Proceedings of the Seventh International Conference

on

Erosion by Liquid and Solid Impact

Robinson College
Cambridge
UK

7-10 September 1987

Editors
J.E. Field, J.P. Dear

Published by Cavendish Laboratory, University of Cambridge.
Printed by the Royal Aircraft Establishment, Farnborough, Hants.
CONTENTS

LIQUID IMPACT; THEORY AND BASIC STUDIES

1. "Acoustic methods for liquid impact and cavitation"
   M. B. Lesser, O. A. Ezekoye, University of Pennsylvania, USA.

2. "Impact of a liquid micro-jet on an elastic-plastic solid surface"
   A. Curnier, S. Ridah, EPF, Lausanne, Switzerland.

3. "Collision of a liquid drop with an elastic halfspace"
   J. Niesytto, J. T. Niesytto, Warsaw, Poland.

4. "Applications of the two-dimensional gelatine technique to erosion problems"
   J. P. Dear, J. E. Field, University of Cambridge, UK.

5. "On the effect of flaw size distribution and flaw density on the rain erosion damage"
   S. van der Zwaag, D. Townsend*, AKZO, Arnhem, The Netherlands and *British Aerospace, Bristol, UK.

LIQUID IMPACT; MATERIAL RESPONSE

6. "The rain erosion resistance of some transparent materials for aerospace applications"
   N. S. Corney, E. M. Minter, RAE, Farnborough, UK.

7. "Multiple impact jet apparatus (MIJA) - development and some damage threshold results"
   P. N. H. Davies, J. E. Field, University of Cambridge, UK.

8. "Rain erosion and induced optical damages of infrared materials - characterization by unique curves"
   A. Déom, D. Balageas, G. Gardette, ONERA, Chatillon, France.

9. "Rain erosion resistance characterization of pure and reinforced slip-cast fused silica by laser simulation"
   A. Déom, F. Laturelle, G. Freydefont, ONERA, Chatillon, France.

10. "Rain erosion resistance of hard carbon coated germanium"
    W. Schaefer, P. Koidl*, R. E. Sah*, Dornier System GmbH, Friedrichshafen, FRG and *Fraunhofer Institute, Freiburg, FRG.

LIQUID IMPACT; TURBINE EROSION, EROSION PREDICTION

11. "Experience in predicting steam turbine blading erosion"
    J. A. Krzyżanowski, Institute of Fluid Flow Machines, Gdańsk, Poland.

12. "New model of droplet impact wear"
    G. Beckmann, J. Krzyżanowski*, Ingenieurhochschule Zittau, GDR and*Institute of Fluid Flow Machines, Gdańsk, Poland.

13. "Drop impact against a hard surface"
    O. A. Povarov, V. F. Rastorguev, V. A. Ridzenkov, Moscow Power Engineering Institute, USSR.

14. "On prediction of erosion wear of details on the basis of its kinetic model by impact of liquid drop on polydisperse flows of moisture"
    A. L. Shubenko, A. E. Kovalsky, Ukrainian Academy of Sciences, Kharkov, USSR.

15. "A model for the erosion of steam turbine blade materials"
    Z. Ruml, A. Liška, SKODA, Plzeň, Czechoslovakia.

16. "Erosion process on the last stage rotor blades of turbines in service"
    B. Staniša, M. Dičko, K. Puklavec, Jugoturbina, Karlovac, Yugoslavia.
LIQUID IMPACT; APPLICATIONS

17. “Study of the mechanisms of coal erosion by high pressure water jets”
M. Mazurkiewicz, J. White, Wroclaw Politech., Poland.

COATINGS

R. H. Parrish, J. J. Wert, W. C. Oliver and P. S. Sklad, Vanderbilt University, Nashville, USA.

19. “Solid particle erosion of thin ceramic coatings”
B. Stridh, P. Hedenqvist, M. Olsson, S. Söderburg, Uppsala University, Sweden.

