Rotary Forming & Spinning

Academic/Industrial Collaboration in Rotary Forging
P.Standring 1379

Numerical Simulation and Experimental Study on the New Process of Two-Roller Bending Spinning
Wang Qiang, Z.R.Wang 1387

Finish Gear Rolling by Screw-Shaped Tool
T.Takemasu, T.Ozaki, K.Yano 1391

Calculation of Force and Power during Radial Ring Rolling
Zhang Meng 1397

Deformation Mechanism in Rotary Forging of Rings
Su Hongxing, K.Kawai, M.Hayama 1401

Further Understanding of the Three-Dimensional Strain Field of Shear Spinning
Hu Huo et al. 1407

Finite Element Analysis of Ring Rolling Processes
S.G.Xu 1413

Study on the Spinnability of Internal Dieless Spinning
J.B.Wang, S.X.Li 1419

The Database of Tube-Shaped Flow Turning
Huang Jiejie, Li Guangxin, Xia Ehui 1423
Optimization of the Technical Parameters and Test Research on Stagger Spinning
Zhao Xianming et al. 1426

Technical Performance and Structural Specifications of WT6500-32 Type Dieless Two-Step Cold Flanging Equipment for Large Heads
Wang Tao et al. 1432

The Shear Spinning of Flanged Container Head
Zhao Yuhao, Zhang Shunfu 1436

A Knowledge Based CAD System for Flow Forming of Tubular Parts
Li Guangxin, Xia Ehui, Ruan Xueyu 1439

A Research on the Shells Neck-in Spinning and Whole Style Wire Winding Production Technology
Pei Sixing, Chen Zhigang, Song Hejing 1445

Spinning Forming Technique and Quality Control of 30 CrMnSiA High Precision End
Wang Delin, Cheng Xueliang, Wang Wei 1448

Neural Networks for Defects Diagnosis in Flow Forming Process
Song Zonghua et al. 1453

Powder & Bending

Production of Rods and Tubes by Sequential Extrusion of Metal Powder
K.Yamaguchi et al. 1459

Study on Superplasticity in Metal Matrix Composites and Fractograph of Superplastic Fracture
Zhang Libin, Hai Jintao 1465

Bonding Strength and Micro-Hardness Distribution in Complex Parts Produced by Shave-Joining Process
T.Machida, T.Okai, K.Kan-no 1470

Study on Powder Forging Process for the Steel Synchronizer Ring
Zhang Zhiyuan et al. 1476

Incremental Forging Process of Plastic Flow Joining and Joint Strength
K.Kato et al. 1481

Effects of Temperature and Strain Rate on Flow Stress of Sintered Iron Powder
F.S.Jan et al. 1487

Sheet Metal Forming

A Realistic Friction Test in Sheet Forming
W.Wang, R.H.Wagoner 1495

The Analysis of Plane-Strain Bending Process
Li Shangjian, Zhong Jianghong 1501

Theoretical Considerations and Practical Concerns about the Numerical Modelling of Sheet Metal Forming Processes Using a Frictional Finite Strain Elastoplastic Model
C.G.Garino, J.Oliver 1505

A Study of Flexible CAD Software for Dies and Moulds
Zhang Zigong, Gu Weibing, Yao Jintao 1511

Out-of-Balance Moment in Bending in FE Analysis
T.Sawada, O.Takanashi 1517

Toward Integration of CAD/CAPP/CAM in Autobody Development and Panel Die Design and Manufacturing
Li Zhigang et al. 1523

