Proceedings
Third Canadian/American
Conference on Hydrogeology

Hydrogeology of Sedimentary Basins: Application to
Exploration and Exploitation

Banff, Alberta, Canada
June 22-26, 1986

Edited by
Brian Hitchon, Stefan Bachu and Claude M. Sauveplane
Alberta Research Council
Edmonton, Alberta, Canada

Published by
National Water Well Association
Dublin, Ohio, U.S.A.
Table of Contents

Preface ................................................................................................................................. i

Section I
Petroleum and Mineral Exploration

Models of Subsurface Hydrology of Sedimentary Basins
J. Tóth ................................................................................................................................. 1
Fluid Movement in Deep Sedimentary Basins: A Review
J. S. Bradley ....................................................................................................................... 19
Hydrodynamic Framework of Some Sedimentary Basins
A. Chiarelli ......................................................................................................................... 32
Deep Water Discharge: Key to Hydrocarbon and Mineral Deposits
W. H. Roberts III ............................................................................................................... 42
Quantitative Models for Stratabound Ore Genesis in Sedimentary Basins
Grant Garven ..................................................................................................................... 69
Hydrogeology and Abnormal Pore Pressures in the Beaufort-Mackenzie Basin: Preliminary Results Along Two Cross Sections
Claude M. Sauveplane and Paul Mortensen ................................................................. 75
Preliminary Comparison of Photolineament Sets, Indicated Regional Subsurface Trends and Hydrogeological Effects of Four Oil Fields in Western Canada
J. D. Mollard ..................................................................................................................... 87
Subnormal and Abnormal Formation Pressures in Mature Sedimentary Basins and Their Importance to Hydrocarbon Exploration
Grant S. Ward .................................................................................................................... 102
Hydrogeological Phenomena as Indicators of Petroleum Deposits
D. Barson and J. Tóth ........................................................................................................ 103
Hydrogeological Controls and Indicators of the Pechelbronn Oil Deposits, Upper Rhinegraben: A Preliminary Synthesis
C. J. Otto and J. Tóth ......................................................................................................... 105
Exploration for Lenticular Reservoirs by Utilizing Potentiometric Surface Anomalies
K. Rakhit and J. Tóth ........................................................................................................ 107
Petroleum Hydrogeology: A Hydrogeological Approach to Petroleum Exploration and Basin Analysis
D. U. Ophori and J. Tóth .................................................................................................... 108

Section II
General Basin Studies

Integrated Hydrogeological Data Basis: Their Use and Misuse
Brian Hitchon, S. Bachu, A.T. Lytviak and C. M. Sauveplane ........................................ 115
Preliminary Analysis of Transport Processes in the Basal Cambrian Aquifer of South-Central Alberta
S. Bachu, Brian Hitchon and P. Mortensen ......................................................................... 118
Geothermal Regimes and Geothermal Resources of Sedimentary Basins
Alan M. Jessop .................................................................................................................. 127
Measuring the Thermal Conductivity and Heat Generation of Sedimentary Units
Trevor Lewis ...................................................................................................................... 140
Chlorine-36 Dating of Old Ground Water in Sedimentary Basins
Fred M. Phillips, Harold W. Bentley and David Elmore ................................................ 143
J. A. Majorowicz, F. W. Jones, M. E. Ertman, A. Linville and K. Osadetz ....................... 151
On the Use of Thermal Data to Resolve and Delineate Hydrologic Flow Systems in Sedimentary Basins: An Example from the Uinta Basin, Utah
Sean D. Willett and David S. Chapman ............................................................................ 159
Bulk Hydraulic Conductivities in Sedimentary Formations of the Alberta Basin
D. Emond and J. Tóth ................................................. 169

Paleohydrogeology of the Cretaceous Dakota Aquifer System in the Denver Basin:
A Computer Approach
D. Tait .............................................................. 170

Section III
Water-Rock Interaction

Origin and Evolution of Water and Solutes in Sedimentary Basins
Yousif K. Kharaka ..................................................... 173

Pradeep K. Aggarwal, Robert W. Hull, William D. Gunter and Yousif K. Kharaka .................. 196

F.J. Longstaffe ......................................................... 204

Modeling of Oxygen Isotopes in Formation Waters — Review of the Principles with Examples
Warren W. Dickinson ............................................... 221

Section IV
Deep Waste Disposal

Composition of Water in Waste Well Disposal from Oil Sands and Heavy Oil Field Pilots of Alberta
William D. Gunter, Bryan J. Fuhr and Bernice Young .................................................. 233

Case Studies of Deep Well Hazardous Waste Disposal — Gulf Coast, Great Lakes and California
Talib Syed, John S. Fryberger, Richard M. Tinlin and A. Roger Anzzolin ..................... 250

Considerations in the Development of a Proposed Monitoring and Testing Program to Assess the Impact of Subsurface Waste Injection

Fluid-Level Fluctuations in a 2200M Well Near Regina, Saskatchewan
G. van der Kamp, H. Maathuis, K. Hutchence and L.W. Vigrass .......................... 269

The Impact of Environmental Regulations on the Design, Construction and Operation of Selected Waste Disposal Wells in Louisiana, U.S.A.
John A. Fleniken and John W. Webb .............................................. 270

Discussion Sessions .......................................................... 271
Participants ............................................................ 275
