PROCEEDINGS OF THE
SEVENTH INTERNATIONAL CONFERENCE
ON CEMENT MICROSCOPY

JAMES BAYLES, Editor
GEORGE R. GOUDA, Editor
ARTURO NISPEROS, Editor

SPONSORED AND ORGANIZED BY:
INTERNATIONAL CEMENT MICROSCOPY ASSOCIATION
1206 COVENTRY LANE, DUNCANVILLE
TEXAS, 75137, USA

AMERICANA HOTEL
FT. WORTH, TEXAS, USA
MARCH 25 - 28, 1985
TABLE OF CONTENTS

Committee of the International Cement Microscopy ii

A Word of Thanks iii

Foreword iv

Introductory Remarks v

Notes vi

Table of Contents of 1985 Proceedings vii
# TABLE OF CONTENTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Case History - Radical Modification in Kiln Feed Fineness</td>
<td>1</td>
</tr>
<tr>
<td>O. N. Wheeler, Independent Cement Corporation</td>
<td></td>
</tr>
<tr>
<td>The Influence of Coarse Quartz in Kiln Feed on the Quality of Clinker and Cement</td>
<td>10</td>
</tr>
<tr>
<td>Jack D. Dorn, Southwestern Portland Cement Company, Corporate Process Laboratory, Victorville, California</td>
<td></td>
</tr>
<tr>
<td>Degradation of Cements by Magnesium Brines - A Microscopic Study-</td>
<td>24</td>
</tr>
<tr>
<td>Ruediger Oberste-Padtberg, Etudes et Fabrication Dowell Schlumberger, Saint Etienne, France</td>
<td></td>
</tr>
<tr>
<td>Practical Oilwell Cement Microscopy</td>
<td>37</td>
</tr>
<tr>
<td>W. J. Caveny and Willis Weigand, Halliburton Services Research Center, Duncan, Oklahoma</td>
<td></td>
</tr>
<tr>
<td>Additional Examination of the Ring Formed in a Clinker Burning Pilot Rotary Kiln by Means of Thermogravimetric Analysis (TGA) and Electronmicroscopy (SEM)</td>
<td>56</td>
</tr>
<tr>
<td>András Jankó, Central Research and Design Institute for Silicate Industry, Budapest, Hungary</td>
<td></td>
</tr>
<tr>
<td>Microstructure of the Circulating Load of a Portland Cement Finish Mill</td>
<td>67</td>
</tr>
<tr>
<td>J. Bayles, Coplay Cement Company, Nazareth, Pennsylvania</td>
<td></td>
</tr>
<tr>
<td>Review of Optical Microscopy in Cement Research</td>
<td>73</td>
</tr>
<tr>
<td>S.L. Sarkar, Department of Geology and Mineral Sciences, University of Ilorin, Ilorin, Nigeria</td>
<td></td>
</tr>
<tr>
<td>D.M. Roy, Materials Research Laboratory, The Pennsylvania State University, University Park, Pennsylvania 16802, USA</td>
<td></td>
</tr>

Application of Microscopy, XRD and DTA in Study of Cement Raw Mix Burnability

G. Goswami and J.D. Panda, Dalmia Institute of Scientific and Industrial Research, Rajgangpur-770017, India

Panel on Kiln Control

Jim Frederick, Texas Industries Inc.

Panel on Specific Measures for Kiln Control Remarks

Peter Hawkins, California Portland Cement Company

Panel on Specific Measures for Kiln Control Remarks

Walter W. Rowe, General Portland Inc.

Effect of Alkalies and Sulfur on the Formation of Clinker Phases And on the Cement Properties

Ingo E. Dreizler, KHD Humboldt Wedag AG, Cologne, West Germany Josef Strunge and Dietbert F. E. Knöfel, University Siegen at Siegen, West Germany

Eight Years of Microscopic Experience at the Fairborn, Ohio Plant

Tom Rader, Southwestern Portland Cement Company, Fairborn, Ohio

Microscopically Determinable Parameters and Their Relationship To Kiln System and Clinker Grindability

B. Scheubel, Krupp Polysius Research Center, Beckum, West Germany

Microstructures Found in the Solidification of Compositions of the System CaO-Al_{2}O_{3}-Fe_{2}O_{3} and Its Variations by the Presence of CaF_{2}

A. Palomo, M.T. Blanco-Varela and T. Vázquez, Instituto Eduardo Torroja de la Construcción, y del Cemento (C.S.I.C.) Madrid
A Survey of Stains and Etches for Polished Section 167

