2. **Innovative mining systems: Solid fuel minerals; coal, etc.**

Innovations and improvements in production systems in the Fe mine, 1975-1992 (Salamanca, Spain)

*J.-I. Artieda González Granda, M. Criado Martín & J.-M. Rios Mitchell*

- Novel developments in mechanization and automation in German coalmining
  *J. Czwalinna*

- Effect of support setting time on productivity of continuous miner operations
  *R. D. Lama & A. Misra*

- Innovative technologies in surface mining
  *R. Singhal, K. Fytas & J.-L. Collins*

- Three new system components concerning mining machinery and mining technique
  *K. Spies*

3. **Mechanization and automation of drilling operations**

- Mechanized and automatic devices in drill rigs for long blast holes
  *R. Almquist & H. Hamrin*

- The performance analysis of large diameter blast hole rotary drills in Turkish Coal Enterprises
  *N. Bilgin, S. Eskikaya & T. Dinger*

- Mechanization of drilling in mining applications
  *Z. Fisher*

- Precision drilling extends the range of long hole blasting
  *H. Hamrin*

- Automated drilling of surface blast holes using computer control
  *M. L. Hopkins & S. D. Duggan*

- Development of a production drilling machine
  *T. Stenström*

- Hole deviation study through a theoretical model of drill string deflection
  *X. Tan & T. Sinkala*

- Evolution of automation in raiseboring systems
  *B. Todd, T. M. Tower & T. H. Wake*

- Automation of hard rock drilling machines
  *A. Tuunanen*

- The economy of underground mechanized rock bolting
  *C. Ulvefeldt & B. Forsman*

- The implementation of the impact interface in the simulation of percussive tools
  *Wu Changming*
4 Mechanized rock fragmentation

TBM performance analysis and rock mass impacts
Y.Abd Al-Jalil, P.P. Nelson & C. Laughton

Examination of winning processes and development of cutting elements of novel type
E. Debreczeni, E. Deák, G. Ladányi & I. Sümegi

Robotics for the control of boom-type tunnelling machines for soft- and hard-rock application
J.B. Edwards, R.J. Hollands, S. Yaacob & S.M. Hargrave

Robotic modelling and control of a roadheader boom
J.L. Fuentes-Cantillana, A. Rodríguez, C. Fernández & J.J. Sánchez

Computer aided tunneling
T. Hollenberg & K. Weibezaehn

The results of high pressure jets used in rock cutting and in assisted rock cutting
N. Iliaș, A. Magyari, S. Radu & M. Achim

TBM for mine development
H. Janzon

Rock impact hardness index for predicting cuttability of roadheader
K. Matsui & H. Shimada

Measurement of tool force and twist exerted on TBM disc cutters
K. Sato, F. Gong & K. Itakura

Current status of Bureau of Mines research on non-explosive fragmentation
R. L. Schmidt

Prospective applications of pick cutting machines in aggressive rocks: Feasibility of activated cutting tools
H. Sellami

Tarp's contribution to hard rock mining
D.E. Westfall, L.S. Sakamoto & B.B. Goyal

Field trials of the Mobile Miner MM 130 at Broken Hill
R.A. Willoughby

5 Material handling and data communication

Steep gradient conveyors utilising conventional belting
F. Alvarez

Rocmec® – A new system for mechanized charging underground
B. Engsbråten

Design of a simulator for productivity analysis of electric mining shovels
C. Hendricks, L. Daneshmand, S. Wu & M. Scoble

Winding systems
N. Kwakwa
Informative ore pass management in a modern Japanese limestone quarry
G. Mogi, J. Yamatomi & U. Yamaguchi

Electric ramp haulage systems for underground mining, experiences
B. L. Norell

Potential implementation of armoured flexible conveyors in inclined room-and-pillar mining
J. Paraszczyk, S. Planeta & C. Hughes

Modelling of transport system for an underground mine
L. A. Puchkov, V. I. Belopushkin & V. M. Shek

Automation in explosive charge distribution – An Indian coal scenario
M. S. Sandhu

6 Machine automation and control

Automated control device for monitoring electric power supply of a mining enterprise load
node
B. N. Abramovich, V. P. Gansky, D. N. Nurbosynov, P. M. Camenev, S. B. Necrasov
& V. B. Prokhorova

Interaction of coal face control systems
B. Kehase & M. Waller

The Opti-Trak system, a system for automating today’s LHD’s and trucks
D. G. Brophy & D. W. Euler

Robotisability of operations in hard rock mining
J. Elbrond, R. Matikainen & J. Pathak

Force analysis in the scooping/loading operation of an LHD loader
A. Hemami

Off-highway truck unmanned navigating systems
A. Hori, S. Nakamura, T. Okuda & S. Hirose

State of the art on human and obstacle detection for automated underground mine vehicles
R. Hurteau, J. Côté & A. Hemami

Development and field experience with a waveconductor-less radio system for mining and
tunneling
H. -J. Kartenberg

