TABLE OF CONTENTS

Selected Abstracts

Special Interest Group for Academic Computing (SIGAC)

Computer Inventories are Valuable Benchmarks
   Elisabeth M. Craig, The University of Tennessee at Chattanooga ............................................... 2

Instructional Computing Laboratory Project
   David W. Dalton, Kent State University ......................................................................................... 2

Technological Solutions: Faculty + Instructional Designer = High-Quality Product
   Carol A. Dwyer, Pennsylvania State University .............................................................................. 3

Lessons Learned While Developing a University Academic Computing Plan
   Peter C. Issacson, University of Northern Colorado ........................................................................ 3

HyperCard in Higher Education: Successes, Challenges, and Strategies for Use
   Annette Lamb, University of Toledo ................................................................................................. 4

Instructional Design for Computer-Mediated Communication
   Maurice Mitchell, University of Nevada System Computing Services ........................................... 4

Authoring Templates in PILOT: Assisting More Faculty with Fewer Resources
   Barbara A. Polka and Marilyne W. Stout, Penn State University .................................................... 5

An Update on The Model Classroom Project at Penn State
   Lawrence C. Ragan, Pennsylvania State University ........................................................................ 5

100% of Empire State College Faculty are Involved in Computing: This is How We Did It
   Carol A. Twigg, Empire State College ............................................................................................. 6

The Maryland Nuclear Science Baccalaureate Degree Program: On-Site, On-Line, On-Time
   Marcia A. Whitney, Thomas A. Janke, University of Maryland; and J. Robert Mueller,
   Wisconsin Public Service Corporation ............................................................................................. 6

Instructional Computing Strategies: Creativity on Campus
   Laura Yordy, University of North Carolina at Greensboro ................................................................. 7

Special Interest Group for Computer-Based Training (SIGCBT)

Methodologies for Design and Production of CBI
   André Boder, Project Start Up ........................................................................................................ 10

Ergonomic CBT
   Kay Bonham, Goal Systems International ....................................................................................... 10

An Example of a Cooperative Effort Between Industry and Academia
   Jerry L. Brown, Hewlett-Packard Company; and Emile Attala, California Polytechnic State University ... 11
Sometimes the Most Cost Effective Training Is...No Training
Charles C. Buchanan, United Airlines ................................................................. 11

Computer-Based Instruction for Teaching English as a Second Language in Taiwan
Lih-Juan Chanlin and Thomas C. Reeves, University of Georgia............................. 12

Combining Accelerated Learning and Computer-Based Learning
Frank Clement, Boulder Center for Accelerated Learning; and Chuck Buchannan, United Airlines ................................................................. 12

Implementing the Advanced Qualification Program (AQP) Fokker-100 (F-100)
Pilot Training at American Airlines
Angela G. Coburn and Janet A. Wise, American Airlines........................................ 13

Evaluation of an Instructional Design Workstation at Multiple Sites
Kent L. Gustafson and Thomas C. Reeves, The University of Georgia; and Alberta Wray, Apple Computer ... 13

Can Computer-Based Training be Fun? ARCO Thinks So
Connie Haskell, Digital Equipment Corporation ...................................................... 14

Building a Consortium to Produce A Computer-based Learning Module: Concepts versus Experience
Brian E. Heckman, COMET.................................................................................... 14

ISD & SDLC: Similar Tunes, Different Lyrics
Michael J. Hillelsohn, McDonnell Douglas Space Systems........................................ 15

"ThreatBusters" Computer-Based Instructional Game
John W. Keller and John A. deVries, Los Alamos National Laboratory ..................... 15

Conducting and Using a Task Analysis to Focus Computer-Based Training Materials
Frederick G. Knirk, University of Southern California; and DanielChristinez,
Navy Personnel Research and Development Center.............................................. 16

Just in Time Training
Judith Morel, Marc Hopkins and Melissa Berkowitz, Tandem Computers.................... 16

Information Requirements for Learner-Controlled CAI
James R. Okey and Marshall G. Jones, The University of Georgia............................ 17

Writing CBT for Profit - The Practitioners' Method
Jeff Oliver, Castle Learning Systems Ltd .................................................................. 17

