IMCC '93
PROCEEDINGS OF THE SIXTH INTERNATIONAL MANUFACTURING CONFERENCE WITH CHINA

10-12th March 1993
HONG KONG

Jointly Organised by
Hong Kong Polytechnic
Nanjing Aeronautical Institute
University of Warwick
Beijing-HK Academic Exchange Centre

INTERNATIONAL ACADEMIC PUBLISHERS
CONTENTS

Preface .................................................................................................................. vii

A. CONVENTIONAL AND NON–CONVENTIONAL MACHINING

Why Chip Curls? — A New Cutting Model with Bending Moment .......................... 3
Liu Peide, Hu RS, Zhang HT and Wu XS

A Study on Grinding Burn and Residual Stress of Ultra–High Strength Steel 300M ........ 9
Kang Renke, Ren JX and Wu XL

Surface Integrity in Ultra–Precision Machining with SPDT ....................................... 13
Yuan Zhejun, Zhang FH, Zhou M, He JC, Han RJ et al

Analysis of Laser Shock Processing (LSP) on 7475 Aluminum Alloy ......................... 17
Zhang Bin and Yu CY

An Analysis of Abrasive Machining of Polycrystalline Diamond ............................... 23
Xu Dayuan and Lu DZ

The Mechanism of Machined Surface Formation in Iceland Spar Cutting ................. 27
Xia Wei, Li YH and Yang NX

Studies on Mechanisms and Improvement of Workpiece Burn in Grinding of Difficult to Grind Metals ................................................................. 31
Pu Xuefeng, Chen M and Li W

Dynamic Characteristics in Wood Drilling ............................................................... 37
Sun Daoyan, Zhang LB and Wang DM

The Experimental Investigation for Mechanism of Chip Formation in Oblique Cutting .... 41
Zhang Wei

The Way for Lapping Concave Microsphere and Analysis on Factors Influencing Precision .......................................................... 45
Zhu Feng, Zhang HH, Xie LF, Chen RY and Huang QK

The Crack Technique and Cutting Machining .......................................................... 49
Wei Qingtong, Lang FY and Zhao BJ

An Experimental Study on Tool Life by Using Cutting Fluid EC2 for Hobbing Hardened Gears .......................................................... 55
Yang Nanxiang, Li JS, Xia GZ, Luo WS and He YH

Dynamic Measurement of Temperature Distribution at Tool Flank Frictional Area ........ 59
Ye Bangyan and Zhou ZH

On the Mechanism of BUE and Scale ................................................................. 63
Chen Yongjie, Cao SY and Chen RY
A New Method for Calculating Hob Tooth Profile .................................................. 67
Chen Xia ii

Effectiveness of Generating Hourglass Worm by Grinding ....................................... 71
Zhang Guanghui and Qin DT

The New Way to Eliminate Built-up Edge for Some Alloys ....................................... 75
Wu Huizhen, Chen ZW, Tan MD and Fu HN

Developing of the Electrolytic—Abrasive Machining Experimental System .................. 79
Wen Guilin, Wang DK and Chen HB

A Study of Sparks Signal and Grinding Surface Burn .............................................. 83
Cao Shuosheng, Jin XS and Zheng XG

Experimental Measure on Ceramic Cutter Temperature Field and Analysis by Boundary 87
Yan Qiusheng

Improvement of Spark Erosion Resistance of Electroformed EDM Electrodes ................. 91
Zhu Di and Yun NZ

The Investigation on the Shaping Law of NC—ECCEM (Electrochemical Contour Evolution 97
Machining) with a Rotating Cathode
Xu Jiawen, Tang YX and Yun NZ

TEM Observation of Crack Fracture and Hydrogen Effects on Crack Tip Deformation .... 101
Sun Shuming, Li BL, Luo KC and Li ZX

The Study of Cutting Tool Breakage for Producing Metal Fibres by Chatter Machining 105
Li Jiazhong

The Machining of Hard Materials Using Cubic Boron Nitride Cutting Tools ................. 109
Luo Zhongchuan and WCK Wong

On the Wheel Wear Characteristics and Mechanism in Vertical Spindle Abrasive Surface Grinding 113
Zheng Huanwen and Cao H

The Performance of Milling Hardened Steel by PCBN Blades of Different Formulae .... 117
Wu Xiangning and Liu GM

Truing and Dressing of Resin—bond CBN Wheels ................................................... 121
Dai Yong

Polishing of Ultra—smooth Reflector Substrate for Laser—gyro ................................ 125
Teng Lin and Ren JX

Empirical Formulas of Granite Sawing Forces ....................................................... 129
Chen Xian and Guan Yifan

To Expound Developmental Feasibility of Ultraspeed Cutting Technology in China ........ 133
Zhao Zhongyi, Yu XH, Zhu NX and Hou ZB
Analysis of Variation Along Tooth Helix and Structure of Inserted Blade Hobs .................................. 213
Sun Jinping

