Preprints of
Proceedings of GWAI–92

Editor: Hans Jürgen Ohlbach

Contents

A Model Elimination Calculus with Built-in Theories
Peter Baumgartner 1

A New Sorted Logic
Christoph Weidenbach 12

An Explanatory Framework for Human Theorem Proving
Xiaorong Huang 24

Towards First-order Deduction Based on Shannon Graphs
Joachim Posegga and Bertram Ludäscher 35

Success and Failure of Expert Systems in Different Fields of Industrial Application
Reinhard Bachmann, Thomas Malsch and Susanne Ziegler 44

Viewing Knowledge Engineering as a Symbiosis of Modeling to Make Sense and Modeling to Implement Systems
Marc Linster 56

Cases as a Basis for Knowledge Acquisition in the Pre-formal Phases of Knowledge Engineering
Sonja Branskat and Marc Linster 66

Controlling Generate & Test in Any Time
Carl-Helmut Coulon, Frank van Harmelen, Werner Karbach and Angi Voß 76

Efficient Computation of Solutions for Contradictory Time Interval Networks
Achim Weigel and Rainer Bleisinger 88

Extensions of Concept Languages for a Mechanical Engineering Application
Franz Baader and Philipp Hanschke 101

Combining Terminological and Rule-based Reasoning for Abstraction Processes
Philipp Hanschke and Knut Hinkelmann 113

Forward Logic Evaluation: Compiling a Partially Evaluated Meta-interpreter into the WAM
Knut Hinkelmann 124

Concept Support as a Method for Programming Neural Networks with Symbolic Knowledge
Erich Prem, Markus Mackinger and Georg Dorffner 134
A Heuristic Inductive Generalization Method and its Application to VLSI-Design
Jürgen Herrmann and Renate Beckmann

Learning Plan Abstractions
Ralph Bergmann

On a Principal Limitation of Reinforcement Learning in Continuous Domains Using Backpropagation Nets
Alexander Linden and Frank Weber

An Intelligent Tutoring System for Classification Problem Solving
Karsten Poeck and Martin Tins

Knowledge-based Processing of Medical Language: A Language Engineering Approach
Martin Schröder

Test Planning in ITEX: A Hybrid Approach
Heike Kranzdorf and Ulrike Griefahn

Yes/No Questions with Negation: Towards Integrating Semantics and Pragmatics
Marion Schulz and Daniela Schmidt

An Efficient Decision Algorithm for Feature Logic
Esther König

Universally Quantified Queries in Languages with Order-sorted Logics
Stefan Decker and Christoph Lingenfelder

A Semantic View of Explanation
Justus Meier

Goal-driven Similarity Assessment
Dietmar Janetsko and Stefan Wess
