Acknowledgements XIX
Organization of the Symposium XXI
The North American Rock Mechanics Symposium Coordinating Committee XXV
The NARMS paper review process XXVII

Abstracts of USNC/RM Award Winning Papers for 1993

PhD Thesis Award in Rock Mechanics XXXI
M.S. Thesis Award in Rock Mechanics XXXIII
Case History Award XXXV
Applied Research award XXXVII
Basic Research Award XXXIX
Vitae XLI

Keynote lectures

Rock mechanics issues in petroleum engineering 3
D.N.Meehan

Discrete fracture approaches for oil and gas applications 19
W.Dershowitz & P.LaPointe

Rock engineering and civil construction 31
A.A.Bello Maldonado

Competitive at depth: Re-engineering and hardrock mining process 35
M.Scoble
Structuring of rock engineering in South Africa and critical review of developments up to 1993

J.N. van der Merwe

Panel discussion: In-situ stress and fluid flow in fractures

Field evidences on the orientation of forced water flow with respect to the regional principal stress directions

F.H. Cornet & R. Jones

Variations of the least horizontal stress magnitude in sedimentary rocks

R.A. Plumb

1 Hydraulic and mechanical properties of discontinuities

The effect of the critical path on fluid flow through a fracture

L.J. Pyrak-Nolte & C.D. Montemagno

Fluid flow network and fractal diffusion fronts in fractured rock mass

Yuzhuo Zhang & Y.P. Chugh

Physically-based models of rock fracture

C.E. Renshaw & D.D. Pollard

Modeling of joint compliance using dynamic discontinuous deformation analysis

W.O. Miller & M.E. Glynn

An investigation of rock joint models on prediction of joint behavior under pseudostatic cyclic shear loads

Sui-Min Hsiung, A. Ghosh & A.H. Chowdhury

The mechanics of progressive shear failure at all scales in rock masses

G. Archambault, A. Rouleau, R. Daigneault & R. Flamand

Development of bedding plane faults and fracture localization in a flexed multilayer: A numerical model

M.L. Cooke & D.D. Pollard

Experimental observations of static and dynamic properties of joints

G.N. Boitnott

Seismic geotomography: Amplitude versus velocity in consideration of joint aperture and spacing

C. Tanimoto & K. Kishida

Guided waves propagation along a fracture with contact

K. Nagano & H. Niitsuma

Numerical modelling of the hydro-mechanical behavior of single fractures

M. Gutierrez & N. Barton
2 Borehole stability and hydraulic fracture

Hydraulic fracture orientation and pressure response during fracturing of producing wells
M.G. Mack & J.L. Elbel

Hydraulic fracture from the interface of a cased wellbore
B.J. Carter, P.A. Wawrzynek, A.R. Ingraffea & H. Morales

The influence of constitutive behavior on the fracture process zone and stress field evolution during hydraulic fracturing
Kunsoo Kim & Cunying Yao

Shearing motion of dense proppant material in hydraulic fracturing
Dezhang Lin & J.-C. Roegiers

Behaviour and stability analysis of a wellbore embedded in an elastoplastic medium
P. Papanastasiou, D. Durban, M. Thiercelin & J. Cook

Modeling of episodic failure leading to borehole breakouts in Alabama limestone
C.G. Herrick & B.C. Haimson

Borehole breakout interpretation in the Gulf Coast, offshore Louisiana
A. Zerwer & N.A. Yassir

Experimental modeling and numerical analysis of well casing loading by rock creep
Deng Jingen, Huang Rongzun, Wang Kangping & Chen Mian

3 Rock engineering for underground excavations

Prediction of boom tunnelling machine excavation rates
R.J. Fowell, G. Richardson & M.J. Gollick

Geotechnical parameters and tunnel boring machine performance at Goodwin Tunnel, California
J.E.O'Rourke, J.E. Springer & S.V. Coudray

Rock mechanics conditions in circular tunnels through Austin Chalk
R.F. Cook

4 New developments in blasting

The use of probability and risk in blast design
T. Kleine, A. Cameron, B. Forsyth & B. Roberds

Survivability of shotcrete near blasts
D.R. McCreath, D.D. Tannant & C.C. Langille
Effect of 'crack-like' defects on rock fracture
_D.S. Kim_

Rock fragmentation results for a simulated underground leaching stope
_F. Djahanguiri, M.S. Stagg, R.E. Otterness & J.M. Kemeny_

