Advanced Materials

**Advanced Polymers and Matrix Materials**

**Chairman:** Dr. James McGrath, Virginia Polytechnic Institute and State University

A New NASA LaRC Multi-Purpose Prepregging Unit  
S.P. Wilkinson, J.M. Marchello, D. Dixon and N.J. Johnston

Low Emissions, Water-Born Phenolics for Prepregs and  
Honeycomb Applications  
Shahid P. Qureshi, Rod A. McDonald and Mark J. Knudsen

Amorphous Poly(Arylene Ether Ketone) Toughened Cyanate Ester Networks  
S.A. Srinivasan, G.D. Lyle and J.E. McGrath

The Toughness Transfer From Matrix to Unidirectional Thermoplastic  
Composites (Polyarylamid + Glass Fibres)  
B. Goffaux, I. Verpoest and R. Legras

Thermally Conducting Polymer-Matrix Composites Containing Both  
AlN Particles and SiC Whiskers  
Lin Li and D.D.L. Chung

Advanced Materials

**Advanced Composite Bolted Joint Designs and Analysis**

**Chairman:** Jim Dorr, McDonnell Aerospace/Materials and Structures

Analysis of Stress Singularities in Laminated Composite Pinned/Bolted Joints  
Larry B. Lessard, Mahmood M. Shokrieh and Jesper H. Esbensen

Effect of Hole on 3D Braiding Composites  
Wenning Liu, Guangming Chou and Xin Qiao

An Experimental and Statistical Analysis of Some Fastener Anomalies on  
the Bolted Joint Strength of Graphite/Epoxy Laminates  
P.F. Packman, H.J. Hietala and K.C. Schulz

Preformed Holes for Improved Mechanical Properties of Laminated Composites  
with Unidirectional Plies  
Stephen L. Gunderson and Richard B. Hall

Advanced Materials

**High Temperature Metal Matrix Composites I**

**Chairman:** Jim Henshaw, Textron Specialty Materials

Characterization of Microstructurally Toughened Metal Matrix Composites  
Susan M. Stern and Kenneth G. Davis

Effect of Thermal Cycling on Strength and Toughness of Discontinuous  
SiCw-Reinforced Aluminum Alloy Matrix Composite and Its Weldment  
Charles S. Lin

Longitudinal Creep and Strength of Continuous Fiber MMCs  
Kevin W. Kelly and Ever Barbero
PAPERS, AUTHORS, SESSIONS AND SESSION CHAIRMEN

The Effect of the Volume Fraction and the Reinforcement Size on the Mechanical Properties of a SiC Particulate Reinforced 6061 Aluminium Composite
K.S. Foo and W.M. Banks

121

Copper/Molybdenum Composite Prepared by Powder Metallurgy Using Copper Coated Molybdenum Powder
Pay Yih and D.D.L. Chung

134

Processing and Fabrication Technology

Filament Winding and TOW Placement Technology

Chairman: Dr. Walt V. Breitigam, Shell Development Company

A New Compact Robotic Head for Thermoplastic Fiber Placement
Klaus D. Felderhoff and Karl V. Steiner

138

Application of Statistical Design of Experiments to Thermoplastic Tape Laying
Duncan Wood and Susan C. Mantell

152

B-Spline Interpolation Improves Filament Winding Controller's Performance
Shaiq A. Haq

163

Design Considerations for Fiber Placement
Don O. Evans

170

Development of a Single TOW Laying Process
Pusheng Chen, Aly ElShiekh and Steven DeTeresa

182

Experimental Determination of Process Parameters for Laser Assisted Processing of PEEK/Carbon Thermoplastic Composites
S.K. Mazumdar and S.V. Hoa

189

On-Line Consolidation Mechanisms in Thermoplastic Filament Winding (Tape Laying)
C.E. Carpenter and J.S. Colton

205

Processing and Fabrication Technology

Non-Destructive Testing and Evaluation

Chairman: Toby Cordell, Wright Research Development Center

Detection of Composite Heat Damage by Drift Spectroscopy
Paul A. Mehrkam and Eileen Armstrong-Carroll

217

How to Get the Best Value for Each Dollar Spent Inspecting Composite and Bonded Aircraft Structures
L.J. Hart-Smith

226

The Bonded Lap-Shear Test Coupon—Useful for Quality Assurance but Dangerously Misleading for Design Data
L.J. Hart-Smith

239

xiii
# Technology Insertion: Applications

## Aerospace, Recreation and Transportation Applications

**Chairmen:** Scott Beckwith, Beckwith Technology Group  
Leslie Cooke, C3 International

PAPERS, AUTHORS, SESSIONS AND SESSION CHAIRMEN

Experimental and Analytical Development of the FRTM Process  
Steven E. Cohen, Charles T. Graves, Edward Bernardon and Harry West

Low Energy Cure of Aerospace Composites  
F. Salvagio, L. Borovac and M. Vaillance

Trapped Rubber Molding for Controlled High Pressure Consolidation  
Ray Cull, Dan Kemp and Gale Pretzer

Remote Cure Monitoring of Polymeric Resins by Laser Raman Spectroscopy  
K.C. Hong, T.M. Vess, R.E. Lyon, K.E. Chike, J.F. Aust and M.L. Myrick

Processing and Fabrication Technology

Resin Transfer Molding and Pultrusion Technology

Chairman: Bruce Leonard, McDonnell Douglas Aerospace

Preliminary Tests of the Application of Continuous Microwave Technique to Pultrusion  
Min Lin and Martin C. Hawley