Innovation of process control room technology within Ruhrkohle AG under consideration of
international standards
W. Künsler

Controlling the wheel excavator position in the stopee room in case of belt conveyance
transportation
I. Lalov

The Panorama project approach, its results and relevance to mining applications
P. Lemarquand
An approach towards full automation in longwall mining by further improvement in the mechanisation system  
S.N. Maity, S.K. Sarkar & Bharat B. Dhar

The essential principles of the management of electric power consumption distribution at mining enterprises  
G.G. Pivnyak

Concept of an autonomous system for piled ore shoveling  
S. Sarata

Technology development for remote, computer-assisted operation of a continuous mining machine  
G.H. Schnakenberg, Jr

Optimal control of nonlinear processes  
V. Strakos & A. Vitecek

Digital control of electric drives of mining machines  
L. Szklarski & A. Skalny

Dynamic real-time control of coal flow on longwall faces  
L. Wade & J. M. A. Dandachi

KT1 optical fibre television, telephone and data transmission system for mines  
Wu Chongqing

7 Computer applications

Coal/noncoal interface detection using learning networks  
K. Birmiwal & H. Sevim

The development of assignment procedures for truck dispatching  
E. Bonates

Recent developments on the use of computer vision as a face mapping tool  

Image analysis of ore flow and implications for sublevel caving design and ore flow control during loading  
S. L. Gustafsson & S. P. Gustafsson

The use of image analysis and fractal dimensioning as an aid to particle characterisation for the mining industry  
D. J. Hancock & M. J. Richards

A simple real time production monitoring concept for an automatic electrically driven LHD  
P. J. A. Lever & N. Vagenas

Object Oriented simulation in mine transportation design  
W. Mutagwaba & S. Durucan

Optimizing the shovel-truck operation using simulation and queueing models  
G. N. Panagiotou
Complementing the trend in automated mining systems  
*L.E.Plansky, C.E.Glass, O.Wiersholm & K.A.Prishbrey*

Open pit planning on the basis of computer graphics and local modeling of ore quality  
*B.R.Rakishev & M.B.Sadykov*

Imitating modelling of interaction between mining machines  
*O.V.Tailakov, V.Konyukh, A.V.Lavrov & M.I.Chernov*

Fuzzy systems & neural networks: Two emerging technologies for mine industry  
*G.Z.Wang & M.C.Rockwell*

An attempt of hoisting capacity calculation for the Integrated Transport System of Continuous Operation  
*J.M.Czaplicki*

8 Human factors and safety, miscellaneous

Mine ventilation control at Boliden Mineral AB  
*P.-O.Andersson, W.Rönnblom & L.Söderberg*

Coal mining in Brazil: Working conditions and state of art  
*D.Barreiros, W.T.Hennies, S.Médici de Eston & L.C.E.Osório*

A multidirectional ground monitoring system  
*E.M.De Souza*

Automated ground control management system for coal mine hazard detection  
*K.Hanna & R.Cox*

Automated measurement and visualisation of underground openings in three dimensions  
*A.J.Jeffery & S.Durucan*

Acquisition of test data from the Exploratory Studies Facility for the Yucca Mountain Site Characterization Project  
*H.N.Kalia*

Operational accident prevention programme in underground pit mining  
*G.N.Mutanov, I.S.Akhmetov & A.V.Kostirin*

French Coal Board – New remote surveillance system  
*J.Naquet*

Human factors and safety issues in new mining technologies  
*R.F.Randolph*

Ergonomics of low seam teleoperated mining  
*L.J.Steiner & K.M.Cornelius*

Gas-geomechanic monitoring system for collieries – A means of environmental control and safety of mining operation  
*B.V.Vlasenko, G.Ya.Polevshikov, V.P.Potapov, V.A.Baranov, V.I.Magdytch, A.V.Remezov & S.S.Zolotych*
9 Reliability and maintenance of mining systems

Expert systems used at Ruhrkohle AG
P. Danielczyk

Machine health monitoring using a rapid PQ (particle quantifier) method
S. Eskikaya, B. Elmacı, N. Bilgin & C. Kuzu

Reliability and maintenance profitability control of machinery in automated mining
H. Harjunpää

The production process analysis of sublevel caving mining system by means of simulation and reliability
Yi Huang & U. Kumar

Dragline operations in Indian opencast mines – A critical study
R. Nath & P. Rai

Openpit mine reliability as a stochastic process
V. Pavlović

Computerised maintenance at Indian mining industries
M. K. Sharma & V. K. Agarwal

10 Abstracts

The optimization of the parameters of layers opening taking into account the reliability factor
V. I. Bitchkov & V. I. Sally

Handling, mechanization and automation in charge distribution
V. F. Byzov

Designing, development and extraction of the Velenje thick coal seam
F. Žerdin, E. Dervaric & M. Medved

11 Supplement

Using GPSS/H to simulate complex underground mining operations
J. R. Sturgil & M. L. Smith