Numerical simulation of delay blasting by the dynamic lattice network model
_J. Song & K. Kim_

5 Rock cutting and TBM performance simulation

A boreability model for TBM’s
_N.-O. Sundin & S. Wänstedt_

Development of a mechanized excavation system performance simulation package
_Y. Abd Al-Jalil, P.P. Nelson & C. Laughton_

Indentation fracture mechanics and rock disc cutting
_X. L. Zhao, E. K. S. Passaris & J.-C. Roegiers_

Observation and simulation of rock indentation fracture
_X. C. Tan, P.-A. Lindqvist & S. Q. Kou_

A new approach for simulation of the rock cutting process
_M. Kadiu_

The effect of surface-active chemical agents on rock cutting with shear/drag bits
_A. V. Staroselsky & K. Kim_

6 In-situ stress

In-situ stress predictions and measurements in an unconsolidated sandstone formation, the Lower Frio, East Texas
_G. Ramos, K. Katahara, R. Keck & M. Batzle_

The influence of near surface faults on in situ stresses in the Canadian Shield
_N. Chandler & D. Martin_

Measurement of in-situ initial stress and excavation-induced stress changes in the vicinity of underground opening
_A. Tamai, T. Kaneda & T. Mikami_

First application of the RPR method to field measurements
_R. Corthesy, M. H. Leite, Guang He, D. E. Gill & P. Germain_

In-situ stress and hydraulic fracture orientation in the mid-continent area, US
_D. P. Yale & T. C. Ryan_
The use of thermal strain relaxation of core to determine stress directions  
N.A. Yassir & D.G. Robertson

7 Mechanical properties of intact rock – Laboratory testing

Material-dependent size effect of hollow cylinder stability: Theory and experiment  
P.I. van den Hoek, D.-J. Smit & M. Khodaverdian

Quantifying drilling-induced damage in samples of Lac du Bonnet granite  
C. Derek Martin

Dynamic stress mapping utilizing ultrasonic tomography  
T. E. Scott, Jr, Q. Ma, Z. Reches & J.-C. Roegiers

Tensile properties of rocks in four-point beam tests under confining pressure  
R. Weinberger, Z. Reches, T. E. Scott & A. Eidelman

Determination of the microcrack tensor in rock: Evaluation of coring induced damage  
D. R. Schmitt & Y. Y. Li

Modelling crack propagation in compression  
A. V. Dyskin, L. N. Germanovich, A. R. Ingraffea, K. K. Lee & L. M. Ring

8 Static and dynamic properties of intact rock

Static and dynamic mechanical properties of carbonates  
D. P. Yale & W. H. Jamieson, Jr

Static and dynamic elastic moduli in granite: The effect of strain amplitude  
R. J. Martin, III & R. W. Haupt

A thermodynamic basis for static and dynamic scaling laws in the design of structures in rock  
B. T. Brady

Strain amplitude and stress dependence of static moduli in sandstones and limestones  
A. N. Tutuncu, A. L. Podio & M. M. Sharma

Effects of strain amplitude on the static and dynamic nonlinear deformation of Berea sandstone  

Relationship between static and dynamic rock properties in welded and nonwelded tuff  
9 Uncertainty and reliability in rock engineering

Application of the Unit-Cell Method to determine the optimum tunnel orientation  
J.S. Kuszmaul  

A test is worth a thousand guesses – A paradox  
G.A. Nicholson  

Probabilistic analysis of progressive block failures  
C. Stone & D. Young  

Uncertainty, reliability and risk in rock block stability  
J. Muralha  

Variability and uncertainty evaluations for rock slope design  
C. Dinis da Gama  

Modeling the effect of disorder on the compressive strength of rock  
S. C. Blair, N. G. W. Cook & S. A. Daveler  

A new empirical peak shear strength criterion for rock joints  
P. H. S. W. Kulatilake, G. Shou, T. H. Huang & R. M. Morgan

10 Numerical modeling – Discontinuum analysis

Mechanical analysis of the accumulation of stress and slip on the San Andreas Fault at Parkfield  
D. Hopkins, W. Foxall & R. Babcock  

Modeling fracturing of rock masses with the DDA method  
B. Amadei, C. T. Lin, S. Sture & J. Jung  

Modeling dynamic rock failure by discontinuous deformation analysis with simplex integrations  
G.-H. Shi  

Discontinuous deformation analysis and ‘the artificial joint concept’  
T.-C. Ke & R. E. Goodman  

