ESA/ESTEC Workshop on:
Space Applications
of High Temperature Superconductors

27–28 April 1993
ESTEC, Noordwijk, The Netherlands
## Session I – Microwave Components

<table>
<thead>
<tr>
<th>PAGE</th>
<th>TITLE</th>
</tr>
</thead>
</table>
| 9    | Research and Development of Analog HTS Microwave Components for Possible Space Applications  
University of Wuppertal, Germany* |
| 27   | Rigourous Analysis of 2D and 3D Planar Circuits by using the Finite Element Method Approach  
*D. Thetiot, V. Madrangeas, M. Aubourg, P. Guillon, I.R.C.O.M., University of Limoges, France* |
| 39   | Fabrication and Characterisation of Thin–Film HTS Microwave Devices  
Results to–date of the BRITE Project *"Thin Film High Tc Superconductor Growth and Characterisation at Microwave Frequencies"*  
*C.K. Winter, D.R. Gray, D.J. Westland, V. Skarda, ERA Technology, UK* |
| 55   | Space Applications of High Temperature Superconductors in Real Time Signal Processing  
*H.A. Kratz, Physics and Systems Department, Dornier GmbH, Germany* |
| 69   | Evaluation of an S– and an X-band HTS Bandpass Filter  
*J.L. Prater, J.J. Bautista, Jet Propulsion Laboratory, USA* |
| 75   | Advances in Application of High Tc Superconductors to Microwave  
*J.C. Mage, B. Marcilhac, M. Mercandalli, Y. Lemaitre, B. Dessertenne, D. Mansart, Thomson–CSF/LCR, Orsay, France* |
| 85   | Microwave Applications of HTS for Communication Satellite Payloads  
*S.J. Fiedziszko, J.A. Curtis, Space Systems/Loral, USA* |
| 87   | A YBCO Monolithic IC for 12GHz Mixers  
*K. Suzuki, S. Yoshikawa, K. Yamaguchi, K. Hayashi, S. Fujino, T. Takenaka,  
K. Imai, F. Suginoshita, N. Yazawa, Y. Enomoto, SRL–ISTEC, Japan* |
| 93   | High–Tc Super Conducting Filters for Space Applications  
*M. Kuhn, R. Hom, A. Baranyak, M. Stiller, M. Klinger, J.H. Hinken,  
Forschungsgesellschaft fuer Informationstechnik mbH, Germany* |
| 97   | Extracted Pole Planar Elliptic Function Filters  
*S.J. Hedges, R.G. Humphreys, GEC–Marconi Research Centre, Chelmsford, UK* |
| 107  | Design of Superconductive Single and Dual–mode Microwave Filters  
*R.R. Mansour, W.C. Tang, C. Kudsia, COM DEV Ltd, Ontario, Canada* |
| 119  | The First and Second High Temperature Superconductivity Space Experiments (HTSSE–I and HTSSE–II)  
Naval Research Laboratory, USA* |
# Session II – Sensors

<table>
<thead>
<tr>
<th>PAGE</th>
<th>TITLE</th>
</tr>
</thead>
</table>
| 131  | A Pilot Study for High Temperature Superconducting Gravity Gradiometers  
C.S. Jacobsen, Technical University of Denmark; J.B. Hansen, T. Freltoft, Y. Shen  
P. Vase, NKT Research Center, Denmark; T. Claeson, Z. Ivanov, P.A. Nilsson,  
Chalmers University of Technology, Sweden; J. Flokstra, University of Twente,  
The Netherlands; E. Armandillo, ESTEC, The Netherlands. |
| 147  | Three Axis High-\(T_c\)-SQUID Magnetometer  
S.S. Tinchev, J.H. Hinken, M. Stiller, Forschungsgesellschaft fuer  
Informationstechnik mbH, Germany |
| 153  | High \(T_c\) dc SQUIDS and Planar Coil Fabrication  
J.W.M. Hilgenkamp, R.P.J. IJsselsteijn, A.J.H.M. Rijnders, C. Brons, H. Rogalla,  
J. Flokstra, Department of Applied Physics, University of Twente, The Netherlands |
| 163  | Activities on High Temperature Superconductive Materials for Italian Space  
Programs  
F. Graziani, University of Rome 'La Sapienza'; M. Lisi, Alenia Spazio Spa; N.  
Sparvieri, A. Fiorello, Alenia Spa Corporate Research Center, Italy |
| 173  | Active and Passive High Temperature Superconductor Devices  
J.S. Satchell, R.G. Humphreys, N.G. Chew, J.A. Edwards, S.W. Goodyear, DRA;  
A. Porch, M. Lancaster, F. Huang, University of Birmingham |
| 185  | Deposition and Patterning of YBCO/PBCO Trilayers for Josephson Device  
Applications  
E.J. Tarte, P. Przyslupski, B. Ghyselen, M. Bari, M.G. Blamire, J.E. Evetts,  
Dep. of Materials Science and IRC in Superconductivity, University of Cambridge,  
UK |
| 193  | The Use of High Temperature Superconductors for Shields and Low Thermal  
Conductivity Current Leads  
N. McN. Alford, T.W. Button, S.J. Penn, ICI Superconductors, UK |
| 197  | Flash Type Analog to Digital Converter Based on High \(T\_c\) Superconductors  
R. Cabanel, G. Gerritsma, Thomson-CSF, France |
| 205  | Cooling of High \(T_c\) Superconductors in Space  
C. Jewell, G. Rouille, ESTEC, The Netherlands |
| 219  | Integrated Cryogenic Subsystems for Satellite Applications  
W.A. Phillips, GEC-Marconi, Hirst Research Centre, UK |
| 231  | List of Participants |
