TABLE OF CONTENTS

VOLUME 1

PLENARY LECTURE 1

R.L. Trillo
High Speed over Water, Ideas from the Past, the Present and for the Future 17

SESSION 1: RESISTANCE AND PROPULSION

L.J. Doctors, M.R. Renilson, G. Parker, N. Hornsby
Waves and Wave Resistance of a High-Speed River Catamaran ............ 35

T. Fuwa, N. Hirata, T. Hino
A Fundamental Study on a Flow Field around a Submerged Body of Revolution with Surface Piercing Struts ........................................... 53

M. Førde, E. Ørbekk, N. Kubberud
Computational Fluid Dynamics Applied to High Speed Craft with Special Attention to Water Intake for Water Jets .................................. 69

SESSION 2: CONCEPTUAL DESIGN

D.W. Czimmek, B.H. Schaub
Concept of a Large Surface Effect Ship for Fast Ocean Transport .......... 91

N. Gee
The Catafoil - A Foil Assisted Catamaran for Fast Ferry and Yacht Applications ................................................................. 107
SESSION 3: FOILS AND APPENDAGES

B. Müller-Graf
The Effect of an Advanced Spray Rail System on Resistance and Development of Spray of Semi-Displacement Round Bilge Hulls ........... 125

H. J. B. Mørch, K. J. Minsaas
Aspects of Hydrofoil Design; With Emphasis on Hydrofoil Interaction in Calm Water .................................................... 143

A Submerged Hull and Foil Hybrid Super-High Speed Liner ........... 163

SESSION 4: CONCEPTUAL DESIGN

A. Cordano, L. De Martini
SES 500 - Fincantieri - Design Criteria ..................................... 179

H. Ozawa, S. Morishita, R. Oimatsu, Y. Kunitake
A Concept Design Study of "Techno-Superliner" ....................... 199

SESSION 5: RESISTANCE AND SEAKEEPING

S. Falch
Seakeeping of Foilcatamarans .............................................. 209

M. Hirano, N. Toki, Y. Kusaka, Y. Wada
Research on Hydrodynamic Aspects of "Techno-Superliner-A" ........ 223

A. Incecik, B. F. Morrison, A. J. Rodgers
Experimental Investigation of Resistance and Seakeeping Characteristics of a Catamaran Design ........................................... 239

SESSION 6: TRANSPORT ECONOMY

B. Foss
Economy and Speed in Commercial Operations .......................... 259
S. Akagi
Synthetic Aspects of Transport Economy and Transport Vehicle Performance with Reference to High Speed Marine Vehicles .............. 277

A. Kraus, A. Naujeck
Comparison of a Cargo Catamaran with Conventional Seaborne and Airborne Transportation ......................................................... 293

T. Koyama
A State of the Arts of Fast Sea Transportation in Japan ......................... 309

SESSION 7: PERFORMANCE OF PLANING CRAFT

T. Hino, N. Hirata, T. Hori
Calculation of Free-Surface Flows Generated by Planing Crafts ............. 317

M. Simeone
The Hydrodynamic Lift Effect on the Stability and on the Banking Angle of the Fast Crafts ................................................................. 331

S. Hellstroem, D. Blount, P. Ottosson, L. Codega
Open Ocean Operation and Manoeuvrability at High Speed .................... 347

SESSION 8: SANDWICH MATERIALS

L. Buene, A. T. Echtermeyer, O. E. Sund, M. K. Nygård, B. Hayman
Assessment of Long Term Effects of Slamming Loads on FRP Sandwich Panels ................................................................. 365

B. Hayman, T. Haug, S. Valsgård
Response of Fast Craft Hull Structures to Slamming Loads ................. 381

R. P. Reichard
Enhanced Shock Performance of FRP Sandwich Structures ................. 399
SESSION 9: SEAKEEPING

D.E.Nakos, A.Nestegård, T.Ulstein, P.D.Sclavounos
Seakeeping Analysis of Surface Effect Ships .......................... 413

D.Kring, P.D.Sclavounos
A New Method for Analyzing the Seakeeping of Multi-Hull Ships ....... 429

G.J.Lee, K.P.Rhee
The Motion Response of an ACV with a Bag-Finger Skirt in Waves ...... 445

SESSION 10: SANDWICH STRUCTURES

O.Gullberg, O.Romell
Structural Optimization of a High Performance GRP-Sandwich Ship Hull 461

J.F.Rolin
Design and Manufacturing of the NES 24 Structure ........................ 475

SESSION 11: HYDRODYNAMIC DESIGN

R.C.McGregor, H.H.Chun
On the Potential of SWATH Ships for Very High Speed Operations ....... 491

A.Papanikolaou, M.Androulakakis
Hydrodynamic Optimization of High-Speed SWATH ........................ 507

Hydrodynamic Design of Fast Ferries by the Concept of Super-Slender Twin Hull ......................................................... 523

SESSION 12: CONCEPTS

L.Hu
Design, Trial and Operation of “Hong Xiang” SES Ferry .................. 529
M.Parodi, L.Grossi
“DESTRIERO”: The Realization of a Technological Challenge ............. 541

SESSION 13: SEAKEEPING

Y.Liang, Q.S.Hong
Experimental Investigations on Air Cushion Catamaran ....................... 557

G.McHenry, P.Kaplan, F.Korbijn, A.Nestegård
Hydrodynamic Analysis of Surface Effect Ships: Experiences with a Quasi-Linear Model ................................................................. 573

K.S.Min
Long-Range High-Speed Catamaran Passenger Ship Design ................. 591

SESSION 14: CONCEPTS

S.Kubo, T.Matsubara, T.Matsuoka, T.Kawamura
A Production Model of WIG as a High Speed Marine Craft:
“Marine Slider; μ sky-2” ............................................................... 607

J.R.Meyer
Hybrid Hydrofoil Technology - An Overview ...................................... 623

V.V.Klichko
Basic Principles of Choosing the Skirt Arrangement for Amphibious ACVs 1315

V.Chubikov, V.Pashin, V.Treshchevsky, A.Maskalik
EKRANOPLAN: A High-Speed Marine Vehicle of a New Type ........... 641

Author Index ...................................................................................... 649
