4th European Symposium on
SPACE ENVIRONMENTAL CONTROL SYSTEMS

Florence, Italy, 21 – 24 October 1991

Organised by:
the European Space Agency (ESA) and
the Agenzia Spaziale Italiana (ASI)
with the participation of Alenia Spazio
CONTENTS

Volume 2

SESSION 15: WATER MANAGEMENT

Chairmen: R. Reysa, Boeing Aerospace, Houston (USA)
           C. Savage, ESA/ESTEC (NL)

Water Recovery from Condensate of Crew Respiration Products Aboard the Space Station
   N.M. Samsonov, NPO NIICHIMMASH, Moscow (USSR) &al
625

Water Reclamation from Urine Aboard the Space Station
   N.M. Samsonov, NPO NIICHIMMASH, Moscow (USSR) &al
629

Space Station Freedom Regenerative Water Recovery System Configuration Selection
   R. Reysa & J. Edwards, Boeing Aerospace, Houston (USA)
633

Catalytic Wet-Oxidation of Human Waste Produced in a Space Habitat: Purification of the Oxidized Liquor for Human Drinking
   Y. Takahashi &al, Niigata University (Japan)
643

Hygiene Water Recovery Aboard the Space Station
   N.M. Samsonov, NPO NIICHIMMASH, Moscow (USSR) &al
649

The Centrifugal Mass Exchange Apparatus in Air-Conditioning System of Isolated, Inhabited Object and its Work Control
   P.A. Barabash, KIEV Polytechnic Institute (USSR) &al
653

Design of JEM Temperature and Humidity Control System
   T. Suzuki, NASDA, Tokyo (Japan) &al
659

SESSION 16: COMPUTATIONAL ENVIRONMENT

Chairmen: W. Dierssen, Fokker, Amsterdam (NL)
           C. Ferro, Alenia Spazio S.p.A., Torino (I)

FIESTA, an Integrated Approach to Thermal Model Processing
   J.P.A. De Koning & H. de Wolf, Fokker, Amsterdam (NL)
667

Integrated Communication Environment for Thermal Analysis Software
   P. Lecuyer, Bertin, Plaisir (F) &al
675

Definition of the Common Structure of Data to Promote the Communication Between Different Thermal Software Tools
   B. Desaunettes & C. Viguier, CNES, Toulouse (F)
681

GRABE.: A Simple Graphical Back-End for Thermal Simulation Packages
   A.N. Pidgeon, VEGA Space Systems Engineering, Harpenden (UK) &al
687

Unified Computational Method for Design and Evaluation of Fluid Loop Systems
   M. Furukawa, NASDA, Tsukuba (Japan)
693

A Processing Environment for Test and Simulation of Data of Thermodynamic Systems
   R. Mueller & G. Kleinert-Alvarado, ERNO Raumfahrttechnik, Bremen (D)
705

Feasibility Study of an Expert System for the Design of Fusion/Solidification Experiment Boarding on Space Furnace
   B. Desaunettes, CNES, Toulouse (F) &al
713
SESSION 17:  
HEAT REJECTION 2

Chairmen: G. Rum, ASI, Roma (I)  
K. Beckmann, ERNO Raumfahrttechnik, Bremen (D)

Design and Performance of the Spacelab ASTRO-1 Mission Heat Pipe Radiator  
R. Hamner & L.S. Hornsby, Teledyne Brown Engineering, Huntsville (USA)  

SIGMA VCHP Radiator: In-Orbit Performance  
J. Gayrard, CNES, Toulouse (F)  

Development of Fluid Loop and Hybrid Radiators — Test Results  
M. Amidieu, Aerospatiale, Cannes & T. Maciazsek, CNES, Toulouse (F)  

Heat Pipe-Based Radiative Panel  
L.L. Vasiliev & al, BSSR Academy of Sciences, Minsk (USSR)  

The Liquid Droplet Radiator — Status of Development  
J. Persson, ESA/ESTEC, Noordwijk (NL)  

