PLENARY LECTURE 2

K.Sugai, M.Yamaguchi
Research and Development Program of Techno-Superliner .................. 671

SESSION 15: SPEED LOSS IN WAVES

M.Ohkusu
Added Resistance of a Catamaran at High Froude Number .................. 679

H.Oehlmann, J.C.Lewthwaite
The Prediction of Resistance of Surface Effect Ships ...................... 693

O.M.Faltinsen, J.B.Helmers, K.J.Minsaas, R.Zhao
Speed Loss and Operability of Catamarans and SES in a Seaway .......... 709

SESSION 16: STRUCTURAL DESIGN

P.Olkinuora, E.Knuuttila, M.K.Hakala, S.Rintala, J.Vuorio
Structural Design of an Aluminium Missile Boat ................................. 727

T.Moan, B.Skallerud, O.Skjåstad
Structural Analysis and Design of Hydrofoils and Struts .................. 743

W.J.Allday
Methods of Avoiding Common Problems with Aluminium Structures ...... 765
SESSION 17: WAVE LOADS

P. Kaplan
Structural Loads on Advanced Marine Vehicles, Including Effects of Slamming ................................................................. 781

J. Talvia, R. Wiefelspuett
Offshore Measurements on Large Scale Model and Investigation of Structural Response Aspects of Slamming Loads for High Speed Monohulls 797

T. E. Schellin, A. Papanikolaou
Prediction of Seakeeping Performance of a SWATH Ship and Comparison with Measurements .................................................. 811

H. Ohtsubo, A. Kubota
Vertical Motions and Wave Loads of Large High-Speed Ships with Hydrofoils ................................................................. 829

SESSION 18: MACHINERY

T. B. Lauriat, R. DiGiovanni
A 4000 Horsepower Marine Gas Turbine, Installation and Control in High Speed Commercial Craft ........................................ 845

B. Meek-Hansen
Engine Running Conditions During High Speed Marine Craft Operation .................................................. 861

J. M. Thames, D. L. Blount
Interfacing the LM1600 Gas Turbine with Advanced Marine Vessels ...... 877

C. Günther
Prime Movers for High Speed Vehicles ........................................ 893

SESSION 19: MOTION CONTROL

J. J. Blok, A. B. Aalbers
Roll Damping Due to Lift Effects on High Speed Monohulls ............... 1331
K.Mori, Y.Doi
Performance and Dynamic Stability of a High Speed Semi-Submersible Vehicle with Wings ........................................... 915

Feasibility Study on a High-Speed Hydrofoil Catamaran of Lesser Pitching 931

SESSION 20: NAVAL CONCEPTS

A.Wangsholm
The Design Process for Military Vessels ........................................ 949

P.Goubault, H.Oehlmann, D.R.Lavis, W.Goetsch
Comparative Parametric Studies of Monohull and Surface Effect Ships ... 965

J.P.Guezou, Y.P.Picart, P.Letty
AGNES 200: Prototype of Surface Effect Ship and Sailing Laboratory ... 981

SESSION 21: CONTROL SYSTEMS

T.Itoko, S.Higashino, Y.Yamagami, T.Ikebuchi
The Development of an Automatic Control System for a Submerged Hull and Foil Hybrid Super-High-Speed Liner ..................................... 997

Y.Saito, M.Oka, T.Ikebuchi, M.Asao
Rough Water Capabilities of Fully Submerged Hydrofoil Craft “Jetfoil” 1013

A.Ponomarev
New Method for Improvement of Performance and Seakeeping
Characteristics of High-Speed Craft ............................................ 1029

SESSION 22: STRUCTURES

M.Hentinen, M.Hildebrand
Nonlinear Behaviour of Single-Skin and Sandwich Hull Panels ............ 1039
G. Behrens, M. Eklund
Light Weight Propeller Shaft Made of FRP for High Performance Vessel 1065

SESSION 23: OPERATION AND COMFORT

K. Hara
Safety of Collision Avoidance Maneuver Under High Speed Navigation 1077

E. Instanes, J. T. Pedersen
Safe and Comfortable Operation of Foilcatamarans 1093

K. A. Abrahamsen, P. T. Gravastrand
Noise and Vibration Aspects of High Speed Passenger Vessels 1113

SESSION 24: PROPULSION

J. C. Rose, C. F. L. Kruppa
Methodical Series Model Test Results 1129

T. van Terwisga
The Effect of Waterjet-Hull Interaction on Thrust and Propulsive Efficiency 1149

R. Svensson
A Description of the Water Jets Selected for "DESTRIERO" 1169

SESSION 25: RIDE CONTROL

T. Ma, W. L. Zhou, Y. N. Xie
Design Research on SES Ride Control System 1185

H. Kawaguchi, H. Miyata, H. Yamato, T. Takai
Full-Scale Experiments by the First Hydrofoil Catamaran WINGSTAR 12 "Exceller" 1195

W. C. O’Neill
The Maximum Attenuation of Seaway Induced Motions, Within a Given Set of Design Constraints, Possible for Hydrofoil Supported Ships 1215
SESSION 26: PERFORMANCE

H. Speich, A. Cappiello
Powershaft Hydrostatic Transmission for the Propulsion of High-Speed Craft .................................................. 1233

P. Ottosson, O. Rutgersson
Computer Programs in the Feasibility Design of New SES-Projects ...... 1251

F. van Walree, C. Buccini, P. A. Genova
The Prediction of the Hydrodynamic Performance of Hydrofoil Craft in Waves .................................................. 1275

SESSION 27: SAFETY. RULES AND REGULATIONS

K. Ogawa
Some Considerations on Rules and Regulations for Fast Sea Transportation in Japan ........................................... 1293

H. Helmersen, P. Werenskiold
Safety of Fast Sea Transport .................................................. 1297

Author Index .............................................................................. 1349
