PROCEEDINGS OF
THE SECOND INTERNATIONAL
SYMPOSIUM ON REFRACTORIES
REFRACTORY RAW MATERIALS
AND HIGH PERFORMANCE
REFRACTORY PRODUCTS

EDITED BY
Zhong Xiangchong
Lu Jiaquan
Yan Xingjian
Li Maoqiang

ORGANIZED BY
The Chinese Silicate Society
The Chinese Society for Metals
CONTENTS

Preface ................................................................. v

OPENING LECTURE

Developing High Performance Refractories Based on Chinese Raw Materials .................. 3
Zhong Xiangchong
Chinese Ceramic Society, China

INVITED LECTURES

Twenty First Century Refractories, Dynamic “High–Techo” Composites ....................... 15
Richard C. Bradt
Mackay School of Mines, University of Nevada–Reno, USA

Recent Progress and Future Trend of Carbon Bearing Refractories in Japan ............... 22
Katsuhiro Tabata
Shinagawa Refractories Co., Ltd., Japan

High Quality Refractory Materials and Systems for the Clean Steel Technology .......... 34
F. Schruff
Didier Asia Pacific Pte Ltd., Singapore;
M. Oberbach, U. Muschner and W. Parbel
Didier Werke Ag, Refractories, Germany

The Titanium Oxide Content Reduction of a 72% Alumina Clinker and Its Effects .......... 54
on Mineralogical Characteristics
Luis R.M. Bittencourt, Harold Nogueira and Amilcar G. Morato
Magnesita S.A., Brazil

Understanding Bayer–Processed Ground Special Calcined Aluminas ....................... 64
George MacZura, Kenneth J. Moody and Edward M. Anderson
Aluminium Company of America, USA;
Barbara Kruft and Gangolf W. Kriechbaum
Alcoa Industrial Chemicals Europe, Germany

vii
Overview of Refractory Technologies in the Nineties in Japan

Naoyuki Nameishi, Bin Nagai and Tatso Matsumura
Harima Ceramic Co., Ltd., Japan

Influence of Aluminosilicate Additives on the Thermo-mechanical Properties of Corundum Based Ultra-Low-Cement-Castables with Amorphous Silica and Reactive Alumina

S.-J. Lee and W. Kronert
RWTH Aachen, Germany

Advancement of Refractories Technology — To the Present and Future

Charles E. Semler
Semler Materials Services, USA

Periclase-Spinel Refractories Based on Brucites

V.I. Shubin and V.I. Nikonorov
NII Cement, Russia

Steelplant Refractories — Tendency in Production, Consumption, Ladle Lining

Manfred Koltermann
Hoesch Stahl AG, Germany

Worldwide Resourcing of Refractory Raw Materials in the 90's

Lawrence R. Lebauer
Cometals, Inc., USA

New Frontiers in Kiln Technology for Ceramic and Refractory Industry

A.N. Pick and A. Smith
NiBek Ltd., UK

Silicon Carbide and Nitride from Lignin of Rice Husk

A.S. Vlasov and A.I. Zaharov
Moscow Mendeleyev Institute of Chemical Technology, Russia

New Development of Refractories for Cement Kilns

Lu Chunxuan
China Building Materials Academy, China
REFRACTORY RAW MATERIALS

The Characteristics and Processing Technique of Yangquan Bauxite. 175
Li Hongxun and Yang Jianying
Yangquan Bauxite Mine, China

The Main Features of Chinese Ball–Clays 181
Liu Changling
Tianjin Geological Academy MMI, China

Studies on Application of Chinese–Made Fused Magnesia to the Basic Refractories 186
Takao Sugino, Kouhei Yasui, Yoshihiro Yasuda, et al.
Toshiba Ceramics Co., Ltd., Japan

Study on Production Technology of Refractory Magnesia from Brine 198
Zhai Fujiang and Miao Pu
Luoyang Institute of Refractories Research, China

Dead Sea Periclase — Process, Product and Properties 208
Moshe Zahavi and Arich Tabic
Dead Sea Periclase Ltd., Israel

Giant Periclase Grain — Its Preparation and Properties 209
Yao Dianyi
Yingkou Electricfused Magnesia Factory, China;
Ren Dehe, Zhang Yongbin, Cheng Zhaokan, et al.
China Building Materials Academy, China