SESSION 18:  
INSTRUMENT & EQUIPMENT THERMAL CONTROL

Chairmen: M. Giommi, Alenia Spazio S.p.A., Roma (I)  
M. Bard, Aerospatiale, Cannes (F)

Battery Thermal Control of the Columbus Free Flyer  
B. Miedza, ERNO Raumfahrttechnik, Bremen (D) & al  

Thermal Analysis of the Spacelab Mission D2 Utility Support Structure and its Payloads  
W. Wessels, ERNO Raumfahrttechnik, Bremen (D)  

V.M. Baturkin & al, Kiev Polytechnic Institute, Ukraine  

Thermal Design for the Space-Exposed Instruments of the Scientific Satellite SAX  
G. Poidomani & G. Bonino, Alenia Spazio, Torino (I)  

Integrated Heat Pipe Concept for LI/SOCL2 Cells Cooling  
A. Suleiman, ENSMA, Poitiers (F) & al  

Development of a Thermal Control Concept for the Optical System of the SUMER Experiment on SOHO  
W. Curdt, MPI für Aeronomie, Lindau, & H. Rathjen, ERNO, Bremen (D)  

Thermal Control of Telescope Apertures by Optimised Baffle Heating  
R. Gessner & al, Dornier, Friedrichshafen (D)
SESSION 19:

CELSS

Chairmen: R. McElroy, NASA-Ames, Moffett Field (USA)
C. Chipaux, Matra, Velizy (F)

Thiocapsa Roseopersicina, a Bacterium for Sulphur Recycling in Microbial Ecosystems Designed for CELSS and Space Purposes

P. Jansen & M. Mergeay, SCK/CEN-VITO, Mol (B)

Higher Plant Growth in Closed Environment: Preliminary Experiments in the Life Support Facility at ESA/ESTEC

C. Tamponnet &al, ESA/ESTEC, Noordwijk (NL)

Chemolithotrophic Hydrogen-Oxidising Bacteria and their Possible Functions in Closed Ecological Life Support Systems

T.G. Volova &al, Institute of Biophysics, Krasnoyarsk, (USSR)

Impact of Diet on the Design of Waste Processors in CELSS

A. Waleh, Applied Sciences Consultants, San Jose (USA) &al

MELISSA: Physical Links of Compartments Nitrobacter/Spirulina

C. Lasseur, ESA/ESTEC, Noordwijk (NL) &al

Modelling Light Transfer Inside Photobiofermentors: Applications to the Photosynthetic Compartments of CELSS

J.F. Cornet, Matra, Toulouse (F) &al

Biodegradation Studies with Space Cabin Contaminants to Determine the Feasibility of Biological Air Filtration (BAF) in Space Cabins

S. Keunlng, Bioclear Environmental Biotechnology, Groningen (NL) &al

SESSION 20:

COOLING LOOP COMPONENTS

Chairmen: M. Ferrara, Microtecnica, Torino (I)
A.A.M. Delil, NLR, Emmeloord (NL)

Progress in the Development of Hermes Evaporators

C. Goehre &al, ERNO Raumfahrttechnik, Bremen (D)

Thermal Analysis of Evaporative Coolers

M. Ohuchi, Japan Systems Co., Kawasaki (Japan) &al

The Transpirator, an Efficient and Light Evaporative Cooler for Space Technology

M. Alf & G. Ernst, Universität Karlsruhe (D)

CPA: a Controlled Pump Assembly for Two-Phase Loops Applications

M.N. de Parolis, ESA/ESTEC, Noordwijk (NL) & P. Reusser, Reusser AG, Zurich (Switzerland)

Thermo-Hydraulic Investigations on Heat Exchangers for Columbus Hybrid Radiators

W.D. Ebeling, R. Meyer, W. Fischer, ERNO Raumfahrttechnik, Bremen (D)
SESSION 21:
HABITABILITY: GENERAL

