Precious Metals 1993

Proceedings of the Seventeenth International Precious Metals Conference
Newport, Rhode Island

DISCLAIMER
The IPMI, its Officers and Publications Committee do not claim accuracy, release of confidentiality nor legality of any information, charts, or references of any paper submitted by authors for this book.
Contents

Overview — Outlook for Platinum, Palladium and Rhodium ... 1

Understanding Trading for the Hedger and Speculator ....... 5
Randall Katzenstein, REFCO, Inc., New York, NY

A Timetable for Investing in Russia ......................... 15
Ronald C. Spurga, ABN AMRO Bank N.V., New York, NY

Process Integration of Sodium Nitrite Oxidation and Fine Grinding in Refractory Precious Metals Concentrate Pressure Leaching ........................................ 19
Dr. Corby G. Anderson, Kevin D. Harrison, L. Ernest Krys,
Sunshine Mining Company, Kellogg, ID

Kinetics of Reducing Rhodium with Normal Pressure Hydrogen in the Hydrochloric Acid Solution .................. 47
Yuehua Lu, Chen Jing, Institute of Precious Metals,
Yunnan, China

Comparative Study of Direct Pressure Oxidation/Cyanidation and a Pyrometallurgical Process for the Recovery of Precious Metals From Sulfide Concentrates ................. 55
Dr. José R. Parga Torres, Hugo Mercado G., Institute of Technology of Saltillo, Saltillo, México

Palladium — A Viable Diffusion Barrier Substitute for Nickel and White Metal Alternative to Rhodium in Decorative Electroplating Applications ..................... 69
Palladium-Nickel Undercoat for Gold Plated Watch Cases — Does It Reduce Porosity and Cost? ........................................ 83
Dr. Indira Rajagopal, K. S. Rajam, S. R. Rajagopalan,
National Aeronautical Laboratory, Bangalore, India
Kumar P. Shah, Progressive Chemical Corporation, Bombay, India

Spectrophotometric and Polarographic Procedures for the Analysis of Palladium-Nickel Bath and Palladium-Nickel Coatings .................................................. 95
R. Kannan, Bharathi Bai J. Basu, S. Sreepathy, S. R. Rajagopalan, National Aeronautical Laboratory,
Bangalore, India

Development of Reference Materials for Assay of Fine Gold ........................................ 101
V. Kogan, M. W. Hinds, G. Ocampo, G. Valente, Royal Canadian Mint, Ontario, Canada

Precise Quantification of Precious Metals by ICP — A Comparison of Sophisticated ICP Methods Versus Classical Wet Chemical Analysis With Regard to Accuracy, Ease of Use and Cost-Effectiveness .................................................. 117
Dr. F. Wissmann, U. Nordheim, W. C. Heraeus GmbH, Hanau, Germany

Microwave Fire Assay .......................................................... 131
Joseph Ching, Brian Schmidt, Adrian Mojica, Engelhard West, Inc., Anaheim, CA

The Development of Coloured Platinum Products for Jewellery ........................................ 141
J. Hurly, P. T. Wedepohl, Mintek, Randburg, South Africa

Optimization of Color and Properties in Karat Golds ........................................ 153
Dr. D. P. Agarwal, G. Raykhtsaum, Leach & Garner Company, North Attleboro, MA

Improving Your Silver Casting ........................................ 157
Richard V. Carrano, Stern-Leach, Attleboro, MA
Gold In Jewelry .................................................. 169
  Dr. G. Raykhtsaum, Dr. D. P. Agarwal, Leach & Garner
  Company, North Attleboro, MA

Silver Chloride — Reduction to Metallic Silver .............. 181
  Roland Loewen, ALCHEMY, Baytown, TX

Extracting Gold and Silver by Thiourea with CIP and FeIL
  Processes ..................................................... 193
  Zhang Jian, Lan Xinzhe, Xian Institute of Metallurgy and
  Construction Engineering, Shaanxi, People's Republic of
  China
  Qi Quozhong, Chen Xiaoyu, Chen Feng, Zhongyan Gold
  Smelting Plant, Shanmengxia, Henan, People's Republic of
  China

Silver Mining in the Big City ................................ 195
  Robert Bailey, Bailey Research, Martinez, CA

Osmium Recovery From Poor in Osmium Platinum
  Concentrates .................................................. 207
  Alexander F. Zolotov, Vladimir N. Gulidov, Norilsk-Nickel,
  Kransnoyarsk, Russia

Silver Electroforming ........................................... 221
  Jack Cunniff, J. C. Gorham, Inc., Providence, RI

Non-Cyanide Plating of Precious Metals ....................... 223
  Dr. Ronald J. Morrissey, Technic, Inc., Providence, RI

Plating the Platinum Group Metals ........................... 225
  Alfred M. Weisberg, Technic, Inc., Providence, RI

Electroless Gold Deposition and It's Applications ........... 227
  Dr. Jean Chevalier, Technic, Inc., Providence, RI

Harmonisation of Hallmarking in the European Community ... 229
Determination of PM’s by ICP at UM: Advantages and
Quality Assurance .............................. 235
Dr. D. Hofmans, E. Adriaenssens, Union Minière SU
Hoboken, Hoboken, Belgium

Quality Assurance — The Way Ahead .................. 247

Hallmarking in Europe: An Outlook on Post 1993
Implications for the US Jewelry Industry ........ 249
Axel Julius Epple, Aristo Marketing Corporation, Providence, RI

Use of Chlorine in the Processing of Gold Ores .......... 265
Dr. Gopalan Ramadorai, Mountain States R and D
International Inc., Vail, AZ