Computerized Certification Exams for Reactor Operators at the Advanced Test Reactor
L. W. Peterson and Lee. Ann R. Summers, EG&G Idaho Inc ....................................... 18

A Review of Cooperative, Competitive, and Individualistic Goal Structures as
Applied to Computer-Assisted Instruction
Gary C. Powell, University of Georgia ...................................................................... 18

Development of Integrated Training Systems
Michael Reakes, Hughes Training Systems ................................................................ 19

Evaluation of CBT in Accounting
Thomas H. Rowley, Georgia State University ............................................................. 19

CBT Downunder: A Report on the 1990 Australian CBT Conference
Rod Sims, University of Technology, Sydney ............................................................. 20

Selecting An Authoring System: Tradeoffs, Compromises, and Consequences
Linda S. Stanley and James R. Okey, University of Georgia................................. 20
Integrating Relational Database Principles into CBT Authoring Environments
Janet A. Wise, R. Ken Brownlow, and Angela G. Coburn, American Airlines .................. 21

Using Autodesk Animator™ in Computer-Based Training Material
Julian Wakeley, Abbey National plc ......................................................... 21

Rapid Prototyping Methodologies for Computer Based Instruction: Two Examples
S. Wang, University of Colorado; D. Wunderlich, McAir Corp.; and D. Owens, and UCAR-COMET ....... 22

Integrating Relational Database Principles into CBT Authoring Environments
Janet Wise, Ken Brownlow, and Angela Coburn, American Airlines .......................... 23

How to Talk to a Subject Matter Expert
Larry E. Wood and John M. Ford, Brigham Young University .................................. 23

Special Interest Group for Elementary, Secondary, and Junior College Education (SIGELSECJC)

An Environment to Learn Argumentation
André Boder, Project Start Up ......................................................................... 26

Logo Instruction and Students' Ordered Trees of Programming Concepts
Gregg Brownell, Bowling Green State University; and Dieter Zirkler, Mead Corporation .......... 26

CAI Design for Metacognition
Bernard J. Dodge, San Diego State University ................................................ 27

A Media Center for the 21st Century
Vicki Durbin and Donna Schell, Yavapai School ............................................... 27

Computers, Critical Thinking, and Freshman Composition
Rex Easley and Gary Vaughn, University of Cincinnati ....................................... 27

The Computerized Writing Classroom and "High-Risk" Learners
Rex Easley and Gary Vaughn, University of Cincinnati ........................................ 28

Computer-Assisted Instruction on the Mac II
Mary M. Finnen, Steven M. Lawton, Bryce Bate, Kathleen Davey, William Jensen, and Russell Skavaril, The Ohio State University ......................... 28

Hispanic Math Project: A Multimedia Learning Station
Wayne Hartschuh and Rocio Sanchez, Arizona State University ......................... 29

Factors Influencing the Adoption and Implementation of an Innovation
Frances Hensley, The University of Georgia .................................................. 29

Personal and Academic Applications of HyperCard: A High School Course
Annette Lamb, University of Toledo .............................................................. 30

Managing the Computer-Based Classroom
Frederick Knirk and Mary Pinola; University of Southern California ...................... 30

Computers in Education: A Graduate Program Design
Lynne Levy and Louis Molinari, Glassboro State College .................................... 31

Which Parents Send Their Young Ones to Computer Classes and Why
Charlotte Scherer, Bowling Green State University .......................................... 31

The Taliesin Project: Integrated Curriculum Using Hypermedia
Eric E. Smith, University of Northern Colorado; and John Redman, Hewlett-Packard Company .................. 32
French and German Diction: Designing an Adaptable HyperCard Stack
James T. Talley and Donna E. Williams, The Ohio State University ........................................ 32

Instructional Transformation Through Instructional Technology: A Model for Change
Robert Wambaugh, Pennsylvania State University ................................................................. 33

Moving Stand-Alone Courseware into a Managed System
Paul Wieser and Eileen Wilkie, MECC .................................................................................. 33

Special Interest Group for Emerging Technologies (SIGET)

The Effects of Access to Simultaneous Integrated Information Systems on Learning
Ruth Curtis and Barbara L. Grabowski, Syracuse University ..................................................... 36

SNOWMAN: A System for Knowledge Management
John M. Ford and Larry E. Wood, Brigham Young University .................................................. 37

