NATO/CCMS PILOT STUDY ON INDOOR AIR QUALITY

4TH PLENARY MEETING

Epidemiology and Medical Management of Building-Related Complaints and Illnesses

Report on a Meeting Held in Oslo, Norway, 19-21 August, 1991

Eds. Finn Levy & Marco Maroni

NATO: Committee on the Challenges of Modern Society
National Institute of Occupational Health, Norway
National Institute of Public Health, Norway

National Institute of Occupational Health, Oslo, Norway, 1992
# TABLE OF CONTENTS

**Disclaimer** .................................................. iii

**Table of Contents** ........................................... iv

**Foreword and Acknowledgements** ........................ vi

1 **EXECUTIVE SUMMARY** ...................................... 1

2 **TOPICS** .................................................... 13

2.1 Epidemiology of Building-Related Complaints and Illnesses

   JAN SUNDELL. Health complaints related to buildings. An overview .............................................. 14

   DAN NORBACK. Epidemiology of principal building-related diseases ................................................... 27

   KJELL ANDERSSON. The use of standardized questionnaires in building-related illness (BRI)/"Sick Building Syndrome" (SBS) ................................................................. 47

2.2 Diagnosis and Medical Management of Building-Related Complaints and Illnesses

   P. SHERWOOD BURGE. Medical/clinical investigation in the diagnosis of BRI/SBS .................. 66

   JAMES H. DAY. Medical and laboratory criteria in the diagnosis and differential diagnosis of BRI/SBS ................................................................. 76

   ROSEMARY MARCHANT. Hypersensitivity and indoor air quality ............................................... 88

   ALASTAIR S. ROBERTSON. The medical management in cases of building-related illnesses .......... 99

2.3 Medical and Technical Prevention

   GAUTE FLATHEIM. Primary prevention of Indoor Air Quality (IAQ)-problems in new buildings (materials, building hygiene, follow-up) .............................. 108

   KJELL AAS. Action plan for the reduction of allergy and hypersensitivity in Norway .......... 124

   DAN NORBACK. Experience from longitudinal and interventional studies on the Sick Building Syndrome and its implications for secondary prevention .............. 135

2.4 Working Group Papers

   JAMES H. DAY. Biological tests in the diagnosis of BRI/SBS ................................................. 142

   JAMES H. DAY. Medical advice for the treatment and prevention of building-related illnesses (BRI) ................................................................. 150
3 CONCLUSIONS AND RECOMMENDATIONS FROM THE WORKGROUPS

3.1 Epidemiology .......................................................... 159
   Definitions .................................................................. 160
   Health effects .............................................................. 162
   Use of questionnaires .................................................... 164
   Reference populations ................................................... 166

3.2 Diagnosis and medical management .................................... 167
   Clinical and laboratory tests ............................................ 168
   Biological tests ................................................................ 172
   IAQ-Factors .................................................................. 176

3.3 Medical and technical prevention ....................................... 181
   Medical activities by any doctor ....................................... 182
   Medical advice ................................................................ 185
   Technical measures ........................................................ 187

4 LIST OF PARTICIPANTS ....................................................... 189