Rational Finite Element Formulation for a Membrane Element in Sheet Metal Forming
Analysis
H.Huh, S.S.Han, D.Y.Yang 1529
A Numerical Study of Leveling Process for Locally Deformed Plates
K.Kadota, R.Maeda 1535
CAE of Stretch Forming Processes
F.Micari 1541
Recent Trends in Precise Press-Working of Electronic Components
T.Jimma, T.Adachi 1547
Developments in Analysis of Finite Strain of Sheet Metalforming
Ju Xiang 1555
Influence of Rate of Change of Strain Rate on Elongation during Uniaxial Deformation
M_.Yoshizawa, H.Ohsawa 1561
A Study on the Determination of Blank Shapes for Deep-Drawn Parts
Li Shunping, Li Shuoben 1567
An Earless Shape Function of Blanks in the Axisymmetrical Deep-Drawing
H.Mulki, Y.Kurosaki 1573
Stress Analysis of Wrinkling by Shear Stress and Effects of Geometric Parameters of Specimen on Wrinkling
Yang Yuying, Xing Zhongwen, Li Chunfeng 1579
Spinning and Automatical Processing Determination
X.X.Li, M.Alabed, J.Trioulere 1585
A Theoretical Prediction of Discontinuous Strain Paths of Anisotropic Sheet Metals
K.C.Chan, W.B.Lee , J.Song 1590
Finite Element Simulation of Plane-Strain Three-Roll Bending of Plates
Yang Gang, K.Mori, K.Osakada 1596
Elasto-Plastic FEM Simulation of Conical Die Forming of Sheet Steel
Y.L.Kang, J.Kihara, T.Aizawa 1602
A New Orthotropic Plasticity Model for Complex Sheet Forming
G.Monfort, J.Defourny 1607
Use of Grid Strain Analysis in Bathtub Pressing
Gao Ji et al. 1613
Tribo-Characteristics of Tool Materials Against Aluminum in Sheet Metal Forming
K.Dohda et al. 1618
Study on Plural Hole Punching with Elastic Tools
K.Satou, R.Miya, T.Asaoka 1624
Comparison of Different Analytical and Experimental Results Obtained Under Simple Sheet Metal Forming Processes
Q.Q.Nie, D.Lee 1630
Forming Limit of Flexible and Incremental Sheet Metal Bulging with a Spherical Roller
H.Iseki, K.Kato, S.Sakamoto 1635
Development of an Elasto-Plastic FE Code for Accurate Prediction of Springback in Sheet Bending Processes and Its Validation by Experiments
H.Ogawa et al. 1641
A Local 3-D Model for Automotive Sheet Metal Forming Analysis
S.C.Tang 1647
Experimental Study on Ironing of Stainless Steel and Optimization of Process Parameters
Mi Xiaozhen, Yang Yuying, Liang Yingchun 1653
Deep Drawing of Copper/Steel Sheet Metal Laminate
F.Yoshida et al. 1657
A Study on Deformation Mechanism in the Curved Forming
Li Shuoben, Li Chunfeng 1663
Expert System for Sheet Metal Forming
M.Tisza 1667
The Numerical Simulation Study of Stress/Strain State on Suspended Material in Stretch Forming of Sheet Metal
Ji Zhong, Sun Sheng

T.Kuwabara, H.Ichikawa

FE Simulation of the Roll-less Forming Process of Thin Walled Tubes
Y.Shirataki et al.

Deep Drawing of Stainless Steel in Warm Working Condition Using a Single Crank Press
J.H.Kim et al.

Comparison of the Implicit, Explicit and Inverse Approaches for the Estimation of the Strain Distribution in Axisymmetrical Thin Sheets
J.L.Batoz et al.

The Performance and Application of a New Bending Die
Chang Shengli

FEM Simulation of Nonuniform Yielding Process in Mild Steel Under Uniform Bending
M.Itoh, F.Yoshida, M.Ohmori

A CAD/CAM System for Multiple-Step Precision Progressive Dies
Wang Lu, Zhang Weidong, Tang Lihua

Experiments on Stripdrawing with Stationary Bending and Straightening
R.J.J.M. Sniekers, J.A.H.Ramaekers

Analysis of Stationary Bending and Straightening During Stripdrawing
S.M. Hoogenboom, R.J.J.M.Sniekers

Computer Aided Process Planning for Complex Die Bending Parts
M.Hoffmann et al.