Leaching Gold and Platinum Group Metals by the LSSS
Method ........................................... 281
Zhang Jian, Lan Xinzhe, Yu Nengwen, Ding Feng, Xian
Institute of Metallurgy and Construction Engineering, Shaanxi,
People’s Republic of China
He Huanhua, Huang Yang, Uy Rongton, Zhang Shuzhao,
Jingchuang Nonferrous Metal Company, Jingchuan, Gansu,
People’s Republic of China

Precious Metal Refining: Meeting the Challenge of the ‘90’s 289
Daniel Castilleja, Academy Precision Materials,
Albequerque, NM

Classification and Solubility Regularity of Insoluble
Coordination Compounds of Platinum Group Metals 295
Chen Jing, Institute of Precious Metals, Kunming, China
Kinetic Study on Redox Reaction of Iron (III) with Thiourea in Acidic Thiourea Solution for Leaching Gold and Silver . . . 303
Lan Xinzhe, Zhang Jian, Xian Institute of Metallurgy and Construction Engineering, Shaanxi, People's Republic of China
Xiu Jingfu, Li Wenxin, Shaanxi Metallurgical Engineering School, Shaanxi, People's Republic of China
Liu Mingshan, Shaanxi Gold Company, Shaanxi, People's Republic of China

What Factors Determine the Price of Gold? .................... 305
James Turk, Freemarket Gold & Money Report, Greenwich, CT

Why Are So Many Industries Moving to Mexico? .............. 313
Subhash Malhotra, Arthur D. Little, Inc., Cambridge, MA

Commercial Ramifications of Silver Brazing Alloys with Market Price Fluctuations ...................... 315
George N. Williams, Fusion Incorporated, Willoughby, OH

Recovery of Platinum Group Metals From Aqueous Solution Using Extraction/Ion Exchange ................ 321
Keith D. Wisecarver, Thomas M. Harris, Nicholas Takach, University of Tulsa, Tulsa, OK

High — Effective Catalyst for Purifying Internal Combustion Engine Exhausts ...................... 323
Huang Rongguang, Li Shuping, Institute of Precious Metals, Kunming, People's Republic of China

Monetary Risk in Sampling Auto-Catalyst .................. 333
Leon Beaudin, Engelhard West, Inc., Lincoln Park, MI

Rhodium, Platinum, and Palladium Recovery from New and Spent Automotive Catalysts .................... 343
Kuo-Ying Amanda Wu, Keith D. Wisecarver, Martin A. Abraham, Nicholas Takach, Ningsheng Yang, University of Tulsa, Tulsa, OK
A Review of Precious Metals Refining .................................................. 351
Dr. G. B. Harris, Mining Industry Technology Council of
Canada, Ontario, Canada

The Application of Ion Exchangers in the Precious Metals
Technology ......................................................................................... 375
Dr. Sudhir C. Dhara, SCD Associates, La Habra, CA

The Solvent Extraction of Precious Metals — A Short
Review ............................................................................................... 411
Michael B. Mooiman, Metalor USA Refining Corporation,
North Attleborough, MA

50 Years of the Extracting Gold and Silver by Thiourea —
A Literature Review ......................................................................... 435
Lan Xinzhe, Zhang Jian, Xian Institute of Metallurgy and
Construction Engineering, Shaanxi, People's Republic of
China
Zang Junquan, Shaanxi “Ba—Yi” Copper Mine, Xian,
Shaanxi, People's Republic of China

A Review of Platinum Group Metals Recovery From
Automobile Catalytic Converters ...................................................... 449
Dr. Rajesh Kumar Mishra, Pease and Curren Inc.,
Warwick, RI

Platinum-Containing Fuel Cells Update — A
Commercialization Perspective ......................................................... 475
Dr. Marino Y. C. Woo, Fuji Electric Corp. of America,
Lincoln Park, NJ

Application of Precious Metals for Silicide Formation:
Morphological Stability Issues ......................................................... 481
Ravi M. Bhatkal, Krishna Rajan, Rensselaer Polytechnic
Institute, Troy, NY
A Method of Preparing Palladium — Silver Alloy Powders
From An Aqueous Solution .................................. 491
Yu Shougeng, Zhang Linzhen, Institute of Precious Metals,
Kunming, China

The Growing Market for Fuel Cell Technology —
Implications for Precious Metals ............................ 495
Dr. W. Peter Teagan, Dr. Brian M. Barnett, Arthur D. Little,
Inc., Cambridge, MA

Metallographic Investigation of Catalyst Gauzes Used for
Ammonia Oxidation ............................................. 503
Zbigniew Rdzawski, Institute of Non-Ferrous Metals, Glwice,
Poland
Kazimierz Kozlowski, Institute of Fertilizers, Pulawy, Poland
Bogdan Nikiel, Polish State Mint, Warsaw, Poland

The Role of Precious Metals in Environmental Catalysis .... 513
Dr. Robert J. Farrauto and Ronald M. Heck, Engelhard
Corporation, Iselin, NJ

Is Hazardous Waste Edible? .................................. 521
William C. Duncan, Pegasus Consultants, LTD., Aurora, CO

Caught in the Act: Chemical Monitoring for the Clean Air
Act ................................................................. 525
James R. Valentine, Arthur D. Little, Inc., Cambridge, MA

A Proposal for Regulatory Control of Secondary Precious
Metals ............................................................. 527
John C. Bullock, Handy & Harman, Waterbury, CT

The Determination of Gold in Cathode Copper .............. 539
Ed C. Thompson, Phelps Dodge Refining Corporation,
El Paso, TX