Adding a Hypermedia Interface and Help System to an Expert System Advisor
R. Scott Grabinger and David H. Jonassen, University of Colorado at Denver .......................... 37

Emerging Technologies and Learning Environments: From Instruction to Learner Centered Models
Michael J. Hannafin and James Gall, Florida State University .................................................. 38

Integrating Hypermedia and Knowledge-Based System Technologies for
Training and Information Dissemination
Francis A. Harvey, Lehigh University ...................................................................................... 39

New Directions in Human Factors for Interface Design
Hueyching Janice Jih and William H. Wheeler, Jr., University of Georgia ............................... 39

The Physics Tutor: Building an Intelligent Tutor from Hypertext and Expert Systems
David H. Jonassen and Sherwood Wang, University of Colorado ............................................. 40

Desktop Presentations: Tips for Using HyperCard as a Presentation Tool
Annette Lamb, University of Toledo .......................................................................................... 41

Integrated Performance Support Systems
Kathleen Long, Jan Hermanns, and Clarence J. Ross, Anderson Consulting ............................ 42

Formal Initial Steps in the Development of Expert Systems CourseWare
Brother Matthew Michelini, Manhattan College ........................................................................ 42

Special Interest Group for Education of the Handicapped (SIGHAN)

Networks for Learning in Groups: Results with High-Risk High Schoolers
Steven L. Robinson, Wilder Research Center .......................................................................... 44

Special Education Technology Resource Center: A Report on the Use of CBI to Train Special Educators
Marshall G. Jones, Gary E. Ross, and John Langone, University of Georgia ........................... 44

Special Interest Group for Health Education (SIGHEALTH)

Emulated Oral Examinations: Experiences and Projections
Michael Anbar and Ada Anbar, State University of New York at Buffalo .............................. 46

NutriSmart: An Intelligent Nutrition Analyst and Advisor for Health Care Professionals
Wm. J. Fetter and Saroj M. Bahl, University of Texas, Health Science Center ............................ 46
Anaerobe Detective: An Intelligent Simulation Adventure Game
Wm. J. Fetter, Paul G. Engelkirk, Janet Engelkirk, University of Texas Health Science Center ...................... 47

Pediatric Resident Satisfaction with Natural Language Interface in a Computer Simulation
Michael Foulds and Janise Richards, University of Texas Health Science Center .................................................. 47

Student Attitudes Towards CAI in Gross Anatomy
Anthony J. Frisby, Ohio State University .................................. 48

Design Considerations and Subject Matter Expert Interaction for Developing IVD/CBT Simulations
Tessie Hernandez and Jo Ann Crystal, JWK International, Inc ................................................................. 48

Using CAI and IVD Applications to Design Non-Traditional Teaching/Learning Strategies for Use in a Nursing Curriculum
Mary R. Price, Hunter-Bellevue School of Nursing .................................. 49

Evaluating Health Science Interactive Video Courseware: Instructional Criteria
James P. Randall, Widener University ................................ 50

Defibrillation Simulation
John A. Stewart, Health Science Consortium ................................ 50

Special Interest Group for Home Economics Education (SIGHOMECE)

A Wrinkle in Time: Or Using CAD as a Tool in the Design of Apparel Based on Historic Time Periods
Diane Davis, Valparaiso University ............................................ 52

Computerizing Fashion Merchandizing
Nina J. Dilbeck, California State University, Fresno ................................................... 52

The Design of a Database for an Historic Costume Collection Catalog
Frances W. Mayhew, University of Delaware at Newark ......................... 53

Customizing CAD Software for Apparel Design and Production
Phyllis Bell Miller, Mississippi State University .............................. 53

Computer Applications in the Field of Home Economics and Design
Susan Winchip, Illinois State University ........................................ 54

Special Interest Group for HyperMedia Education (SIGHYPER)

An Expert Systems Approach to HyperMedia
Mark Chignell, University of Southern California ........................................ 56

Using Linkway in the Design of Concept Lessons
Gayle V. Davidson, Deb Dorman, and Paul Fayfich, The University of Texas at Austin .............................. 56

Designing Hypermedia Training Materials to Optimize Learning
Francis A. Harvey, Lehigh University ........................................... 57