20. “Helicopter blade leading edge erosion protection study”
K. M. Kalumuck, G. L. Chahifie, D. A. Haynie*, Tracor Hydraulics Inc., Laurel, USA and *Bell Helicopter Textron, Inc., Fort Worth, USA.

21. “The point contact and erosion behaviour of PVD-TiN coated glass”
P. J. Burnett, D. S. Rickerby, AERE, Harwell, UK.

22. “Erosion characteristics of intermediate temperature (537 to 760°C) coatings and base materials for turbine blade path wear protection”
D. H. Linden, Ingersoll-Rand Co., Phillipsburg, USA.

CAVITATION; BASIC STUDIES

M. B. Lesser, M. Finnström, University of Pennsylvania, USA.

24. “Fitting in aluminium alloys produced by air bubble-shock wave interaction”
P. A. Lush, N. Sanada*, K. Takayama†, City University, London, UK,
*Government Industrial Research Institute, Sendai, Japan and †Tohoku University, Sendai, Japan.

25. “Dynamics of vortex cavitation involved in the erosion of hydraulic machines”
F. Avellan, A. Karimi, EPF, Lausanne, Switzerland.

K. A. Mørch, Technical University of Denmark, Lyngby, Denmark.

27. “New approach for cavitation erosion rate computation”
A. Karimi, M. Maamouri, EPF, Lausanne, Switzerland.

28. “On cavitation erosion prediction”
K. Steller, J. Steller, Institute of Fluid-Flow Machinery, Gdańsk, Poland.

CAVITATION; TESTING AND MATERIAL DAMAGE

29. “Cavitation erosion used for material testing”
M. T. Gracey, A. F. Conn, Tracor Hydronautics Inc., Laurel, USA.

30. “Some further studies on erosion and scale effects with plane and cavitation-induced jets”
K. S. Janakiram, B. C. Syamala Rao*, Bangalore, India and *University of Stuttgart, FRG.

31. “Modification of material structure by cavitation and liquid impact and their influence on mechanical properties”
H. Blickwedel, H. Haferkamp, H. Louis, P.T. Tai, University of Hannover, FRG.

32. “Cavitation erosion and deformation mechanisms of Ni and Co austenitic stainless steels”
R. Simoneau, P. Lambert*, M. Simoneau, J. I. Dickson* G. L'Espérance*, IREQ, Varennes, Canada and Polytechnique de Montréal, Canada.

33. “Detection and evaluation of cavitation damages by roughness measurement in their early stages”
H. Haferkamp, H. Louis, P. T. Tai, University of Hannover, FRG.
34. "The relation between cavitation damage in the incubation zone and damage in the steady-state weight loss zone"
S. M. A. Selim, S. P. Hutton*, Menoufia University, Egypt and *Southampton University, UK.

35. "A study on cavitation damage in slurry flow"
J. Zhiye, China Ship Scientific Research Center, Jiangsu, China.

36. "Control of erosive-corrosive wear of power generating equipment with microadditives of surfactants"

SLURRY EROSION

37. "Solid particle wear in hydraulic slurry systems"
A. H. Elkholy, Yarmouk University, Irbid, Jordan.

38. "Resistance of oil-well casing steels to erosion by sand-oil suspensions"
J-C. Cruzado, R. A. Hardin, H. Mcl. Clark, University of Kansas, Lawrence, USA.

39. "Slurry erosion-corrosion on commercially pure iron in a vibratory testing facility - mechanism of erosion-corrosion under predominantly erosion conditions"
Y. Oka, M. Matsumura, M. Yamawaki*, Hiroshima University, Japan, and *Mazda Pump Manufacturing Co., Takarazuka, Japan.

40. "Slurry erosion-corrosion of commercially pure iron in fountain-jet testing facility - mechanism of erosion-corrosion under comparable intensity of erosion and corrosion"
M. Matsumura, Y. Oka, M. Yamawaki*, Hiroshima University, Japan, and *Mazda Pump Manufacturing Co., Takarazuka, Japan.