B. AUTOMATION

A Fuzzy Control Method for FMS Dynamic Scheduling ................................................................. 219
Zhou Kai and Han ZJ

Research on NC Programming Realized with Interactive Graphics Technique .............................. 225
Zhang Ping and Sun J

CAM for Intricate Ruled Surface by Four Axes Wire–EDM ............................................................. 229
Liu Zhengxun and Ni ZW

A Practical CAPP System in the Manufacturing of Large Capacity of Electrical Machinery .......... 233
and Hydraulic Turbine
Yuan Shanzhong and Yuan JX

The Structure of an Intelligent Product Design CAD System with the Ability of Marketing and .......... 237
Cost Analysis
Sun Ke and Xu XD

Shape Preserving Parametric Rational Cubic Interpolation to Planar Data .................................. 241
Kang Baosheng and Zhou RR

A Fast Circular Interpolation Algorithm for CNC Machine Tools .................................................. 247
Shen Fuzhen, Xiao XM and Wu XL

Resource Constrained Production Planning and Scheduling in an Actual FMS .............................. 251
Chen Bingsen, Chen KW and Zhang S

Development of a Flexible Manufacturing System Simulation Package ...................................... 255
Zhang Hao, Chen BS and Zhang S

The CAD for the Elastomer in High Precision Load Cell ............................................................... 261
Zhang Huixin and Li L

The Architecture and Hierarchy for CAPP Developing Systems and Products ............................ 267
Zhao Liangcai

An Algorithm for Interpolation a Composite Curve by Nurbs Curve and Its Application in .......... 271
Constructing Nurbs Defined Skinning Surface
Ma Xiang, Yi ZD and Zhou RR

A Microcomputer Application in Die Design ................................................................................... 275
Chen Wenliang, Zhai JJ and Zhang L

The Studies and Applications of a CAD / CAM / CAG System ..................................................... 277
Chen Shaolian, Zhu JY and Wang YH

A Simulation System for Evaluating the Job Schedules of an FMS ................................................ 281
Lou Peihuang, Chen FL and Wang NS
CAM-1 Computer-aided-manufacturing System for Engine Cylinder Cover .......................... 285
Yin Sumin, Zhu BQ, Hu CL, Cai L, Gu J et al

A VC Construction of Parametric Triangular Bezier Surface and Its Application in Measure .... 289
Modeling
Ke Yinglin, Zhou RR and Liu XC

BITCAPP: a CAPP System for FMS ................................................................. 293
Xu Hongshan, Wang T, Xue Q and Ma CF

Zhang Zhuo

Design of an Active Flexible Wrist for Assembly Robot .............................................. 301
Zhao Yongqian, Ouyang JY, Huang XQ and Ku CH

The MRL Robot Programming System ............................................................... 305
Su Zhongfei, Hao XG, Yuan QH and Sun SD

Active Force Control of Robotic Manipulator ....................................................... 309
Huang Xiaoxi, Li SC, Wei ZX and Zhu JY

Active Compliance Control for Precision Insert Operation Robots ........................ 313
Ouyang Jiyuan, Huang XQ, Zhao YQ and Ku CH

Automatic Determination of Assembly Sequence in CAPP for Assembly ................. 317
Lin Dehao, Tao ZJ, Li ZQ and Su SS

A Study on Conditional Surveillance of Machining Process — A New Method to Detect Tool 321
Wear and Surface Roughness
Wang Jiemin, Chen RH, Zhao WY and Qu LS

A Study on Comprehensive Measurement for Automatic Machining — A Comprehensive 325
Optical Fibre Measuring System
Chen Renheng, Wang JM, Zhao WY and Qu LS

Inspection Process Planning for Complicated Parts ............................................... 329
Cheng Ye and Cai FZ

A New Method for Machine-tool Dynamometer Design .......................................... 333
Li Xiaoqian, Jiang XF and Xue BY

Investigation on Precision Laser Drilling with Focusing of Quasi-light Column .......... 337
Sun Kun, Wang KQ, Han XC, Sun LF and Ke B

Computer Animation Technique and Its Engineering Applications ...................... 341
Wu Weimin and Chen SL

Study of 3D Robot Vision System with Two Cameras ............................................. 345
Zhu Qinyao, Zhang LY and Zhu JY

The Application of Image Analysis System in Tool CAD .................................... 349
Xu Xianxu
An Investigation on the Experiment Design Plan for Tool Life in Machining Data Base .......................... 353
  Tang Mingquan and Tang M

Some Aspects of the Machining Data Bank for China Petroleum Machinery ................................. 357
  Zhou Jiabao and Hua HS

Compensatory Control of Form Accuracy in Precision Machining ................................................. 359
  Xue Bingyuan, Li GS, Shen DH, Liu GL and Wang JX

