Natural Draught Cooling Towers

Proceedings of the 2. International Symposium
Ruhr-Universität Bochum, Germany,
September 5-7, 1984

Editors:
P. L. Gould, W. B. Krätzig, I. Mungan,
and U. Wittek

With 333 Figures
IMPULSES OF THE RESEARCH ON THE DEVELOPMENT OF LARGE COOLING TOWERS
W. Zerna - Bochum ................................................. 1

RECENT STRUCTURAL DEVELOPMENTS

RING-STIFFENED SHELL CONSTRUCTIONS - A STRUCTURAL ALTERNATIVE OR A TECHNICAL AND ECONOMICAL NECESSITY?
H.L. Peters - Herne .................................................. 21

LARGE RETICULATED STEEL COOLING TOWERS
L. Kollár - Budapest ............................................... 39

DESIGN AND CONSTRUCTION OF COOLING TOWERS - RECENT DEVELOPMENTS - CONSTRUCTIONAL PROBLEMS
H. Damjakob - Ratingen .......................................... 51

IMPROVEMENT OF THE STRUCTURAL BEHAVIOR OF COOLING TOWER SHELLS BY RING-STIFFENERS
U. Eckstein, C. Eller, R. Harte, Z. Sanal, W.B. Krätzig - Bochum
U. Wittek - Kaiserslautern ....................................... 61

REVIEW AND FEEDBACK OF EXPERIENCE GAINED OVER THE LAST FIFTY YEARS IN DESIGN AND CONSTRUCTION OF NATURAL DRAUGHT COOLING TOWERS
P.B. Bosman - Ashford .............................................. 77

THE RING-STIFFENED SHELL OF THE NATURAL DRAFT COOLING TOWER OF THE ISAR II NUCLEAR POWER PLANT
J. Form - Herne ...................................................... 90

A NEW TYPE OF COOLING TOWER WITH VERTICAL COLUMNS DISCONNECTED FROM SHELL DESIGNED AND BUILT IN FRANCE
R. Bordet, L. Caudron, M. Diver, Y. Grovalet - Paris ...... 110
WIND LOADING

RELIABILITY OF CURRENT DESIGN METHODS FOR WIND-INDUCED STRESSES

H.-J. Niemann - Bochum ............................................. 119

WIND LOADING OF HYPERBOLIC COOLING TOWERS WITHOUT MERIDONAL RIBS

L. Wenda - Shanghai
Z. Liangmao, J. Minzhong - Xian ............................... 136

WIND EFFECTS ON HIGH COOLING TOWERS
(abstract)

M. Robert - Paris .................................................. 155

A DISCUSSION OF THE TREATMENT OF WIND LOADING IN NATURAL DRAUGHT COOLING TOWERS WITH SPECIAL REFERENCE TO RELIABILITY AND SIMPLIFIED DYNAMIC FACTORS
(abstract)

A.G. Davenport, N. Isyumov - London, Ontario .............. 156

DYNAMICS

SEISMIC ANALYSIS OF COOLING TOWERS

J.P. Wolf - Zürich .................................................. 159

SEISMIC RESPONSE OF COOLING TOWERS ON INTERACTIVE SHALLOW OR DEEP FOUNDATIONS

B.J. Lee - Tulsa
P.L. Gould - St. Louis ............................................. 177

ANALYSIS OF COOLING TOWERS DUE TO HORIZONTAL INCIDENT EARTHQUAKE MOTIONS PROPAGATING VERTICALLY FROM BASE ROCK

S. Kato, M. Hirota - Kawasaki
P.L. Gould - St. Louis ............................................. 188

THE EARTHQUAKE DESIGN OF REINFORCED CONCRETE NATURAL DRAUGHT COOLING TOWERS
(abstract)

H. Tottenham - Romsey ........................................... 198
THE FREE VIBRATION ANALYSIS OF THE THIN, ELASTIC HYPERBOLOIDAL SHELL BY THE ANALYTICAL-NUMERICAL METHODS

Z. Jamicki - Gliwice ........................................ 199

THE FINITE ELEMENT SOLUTION AND MODEL TESTS OF FREE VIBRATION OF HYPERBOLIC COOLING TOWER

L. Wenda - Shanghai
C. Yuzhuo, P. Jingxin, W. Yangqi - Xian ....................... 211

STABILITY AND NONLINEAR BEHAVIOR

THE PROBLEM OF KINETIC INSTABILITIES IN THE NATURAL WIND - THEORETICAL AND NUMERICAL INVESTIGATIONS

S. Spierig, E. Stein - Hannover ............................... 229

BUCKLING OF REINFORCED CONCRETE COOLING TOWER SHELLS

E. Dulácska - Budapest ........................................ 239

ON THE VALIDITY OF REINFORCED CONCRETE MODELS OF COOLING TOWER SHELLS

S.E. Swartz, A. Nikaeen, H. Mozaffarian - Manhattan ...... 254

GEOMETRIC IMPERFECTIONS AND BUCKLING IN COOLING TOWER SHELLS

S. Kato - Toyohashi
A. Miyamura, M. Murata - Tempaku Nagoya ..................... 264

PHYSICALLY LINEAR BUCKLING ANALYSIS OF REINFORCED CONCRETE COOLING TOWERS - DESIGN NECESSITY OR ACADEMIC EXERCISE?