Disappearing Ducks: Problem Solving Using Hypertext
Beth Huning, Richardson Bay Audubon Center & Sanctuary ................. 57

Collaborative Annotation of a Hyperbook on Hypermedia Design
David H. Jonassen and Sherwood Wang, University of Colorado at Denver .............................. 58

Selecting Media for Use in Educational HyperMedia Applications
David C. Klugh and Francis A. Harvey, Lehigh University ............... 58
Expanding Pedagogical Horizons with a Hypermedia Classroom Presentation System
Michael A. Kolitsky, California Lutheran University ............................................. 59

Hyperties®: A HyperMedia Authoring Tool
Charles Kreitzberg, Cognetics Corporation; and Janis Marariu, University of Maryland .......................................................... 59

Information Exploration-Based Instruction: Guidelines for HyperCard Stack Development
Annette Lamb, University of Toledo ........................................................................ 60

The Word Learner
Henryk R. Marcinkiewicz, Pennsylvania State University ........................................... 60

Design of HyperText: The Effects of User Control and Practice
Diane McGrath, Kansas State University ...................................................................... 61

HyperCard Design and Field Dominance of the Designer
Hilary McLellan, Kansas State University ..................................................................... 61

Starting from Scratch: HyperMedia in the Classroom
Louis Molinari and Lynne Levy, Glassboro State College ........................................... 62

Interaction Instruction Development using PC ToolBox
Claude Ostyn, Asymetrix Corporation .......................................................................... 62

The HyperCard and QUEST Authoring Environments: Two Approaches to CBI Courseware Development for the "Novice"
Steve Purcell .................................................................................................................. 63

The Evolution of a HyperCard Stack: Negotiating Spanish Weeds
Lawrence C. Ragan, Pennsylvania State University ..................................................... 63

A PODIUM for Teaching Philosophy
Donald Scherer, Bowling Green State University ......................................................... 64

Hypermedia, Critical Thinking, and Diagnostic Simulations in the Health Sciences: A Development Model
Elwin R. Tilson, Armstrong State College ...................................................................... 64

Special Interest Group for Interactive Video and Audio (SIGIVA)

Platform Independent Authoring and Delivery of Interactive Multimedia
Michael W. Allen, Authorware ...................................................................................... 66

You've Got a Friend in the Interactive Business: Programming the Amiga for Interactive Video
J. Wesley Baker, Cedarville College ............................................................................. 66

Translating and Repurposing Videodiscs: The Development Process in Taiwan
Jiin-Tian Chyou, Tamkang University; and Bor-Nian Chang, ISTEC .......................... 67

The Application of Formal Design Theories to the Production of Video/CBI Instructional Systems
Charles R. Dills and Alexander Romiszowski, Syracuse University ............................. 68

Steps for Developing Award Winning Interactive Video Scripts
Deidre Emery and Steven Holder, Southwestern Cable .............................................. 69

Health Physics Technician Computer-Based Training
Kay Houghton and Lois Spangenberg, Los Alamos National Laboratory ..................... 69
IVD/CAI for the Teaching of Intermediate Level Language  
Anita M. Knisbacher, US Department of Defense ................................................................. 70

Design, Production, and Use of a Vertebrate Embryology Videodisc  
Michael A. Kolitsky, California Lutheran University ............................................................ 70

Developing Multimedia Training Tools  
Helen B. Miller and Andy McGuire, Clemson University ....................................................... 71

Videodisc-Based Health Promotion: Education Plus Motivation in Smoking Cessation  
John Noell, Anthony Biglan, and Don Hood, Oregon Research Institute .............................. 71

Ensuring Instructional Soundness Through Sound Evaluation  
William W. Lee and Kenneth H. Roadman ............................................................................. 72

An Instructional Design Model for the Design and Development of Interactive Videodisc Projects  
William D. Milheim and Harold J. Bailey, Bloomsburg University ........................................ 72

A Videodisc for the Teaching of French Language and Culture  
Donna Mydlarski, The University of Calgary ......................................................................... 73

Effects of Variations in Lesson Control on Children's Curiosity and Learning About Art From Interactive Video  
Marilyn Johnstone Plavocos, Syracuse University ................................................................. 74

