PROCEEDINGS OF THE
FOURTH INTERNATIONAL CONFERENCE
ON CEMENT MICROSCOPY

GEORGE R. GOUDA, Editor
JAMES BAYLES, Assistant Editor
ANDREW KRAFT, Assistant Editor

SPONSORED AND ORGANIZED BY:
INTERNATIONAL CEMENT MICROSCOPY ASSOCIATION
1206 COVENTRY LANE, DUNCANVILLE
TEXAS, 75137, U.S.A.

RIVIERA HOTEL,
LAS VEGAS, NEVADA
MARCH 28 - APRIL 1, 1982

PANEL DISCUSSION I
APPLICATION OF THE MICROSCOPE TO CLINKER QUALITY CONTROL

1. Introduction
Kathy S. Jones, General Portland Inc., U.S.A.

2. Thoughts Regarding the Ono Method of Portland Cement Clinker Analysis
W. J. Prout, St. Mary's Cement Company, Canada

4. Application of Ono Method at Canada Cement Lafarge
Hung Chen, Canada Cement Lafarge Ltd., Canada

6. Use of the Ono Technique
Peter Hawkins, California Portland Cement Co., U.S.A.

7. Interpretations of Burning Conditions with Powder Mounts
D. H. Campbill, Portland Cement Association, U.S.A.

9. Comments on Ono's Method and Cement Microscopy
Robert C. O'Neill, Kaiser Cement Corporation, U.S.A.

PANEL DISCUSSION II
APPLICATION OF THE MICROSCOPE TO CONCRETE QUALITY CONTROL

11. What Does It Mean?
Bernie Erlin, Erlin & Hime, U.S.A.

12. Concrete Microscopy at the Construction Technology Laboratories
D. H. Campbill, Portland Cement Association, U.S.A.
Use of the Microscope in the Ready-Mix Concrete Industry
Arturo Nisperos, Material Service Corp., U.S.A.

SESSION I
LIME AND AGGREGATE MICROSTRUCTURES

The Microscope and Lime
Daniel D. Walker, Jr., Genstar Cement and Lime Co., U.S.A.

Microstructure of Natural and Artificial Aggregates
George R. Gouda, Kuwait Institute for Scientific Research, Kuwait

SESSION II
CLINKER MICROSTRUCTURE

Influence of Second Firing System Incorporated in Suspension Preheater Kilns of Clinker and Cement Quality
Ingo E. Dreizler, KHD Humboldt Wedag AG, West Germany

Investigation of the Formation of Portland Cement Clinker in a Pilot Rotary Kiln by the Aid of XRD and Microscopy
Andras Janko, Central Research and Design Institute for Silicate Industry, Hungary

Microscopic Analysis of Portland Cement Clinker Applied to Rotary Kiln and Compressive Strength Control
James K. Hicks, General Portland Inc., U.S.A.
Jack D. Dorn, Martin-Marietta Cement, U.S.A.

Clinker Quality Characterization by Reflected Light Techniques
G. R. Long, Blue Circle Industries PLC., England

Effects of Kiln Feed Particle Size and Mineralizers of Clinker Microstructure and Cement Quality – a Case Study
R. V. Hargave, R. D. Shah, A. K. Chatterjee, and B. S. Rangnekar, Associated Cement Co., Ltd., India

The Effect of Burning Environment on the Microscopic Characteristics of Portland Cement Clinker
G. R. Long, Blue Circle Industries PLC., England
Microstructure of Alite Crystals in Portland Clinker Fused in the Induction Generator
Cizary Wieja, Institute of Binding Building Materials, Poland; Krystyna Wieja, Institute of Building Materials and Refractories, Academy of Mining and Metallurgy, Poland

Quantitative Phase Analysis of Cement Clinker by the Analytical Electron Microscope
Ferenc O. Tamas and Kristof Kovacs, University of Chemical Engineering, Hungary

Applications of Transmission Electron Microscopy to Portland Cement Clinkers and Cement Pastes
G. W. Groves, University of Oxford, England

Refractory Problems in Portland Cement Manufacture
G. R. Long, Blue Circle Industries PLC, England

SESSION III
CEMENT AND MORTAR MICROSTRUCTURE

Use of Heavy Liquids as an Aid in the Microscopical Analysis of Cement Related Materials
Jack D. Dorn, Southwestern Portland Cement Co., U.S.A.

Mechanism of Hydration of Portland Cement Composite Containing Ferro Silicon Dust
M. W. Grutzeck and D. M. Roy, Penn State University, U.S.A.

Microstructure of Ettringite Produced by Different Methods
Salah Abo El-Enein, Qatar University, State of Qatar

Microstructural Analysis of Ettringite Formation: Scanning Electron Microscope
Menashi O. Cohen, Northeastern University, U.S.A.

The Use of the Petrographic Microscope in Manufacture of Portland Cement and Related Technical Services
Richard L. Werner, River Cement Company, U.S.A.
Study of the Causes of Mortar Failure by Means of the Scanning Electron Microscope (SEM)
Stella L. Marusin, Wiss, Janney, Elstner and Assoc., U.S.A.

Microstructure and Properties of Carbonated Pastes and Mortars
M. Hornain, B. Mortureaux, and M. Regourd, Microstructures Department, C.E.R.I.L.H., France

SESSION IV
CONCRETE MICROSTRUCTURE

Microstructure of Concretes Containing Silica Fume
M. Regourd and B. Mortureaux, Microstructures Department C.E.R.I.L.H., France
P. C. Aitchin and P. Pinonneault, University of Sherbrooke, Canada

Influence of the Reaction Between Cement and Laumontite on the Microstructure of Concrete
M. Ono, M. Nagashima, S. Saito, and E. Asakura, Mitsubishi Mining and Cement Co., Ltd., Japan

Modified Rapid Method for Petrographic Examination of Bulk Aggregate Samples
L. Dolar - Mantuani, Consultant Petrographer, Canada

The Use of Multidiscipline Approach for Concrete Examination
Frederick D. Kinney, Master Builders, U.S.A.

A Factor Which May Affect Differences in the Determined Air Content of Plastic and Hardened Air-Entrained Concrete
Frank T. Gay, Master Builders, U.S.A.

Sulphur Concrete - Inside a New Composite
M.E.D. Raymont, Sudic, Canada

Fifth Internation Conference of Cement Microscopy: Calls for 1983 Papers

Sample Exchange Program
Walter Rowe, General Portland, Inc.
Dallas, Texas, USA
