UTILIZATION OF HIGH STRENGTH CONCRETE
Proceedings
VOLUME 1
Symposium in Lillehammer, Norway
June 20 - 23, 1993
Edited by
Ivar Holland Erik Sellevold
CONTENTS

VOLUME 1

1. PLENARY SPEAKERS

Walraffen, J, The Netherlands
High-Strength Concrete: A Material for the Future 17

Hoff, G., USA
Utilization of High-Strength Concrete in North America 28

Ikada, S., Japan
Utilization of High-Strength Concrete in Japan 37

Collins, M.P., Canada
Research on High-Strength Concrete in Canada --

König, H. Bergner, H. Grimm, R. Simsch, G., Germany
Utilization of High-Strength Concrete in Europe 45

Shah, S.P., USA
Research on High-Performance Concrete at the Advanced Cement-Based Materials Center --

De Larrard, F., France
A Survey of Recent Researches Performed in the French "LPC" Network on High-Performance Concrete 57

Holand, I., Norway
High-Strength Concrete in Norway. Utilization and Research 68

2. DESIGN

Al-Hussaini, A., Regan, P.E., Xue, H-Y., Ramandane, K-E., United Kingdom
The Behavior of HSC Columns under Axial Load 83

Azizinamini, A., Kuska, S.B., USA
Flexural Capacity and Ductility of High-Strength Concrete Columns 91

Azizinamini, A., Russel, H.G., USA
Design Criteria for Tension Splices in High-Strength Concrete 99

Russel, H.G., Bruce R.N., Roller, J.J., Martin, B.T., USA
High-Strength Concrete for Highway Bridge Structures 107

Bruce, R.N., Tavera, E., USA
Behavior of High-Strength Concrete Piling under Driving Conditions 115
Chen, Z., Wang, Z., Zhao, Q., China
Use of High-Strength Concrete in Blast-Resistant Structures 120

Collins, M. P., Canada
Shear Design of High-Strength Concrete Structures 128

Cusson, D., Paultre, P., Canada
Experimental Study of High-Strength Concrete Columns
Confined by Rectangular Ties 136

Do, M.-T., Schaller, I., De Larrard, F., Altcin, P-C, France
Fatigue of Plain and Reinforced High-Performance Concrete 146

Fang, I.-K., Wang, C.S., Horn, K.-L., Yen, S.-T., Taiwan, China
High-Strength Concrete Short Beams for Seismic Regions 155

Mokhtarzadeh, A., Ahlborn, T., French, C., Leon, R., USA
Applications of High-Strength Concrete to Prestressed Industry 163

Gabrielsson, H., Sweden
High-Performance Concrete Beams Tested in Shear Comparison
between the Traditional Approach and the Modified Compression
Field Theory 169

Gupta, A., Rangan, B.V., Australia
High-Strength Concrete Structural Walls under Inplane Vertical
and Horizontal Load 177

Hansen, E.Aa., Tomaszewicz, A., Norway
Effect of Confinement on Ductility of Structural Members with
High-Strength Concrete 184

Hallgren, M., Kinnunen, S., Sweden
Punching Shear Tests on Circular High-Strength Concrete Slabs 192

Held, M., König, G., Simsch, G., Germany
Ductility of Large High-Strength Concrete Columns in
High Rise Buildings 200

Hellesland, J., Norway
Applicability of Normal Grade Slenderness Limits to
HSC and LWA Columns 209

Ithurralde, G.J.B., Olivier, J., France
High-Performance Concretes for French Nuclear Reactor
Containment Vessels 217

Jaccoud, J.-P., Charif, H., Farra, B., Switzerland
Cracking Behaviour of HSC Structures and Practical
Consequences for Design 225

Jakobsen, B., Gausel, E., Stemland, H., Tomaszewicz, A., Norway
Large Scale Test on Cell Wall Joints of a Concrete
Gravity Base Structure 233
Ductility of High-Strength Concrete at High Rate Loading 241

Kim, J.-K., Park, Y.-D., Lee, S.-G., Korea
Shear Strength of Reinforced High-Strength Concrete Beams 251

Kudzys, A., Kliukas, R., Vadluga, R., Lithuania
Utilization of High-Strength Spun Concrete and Reinforcing Steel in Compressive Structures 259

Remmel, G., König, G., Germany
The Tensile Behavior of High-Strength Concrete (HSC) and its Effect on the Shear Strength of Longitudinally Reinforced Concrete Members 269

Limsuwan, E., Thailand
Strengths of High-Strength Concrete Columns 277

Limsuwan, E., Thailand
Behavior of Post-Tensioned High-Strength Concrete Beams 285

Levi, F., Marro, O., Italy
Shear Tests on HSC Prestressed Beams - Proposals of New Interpretative Models 293