Results of the Field Test Evaluation of an Interactive Videodisc Science Curriculum with a Focus on Student and Teacher Perceptions and Implementation  
Wilhelmina C. Savenye, The University of Texas at Austin .................................................. 74

Teaching Interactive Video Design and Development: Methods and Models  
Wilhelmina C. Savenye, The University of Texas at Austin .................................................. 75

Individualizing Interactive Videodisc Instruction  
Karen Tichy, Illinois Institute of Technology ............................................................................ 75

Evaluation of a Labor and Delivery Videodisc Simulation  
Elizabeth E. Weiner, Barbara Gilman, and Jeffry Gordon, University of Cincinnati ............... 76

Students as Producers: A Multi-Media Project for Middle School Mathematics, Science, and Social Studies  
Michael Young, University of Connecticut; and William Corbin and Susan Williams, Vanderbilt University 76

Special Interest Group for Management Issues (SIGMI)

An Experiential Framework for Evaluating Simulations  
Wayne Anderson, JWK International ....................................................................................... 77

Teamwork: Group Development of CBT  
Kay Bonham and Karen Droms, Goal Systems International ................................................. 77

Outgrowing the Cottage: Developing Computer-Based Training on a Large Scale  
Robert C. Fratini, AT&T National Product Training Center .................................................. 78

Development and Implementation of a Computer-Based Data Management System for Novice Computer Users  
Francis Hensley, University of Georgia; and Chris Peters, Clemson University ..................... 78

Managing Conflict in CBT Projects  
James R. Hutton, J.R. Hutton & Associates ......................................................................... 79
Case Materials for Management Training
Frederick G. Knirk, University of Southern California; and DeLaynne Hudspeth, University of Texas at Austin

The Cost of NOT Training with Computers
Frederick G. Knirk and Mary Pinola-Kenny, University of Southern California

The Role of the Subject Matter Expert in the Development of CBT
Henry H. McCaslin, Jr. and Patricia M. Boord, FBI Academy

Evaluating Training and Development Personnel: Methods, Levels, and Pitfalls
William H. Wheeler, Jr., The University of Georgia

Special Interest Group for Music Education (SIGMUSIC)

Development of a Computer-Based College Pitch Matching Test
Ioanna E. Etmektsoglou, University of Illinois-Urbana-Champaign

The Use of Interactive Videodisc in Acquiring Music Teaching Competencies
Mary A. Leglar and Robert W. Placek, The University of Georgia

MusicAT: An Adaptive Testing Program to Assess Musical Ability
Walter P. Vispoel, Don Coffman, and Dawn Scriven, The University of Iowa

Using CD-ROM and CBT to Develop Listening Skills
Ernest Woodruff and Phillip Heeler, Northwest Missouri State University

Special Interest Group for PILOT (SIGPILOT)

Integrating PC-PILOT with Expert Systems: Graphics, Editing, and Consultation
Ping-Cheng Chao, University of Georgia

Simulating Dynamic ECG Tracings with PC/Pilot
John A. Stewart, HealthWare Corporation

Creating a Structured PILOT CAI Lesson
Marianne E. Yoder, Northern Arizona University

Special Interest Group PLATO Users’ Group (SIGPUG)

Lessons Learned in Applying NovaNET to Alternative Education (Basic Skills Deficient and Dropout Students)
A. Sidney Alpert, University Communications, Inc.

Innovations in Trans-TUTOR
Richard W. Blomme

How to Deliver Independent Study (Correspondence) Courses via NovaNET
Bruce A. Cameron

NovaNET Showcase
Celia Kraatz, University of Illinois

Special Interest Group for Theory and Research (SIGTAR)

Designing the User Interface as Genre: Restricting Context for Meaning and Behavior
Terence C. Ahern and Jamie Myers, The Pennsylvania State University

Using CAI to Increase Flexibility in Problem-Solving
Terence C. Ahern and Fernando Senior, The Pennsylvania State University

Selected Formal Papers

Special Interest Group for Academic Computing (SIGAC)

Network Technology: Its Implications Toward Education and Its Implementation
Blair R. Bernhardt, Lehigh University; and Denise LePage, Muhlenberg College..............................124

Special Interest Group for Computer-Based Training (SIGCBT)

