The First European Conference on Information Systems

Henley on Thames, England.
29th-30th March, 1993

Proceedings

OPERATIONAL RESEARCH SOCIETY
ASSOCIATION FOR INFORMATION TECHNOLOGY

Sponsored by: Barclays Bank plc
IBM
### Table of Contents

#### Information Management - 1

Anne Davies  
*The implications of outsourcing for information management in the public sector*  
1  

William J. Doll, Mark W. Doll  
*Downsizing to client/server architectures*  
9  

Theodore Tsiligirides  
*TELEWORKING: An information technology tool for integrated broadband communication development in rural areas of Europe*  
18

#### Information systems for developing economies

Shirin Madon  
*Information systems for development planning: Managing the process of organisational change*  
31  

Pek Hooi Soh, James Ang  
*The role of the Singapore government in national computerisation*  
39  

Walter Baets, Michael Smirnov  
*Strategic IS planning: Relevance for Russia*  
48

#### Techniques and methods - 1

F.A. Wilson, J.N. Wilson  
*An organizational information model and technical support for use with concurrent engineering practice*  
64  

Maria C. Angelou, Tony Cornford  
*Conceptual modelling: An information systems perspective*  
72  

Stanislaw Wrycza  
*The combined ISAC-ER methodology of information systems development*  
80

#### Information management - 2

Christopher Westrup  
*Information systems methodologies in use*  
90  

Dan Remenyi  
*The key issues in information management for the mid-1990s*  
98  

Janice Burn  
*Effective alignment of information systems and business strategies*  
118

#### System development - 1

Ulrich Frank  
*An integrated environment for designing object-oriented enterprise models*  
131  

James Backhouse, Alberto Pucci  
*Supporting legal interpretation: A hypertext tool for semantic analysis*  
141  

John Shochot  
*A discussion of certain implications on software development of the copyright law*  
157
Techniques and methods - 2
Ian O. Angell, Bernhard H. Straub
"Though this be madness, yet there is method in’t" .................................................. 163
Lucas D. Introna
Information: A hermeneutic perspective ................................................................. 171
Andre Doswell, Usha Asnani
Information system and strategy: myth or reality? A discussion .......................... 180

Information management - 3
Hans Lehmann
Core competence and learning alliances - the new face of information management? 186
C.S. Yap, James Y.L. Thong, K.S. Raman
Government incentives and small business computerisation: An empirical study 198
Beat Hochstrasser
Quality engineering (QE): A new framework applied to justifying and prioritising IT investments ................................................................. 213

System development - 2
Grace Au
Developing a modelling framework for document image processing using a simulation model ................................................................. 230
Idir Moualek
A framework for developing a decision network based on intelligent executive support systems ................................................................. 239
Ray J. Paul
Dead paradigms for living systems ........................................................................... 250

Techniques and methods - 3
Graham McLeod
A generic method model for representation, integration and management of methods 256
David Preedy
Information design: Making management information systems effective ......... 268
Chrisanthi Avgerou, Tony Cornford
A review of the methodologies movement ................................................................. 278

Information management - 4
A.C. Leonard
Factors that contribute to successful quality assurance management in a changing IT department environment: A case study ......................... 290
Kevin A. Johnston
Are information systems departments dying or just disappearing? ....................... 301
David Norman
Business process reengineering ................................................................................. 307
### Evaluation of Information Systems

Frank Land, Barbara Farbey, David Targett

*Evaluation of Information Systems is an extensive examination of the various applications and benefits of information systems, providing a comprehensive overview of the field.*

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A taxonomy of information systems applications: The benefits ladder</td>
<td>312</td>
</tr>
<tr>
<td>Dan Remenyi, Arthur Money</td>
<td></td>
</tr>
<tr>
<td>Service quality and correspondence analysis in determining problems</td>
<td>320</td>
</tr>
<tr>
<td>Richard T. Watson, Leyland F. Pitt, Chris J. Cunningham, Deon Nel</td>
<td></td>
</tr>
<tr>
<td>User satisfaction and service quality of the IS department: Closing</td>
<td>341</td>
</tr>
<tr>
<td>the gaps</td>
<td></td>
</tr>
</tbody>
</table>

### Information Systems Strategy - 1

G.G. Lee, T.G. Gough

*Information Systems Strategy - 1 explores the strategic planning and development of information systems within organizations.*

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