Application of the discontinuous deformation analysis to the evaluation of rock reinforcement for tunnel stabilization  
M. R. Yeung, S. J. Klein & M. Y. Ma  

Environmentally motivated tracking of geologic layer movement during bench blasting using discrete element methods  
D. S. Preece & D. S. Scovira  

A curved structural element model for rock surface linings in discontinuous rock analysis  
R. Wang
Numerical studies relating to micro fracture in granular materials
Zhong Liu, N.G.W.Cook & L.R.Myer

11 Numerical modeling – Continuum analysis

Evaluation of pressure and stresses due to fluid sources in a semi-infinite medium
M.Bai & J.-C.Roegiers

Dilation-induced permeability increase around caverns in salt
K.Fuenkajorn & S.Serata

Time effect in rocks surrounding a horizontal tunnel
N.D.Cristescu

Complex tunnel intersections of the SSC: The inter-relationship of analysis, design and construction
F.-D.Lin, S.H.Baldauf & M.A.Elioff

Recovery of a double width stope at Golden Giant Mine: A successful application of numerical modelling and conventional methods for stability analysis
P.Rocque & W.F.Bawden

Constitutive modeling of rock masses containing fracturing joints and analysis of large-scale excavation
H.Hori & H.Yoshida

The edge function method: An efficient new numerical technique in rock mechanics
J.F.Dwyer & B.Amadei

Numerical simulation of stress wave interaction with cracks in layered rock
H.P.Rossmanith, K.Groschupf, R.E.Knasmillner & K.Uenishi

12 Mechanics of weak rock – Creep/Rheology

The influence of geological burial on the deformation characteristics of bonded carbonate rocks
M.E.Jones, S.Willis, N.Kågeson Loe, R.N.Mortimore & M.J.Leddra

Probability distributions for parameters of the Munson-Dawson salt creep model
A.F.Fossum, T.W.Pfeifle, K.D.Mellegard & D.E.Munson

Experimental identification of kinematic and isotropic hardening in rocksalt
M.Aubertin, S.Servant & D.E.Gill
Thermomechanical damage recovery parameters for rocksalt from the Waste Isolation Pilot Plant  
N.S. Brodsky & D.E. Munson

13 *Intact rock testing – Influence of pores and fluid transport on properties*

- Laboratory testing of Lägerdorf Chalk  
  *P. Chryssanthakis, L. Tunbridge & G.H. Landa*

- A study of the coupling between mechanical loading and flow properties in tuffaceous rock  
  *R. Wang & J.M. Kemeny*

- Deformation of Wilcox shale: Undrained strengths and effects of strain rate  
  *O. Kwon & A.K. Kronenberg*

- Pore collapse mechanisms in Cordoba Cream limestone  
  *S. Mowar, M. Zaman, D.W. Stearns & J.-C. Roegiers*

- Acoustic velocity anisotropies in Cordoba Cream limestone during different deformational stress paths  
  *M. Azeemuddin, T.E. Scott, Jr, J.-C. Roegiers & M.M. Zaman*

- The effect of clay-fluid interactions on ultrasonic seismic wave propagation  
  *S.L. Ita, L.R. Myer & N.G.W. Cook*

14 *Natural fracture systems*

- Fractal point patterns and fractal fracture traces  
  *R.L. Kranz*

- On the paradox of systematic, contemporaneous, orthogonal opening-mode fractures  
  *S.J. Martel*

- Fracturing and stress history of the Devonian Antrim Shale, Michigan Basin  
  *T. Apotria, C.J. Kaiser & B.A. Cain*

- Fracture mechanics analysis of limestone cantilevers subjected to very long-term tensile stress in natural caves  
  *T.M. Tharp & T.J. Holdrege*

- The widespread occurrence of healed microfractures in siliciclastic rocks: Evidence from scanned cathodoluminescence imaging  
  *K.L. Milliken*

- Containment of natural fractures in brittle beds of the Austin Chalk  
  *M. Friedman, O. Kwon & V.L. French*
15 Mechanics of poorly consolidated weak rock

Strength and deformation properties of a physical model melange 843
E.S.Lindquist & R.E.Goodman

Estimating the block volumetric proportions of melanges and similar
block-in-matrix rocks (bimrocks) 851
E.Medley & R.E.Goodman

Translational slope instabilities in weak rock 859
R.Berardi, F.Forlati, R.Passalacqua & C.Scavia