Computer-Based Training Among Top American Banks
Harold F. Rahmlow, Rahmlow Associates; and Pamela S. Wolf, Automated Financial Systems..............128

The "At-Risk" Adult Learner: Definition and Solutions
Jennifer G. Rudd, EG&G..................................................135

Choosing Options for Instructional Design Tools
Sherwood Wang, University of Colorado; Dana Wunderlich and P. Duchastel, McAir Corp......................141

Special Interest Group for Elementary, Secondary, and Junior College Educators (SIGELSECJC)

Toward a Model Program of University-Secondary School Integration Enhanced Mathematics Instruction Through Computer Integration: The First Two Years
M. Peter Jurkat, Stevens Institute of Technology ..................................................................................146

Implementing an On-Line Information "Knowledge Network" in Multi-Site Locations
James M. King and Mary Ann Hindes, The University of Georgia..........................................................151

The Emergence of The Educational Technologist: A Standard for Certification
Jamie J. Kline, Lehigh University..............................................................................................................157

Special Interest Group for Emerging Technologies (SIGET)

Using Expert Systems Approaches to Solve Media Selection Problems
Ping-Cheng Chao, University of Georgia..................................................................................................168

The Instructional Developer, Expert Systems, and the Front-End Process
Charles R. Dills and Alexander Romiszowski, Syracuse University..........................................................175

Creating Highly Interactive Lesson Material or Learning by Doing
Gerd Holweg and Friedrich Huber, IICM Graz University........................................................................184

QTA: An Electronic Tool for Job/Task Analysis
Kay Houghton and Jay Fries, Los Alamos National Laboratory.................................................................192

Machine-Readable Courseware Modules for Introducing Expert Systems
Larry Press, California State University, Dominguez Hills........................................................................199

Special Interest Group for Health Education (SIGHEALTH)

The Use of Course of Action to Develop Five Units of Instruction in a Cardiovascular Systems Course
Richard S. Hannah and Peter H. Harasym, University of Calgary............................................................206

An Interactive Video for Teaching Surgical Skills
Richard S. Trynda, University of Colorado Health Sciences Center ......................................................210
Special Interest Group for Home Economics (SIGHOMEC)

Using Computer Spreadsheets for Instruction in Cost Control Curriculum at the Undergraduate Level
James Buergermeister, University of Wisconsin, Stout ..............................................................214

Comparison of Training Received and Difficulties Encountered
During Computer Conferencing by Undergraduates in Consumer Economics
James L. Morrison, University of Delaware; and Pamela P Morrison, Goldey Beacom College .........221

Home Economics Teacher Educators' Perceptions of Computer Competence
Cecilia Thompson, Dale E. Thompson, and Lori Shimoura, University of Arkansas .........................224

Special Interest Group for HyperMedia (SIGHYPYER)

Programming Techniques for Interactive Concept Development in HyperCard
James Baggott and Sharon Dennis, Hahnemann University ..............................................................230

Hypermedia for Education
Ann Barron and Donna Baumbach, University of Central Florida ..................................................246

Design Techniques for Ensuring Structure and Flexibility in a Hypermedia Environment
Sharron J. Love, Chris M. Chapman, Jocelyn D. Ten Haken, The University of Michigan Medical School ...252

Teachers as HyperCard Authors: What Can They Do?
Carolyn Rude-Parkins, University of Louisville; and Marjorie Maynard, Jefferson County Public Schools ...261

Structuring Knowledge for Hypertext-Type Information Access
Doris Smith Shaw, US Army Construction Engineering Research Laboratory ......................................266

Special Interest Group for Interactive Video and Audio (SIGIVA)

Prototyping Interactive Exhibits for Museums: A Case Study
Brockenbrough S. Allen and Nanette Sterman, San Diego State University ........................................273

The User Interface in Interactive Systems
Greg Baur, Western Kentucky University ......................................................286

Adding Research Tools to Computer-Based Video Instruction Programs
Mary R. Hassett, Fort Hays State University .................................................................289

Are Instructional Organizers Effective When Used in Computer-Based Interactive Video?
Richard F. Kenny, Syracuse University .................................................................294