Miyauchi, Y., Higashibata, Y., Nishimura, Y., Minami, K., Japan
Design of Steel Reinforced Concrete Columns using High-Strength Concrete 306

Muguruma, H., Nishiyama, M., Watanabe, F., Japan
Stress-Strain Curve Model for Concrete with a Wide-Range of Compressive Strength 314

Nishiyama, M., Fukushima, I., Watanabe, F., Muguruma, H., Japan
Axial Loading Tests on High-Strength Concrete Prisms Confined by Ordinary and High-Strength Steel 322

Nykyri, P., Yli-Luukko, E., Finland
Tensile Strength of Concrete in Hollow Core Slab 330

Samman, T., Radain, T., Mesawa, A., Saudi Arabia
Torsion in High-Strength Plain Concrete Deep Beams 338

Sheikh, S.A., Canada
Deformability of High-Strength Concrete Columns 346

Shin, S.-W., Ahn, J.-M., Lee, K.-S., Ghosh, S.K., USA
The Investigation on the Behaviour of Beam Column Joints with High- and Low-Strength Concrete 354

The Fiber Pretensioned Concrete Bar; FPC-Bar 362
Sudo, E., Masuda, Y., Abe, M., Yasuda, M., Japan
Mechanical Properties of Confined High-Strength Concrete 369

Kimura H., Sugano, S., Nagashima, T., Ichikawa, A., Japan
Seismic Loading Tests of Reinforced Concrete Beams Using
High-Strength Concrete and High-Strength Steel Bars 377

Taerwe, L.R., Belgium
Partial Safety Factor for High-Strength Concrete under
Compression 385

Tomaszewicz, A., Norway
Punching Shear Capacity of Reinforced Concrete Slabs 393

Walter, E., Lichtenstein, Ammann, W., Switzerland
Effects of High-Strength Concrete on the Pull-Out
Behavior of Fastening Elements 402

Watanabe, F., Nishiyama, M., Muguruma, H., Japan
Strength and Ductility of High-Strength Concrete Beams
subjected to Combined Bending and Shear 412

Wollmann, G.P., Wernli, M., Switzerland
Detailing for Post-Tension in High-Strength Concrete 420

Zachar, J., Naik, T., USA
Analysis of the Flexural Interaction between
High-Strength Concrete and High-Strength Reinforcement 428

3. CONSTRUCTION, CASE RECORDS

Rui-Wamba, J., Aguado, A., Oliveira, M.O.F., Bellod, J.L., Spain
A Non-standard Structure on High-Strength Concrete 437

Ajdukiewicz, A., Kliszczewicz, A., Poland
Application of High-Strength Concrete in Composite
Skeletal Structures 449

Structural Rehabilitation using Shotcrete with Microsilica 457

Smith, J.L., Azizhi, A.M., USA
Utilization of High-Strength Concrete in North Carolina, USA 468

Azizinamini, A., Prakash, B.A., USA
Application of High-Strength Concrete in High Rise Buildings 474

Rønneberg, H., Eeg, I.R., Norway
Production of High-Strength Concrete - The Views of a
Readymix Concrete Company 482
Haug, A., Fjeld, S., Norway
A Floating Concrete Platform Hull made of Lightweight Aggregate Concrete 494

Hegger, J., Germany
High-Strength Concrete for a 186 m High Office Building in Frankfurt, Germany 504

Kompen, R., Norway
Low Water-Binder Ratio Concrete for Bridges: Experiences from Full Scale Construction 512

Laamanen, P-H., Norway
High-Strength LWA Concrete for Bridge Construction - the New Sundbru Bridge in Eidsvoll, Norway 517

Sindre, H., Larsen, O.G., Norway
The New Varodd Bridge, Norway: A large Concrete Bridge currently under Construction by the Balanced Cantilever Method 527

Malier, Y., de Larrard, F., France
French Bridges in High-Performance Concrete 534

Melby, K., Jordet, E.A., Hansvold, C., Norway
Long Span Bridges in Norway Constructed in High-Strength LWA-Concrete 545

Mirambell, E., Aguado, A., Spain, Calmon, J.K., Brasil
Heat of Hydration in High-Strength Concrete, Case Study 554

Moussard, M. M., Montens, S.J., France
Roize River Experimental Bridge 562

Papworth, F., Burnett, I., Australia
High Performance Silica Fume Concrete Application 570

Potter, R.J., Guirguis, S., Australia
High-Strength Concrete in Australia 581

Sandvik, M., Norway
Utilization of High-Strength LWA-Concrete in Norway 590

Dugat J., Leguet J.L., Vinches, M., France
The Amphitheatre of Ales School of Mines and experimental Building for High-Performance Concrete 599

Starr, P., Wainwright, D.A., United Kingdom
Design and Construction of a Concrete Floating Berth 607