Study on the Technique to Measure Tool Tip Stress with Laser in Cutting Process .................. 363
  Huang Chuanzheng and Ai X

Intelligent Monitor & Control of Machining Processes—A Neural Network Approach .................. 367
  Ding Yucheng, Lu BH, He GP and Ku CH

Optical Fibre Sensor for Monitoring Cutting Force and Torque in Deep-hole Drilling .......... 371
  Yang Zhiguo, Zong HY, Wong YQ, Xu YG and Luo ZQ

A Detecting System for High Speed Grinding Wheel by Laser Power Spectrum .................... 377
  Li Hanzhong, Wang Y and Yang YS

Volumetric Error Formulation and Measurement on a CNC Lathe ............................................. 381
  Zhao Yaojun

Study on Testing Mechanism for Cell Controllers ................................................................. 385
  Zhang Jian, Ding TC, Wang HJ and Deng ZQ

Investigation on a New Alarm System for Cutting and Grinding Process .............................. 389
  Fu Jiecai, Zhou ZX, Liu SF and Zeng XN

Selecting Tool Materials with Expert Fuzzy Clustering Method .............................................. 395
  Shen Liguo and Han ZJ

The Establishment and the Use of Metal Cutting Data Base of Common Steels for Petroleum Machine .......... 399
  Wang Hui and Hua HS

Application of Piezoelectric Actuator in Precisional Turning the OC Camber of Piston Skirt ........ 403
  Ye Xiongbo, Niu YM, Zhang J and Tao T

Studies and Application of Analysis, Checking and Control of Drill Point Grinding Processes .... 407
  Lou Wengao and Yu HR

Reliability Analysis of Monitoring Signal in Monitoring Manufacturing Process .................... 411
  Zheng Detao and Huang XH

Monitoring of Grinding Processes with Acoustic Emission Signals ....................................... 415
  Hong Miao, Lou ZB and Zhang BP

A New Method of Monitoring Centerless Grinding Product in Manufacturing Process ............ 419
  Chen Xiaonian, Jiang ZD, Wang JH, Zhang XC and Li DS

Computer Control of Technological Parameters on Precise Laser Machining ............................ 423
  Han Xiaochun, Sun LF and Sun K
Special Control Method of Stepping Motor Servo System Used in EDM ......................... 427
Zhang Bin

An Optical Fibre Sensor Based Cutting Force Measuring Device ........................... 431
Jin Wenlin and Wang X

C. MANUFACTURING SYSTEM

Study on Relationship Between Reasonable Reliability Distribution and Lowest Production .......... 437
Cost in a Complicated System
Ouyang Zuxing, Ouyang N, Yong ZZ and Zhang XG

The Physical Analogue Method on the Study of Chip-controlling .............................. 441
Fang Ning, Chen YJ, Shi HM and Chen RY

A Study on Effects of Additives on Properties of Working Emulsion for WEDM—HS .............. 445
Fan Zhijian, Zhang AZ, Wang TC and Guo YF

Software Stiffness in Linear Motor Micro-feed System ............................................. 449
Wu Dan, Wang XK and Feng ZJ

The Suppression of Torsional Vibration in the Process of Gun Drilling ......................... 453
Tang Yike and Gu QK

The Optimum Metal Cutting Regime Determined with the Method of Iteration by Microcomputer .... 457
Song Cuifang

Study on the Precise Processing Feasibility of Thermal Energy Method Deburring ............. 461
Zheng Hangyong, Chen JH and Ren JX

Research on the Lubricant Reducing Machine Noise .................................................. 465
Li Shiliang

Design and Manufacture of the Controlled System of Gaseous Laser Lidar for the Mechanical .... 467
Heat Treatment and Foundry Workshops
Zhang Zulin, Zheng CQ and Si TD

A Study on the Interpolation of Three Dimension Space Curve .................................. 471
Huang Yiyuan and Wang B

D. ADVANCED MANUFACTURING PROCESSES

Improvement of Surface Integrity of Internal Thread by Cold Form Tapping .................. 477
Xu Jiuhua and Wang M

A Study of Hydraulic Local Building Process for Manufacturing Tee-pipes .................... 483
Zhong Chengtong, Yang LZ and Li XN

Time Series and Grey System Model of Forecasting Compensatory Control .................... 487
Han Jie

A Model for Dynamical Cutting Process Investigation ............................................... 491
Zhang Jian, Ye XB, Yi CJ and Ku CH
The Study of Expert System Model for CAPP .................................................. 497
Li Zhijun, Liu Y and Wu J

Expert System for Evaluation of Cutting Data .............................................. 501
Ye Wenhua, Xu HC, Wang NS and Zhang YZ

Embedded Scheduling Expert System for FMS Simulation ......................... 505
Zhou Yanfei and Wang NS

An Application of Expert System in Scheduling of FMS ............................ 509
Zhang Lizhen and Wei ZX
