Proceedings
of the
14th Annual International Symposium
on
Electronic Structure of Metals and Alloys
Gaußig, April 2-6, 1984

organized by
Wissenschaftsbereich Theoretische Physik,
Sektion Physik, Technische Universität Dresden,
in cooperation with
Dresdener Seminar für Theoretische Physik

edited by
P. Ziesche

TU Dresden 1984

V. Drchal, J. Kudrnovský
The Auger spectra of ordering alloys

J. Kudrnovsky, J. Mašek
The LCAO-CPA approach to disordered alloys: effect of electron correlation

A. Möbius
The metal-semiconductor transition in three-dimensional disordered systems - Reanalysis of recent experiments pro and con the minimum metallic conductivity

R. Hayn, W. John
Non-exponential localization in an inhomogeneously disordered chain

L. Smrčka
The quantum Hall effect and edge currents

P. Středa
Thermopower of inversion layers in high magnetic field

U.H. Gläser
On the residual resistivity of alloys containing precipitates

Abstracts of papers intended for presentation:
J.T. Devreese
Time dependent Hartree-Fock theory for the electron gas, Cyclotron resonance of polarons

From the following papers no manuscripts have been submitted:
L. Fritsche, Generalized Kohn-Sham theory for spin ordered systems in the presence of spin-orbit coupling. Application to Ni, Fe, Pd
D. Iha, Electrical transport in FeB and NiF amorphons alloys
B. Vasvari, Soft X-ray spectra of amorphons metals
P. Storbeck, Investigation of the electronic structure of a substitutional mixed crystal by means of ARUPS-, AES-, XPS-measurements on the Cr-Ni-steel (111) surface
