The National Centre of Systems Reliability and the University of Bradford

Proceedings

9th Advances in Reliability Technology Symposium

ARTS 86

Venue: University of Bradford, Bradford, UK. 2, 3 and 4 April, 1986
CONTENTS

Wednesday 2nd April 1986

SESSION A1: RELIABILITY MANAGEMENT
CHAIRMAN: MR. A. J. BOURNE, HEAD OF NATIONAL CENTRE OF SYSTEMS RELIABILITY (RETIRED)

Analytical Systems Availability Techniques
J. J. H. Brouwers, P. H. J. Verbeek & W. R. Thomson, Shell UK Exploration and Production, UK

Management of Reliability in the Marine Industry
H. C. Blanding, American Bureau of Shipping

The Scaling of Repairable Spares
A. J. Beck, Theta Analysis & Systems Ltd., UK

SESSION A2: RELIABILITY ASSESSMENT
CHAIRMAN: DR. A. Z. KELLER, CHAIRMAN, POST-GRADUATE SCHOOL OF STUDIES IN INDUSTRIAL TECHNOLOGY AND MANAGEMENT, UNIVERSITY OF BRADFORD

A Maintainability Prediction Methodology for Use in Aircraft Design
V. C. Serghides & J. P. Fielding, Cranfield Institute of Technology, UK

Applications of Systems Analysis Techniques Vulnerability Studies of Complex Installations
T. F. Bott, Los Alamos National Laboratory, USA

Forecasting Reliability Growth
D. K. Lloyd, TRW Inc., USA

Movement Control, Auditing and Accountability of Fissile Materials; a Bayesian Approach
R. D. Leitch, Royal Military College of Science, UK

SESSION A3: AVAILABILITY ANALYSIS
CHAIRMAN: MR. C. A. CAMPBELL, SENIOR RELIABILITY CONSULTANT MAINTENANCE SUPPORT DIVISION, BUSINESS TECHNICAL SUPPORT DEPARTMENT, BP INTERNATIONAL LTD.

An Investigation into the Availability and Reliability of a Fleet of Vehicles
M. G. Rothery, University of Southampton/Metal Box Plc, UK

Required Reliability Level as the Optimization Criterion
J. Knezevic, University of Exeter, UK

Downtime Analysis for Electrical Generating Plant
R. F. de la Mare, A. E. Izundu, University of Bradford UK, and I. A. Watson, UKAEA, UK

Bayesian Maintainability Demonstration Tests
B. A. Basker, Reliability Consultants Ltd., UK & A. Winterbottom, The City University, UK

Power System Quality – Quality and Costs. Application to Heat Exchangers
R. Paggi, ENEL-DCO, Italy

Thursday 3rd April, 1986

SESSION B1: MECHANICAL AND STRUCTURAL RELIABILITY
CHAIRMAN: MR. P. MARTIN, SENIOR LECTURER, DEPARTMENT OF MECHANICAL ENGINEERING, UNIVERSITY OF LIVERPOOL

Damage Accumulation in Structures
J. G. Parkhouse, Atkins Research & Development, UK

Recent Advances in Optimal Design of Structures from a Reliability Point of View
P. Thoft-Christensen & J. D. Sørensen, University of Aalborg, Denmark

A Method for the Reliability Analysis of Steel-Jacket Off-shore Platforms Under Extreme Loading Conditions
Y. Guenard, Elf Aquitaine, France, & C. A. Cornell, Stanford University, USA

Modelling the Reliability of Sodium Sulphur Batteries
R. O. Ansell, Glasgow College of Technology, UK, and J. I. Ansell, Coventry Polytechnic
SESSION B2: COMMON CAUSE FAILURE ANALYSIS
CHAIRMAN: DR. G. M. BALLARD, ACTING HEAD OF NATIONAL CENTRE OF SYSTEMS RELIABILITY.

COMMON CAUSE OF MULTIPLE AERO-ENGINE SHUT-DOWNS
F. H. Thomas, Rolls Royce Ltd., UK

Reliable and Safe Control Systems Using Fault Tolerance
J. H. Wensley, August Systems Inc., UK, & C. J. Goring, Low & Bonar Plc, UK

A Survey of Maintenance and Replacement Models for Maintainability and Reliability of Multi-Item Systems
L. C. Thomas, University of Edinburgh, UK

SESSION B3: HUMAN FACTORS
CHAIRMAN: MR. I. A. WATSON, HEAD OF SYSTEMS RELIABILITY SERVICE, NATIONAL CENTRE OF SYSTEMS RELIABILITY

Improving Human Reliability: Practical Ergonomics for Design Engineers
S. G. Collier & R. J. Graves, Institute of Occupational Medicine, UK

The Human Cause of Failures in the Construction Industry
P. Jackson, Heriot Watt University, UK

Understanding and Reducing Human Error in High Technology Systems
D. E. Embrey, Human Reliability Associates, UK

HEART - A Proposed Method for Assessing and Reducing Human Error
J. C. Williams, Sizewell B Project Management Team CEGB

SESSION B4: SOFTWARE RELIABILITY
CHAIRMAN: DR. R. N. ALLEN, SENIOR LECTURER, DEPARTMENT OF ELECTRICAL ENGINEERING & ELECTRONICS, UMIST, MANCHESTER

Microprocessor-Based Systems Software Failure Process and Probabilistic Model for System Reliability Prediction
Miss O. T Ososanya, Department of Engineering Production, University of Birmingham, & O. J. Downing, University of Bradford, UK

Software Reliability Prediction: Derivation of Model Parameters from Failure Data and their use in Forecasting
P. Mellor, The City University, UK

Fitting Software Failure Data with Stochastic Models
I. P. Schagen & M. M. Sallih, University of Technology, Loughborough, UK

Development Processes and Environments, and their Relationship to Software Reliability
C. J. Leach, Aregon International Ltd., UK

Friday 4th April 1986

SESSION C1: SYSTEM SAFETY
CHAIRMAN: PROFESSOR P. THOFT-CHRISTENSEN, UNIVERSITY OF AARLBORG, DENMARK

Root Cause Analysis of the Reliability of Standby Diesel Generators at a Nuclear Power Station
M. G. K. Evans, NUS Corporation, USA, & J. S. Wu, Institute of Nuclear Energy Research, Republic of China

Probabilistic Factors in Radio Frequency Ignition and Detonation Hazards Analyses
R. A. James, P. S. Excell & A. Z. Keller, University of Bradford, UK

Application of a Process Flow Model to a Shutdown Nuclear Plant Probabilistic Safety Assessment
D. C. Bley, Pickard, Lowe & Garrick, USA, W. B. Reuland, Electric Power Research Institute, USA

SESSION C2: MODELLING AND ANALYSIS
CHAIRMAN: DR. A. VEEVERS, SENIOR LECTURER, DEPARTMENT OF STATISTICS AND COMPUTATIONAL SCIENCE, UNIVERSITY OF LIVERPOOL

The Reliability of Equipment Fitted to a Fleet of Ships
D. A. Triner, Lloyd's Register of Shipping, & M. J. Phillips, University of Leicester

Analysis of Reliability Data using Graphic-Based Interactive Techniques
R. N. Allan & N. M. Abu-Sheikhah, University of Manchester Institute of Science & Technology, UK

Time Series Methods in Reliability
L. A. Walls & A. Bendell, Trent Polytechnic, UK

Systems Reliability from Component Data
S. Humble & M. D. Sandford, Royal Military College of Science, UK