Chairmen: F. Rossitto, ESA/EAC, Porz-Wahn (D)
M. Novara ESA/ESTEC, Noordwijk, NL

The Human Factors in the Conception of the Hermes Space Vehicle
F. Winisdoerffer, Aerospatiale, Les Mureaux (F)

Logistics in Space: Tools to Support Astronauts
G.F. Deluca & al, Ciset, Rome (I)

CAD System for H.F.E. Analyses: Zero-G Posture in Optimisation of Columbus APM Crew Work-Stations
F. Bobbu & al, Alenia Spazio, Turin (I)

CBT: Role and Future Application for Crew Training
A. Guerrazzi & al, Ciset, Rome (I)

Crew Support Equipment: Identification and Definition of Additional Hardware for Columbus APM Laboratory Habitability
S. Ferraris Seal, Alenia Spazio, Turin (I)

Microgravity Simulations
K. Vergé-Dépré, ESA/ESTEC, Noordwijk (NL)

Engineering of a New Overall System to Improve the Interaction between the Crew and the Ground-Based Scientists and Personnel
C. Viberti, ESA/ESTEC, Noordwijk (NL)

SESSION 22:
IN ORBIT THERMAL PERFORMANCE

Chairmen: W. Pinter-Krainer, ESA/ESTEC, Noordwijk (NL)
J-P. Bouchez, INTELSAT, Palo Alto (USA)

ITALSAT Thermal Control: the In-Orbit Performances
M. Giommi & al, Alenia Spazio, Rome (I)

ROSAT – Measured Temperatures Versus Thermal Analysis Results
A. Braig, Dornier, Friedrichshafen, & P. Pawlovski, DARA, Bonn (D)

SPOT Multimission Platform Thermal Control – Five Years of In-Flight Results
I. Alet, CNES, Toulouse (F)

ULYSSES – One Year After the Launch
H. Petersen, Fokker, Amsterdam (NL)

Flight Test Results of the Passive Cooling System
A.I. Abrosimov & al, All-Union Research Inst. of Electromechanics, Moscow (USSR)

Thermal Implications from the Hubble Space Telescope Solar Array Bi-Stem Boom in Orbit Disturbance
P. Poinas & G.I.M. Beere, ESA/ESTEC, Noordwijk (NL)
SESSION 23:  
EVA 1  
Chairmen: A.I. Skoog, Dornier GmbH, Friedrichshafen (D)  
Y. Ollivier, Dassault, Saint Cloud (F)

EVA Life Support Design and Technology Developments  
R. Vlth & A.I. Skoog, Dornier, Friedrichshafen (D)

Genesis and Evaluation of an Ergonomic Architecture for the ESA EVA Suit  
Y. Ollivier, Dassault, Saint Cloud (F)

EVA Space Suit Thermal Control and Micrometeoroid Protection  
M.C. Tosi &al, Alenia Spazio, Turin (l)

Development of the Suit Enclosure Soft Joints of the European EVA Space Suit  
V. Menendez, ZESA, Figueras (Spain) & Y. Ollivier, Dassault, Saint Cloud (F)

Fan-Pump-Separator Technology Development for EVA  
J.M. Lassus, Technofan/Labinal Group, Blagnac (F)

SESSION 24:  
HABITABILITY: SPECIAL TOPICS  
Chairmen: B. Comet, CNES, Toulouse (F)  
V. Cotronei, ASI, Roma (l)

Study on the Requirements for the Installation of a CES and Habitability Centre  
A. Tomds &al, NTE SA, Barcelona (Spain)

Multi-Cultural Components and Keys for European Worldwide Space Programmes  
R. Pinotti, Futuro, Florence (l)

An Evaluative Study of the Sensory Qualities of Selected European and Asian Foods for International Space Missions (a French Food Study)  
S.M. Ahmed & P.V. Cornish, Texas Southern University, Houston (USA)

Critical Technologies: Spacecraft Habitability – An Update  
R.A.J. Dams, CJB Developments Limited, Portsmouth (UK)