Compressive Strength Models for Pultruded Fiber Reinforced Composites  
Ever Barbero and John Tomblin

Effect of Pultrusion Process Parameters on Flexural Strength  
E. Lackey and J.G. Vaughan

Resin Transfer Molding for High Fiber/Low Void Content  
Gray Fowler and Steve Phifer

Resin Transfer Molding with Powder-Coated Preforms  
K. Shields and J. Colton

Resin Transfer Molding Applications in the Kitplane Industry  
H. Michael Bonner and Darrin B. Teeter

Processing and Fabrication Technology

Fabrication of Composite Structures

Chairmen: Dr. George Springer, Stanford University  
Peter Hoffman, McDonnell Douglas Aerospace

Injection Molded Notar Fan Blade for Helicopter Dynamic Application  
Steve Chen and Ramesh Patel

Advanced Composites Tooling Materials Evaluation and Qualification  
Hsin-Nan Chou

Comparison of Processing Techniques for the Molding of Hollow Advanced Composite Parts  
David M. Lane, John J. Kutz, Steve D. DeRoos and Keith R. Alesse

SMC--A Cost Effective Alternative to Prepreg Technology  
Paula Allen and Bill Childs

New Trends in Nylon Bagging Films  
R.J. McCready
Michael D. Lundy

Technology Insertion: Applications

**Biomedical Composites and Polymer Applications**

Chairman: *Deva Devanathan, Zimmer Inc*

An Application of Composites in Fracture Fixation: Dynamization of the Fixator Frame - Fractured Bone Construct
A. Nazre and Kim Dueringer

Application of Polymers in Urology
F.A. Salama

Design of CFRP Lumbar/Thoracic Stackable Spine Fusion Cages
Carl R. McMillin and John W. Brantigan

Evaluation of PEKEKK Composites for Spine Implants
Carl R. McMillin

Process Optimization of Spectra Fiber Reinforced Polyethylene for Use in Total Knee Arthroplasty
Jack Jennings

Technology Insertion: Applications

**Advanced Materials and Structures Technology for Space**

Chairmen: *Dr. William Gaubatz, McDonnell Douglas Aerospace*

*Dr. Darryl Tenney, NASA Langley Research Center/Advanced Materials*

Conductive White Thermal Control Paint for Spacecraft
Cheng Hsieh, Ed Metzler, Gus Forsberg, Lisa McHugh, Tim O'Donnell and James Cordaro

Fabrication and Testing of an Hybrid Titanium-Composite Integral Filament Wound Solid Rocket Motor Case
V. Giavotto, C. Caprile, G. Sala, F. Depasquale, G. Ciavatta and M. Ciranna

Development of Carbon/Epoxy Composite Interface Adapter in LM-2E Launch Vehicle
Zhu Datong and Chen Zheng

Evaluation of Kapton Pyrolysis, Arc Tracking, and Flashover on SiOx-Coated Polyimide Insulated Samples of Flat Flexible Current Carriers for Space Station Freedom
Thomas J. Stueber and Chris Mundson

Low Earth Orbital Atomic Oxygen Environmental Simulation Facility for Space Materials Evaluation
Curtis R. Stidham, Thomas J. Stueber, Bruce A. Banks, Joyce A. Dever and Sharon K. Rutledge
Response of Selected High Performance Polymer Films to LEO Exposure 664
Philip R. Young, Anne K. St. Clair and Wayne S. Slemp

Space Station Freedom Solar Array Blanket Coverlay Atomic Oxygen Durability Testing Results 679
Sharon K. Rutledge and Raymond M. Olle

The Effects of Simulated Low Earth Orbit Environments on Spacecraft Thermal Control Coatings 694

Advanced Materials

Design and Analysis of Composite Structures I

Chairmen: Samuel Dastin, Grumman Aircraft Systems
Dr. Leslie Cohen, McDonnell Douglas Aerospace

Bending Analysis of Thick Cross-Ply Laminated Doubly-Curved Shells 707
Hung-Sying Jing and Kaun-Goang Tzeng

Theoretical Prediction of the Tensile Elastic Properties of Braided Composites 719
Christopher J. Redman and Craig D. Douglas

Elasticity Solution of Transverse Normal Stress in Laminated Anisotropic Cylindrical Panels 728
Hung-Sying Jing, Kuan-Goang Tzeng and Jing-Sying Young

Microstructure and Fracture Propagation in Short Carbon Fiber Reinforced Nylon 6 Composites 739
I.S. Bhardwaj

Effect of Misaligned Specimens on the Interlaminar Tensile Testing of 2D Carbon-Carbon with a Self-Aligned Test Fixture 750
Ajit K. Roy

The Influence of Specimen Volume on Matrix-Dominated Composite Strength 759
Allan S. Crasto and Ran Y. Kim

Advanced Materials

Adhesive Bonding and Surface Preparation Technology I

Chairmen: Jim Browne, Dexter Corporation/Aerospace Materials
Bill Pitt, Brigham Young University

Aerospace Adhesives in the '90's 771
Jim Browne

Evaluation of Low VOC Chromated and Nonchromated Primers for Adhesive Bonding 785
Ronald J. Kuhbander and James J. Mazza

Implementation of Boric Sulfuric Acid Anodize at Boeing Wichita—Replacement for Chromic Acid Anodize 796
Peter H. Wu