41. "Erosive influence of mixtures of fine-grained solids in liquids on impeller pumps"
J. Rokita, Silesian Technical University, Gliwice, Poland.

42. "Laboratory and field erosion tests on materials for coal-water slurry burner tips"
R. Martinehla, G. De Michele*, V. Regis*, CISE, Milano, Italy, *ENEL-CRTN, Pisa, Italy, and *ENEL-CRTN, Milano, Italy.

43. "A phenomenological approach to modelling the erosion of WC-Co alloys"
I. G. Wright, D. K. Shetty*, Battelle Columbus Division, USA and *University of Utah, USA.

44. "Resistance of polymeric materials to slurry abrasion"
N. Steward, R. O. Heckroodt, University of Cape Town, South Africa.

GENERAL

45. "Theory and simulation of surface erosion by particle impact"
R. Smith, A. H. Osbaldestin, Loughborough University of Technology, UK.

46. "Scale effects in the surface deformation of ceramics: a review"
T. F. Page, University of Newcastle, UK.

47. "Some views on the formation of ripples on eroded surfaces"
J. Stringer, I. G. Wright*, EPRI, USA and *Battelle Columbus Division, USA.

48. "Resistance of metal surface to impact indentation by spherical projectiles at impact"
I. R. Kleis, H. F. Kangur, Tallinn Technical University, USSR.

49. "Semiempirical model of plastic materials wear in a stream of hard particles"
V. N. Vinogradov, I. B. Cherviakov, Moscow Institute of Oil and Gas, USSR.

SOLID PARTICLE EROSION; METALS

50. "Characterization of individual impact craters on selected aluminum alloys: effect of multiple erosive particle impacts on the hardness of aluminum alloys"
J.R. Keiser, R. S. Heidersbach, W. C. Oliver, Oak Ridge National Laboratory, Tennessee, USA.
51. "Erosion of solid solution strengthened alloys"
A. V. Levy, Z. R. Shui, B. W. Wang, Lawrence Berkeley Laboratory, University of California, USA.

52. "High temperature erosion study of AM355 steel"
W. Tabakoff, University of Cincinnati, USA.

53. "Particle erosion behaviour of laser surface treated Ti-6Al-4V"

SOLID PARTICLE EROSION; BRITTLE MATERIALS AND POLYMERS

54. "Multiparticle erosion of α-quartz single crystals"
Y. H. Shin*, H. Conrad*, G. A. Sargent, *Department of Materials Engineering, North Carolina State University, USA and University of Dayton, USA.

55. "Effect of microstructure on impact damage of polycrystalline alumina"
J. E. Ritter, K. Jakus, M. Viens, K. Breder, University of Massachusetts, Amherst, USA.

56. "Factors influencing the size of particle impact damage"
R. O. Heckroodt, N. Steward, T. M. Karlsen, University of Cape Town, South Africa.

57. "Fracture impact of brittle materials by spherical particles and particle size effect on the material behaviour"
R. Mouginot, ETCA, Arcueil, France.

58. "Dynamic strength properties and solid particle erosion behaviour of a range of polymers"
S. M. Walley, J. E. Field, I. M. Scullion, F. P. M. Heukensfeldt Jansen, D. Bell, University of Cambridge, UK.

SOLID PARTICLE EROSION; CERMETS AND COMPOSITES

59. "Indentation damage in WC materials"
D. J. Rowcliffe, T. Cooper, SRI International, Menlo Park, USA.

60. "Erosion mechanisms in cemented carbides subjected to solid particle erosion"
R. C. Pennefather, R. Hutchings, A. Ball, University of Cape Town, South Africa.

61. "Particulate erosion of WC-Co composites at elevated temperatures"
M. T. Laugier, Materials Research Centre, Limerick, Eire.