Investigation on Magnesia–Alumina Spinel Synthesized from Natural Raw Materials 215
Wang Jinxiang, Zhu Yuqi and Zhang Lihua
Luoyang Institute of Refractories Research, China

A Study on Synthetic Magnesium Aluminate Spinel from Bauxite–Magnesite and Its. 226
Application
Wuhan Iron and Steel University, China

Spinelle Synthesized with High–Purity Magnesites as Raw Materials 233
Gao Xinkui
China Liaoning Magnesite Refractories Co., China
Study on the Microstructure and Crystallization Behaviour of Synthetic Cordierite .......................... 241
Guo Haizhu and Yao Qingrong
China Building Materials Academy, China

Synthesis of B–Sialon from Acid Treated Kaolin ................................................................. 249
K.H. Lee
Research Institute of Korea Special Refractories Ltd., Korea;
M.H. Hong
Woo Yang Industries Co., Ltd., Korea;
C.G. Lee and D. Han
Research Institute of Industrial Science and Technology, Korea;
C.S. Mun and B.S. Jun
Kyungnam University, Korea

Synthesis of Ceramic Raw Materials Using Thermite Ignition: Sialon Formation ....................... 256
B.S. Jun
Kyungnam University, Korea;
O.Y. Lee and W.D. Jung
Research Institute of Changwon Refractory Co., Ltd., Korea;
J.H. Park
Yonsei University, Korea

REFRACTORIES FOR THE METALLURGICAL INDUSTRY

The Development and Application of Silicon Carbide Refractories in China’s Zinc Smelting Industry
Li Zhijian and Zhang Huiyi
Huludao Zinc Smelting Plant, China;
Liang Hongxiang and Chen Caiqing
Jinzhou Institute for Silicon Carbide Application, China

Application of Direct–Bonding Magnesite Chrome Brick in Copper Converter .......................... 273
Xu Xueying and Li Yong
Luoyang Refractory Factory, China

Mullite–Corundum Refractory with Special Shape and High Resistance to Creep ......................... 279
and Thermal Shock
Li Nan, Wang Xitang and Ke Changming
Wuhan Iron and Steel University, China;
Guan Hua, Zhang Xinggao and Wu Guangyao
Refractory Works, Xiangtan Iron and Steel Company, China
Influence of Fluxes in Refractories for Hot Metal Pretreatment ........................................ 285
K. Ichikawa, T. Fujwara and S. Taniguchi
Shinagawa Refractories Co., Ltd., Japan

Application and Investigation of the High-Magnesia Clinker Cold-Laid Bottom ............... 293
of Open-Hearth Furnace
Li Chunmin, Mou Weiguo and Xu Muru
Anshan Iron and Steel Complex, China

Bottom Blowing for EAF(EF-KGC Process) ................................................................. 301
M. Usuzaka, N. Mimura, T. Mizoguchi and Y. Nagao
Kawasaki Refractories Co., Ltd., Japan

Damage Mechanism of High Pressure Gas-Permeable Elements (HPE) Used .................. 309
for Converter Combined Blowing
Zhu Dezhi, Xu Shengxi, Meng Xiangping and Li Lin
Central Iron & Steel Research Institute, Ministry of Metallurgical Industry, China

Improvement of MgO-C Refractories in Turkey .......................................................... 316
R. Hakkl Özsahin
Konya Krom Magnezit, Turkey

The Recent Development of Refractories for Continuous Casting in WISCO ................ 317
Zhao Yingjie, Yang Xiwen and Dai Xiaoguang
Wuhan Iron and Steel Company, China

The Application of Boron Nitride-Based Composite Materials and Their Additives ........ 326
Hu Lihua
Shanghai No.2 Refractory Manufactory, China

Development of Castable for Teeming Ladle in Japan ................................................. 334
K. Furuta, I. Furusato and I. Takita
Krosaki Corporation, Japan

The Use of Al₂O₃-MgO-C Bricks for 300 Ton Steel Ladle ........................................... 349
Wang Xizhang and Li Yongquan
Baoshan Steel Works, China;
Li Qinhui, Zhang Yuemin and Lin Yulian
Luoyang Institute of Refractories, China
Latest Application of Magnesia Carbon Bricks in Secondary Steel Making .......................... 356
Ravin Jhunjhunwala, M.M. Sahu and P.C. Padhi
Orissa Industries Ltd., India