The impact of tropical weathering on the mechanical behaviour of mudrocks 867
C.-H.Fan & M.E.Jones

16 Deep mine design in South Africa and Canada

Integrated seismic-stress-geomechanical analysis of a cable bolted back
failure, Mines Gaspe, Canada 877
W.F.Bawden

An integrated rock mechanics program at the David Bell Mine 887
C.W.Pelley, K.McKirdy & E.De Souza

The nature and possible source mechanisms of seismic events from a shallow
pillar supported, platinum mine in South Africa 895
K.Aref, A.L.Jager & S.M.Spottiswoode

A conceptual model of a hard rock, deep level, tabular ore body that
incorporates the potential for face bursting as a natural product of mining 903
N.Lightfoot, A.R.Leach & D.H.Kullmann

Numerical modelling of the behaviour of concrete stabilising pillars compared
to reef pillars in deep level narrow reef mining 911
G.York & G.L.Smith

The development of a rationale for the design of stope and gully support
in tabular South African mines 919
A.P.Squelch, M.K.C.Roberts & P.N.Taggart

Spotlight on new developments in the support of tunnels in South African
mines under high stress conditions 927
L.Wojno & A.J.Jager

17 Deep mine design/bursting/pillar design

Analysis of induced seismicity in a hard-rock mine in the Sudbury Basin,
Ontario, Canada 937
S.Talebi, M.Ge, P.Rochon & P.Mottahed

xv
On the use of the brittleness index modified (BIM) to estimate the post-peak behavior of rocks
M. Aubertin, D. E. Gill & R. Simon

The (in?)significance of creep in a prestressed polyester resin grouted rock anchor
T. S. Avery & J. J. K. Daemen

Rockbolt behaviour under dynamic loading: Field trials and numerical simulation

Geomechanics of sill pillar mining
M. R. Hudyma, Y. Potvin, D. Milne, R. K. Brummer, D. R. Grant & M. Board

Composite source mechanism solutions for rockbursts at the Lucky Friday Mine, Mullan, Idaho
C. J. Wideman, J. M. Girard, T. J. Williams & T. L. Nichols

Chimneying disintegration failure mechanisms of hard rock mines
M. C. Bétournay, H. S. Mitri & F. Hassani

18 Coal and surface mine design

Three-dimensional elasto-plastic analysis of coal pillars for highwall mining
M. S. Craig, M. E. Duncan Fama & R. Trueman

Three dimensional modeling of a four-way coal mine intersection for analysis of roof-pillar-floor interaction
K. Chandrashekhar & Y. P. Chugh

The role of local mine stiffness in pillar bump prediction
Y. Pen & K. Barron

Overburden failure due to longwall mining
D. K. Ingram, M. A. Trevits & P. W. Jeran

High amplitude stress wave generation and damage induced by roof caving in mines
B. T. Brady & K. Y. Haramy

Roof fall monitoring and prediction at the Waste Isolation Pilot Plant
C. T. Francke, S. Saeb & S. J. Patchet

19 Rock mechanics in dam and hydro-project construction

Rock mechanics dam safety studies for Seminole arch dam
R. E. Goodman & G. A. Scott
Stability of a concrete gravity structure
C.A. Jaramillo

Seepage investigations and 3-D finite element analysis
W.O. Miller & J.B. Palmerton

Long-term stability of the Santa Rosa Dam left abutment
F. Gonzalez-Valencia & C. Montoya-Beltran

Durability issues in the production of rock for erosion control
D.A. Lienhart

20 Rock mechanics in the design of rock slopes

Rock mechanics at the Fiesta Texas Theme Park
G.W. Hall, M.R. Funkhouser, R.W. Humphries & W.L. Warburton

Application of the adaptive filtering technique for rock mass displacement monitoring by the Global Positioning System (GPS)
N. Shimizu, K. Nakagawa & S. Sakurai

Stability analysis of a penstock slope
T.-C. Ke, B. Thapa & R. E. Goodman

Estabilidad de taludes en los cortes del tramo Río Balsas-Chilpancingo de la nueva Autopista México-Acapulco
R. Ayala Muñiz & A. Aguirre Ponce

Estabilización de un talud excavado en riolitas
E. Padilla Corona

Discrete element modeling for the Belden Siphon rock slope remediation project – Verification and reliability

Estudio de estabilidad de taludes y propuesta para aumentar el grado de inclinacion de los mismos en la mina a cielo abierto de minera real de Angeles
A.S. Menache Varela

Author index
