Proceedings of the
Fourth EUROGRAPHICS Workshop on Rendering

Paris, France. June 14-16, 1993

Edited by
Michael Cohen, Claude Puech and François Sillion
Contents

Monday, 14 June 1993

10:00-11:00: Sampling  
Chair: Claude Puech  
Dynamic Stratification .................................................. 5  
Andrew Glassner  
Progressive Ray Refinement for Monte Carlo Radiosity .......... 15  
Martin Feda, Werner Purgathofer

11:30-12h30 Invited speaker  
Realism in real-time ? .................................................. 27  
Erik Jansen

14.00-15:30 Reflection Models  
Chair: Kadi Bouatouch  
Making Shaders More Physically Plausible ......................... 47  
Robert Lewis  
Illumination of Dense Foliage Models .............................. 63  
Christopher Patmore  
A Customizable Reflectance Model for Everyday Rendering .......... 73  
Christophe Schlick

16:00-17:30 Hierarchical and Adjoint Radiosity Formulations  
Chair: Philipp Slusallek  
Importance and Discrete Three Point Transport .................. 85  
Larry Aupperle, Pat Hanrahan  
A Continuous Adjoint Formulation for Radiance Transport ....... 95  
Per Christensen, David Salesin, Tony DeRose  
Wavelet Projections for Radiosity .................................. 105  
Peter Schröder, Steven Gortler, Michael Cohen, Pat Hanrahan

Tuesday, 15 June 1993

09.00-10:00 Visibility and Viewpoints  
Chair: David Salesin  
Continuous Algorithms for Visibility: The Space Searching Approach .................................................. 115  
Jenny Zhao, David Dobkin  
Invited paper: Viewpoint Analysis of Drawings and Paintings Rendered Using Multiple Viewpoints: Cases Containing Rectangular Objects ........................................ 127  
Yoshihisa Shinagawa, Saeko Miyoshi, Toshiyasu Kunii

</table>
| 10.30-11:30  | Filtering and Antialiasing | Chair: Erik Jansen  
Constant-Time Filtering by Singular Value Decomposition             | Craig Gotsman                               |
|              |                          | Measuring the Quality of Antialiased Line Drawing Algorithms          | Terence Lindgren, John Weber               |
| 11:30-12:30  | Invited speaker          | "How to solve it?"                                                   | Pat Hanrahan                                |
| 14:00-15:30  | Form Factors             | Chair: Xavier Pueyo  
Numerical Integration for Radiosity in the presence of Singularities | Peter Schröder                              |
|              |                          | Optimal Hemicube Sampling                                             | Nelson Max, Roy Troutman                   |
|              |                          | Fast Calculation of Accurate Form Factors                            | Georg Pietrek                               |
| 16:00-17:30  | Grouping Interactions    | Chair: Alain Fournier  
Grouping of Patches in Progressive Radiosity                          | Arjan Kok                                  |
|              |                          | Blockwise Refinement – A New Method for Solving the Radiosity Problem | Günther Greiner, Wolfgang Heidrich, Philipp Slusallek |
|              |                          | Analysis and Acceleration of Progressive Refinement Radiosity Method  | Min-Zhi Shao, Norman Badler                |
| Wednesday, 16 June 1993 | Texturing and Lines   | Chair: Michael Cohen  
Texture Mapping as a fundamental Drawing Primitive                     | Paul Haeberti, Mark Segal                  |
| 09.00-10:00  |                          | A Methodology for Description of Texturing Methods                    | Pascal Guitton, Christophe Schlick         |
10.30-11:30 Visualization
Chair: Georgios Sakas
Visualization of Mixed Scenes based on Volumes and Surfaces ........................................... 281
Dani Tost, Anna Puig, Isabel Navazo
Physically Realistic Volume Visualization for Interactive Image Analysis ....................................... 295
H.T.M. Van der Voort, H.J. Noordmans, J.M. Messerli, A.W.M. Smeulders

11:30-12:30 Special session
Computer Graphics Research in Eastern Europe ................. 307
Alan Chalmers, László Neumann

14.00-15.30 Meshing and Reconstruction
Chair: Alan Chalmers
Reconstruction of Illumination functions using Hermite Bicubic Interpolation .................................. 317
Rui Manuel Bastos, António Augusto de Sousa, Fernando Nunes Ferreira
Mesh Redistribution in Radiosity .................................. 327
Miguel P.N. Águas, Stefan Müller
Accurate Rendering of Curved Shadows and Interreflections ....... 337
G.R. Jones, C.G. Christou, B.G. Cumming, A.J. Parker
