Table of contents

Foreword ix
Organization of the symposium xi

1 Surface mining equipment, methods and systems

New technology and economies of scale in shovel-truck sizing
T.W. Sullivan 3

UK open cast mining equipment in the 1980’s
J.N. Adams 7

The development of continuous surface mining technology for hard materials
Rolf Sagner 13

Increasing profitability by adapting off-highway truck bodies to accommodate specific material densities
LeRoy G. Hagenbuch 25

Surface mining system design using intelligent computer techniques
D. Schofield & R. Denby 37

Technology of the North Bohemian Brown Coal Mining District open-pit mines, Czechoslovakia
Josef Kalář 47

Random functioning continuous mining system output
Vladimir I. Pavlović 61

Product improvements on large hydraulic excavators for more efficiency
Bernd M. Christoph 67

Some recent thinking in field of equipment maintenance in mines
Sven Granholm & Uday Kumar 73

Mine maintenance
H.N. Karmakar & L.K. Mishra 79

The price of ‘DURT’: What fugitive materials cost conveyors and how improved systems can save money
Richard P (Dick) Stahura 89
Rational selection of conveyor belt

M. Hardygôra

Turning resistance of large conveyor rollers

T.S. Golosinski & W. Cholewa

Planning features of second lignite mine at Neyveli and its development

M. S. Mani, P. V. Ayyasamy & R. Deivam

Bucket wheel excavator design for mining in difficult conditions

Ricardo Lain Huerta & Pedro Ramirez Oyanguren

Preliminary dragline selection for surface coal mining operations

Matthew J. Hrebar

Applications of Markov chain models to mining operations

Jean-Luc Collins, Raj K. Singhal & Kostas Fytas

Blast optimization through performance monitoring of drills and shovels

J. Peck, C. Hendricks & M. Scoble

Mathematical formulae to design buckets in bucket wheel excavators

Ricardo Lain Huerta & Pedro Ramirez Oyanguren

A computer model for dragline selection in opencast mine planning

D. K. Sharma & R. P. Singh

Instrumentation on blasthole drills produces significant economic benefits

John F. Vynne

Development of Titan T-2240 rear dump truck

John H. House

On availability of a piece of equipment

J. M. Czaplicki

Improvement of the belt conveyor shifting and extension operations using the critical path method

Neş'e Çelebi, Celal Karpuz & Dincer Kara

The development of Cross-Pit-systems

Hans-Joachim Thiel

Pre-crushing sieving system: A concept to improve economics of crushing

B. B. Dhar & H. J. Shivaram

The first principle of real-time dispatching for railway systems in surface mining

Wang Lianyin, Luo Zhongzhou & Li Jinsong

A simulation model for optimizing loader-hauler-regulator-conveyor systems in mining

Z. Li

Using CAD to achieve mining schedule

Jin Xing
2. Geotechnical engineering

The Island Copper south wall pushback project
R. B. Findlay, R. B. Robertson & K. P. O’Kane 257

Monitoring the stability of cut slopes
S. Sakurai 269

Slope stability prediction and monitoring techniques in surface mining
K. Kuntsche 275

An overview of haulroads at Syncrude Canada Limited
Leroy W. Van Wieren & Helene M. Anderson 283

Modelling variable slopes for dynamic programming pit design algorithms
E. Alaphia Wright 291

Geotechnical risk assessment using expert systems for surface coal mine design
M. S. Kizil & B. Denby 295

Assessment of open pit excavators diggability
G. N. Panagiotou 305

Rippability assessment in surface coal mining
Celal Karpuz, A. Günhan Paşamehmetoğlu, Taylan Bozdağ & Yadigar Müftüoğlu 315

Ground characterization for assessment of ease of excavation
J. Hadjigeorgiou & M. J. Scoble 323

Effect of mobile equipment operation on dump point stability
James P. May 333

The back analysis of rock slope failures in UK surface coal mining practice
D. Stead 343

Overview of research on the management of mining wastes
Randall E. Connolly 353

Impact of Upper McMurray Formation Marine Oil Sands on dragline mining at the Syncrude Canada Limited open pit mine
Gordon T. McKenna & Beat R. List 363

Drag bit cutting: A conception of rock deformation processes that correspond to observed force-distance plots
Hilary I. Inyang 373

The use of horizontal drain holes for slope stability control
G. C. Singer 379

Spoil pile stability in the Canadian prairie coal mining region
D. W. Horsfield, P. F. Stacey & A. W. Stokes 385

Computer simulation of slope stability analysis and stabilization design of cable bolting
D. Feng 393
A numerical method for analyzing the time dependent behavior of groundwater in surface coal mine spoil
D.M.Surana & L.B.Phelps

Mining implications of footwall movement at the Westar Greenhills operation
P.F.Stacey, B.Bjornson & D.Parsons

Winter construction of mine earthworks
Wayne Hurley & Michael Fabius

Design of a tailings disposal facility for the Samatosum Mine, British Columbia
P.M.Hawley & A.F.Stewart

Design of crusher house on hilly slope and associated geotechnical problems
B.D.Baliga, B.Singh, M.Abbas & V.K.Singh

Optimization of waste haulage with linear programming
B.Saul

Minesite manufacturing of slurry explosives
Robert C.Paddock

Explosives and explosives loading equipment selection
D.K.Joyce & T.C.Matts

Cast blasting at Teck Corporation's Bullmoose Mine
R.E.Hallbauer

A coupled expert system approach to optimal blast design
Martin L.Smith & Robert L.Hautala

Rock drillability comparison by different methods
S.P.Singh

Application results of a new type non-resharpening tungsten carbide button bit for light duty rock drifter
Xue Qingpeng, Gong Xiujun & Wang Dezhi

Optimization calculations in the context of back-analysis of slope failures
S.Zhang & R.N.Chowdhury

3 Late papers

Structural design codes for mining equipment
R.A.Herringe, B.L.Manser & K.J.Wills

Simulation of settling and consolidation process for the assessment of tailing impoundments stability
R.Ciccu, P.P.Manca, G.Massacci & G.Pisanu