Roller of Stainless Steel Fibre Reinforced Castable ....................................................... 376
Central Research Institute of Building and Construction
of Ministry of Metallurgical Industry, China

Properties and Applications of Stainless Steel Fiber Reinforced Refractory Castables ........ 383
Liu Genrong and Zhao Hongliang
China Building Materials Academy, China

Monolithic Refractory Based on Chinese Raw Materials and Its Applications .................. 391
Yang Yuanfeng and Cao Hongchen
Shanghai Refractories Plant, China

RéFRACTORIES FOR THE CEMENT, GLASS, PORCELAIN
AND OTHER INDUSTRIES

The Preparation of Recrystallized SiC Refractory as Kiln Furniture Material .................. 401
Yu Fenghua, Li Jianhui and Yan Hong
China Building Materials Academy, China

Silicon Nitride / Sialon Bonded Silicon Carbide Refractories for Kiln Furniture ............. 407
Zhang Zhiping, Huang Huihuang, Huang Zhaohui, et al.
Luoyang Institute of Refractories Research, China

Reduction of Cement Kiln Preheater Plugging by the Use of Silicon–Carbide ................... 416
Containing Castables and Pre–cast Blocks
Toru Honda, Fumikazu Tanemura, Hisao Kozuka, et al.
Mino Yogyo Co., Ltd., Japan

Magnesia Spinel Bricks for the Cement Industry ......................................................... 424
W. Tabbert and H.–J. Klischat
Refratechnik GmbH, Germany

A Study on the Relationship Between Mineral Compositions of Clinkers and Early ... 431
Strength of High Alumina Cement
Cheng Li'an and Wu Hongpeng
China Building Materials Academy, China
Application of Isostatically Pressed AZS ........................................... 437
E. Goerenz, C. Metzger and P. Frolow
VGT–DYKO Industrikeramik Vertriebs GmbH, Germany

Hot End Tin Bath Blocks ................................................................. 445
C. Metzger and H. Petschauger
VGT, Industrikeramik GMBH, Germany

Development and Production of Super Heat Duty Silica Bricks for Crown of Glass .......... 467
Melting Furnaces
B.K. Chaudhurl and J.P. Sengupta
Orissa Cement Limited, India;
J.D. Panda and N. Sahoo
Dalmia Institute of Scientific & Industrial Research, India

Mullite–Chrome & Chrome–Mullite Refractories ................................... 474
A.M. Pozdnyak
Eastern Institute of Refractories, Russia

Furnace Accessories from Structural Ceramics .................................... 475
N.M. Permikina and S.N. Makhonina
Eastern Inst. of Refractories, Russia

FUNDAMENTAL STUDIES ON REFRACTORY MATERIALS

Sintering Kinetics Study of Zirconia Powder Compacts — Analysis of a Flow Model ........ 479
P. Das and R. Choudhury
Research & Development Centre for Iron & Steel, IISCO Sub-Centre, India

Microstructures of Corroded Refractories Used in Glass–Melting Tank .................... 480
Ma Litai, Yu Ling, Jiang Lingzhang, et al.
Shanghai Institute of Ceramics, China

A Study on the Residual Block of Electric Arc Melting Furnace for AZS Refractories. .... 485
Huang Yuanlin and Qiu Biyun
The Glass & Enamel Research Institute, Ministry of Light Industry, China;
Chen Xianqiu
Shanghai Institute of Ceramics, China

Investigations in the CaO–Al₂O₃–ZrO₂ Phase Diagram ................................ 494
P. Bartha, K.H. Nitsch, D. Fuchser and W. Tabbert
Refratechnik GmbH, Germany

— xiii —
A Study on the Mechanism of Segregation of Fusion Cast AZS Refractories
Qiu Blyun, Huang Yuanlin and Bao Zhuowu
The Glass & Enamel Research Institute, Ministry of Light Industry, China

Effect of Oxidation State on Glass Exudation of Alumina-Zirconia-Silica
Sheng Jianxin and Wang Cun
China Building Materials Academy, China

A Study of the Reaction-Sintering Process of Zirconia-Corundum-Mullite Materials
Zhong Xiangchong, Sun Gengcheng, Huang Wensheng, et al.
Luoyang Institute of Refractories Research, China