Paul Lehoux, Research and Technical Center, Canada Cement Lafarge Limited, 6150 Royalmount Avenue, Montreal, Quebec, Canada, H4P 2R3
William R. Carruthers, General Portland Inc., Dallas, Texas

Electronprobe Microanalysis for Kiln Troubleshooting 174

H. Chen*, M. Conjeaud†, P. Lehoux*
* Research and Technical Center, Canada Cement Lafarge Ltd., 6150 Royalmount Ave., Montreal, Quebec, Canada, H4P 2R3
† Trappes Research Centre, Lafarge Coppee Research, 2 Albert Einstein Ave., Trappes, France

Effects of Clinker Size on Grindability 196

C. E. Buchanan, Jr., Roan Industries Inc.
H. J. Bayles, Coplay Cement Company

Quality Prediction System for Cement Production 213

T. Aizawa, Onoda Cement Company, Tokyo, Japan

The Practical Application of Simple Microscopy to Cement Plant Operations 220

W. J. Prout, St. Marys Cement Company

The Effect of Lime and Alkali on the Hydration Reaction of C₃A In Presence of Gypsum 232

H.Y. Ghorab and S.H. Abou El Fetouh, Department of Chemistry, University College for Girls, Ain Shams University, Heliopolis Cairo, Egypt
S.L. Marusin, Wiss, Janey, Elstner Associate, Inc., Northbrook, Illinois 60062, USA

X-ray Diffraction Studies on the Effect of Cooling on Clinker Microstructure 243

Hydration and Microstructural Characteristics of β-Dicalcium Silicate

S. A. Abo-El-Enein, K. Kh. Al-Nauimi, Faculty of Science, Ain Shams University, Cairo, Egypt
Stella L. Marusin, Wiss, Janney, Elstner Associates, Inc., USA

Crystal Morphology Under Pressure

M. D. Cohen¹ and H. Nayeb Hashemi², Department of Civil Engineering, Northeastern University, Boston, Massachusetts 02115
¹ Associate Professor and Director of Civil Engineering, Materials Laboratory
² Assistant Professor, Department of Mechanical Engineering

Electrical Conductivity and Microstructure of the Hydrated C₃A

S. A. Abo-El-Enein, Th. M. Salem, S. Hanafi and S. M. Abd-El-Wahab, Faculty of Science, Ain Shams University, Cairo, Egypt
Stella L. Marusin, Wiss, Janney, Elstner Associates, Inc., USA

The Matrix and Its Resistance of Fly Ash Concrete

R. Blaschke, Institute of Medical Physics, WWU Münster, Germany

The Effect of Mix Temperature on Air Content and Spacing Factors Of Hardened Concrete Mixes with Standardized Additions Of Air-Entraining Agent

Frant T. Gay, Master Builders, Cleveland, Ohio, USA

Identification of Reactive Concrete Aggregates Containing Strained Quartz by SEM and IR

A. K. Mullick, George Samuel and S. N. Ghosh, Cement Research Institute of India

Contribution on the Influence of SO₂ on Cement Mortar and Concrete

Dietbert F. E. Knöfel and Karl G. Rottger, Universität Siegen, Siegen, West Germany
Panel Discussion on Case Histories on Concrete Petrography

Problem Solving by Petrographic Techniques

Robert C. O'Neill, Micro-Chem Laboratories

Kinetics and Morphology of Ettringite Formation

M.D. Cohen¹, E. Campbell², W. Fowle³, Department of Civil Engineering, Northeastern University, Boston, Massachusetts 02115
¹ Associate Professor and Director of Civil Engineering, Materials Laboratory
² Former Graduate Student
³ Supervisor, Center for Electron Microscopy

SEM Studies on Polished Clinker Surfaces

+ Presently: Res. Inst. of Building Materials, Beijing, China

The Application of Microscopy in the Determination of Alkali-Aggregate Reaction

D.A. St John, Chemistry Division, DSIR, Private Bag, Petone, New Zealand

Quantification of Varying Effects of a Set of Clinker Microstructural Parameters on Cement Strength at Various Ages

R.V. Hargave, D. Venkateswaran, V.V. Deshmukh and A.K. Chatterjee, Research and Development Division, The Associated Cement Cos. Ltd., Thane 400 604, India

Microstructure and Pore Characteristics of Conventional Portland Cement Concrete Vs Concrete Containing HRWR

Sample Exchange Program

Walter W. Rowe, General Portland Inc., Dallas, Texas, USA

Instructions for Manuscript Preparation