Architectural Studies Relating to Human Body Motion Morphology in Microgravity  
R. Fauquet & J. Okushi, Space Projects Group, Santa Monica, CA (USA)

LBNP as Countermeasure: an Automated Scenario  
F. Baisch &al, DLR, Köln (D)
SESSION 25:
THERMAL PROTECTION SYSTEMS

Chairmen: H. Schmidt, DARA, Bonn (D)
P. Coquerez, CNES, Toulouse (F)

Winged Launcher Thermal Design Aspects
K. Keller, ESA/ESTEC, Noordwijk (NL)

Structures chaudes et protections thermiques de l’avion spatial européen Hermes
J.P. Vialaneix, ESA/CNES, Toulouse (F) & al

Heatshield Concepts for the Rosetta Aerocapsule
M. Eiden, ESA/ESTEC, Noordwijk (NL)
D. Desnoyer, SEP, Bordeaux (F)
C. Chiarelli, Alenia Spazio S.p.A., Torino (I)
A. Smith, Fluid Gravity Engineering, Godalming (UK)

The Importance of Chemical Reactions with Environment for Ablation Process of Thermal Protection and Structural Materials
N.A. Anjimov, Central Research Institute of Machine Building, Kaliningrad (USSR)

Lightweight Fiber Insulations Performance and Applications
J. Antonenko, W.D. Ebeling, B. Schwarz, F. Menn, ERNO Raumfahrtechnik GmbH, Bremen (D)

SESSION 26:
EVA 2

Chairmen: R.C. Augusti, Hamilton Standard, Windsor Locks (USA)
A. Thirkettle, ESA/ESTEC, Noordwijk (NL)

Determination of Ventilation Requirements for a Space Suit Helmet
J. Witt & R. Seurig, ESA/ESTEC, Noordwijk (NL)

Development of European Sublimator Technology for EVA
C. Planert, Nord-Micro, Frankfurt (D) & al

Investigation on a Partial Pressure Carbon Dioxide Sensor
K. Ammann, Draegerwerk, Luebeck (D) & J. Witt, ESA/ESTEC, Noordwijk (NL)

Heat Rejection System for an Advanced Extravehicular Mobility Unit Portable Life Support System
H.J. Strumpf & A.A. Vaigner, Allied-Signal Aerospace, Torrance (USA)

Metal Oxide Absorbents for Regenerative Carbon Dioxide and Water Vapor Removal for Advanced Portable Life Support Systems
J.M. Hart, Allied-Signal Aerospace, Torrance (USA) & al
SESSION 27:
HABITABILITY: ARCHITECTURE & INTERIOR DESIGN

Chairmen: D. Bedini, Futuro, Florence (I)
F. Winisdoerffer, Aerospatiale, Les Mureaux (F)

New Perspectives of Living in Space: Habitability Guidelines for Future Manned Space Systems
M.S. Lavitola, Alenia Spazio, Turin (I) &al

Concept for a European Space Station: Habitability, Life Support Systems and Scientific Facilities
R.C. Huttenbach, Nelson Space Services, London (UK) &al

Influence of Architecture in the Definition of a Space Station Configuration
L. Bradini & L. Galofaro, Progetto Area, Rome (I)

Crew-Friendly Support Systems for Internal Vehicular Activities in Zero Gravity, Experimented Underwater for the Columbus Programme
C. Viberti, ESA/ESTEC, Noordwijk (NL)

Moon Base Habitability Aspects
M.A. Perino, Alenia Spazio, Turin (I)

LATE PAPERS

Session 2: Heat Transport Systems
Conjugating Binary Systems: Advanced Cooling Liquids for Use in Spacecraft ATCS
P. Mueller-Remmers, ERNO Raumfahrttechnik, Bremen (D) &al

Session 25: Thermal Protection Systems
Heatshield Concepts for the Rosetta Aerocapsule
M. Eiden, ESA/ESTEC, Noordwijk (NL) &al

LIST OF PARTICIPANTS