DVI: What MultiMedia Developers Think About It
Steve Lidard and Deborah Hix, Virginia Tech .................................................................305

Management Activities for Interactive Videodisc Projects
Hueyching Janice Jih, University of Georgia .................................................................310

Using an Expert System Shell as an Authoring Tool for Interactive Videodisc Applications
D.V. Pigford, Western Kentucky University .................................................................314

Special Interest Group for Management Issues (SIGMI)

Identifying Resistance to Computer-Based Training
John C. LeDou, FBI Academy .................................................................320
Special Interest Group for Music Education (SIGMUSIC)

Creating Adaptive Tests of Musical Ability with Limited-Size Item Pools
Walter P. Vispoel and Jon S. Twing, The University of Iowa ................................................................. 326

Special Interest Group for PILOT (SIGPILOT)

Using Utah PILOT to Construct a CAI Program to Replace the General Library Tour: An Experimental Study
V. Lonnie Lawson, Central Missouri State University ..................................................................................... 332

Special Interest Group for Theory and Research (SIGTAR)

Computer Anxiety Among Teachers in Computer Literacy Courses: Report of a Research Study
Marcia B. Cushall and Francis A. Harvey, Lehigh University ........................................................................ 336

Instructional Groupware: Design Considerations
Norman R. Dodl, Virginia Tech; and Diane T. Thompson, Emory and Henry College .................................. 344

The Effective Use of the CAI Drill Designs on Students with Different Learning Styles
Jon-Chao Hong, National Taiwan Normal University ....................................................................................... 353

Creative Approaches to Knowledge Transfer
Cynthia B. Leshin ........................................................................................................................................... 357

Do Icons Improve a User Interface?
Carol B. MacKnight, University of Massachusetts ....................................................................................... 362

Microcomputer-Based Instructional Simulation for Training Research
Joseph S. Mattoon and Richard A. Thurman, Air Force Human Resources Laboratory ............................... 366

Effects of Adjunct Questions on Learning from Hypertext
Wayne A. Nelson, Southern Illinois University at Edwardsville ................................................................. 369

The Evaluation of Intelligent Tutoring Systems: A Plan and an Example
Michael A. Orey, University of Georgia .......................................................................................................... 373

How to Apply Intelligent Tutoring Principles to the Design of Computer-Based Instruction
Michael A. Orey, University of Georgia .......................................................................................................... 377

Computer Modeling: A Research Tool for Computer-Based Instruction
Thomas C. Reeves, University of Georgia ........................................................................................................ 383

Theoretical Foundations of Instructional Applications of Computer-Generated Animated Visuals
Lloyd P. Rieber, Texas A&M University .......................................................................................................... 383

Method and Frequency of Drill and Practice in Acquisition of Declarative Knowledge Using a Computer-Based Drill
S. Del Marie Rysavy, University of Minnesota ............................................................................................... 396

The Interplay of Interactivity and Motivation in Educational Software
Daniel Schwartz and Jeanne Buckley, Columbia University ......................................................................... 388

Techniques and Procedures for the Transparent Automatic Collection of Data for Hypermedia-Based Research
William B. Story, Jr. and Francis A. Harvey, Lehigh University ................................................................... 393
Management Development Training and Learning Styles:
An Evaluation of the Applicability of Multimedia Instruction
James B. Wells, Benjamin H. Layne, Georgia State University; and Derek Allen, Georgia Department of Corrections ................................................................. 396

Special Interest Group for Telecommunications (SIGTELE)

The Use of Telecommunications Technologies in Learning Environments: Present and Future
Greg Baur, Western Kentucky University .......................................................................................... 406

An Interactive Telecommunication Network to Support Educators:
A Preliminary Report on the VEIN Project
Barbara T. Hakes and Landra L. Rezabek, University of Wyoming .............................................. 409

Teaching Telecommunications: Promoting Practice and Potential
Landra L. Rezabek and Barbara T. Hakes, University of Wyoming .................................................. 413

Computer Mediated Communication: A Hypertext Approach to Structuring Distance Seminars
Alexander Romiszowski, Karen Jost, and E-Cheol Chang, Syracuse University ............................... 419

Enhancing Future Educators for Integrated Distance Education Workstations
Farhad Saba, San Diego State University ........................................................................................... 435
