead to Copper Finishes*" .................................................. 405
Bruce Short and Dick Reilly, Digital Equipment Corporation

"Effect of Simulated Storage on the Solder Wettability of Inhibited Substrates" .................. 416
F.M. Hosking, Sandia National Laboratories

"Solderability and Thermal Stability of Azole Corrosion Inhibitors" .......................... 423
Urmi Ray, I. Artaki, H.M. Gordon and R.L. Opila, AT&T Bell Laboratories

"Soldering Evaluations of Organic Solderability Preservatives*" .................................. 436
George Wenger, Member of Technical Staff, AT&T Bell Laboratories

"SMT Study - Strife and Solderability" ................................................................. 1906
Jim Freeman, Hewlett Packard

"Solder-Wetting Characteristics of Bare Copper Printed Wiring Boards with Protective Anti-Tarnish Coatings*" .................................................. 452
Sy-Hwa Chen, Consulting Engineer, NCR Corp.

TECHNICAL SESSION 15  
Board Evaluation
Chairman: Julie Keahey, Sales Development Engineer, Hewlett-Packard Corp.

"Using Automated X-Ray Test to Certify Your Process*" ........................................... 471
Dr. John Adams, Chief Scientist and Bruce Bolliger, Director of Product Mgmt., Four Pi

"Insuring Test Quality From a Contract Manufacture" ............................................ 480
Daniel R. Caldwell, Manager of Test Technology, Plexus

"Testing in a High-Mix Environment" ...................................................................... 1909
TECHNICAL SESSION 16
Fine-Pitch Assembly and Reliability
Chairman: Dr. Viswanadham Puligandla, IBM Corporation
Co-Chairman: Pratap Singh, IBM Corporation

"The Cost of Implementing FPT" .................................................. 1887
Fred Smith, President, Royonic Inc.

"Fine-Pitch Surface-Mount Solder-Joint Rework Reliability Study" ...................... 489
Joanne D. Larson, J.A. Self and W.J. Claridge, Storage Technology Corp.

"Evaluation Solder Paste Printing and Reflow for Ultrafine Pitch Surface Mount Process" .... 506
Bao-Tong Ma, Amit Sarkhel and Charles Woichik, IBM Corporation

"Taping & Reeling Fine-Pitch Components" ........................................ 518
David Lightbody, President, and Ian Thomas, Reel Service (USA) Inc.

"The Impact of Lead Density on Semi-Aqueous Cleaning for Fine-Pitch Surface-Mount Technology" . . 524

TECHNICAL SESSION 17
No Need to Clean
Chairman: Armin Rahn, President, Fluoncon Technologies

"No-Clean No-Residue Technology" ............................................. 533
Patrick Bruneel, President, Interflux U.S.A.

"Does Nitrogen Eliminate Cleaning?" ........................................... 542
Uta Puschmann, Process Planner, Alcatel-Sel, Mannheim

"How Come Vapor-Phased Boards are Cleaner?" .................................. 550
Armin Rahn, President, Fluoncon Technologies

"Benefits of Ultrasonic Fluxing: A Case Study" .................................. 556
Harvey Berger, President, Sono-Tek

"No-Clean Solder Process Enhancement" .......................................... 562
Richard Szymanowski, Manufacturing Eng., Northern Telecom Ltd.

"No-Clean Soldering of Electronics Assemblies" .................................. 574
Rick Wade, Advanced Mfg. Eng., UDS/Motorola