Deformation of H-Beam Under Unsymmetrical Bending
J.Endo, T.Murota

Analysis of Blank Holding Force Control Forming Using Hydraulic Forming Simulator
Y.Hishida, R.H.Wagoner

Recent Advances in 3-D Numerical Simulation of Sheet Forming Operations
R.H.Wagoner, Dajun Zhou

A Study of the Deformation Laws During the Compound Forming of the Hemispheric Parts
Liu Yuli, Chu Jiayou, Fu Sheng

Production of Aluminum Optical Drums by Inside-ironing Process
M.Saito et al.

Effects of Annealing Conditions on Recrystallization Texture and Properties of Interstitial-Free Steel
Cui Deli, Wang Xianjin

Square-Cup Deep Drawing of Thick Plate by Multi-Axial Loading
E.Sato et al.

Prediction of Forming Limit Diagram in Sheet Metal by Means of a Nonclassical Plastic Model
Wang Hongyi, Gao Zhihui, Fan Jinghong

Lubrication in Deep Drawing, It's Improvement by Giving a Slope to the Die Face
T.Mizuno, Y.Kojima, K.Nagahara

Friction Characteristics Experimental Study on Galvanized Steel Sheets
Deng Zhi, Wang Xianjin, Cai Jiannan

FDM and FEM Simulation of Laser Forming: a Comparative Study
F.Vollertsen, M.Geiger, W.M.Li

Development of Virtual Manufacturing System for Automotive Sheet Forming
E.Nakamachi, H.Tongru

Computer Simulation and Experimental Research on Drawing Process of a Cylindrical
Electrohydraulic Stamping of the Titanic Alloy Parts
Y.E. Shamarin et al. 1929

Superplastic Forming

Anisotropy in Superplastic Deformation of Ti-6Al-4V
Bai Bingzhe, Chen Nanping 1935

Numerical Simulation of Thin Sheet Superplastic Forming Processes
C.A. Saracibar, E. Oñate 1941

The Strain-Rate-Cycling-Induced Superplasticity in Titanium Alloys
Wang Gaoshao, Du Zhongquan, Chen Yuxiu 1947

Finite Element Analysis of Superplastic Forming Processes
Y. H. Kim et al. 1953

Study on the Microcomputer Controlled Superplastic Bulging Machine
Xing Huilin et al. 1959

Computer Aided Design of Superplastic Forming Processes Based on the SPLEN Program Set
E.N. Chumachenko, O.M. Smirnov 1964

The Superplastic Pretreatment and Superplasticity of SiCp/2024 Aluminium Composite
Zhang Baoliang, Wang Yanwen, Wei Zheng 1968

Superplastic Deformation Behaviour in a SiC Particulate Reinforced Aluminum Alloys
Z. Q. Cui, T. X. Liang, P. Q. Chen 1974

Research on Superplastic Forming Technology of 2091 Al-Li
Fu Daxin, Hao Zhiping, Lu Hongjun 1977

Finite Element Analysis of the Nonsteady State Superplastic Forming Process
Zhang Kaifeng et al. 1982

The Incremental Perturbational Method for the Superplastic Expansion
Chen Guangxia et al. 1987

Influence of Thermo-Torsion on Structure and Superplastic Property of AlMn Brass
Gao Shiyou et al. 1991

Transformation Superplastic Hot Pressing for Metal Powders
Wang Yong, Hai Jintao 1995

Superplastic Micro Forming of Double Gear for Milli-Machines
Y. Saotome, A. Itoh, S. Amada 2000

Mechanical Aspects of Plasticity Development in Shot Peening
Y. F. Al-Obaid 2006

Tube Inspection and Compensation for Material Properties of Springback and Elongation
J. M. Brown 2014

Analysis of the Slip Line Field and the Hodograph in Plane-Strain Compression Between Perfectly Rough Inclined Dies
Y. Xu, S. Chandrasekar, W. Johnson 2020

Introduction to SAG