H. A. Mang, F. Trappel - Wien ................................ 279

NONLINEAR BEHAVIOR OF COOLING TOWER SHELLS

I. Mungan, J. Ruhwedel, M. Winter - Bochum .................. 298

COMPARISON OF COMPLETE AND SIMPLIFIED ELASTIC BUCKLING LOADS FOR COOLING TOWER SHELLS

J.F. Abel, S.-C. Chang, S.L. Hanna - Ithaca .................... 309
THE EFFECT OF CRACKING ON THE ULTIMATE LOAD OF REINFORCED CONCRETE COOLING TOWERS

R. V. Milford - Pretoria
W.C. Schnobrich - Illinois ........................................... 319

NONLINEAR ELASTIC STABILITY OF COOLING TOWER SHELLS

U. Eckstein, R. Harte, W.B. Kräzig - Bochum
U. Wittek - Kaiserslautern ................................. 333

DESIGN SPECIFICATION OF TOLERANCES FOR GEOMETRIC IMPERFECTIONS IN CONCRETE COOLING TOWERS

(a)bstract)

C.P. Ellinas - London .................................................. 348

STRUCTURAL BEHAVIOR AND SPECIAL PROBLEMS

TWO DECADES OF COOLING TOWER DESIGN IN THE UNITED STATES OF AMERICA

D.P. Billington - Princeton ............................................. 351

EXTREME LOADING EFFECTS ON COOLING TOWERS

H.-D. Köpper - Bochum ................................................ 362

REPAIR OF COOLING TOWERS

R.J. Krapfenbauer - Wien .............................................. 374

THE EFFECT OF UNEQUAL SETTLEMENT OF FOUNDATION ON THE STRESS RESULTANTS OF HYPERBOLIC COOLING TOWERS AND THE UNEQUAL SETTLEMENT TOLERANCE LIMIT

L. Wenda - Shanghai
L. Baqing - Xian
L. Renyi - Beijing ............................................. 381

ANALYSIS OF HYPERBOLIC COOLING TOWERS WITH LOCAL IMPERFECTIONS

P.L. Gould - St. Louis
K.J. Han, G.S. Tong - Houston .............................. 397
A STUDY OF THE EFFECT OF GEOMETRIC IMPERFECTION ON THE HYPERBOLIC COOLING TOWER SHELLS

(abstract)

P.S. Rao, P.K. Aravindan, B.S. Srinivas - Madras
M.A. Mata - New Delhi ............................................. 412

OPTIMIZATION OF LARGE COOLING TOWERS

K.T. Alowooja, P.L. Gould - St. Louis
I. Furzer - Sydney ................................................. 413

A NEW LOOK AT THE ULTIMATE BEHAVIOR OF HYPERBOLIC COOLING TOWERS

(abstract)

A.K. Gupta - Raleigh .............................................. 430

STRESS ANALYSIS

STRESS ANALYSIS OF COOLING TOWERS WITH RIBS AND DISCRETE SUPPORTS USING F.E.M.

D. Wang, J.Chen, D. Ju - Beijing ................................ 433

ECONOMICAL CALCULATION FOR THE OPTIMAL DESIGN OF GENERAL SHELLS OF REVOLUTION FOR NATURAL-DRAFT COOLING TOWERS BY MEANS OF MEMBRANE THEORY

W. Krings - Herne .................................................. 440

CURRENT DEVELOPMENTS IN THE COOLING TOWER ANALYSIS AT PURDUE UNIVERSITY

T.Y. Yang, S. Saigal,
R.K. Kapania - West Lafayette ................................. 456

AN EVALUATION METHOD OF LOAD COMBINATION OF WINDSTORM AND LOW ATMOSPHERIC TEMPERATURE ON COOLING TOWERS

H. Weimou - Beijing ................................................ 466

ANALYSIS OF COOLING TOWERS BY A NUMERICAL INTEGRATION METHOD

J.E. Goldberg - West Lafayette
D.V. Pathak - Ann Arbor ......................................... 474
DURABILITY

LONG TIME MEASUREMENTS OF THE EFFECTS OF WATER AND TEMPERATURE ON COOLING TOWERS

U. Stoffregen - Essen .................................................. 487

DURABILITY OF THE INNER SURFACE OF COOLING TOWER SHELLS

O. Lehmkämper - Essen ................................................ 501

LONG TERM DETERIORATION OF CONCRETE COOLING TOWERS
(abstract)

J.G.A. Croll - London .................................................. 513

SPECIAL SYSTEMS FOR TREATMENT OF FRESH CONCRETE SURFACES COMBINED WITH LONG TERM PROTECTION

F.M. Depke - Bottrop .................................................. 514

PHYSICAL, CHEMICAL AND MICROBIOLOGICAL INFLUENCES OF THE ENVIRONMENT ON THIN COOLING TOWER SHELLS

W. Stiller - Düsseldorf ................................................ 524

AERODYNAMIC ASPECTS OF THE INFLOW PROBLEM OF FLUE GASES INTO THE COOLING TOWER

H. Ruscheweyh - Aachen .............................................. 540