62. "The effect of enhanced erosion at the edges of second-phase particles"
T. Ahmed, T. H. Kosel, University of Notre Dame, USA.

63. "Microstructure and rebound energy changes in metal matrix composites by repeated solid particle impact"
I. G. Greenfield, K. R. Stull, R. Vignaud, University of Delaware, USA.

64. "Continuous in-situ mass measurement in solid particle erosion studies and its applications"
F. P. M. Heukensfeldt-Jansen, University of Cambridge, UK.

65. "Validation and statistical nature of accelerated solid particle erosion experiments"
P. Veerabhadra Rao, Bangalore, India.

66. "An improved model of erosion by solid particle impact"
M. Hashish, Flow Industries Inc., Kent, USA.

67. "Computer modelling of the rebound characteristics of spherical erodent particles"
T. S. Sriram, T. H. Kosel, University of Notre Dame, USA.

68. "Method for the prediction of erosion by logarithmic-normal size distributed particles"
K. Shimoda, H. Hojo*, T. Yukawa, Hitachi Plant Engineering, Chiba-ken, Japan and *Department of Chemical Engineering, Tokyo Institute of Technology, Japan.
FLUIDISED BEDS AND EROSION; CORROSION

69. "Experimental study on the relation between erosion wear rate and particle impact velocity measured by LDV"

70. "Numerical prediction of erosion on fluidized-bed heat transfer tubes"

71. "Evaluation of a novel fluidised bed erosion rig"
M. J. Entwisle, I. M. Hutchings, J. A. Little, University of Cambridge, UK.

72. "Erosion-corrosion of steels in simulated and actual fluidized bed combustor environments"
A. V. Levy, W. Bu-Qian, M. Yong-Fa*, N. Jee**, Lawrence Berkeley Laboratory, University of California, USA, *Institute of Metal Research, Shenyang, People’s Republic of China and **Tungsten Carbide Manufacturing, Tustin, USA.

73. "High temperature erosion of alloys in oxidizing environments"
V. K. Sethi, R. G. Corey, Kentucky Energy Cabinet Laboratory, Lexington, USA.

SOLID PARTICLE EROSION; OTHER APPLICATIONS

74. "Erosion in pulverised fuel distribution systems: materials’ selection and plant performance"
T. D. Johnson, M. B. J. Low, M. T. Parry, D. J. Wall, CEGB, UK.

75. "Prediction of flyash erosion in convective pass sections of coal fired systems"
J. F. Drennen, J. G. McGowan*, Combustion Engineering Inc., Windsor, USA and *University of Massachusetts, Amherst, USA.

76. "A practical method for assessing the wear life of pipe bends"
D. Hoadley, T. D. Johnson, CEGB, UK.

77. "Particulate flow dynamics and erosion in gas turbines"
A. Hamed, W. Tabakoff, University of Cincinnati, USA.

78. "Aerodynamics/aeroelastic behaviour of eroded axial turbines"
A. F. Abdel Azim, Zagazig University, Egypt.

79. "Computer calculation of inlet box effect on erosion of centrifugal fans"
M. Mengüutürk, D. Günes, E. F. Sverdrup*, Istanbul Technical University, Turkey and *Westinghouse, Pittsburgh, Pennsylvania, USA.

80. "Mathematical modelling of erosion in the rotors of the centrifugal fans"
J. J. Otte, Z. Bielecki, Institute of Power Machines and Devices, Gliwice, Poland.

81. "The erosive wear of hardened and tempered steels in pneumatic conveying system pipelines"

82. "Benign aerosol influences in the erosive/corrosive combustion boundary layer"
A. C. Buckingham, Lawrence Livermore National Laboratory, Livermore, USA.

83. "Solid particles in nozzles with transpired walls"
D. P. Georgiou, University of Patras, Greece.

84. "Investigation of erosion wear of white irons"
I. Katavic, University V. Bakaric, Yugoslavia.
