ZINC COATED STEEL SHEET

EDITED PROCEEDINGS:
THIRD INTERNATIONAL CONFERENCE ON
ZINC COATED STEEL SHEET
BARCELONA, 7 & 8 JUNE 1991
Contents

Current situation and prospects for coated products in the Spanish market:
N Uribarri Madariaga (Spain) SA/1

SESSION 1: ZINC AND ZINC ALLOY COATINGS

Galvalume sheet: its production, properties and applications:
S A Kriner (USA) and K Niederstein (Germany) S1A/1

Aluzink DQ and HSLA grades - properties and applications:
U Bergström and B Svensson (Sweden) S1B/1

Application of zinc-5% aluminium coatings on inside and outside surfaces of tubes:
E V Proskurkin and I E Mytnikov, A F Shulezhko and O G Baranets (Russia) S1C/1

Galfan solidification control and associated effects on coating quality and microstructure:
M Lamberigts and V Leroy (Belgium); F E Goodwin (USA) S1D/1

Corrosion resistance and ductility: extent and origins of the advantage of Galfan over classical galvanizing:
M Lamberigts and V Leroy (Belgium); F E Goodwin (USA) S1D/7

Comparative study on the cathodic protection applied to steel by hot dip coatings:
P Tierra, M Bernal, P Molera and L Fernandez (Spain) S1E/1

Zinc-nickel alloy electroplated steel sheet - production and properties:
M Pimminger, F M Androsch and S Wiesinger (Austria) S1F/1

Coating developments in Japan:
Y Uchida (Japan) S1G/1

SESSION 2: ORGANIC AND COMPOSITE COATINGS

Trends in organic coated steel sheet:
R A Simcock and A J Robinson (Australia) S2A/1

Phosphated polymer and related treatments on zinc and zinc alloy coatings:
J Brugarolas and F Rodellas (Spain) S2B/1

Multisheet laminate: composite of steel sheet and zinc matrix - preliminary results:
A J Vazquez and J J de Damboirenea (Spain) S2C/1

Dispersion coatings in Japan:
H Kimura (Japan) S2D/1

The coil coating industry - current status and future opportunities:
F D Graziano (USA) S2E/1
SESSION 3: CORROSION TESTING AND PERFORMANCE

Field exposure and outdoor scab-testing of different precoated sheet steels:
E Johansson and B Rendahl (Sweden) S3A/1

ECCA - Eurodes:
P J Franck (Belgium) S3B/1

Exterior corrosion tests for the automotive industry:
T J Goodwin, J S Isaac and T Parsons (UK) S3C/1

Results of a new cyclic corrosion test for automotive steel products, based upon micro-climate measurement in running vehicles:
F Blekkenhorst, E Nagel Soepenberg and J P Schoen (The Netherlands) S3D/1

SESSION 4: TECHNICAL DEVELOPMENTS INCLUDING RECYCLING

Developments in zinc and zinc alloy coated steel:
D Coutsouradis (Belgium) S4A/1

Equipment and process development for production of DDQ grade HDG steel sheets:
N Azzerri and M Riccio (Italy) S4B/1

Hot dip galvanizing of steel strip using a closed loop to control the coating thickness:
V Iliev, S Gavriloski, T Dimovski, J Josifovski, A Panov and B Nadzinski (Yugoslavia) S4C/1

The management of continuous galvanizing baths with emphasis on aluminium:
H Guttman, S Bélisle and M Gagné (Canada) S4D/1

Reactivity of synthetic titanium interstitial-free steel in the liquid zinc bath:
A Aubry and B Vialette (France) S4E/1

Zinc bath control and coated strip surface improvement via bath/strip cooling technology:
P Sippola (Germany) and R F Lynch (USA) S4F/1

Improvement of coating adhesion of hot dip galvanized sheet steels:
J S Kim, D C Bae and Y G Jin (Korea) S4G/1

Experiments on deformation and surface appearance characteristics of Galfan-coated sheet steel:
S Mathieu (France), F E Goodwin (USA) and M Lamberigts (Belgium) S4H/1

Crack initiation and propagation in hot dip galvannealed steel sheet during bending:
K M Goggins and A R Marder (USA) S4I/1

Quantitative assessment of coating damage during forming of hot dip galvanized steel sheets:
D Laverde Catano, J Fernandez Diaz, J Gil Sevillano, E Villaneuva Arnaiz, P Goicoechea Aguirreche and J I Larburo Ereno (Spain) S4J/1
Texture development in hot dip coatings on galvanized sheet steel:
J A Spittle and S G R Brown (UK)  S4K/1

Recycling of zinc coated scrap:
A de la Cuadra (Spain)  S4L/1

SESSION 5: THE VEHICLE INDUSTRY

An up-dated overview of continuous sheet galvanizing in Western Europe:
B Meuthen and E A Friedrich (Germany)  S5/1

Corrosion - general report: Sollac's answers:
B Bramaud (France)  S5A/1

Hot dip galvanized and galvannealed sheet - new products for the automotive industry:
H Klotzki and R Bode (Germany)  S5B/1

Development of hot dip galvanized formable steel for the automobile industry:
C Alonso, B Fernandez, M A Fernandez and A Lopez (Spain)  S5C/1

Solutions in Spain for the supply of coated products to the motor car industry:
J Ramon Arechaga (Spain)  S5D/1

Japanese developments with coated steel in the automotive industry:
T Adaniya (Japan)  S5E/1

Coated steel in the automotive industry:
H Teulon (France)  S5F/1

SESSION 6: THE APPLIANCE INDUSTRY

Zinc and zinc alloy steels and prepainted appliances:
A Lindgren (Sweden)  S6A/1

Prepainted Galfan for domestic appliances:
C Filthaut and M Klinge (Germany)  S6B/1

The application of prefinished steel in domestic appliances:
R B Messham (UK)  S6C/1

SESSION 7: THE BUILDING AND CONSTRUCTION INDUSTRY

Prepainted galvanized products in building construction:
Y Donan (France)  S7A/1

Worldwide field performance of prepainted Galvalume:
S A Kriner (USA)  S7B/1

Field performance of 55%-aluminium-zinc coated sheet, bare and prepainted:
J Lamesch (Luxembourg)  S7C/1

Application of Galfan-coated steel in buildings:
F E Goodwin and A B Celestin (USA)  S7D/1

CONCLUSION:

Future of coated sheet:
A Matthews (UK)  S8/1