High Temperature Properties of Zirconia-Corundum-Mullite-Silicon Carbide
Composites
Li Tingshou and Zhong Xiangchong
University of Science and Technology Beijing, China

The Corrosion Resistance of Zircon-Chromium Sesquioxide Composite Refractories
to Molten Glass
Li Maoqing, Zhang Shuying, Tang Nanhua, et al.
China Building Materials Academy, China

Influence of Various Oxidic and Nonoxidic Microfillers on the Thermomechanical Properties of Corundum Based Low-Cement-Castables
S.-J. Lee and W. Kroenert
RWTH Aachen, Germany

Phase Compositions and Setting Mechanisms of Low Cement, Ultra-Low Cement and Cement-Free Castables
Li Zaigeng, He Jinzhou and Ye Guotian
Luoyang Institute of Refractories Research, China

C$_{12}$A$_7$ The Non-existant Phase in High Purity Calcium Aluminate Cements
M.D. Cook
Refractory Materials, Inc., USA;
W. Cornell
University of Tulsa, USA
Influence of Aluminum Addition on Spinel Formation in Alumina–Magnesia–Carbon ........................................ 551

Toshiyuki Hokii and Akihiro Tsuchinari
Harima Ceramic Co., Ltd., Japan;
Seiji Hanagiri and Shigeru Fujihara
Nippon Steel Corporation, Japan

A Study on the Mechanism of Sintering of Dolomite ............................................................... 558
Li Maoqiang, Zeng Lingfang, Lu Chunxuan, et al.
China Building Materials Academy, China

The Studies on Structures and Properties of Pitch and Resin-Based Carbons. ......................... 565
Li Nan and Zhu Boquan
Wuhan Iron and Steel University, China

Effect of Particle Composition of Magnesite on Fracture Properties of MgO–C Brick ............. 572
Wang Runze and Liu Yanling
Luoyang Institute of Refractories Research, China

Reaction Kinetics in the MgO–C Refractory Materials at High Temperature .......................... 580
Under Vacuum
Jiang Mingxue
Xi'an Institute of Metallurgy and Construction Engineering, China;
Chen Zhaoyou and Zhong Xiangchong
Luoyang Institute of Refractories Research, China

Application of Positron Annihilation Technique to the Study of Magnesian .......................... 586
Refractory Materials of High Purity
Zhu Xiuying, Sun Qinying, Gu Huazhi, et al.
Wuhan Iron and Steel University, China;
Zou Liujuan
Huazhong University of Science and Technology, China;
Zhang Caiguo
Huber Polytechnic University, China

Sintering and Recrystallization of Ceramic in the System AL₂O₃-Ta₂O₅ ........................................ 593
M.N. Kaibicheva
S.M. Kirov Urals Polytechnic Institute, Russia

Mineralogical–Petrographic Bases of Refractory Formation .................................................... 599
V.A. Perepelitsin
Eastern Institute of Refractories, Russia
Nondestructive Control as a Means of Improving the Quality of Refractory Products
Yu.M. Rapoport and V.G. Sloousch
St. Petersburg Institute of Refractories, Russia

Power Structural Criteria of Refractory Wear Resistance
V.A. Perepelitsyn
Eastern Inst. of Refractories, Russia

EQUIPMENTS FOR THE REFRACTORY INDUSTRY

Status and Future Trends of Mixing Technics for the Production of Refractory Materials
Hans B. Ries
Maschinenfabrik Gustav Eirich, Germany

Pressing of High Quality Refractory Brick Using a Mechanical Toggle Press
Michael T. Gerardi
Chisholm, Boyd & White Company, USA

Innovative Design of Hydraulic Presses for the Refractory Industry
Uwe Herbst
Laeis Bucher GmbH, Germany

On Development of Drying Plant Control System
V. Voznesensky
St. Petersburg Institute of Refractories, Russia

Latest State of Art in the Design of High Temperature Tunnel Kilns
Jürgen Mendheim
Georg Mendheim GmbH, Germany

New Firing Tech for Alumina–Graphite Nozzle in Mazout–Fired Tunnel Kiln
Anshan Coking and Refractory Engineering Consulting Corporation, China
The Evolution in Industrial Furnace Lining Designs Employing Refractory Ceramic

Fibers

G.K. Steinbach and S.E. Chernack
Thermal Ceramics, USA;
Y.C. Sung
Karahm Company Ltd., Korea

APPENDIX
